Of one and two-year notes	3,700	00
Of old demand notes	495	00
	73, 968, 087	41

The amount due the sinking-fund for this year was \$37,931,643 55. There was applied thereto, from the redemption of bonds and fractional currency, as shown in the above statement, the sum of \$73,904,617 41, an excess of \$35,972,973 86 over the amount actually required for the year.

The requirements of the sinking-fund law have been substantially observed, and the principal of the public debt, less cash in the Treasury and exclusive of accruing interest, has been reduced from \$2,756,431,571 43, its highest point, which it reached on August 31, 1865, to \$1,890,025,740 89, on November 1, 1880—a reduction of \$866,405,830 54.

Compared with the previous fiscal year, the receipts for 1880 have increased \$62,629,438 23, in the following items: In customs revenue, \$49,272,016 90; in internal revenue, \$10,447,763 34; in sales of public lands, \$91,725 54; in tax on circulation and deposits of national banks, \$267,471 12; in proceeds of sales of Government property, \$101,487 69;

in consular fees, \$142,551 32; in custom-house fees, \$92,403 63; in steamboat fees, \$12,063 39; in marine-hospital tax, \$27,183 29; in interest on Indian trust-funds, \$640,901 59; in sales of Indian lands, \$272,883 54; in deposits by individuals for surveying public lands, \$380,062 33; and in miscellaneous items, \$880,924 55. There was a decrease of \$2,930,011 71, as follows: In premium on loans, \$1,496,943 25; in repayment of interest by Pacific Railway Companies, \$999,833 85; in profits on coinage, \$132,751 89; in premium on sales of coin, \$8,104 38; in customs fines, penalties, and forfeitures, \$39,726 78; in customs emolument fees, \$4,748 35; and in unenumerated items, \$247,903 21—making a net increase in the receipts, from all sources, for the year, of \$59,699,426 52.

The expenditures show an increase over the previous year of \$25,190,360 48, as follows: In the Interior Department, \$22,395,040 06; (Indians, \$739,348 01; and pensions, \$21,655,692 05;) in premium on bonds purchased, \$2,795,320 42. There was a decrease of \$24,495,286 23, as follows: In the War Department, \$2,308,744 51; in the Navy Department, \$1,588,142 10; in the interest on public debt, \$9,570,373 89; and in the civil and miscellaneous, \$11,028,025 73—making a net increase in the expenditures, for the year, of \$695,074 25.

FISCAL YEAR 1881.

For the present fiscal year the revenue, actual and estimated, is as follows:

Or nearly the same amount as the balance of estimated receipts over the estimated expenditures, as shown above. Thus it is probable that there can be applied to the purchase of bonds for the sinking-fund during the present fiscal year an amount sufficient to cover the whole deficiency now existing on the account of that fund, thus making good the whole amount of the sinking-fund as required by law.

FISCAL YEAR 1882.

The revenues of the fiscal year ending June 30, 1882, estimated upon the basis of existing laws, will be—

From customs	\$195,000,000 00
From internal revenue	130, 000, 000 00
From sales of public lands	1,000,000 00
From tax on circulation and deposits of national banks.	7, 124, 000 00
From repayment of interest by Pacific Railway Com-	
panies	2,500,000 00
From sinking-fund for Pacific Railway Companies	1,500,000 00
From customs fees, fines, penalties, &c	1, 150, 000 00
From fees—consular, letters-patent, and lands	2, 350, 000 00
From proceeds of sales of Government property	200,000 00
From profits on coinage, &c	2,800,000 00
From revenues of the District of Columbia	1,676,000 00
From miscellaneous sources	4,700,000 00
Total ordinary receipts	350, 000, 000 00

The estimates of expenditures, for the same period, received from the several Executive Departments, are as follows:

Legislative	\$3,038,643 26
Executive	14, 536, 404 23
Judicial	399, 300 00
Foreign intercourse	1,257,035 00
Military establishment	30, 240, 790 04
Naval establishment	15, 022, 331 01
Indian affairs	4,858,866 80
Pensions	50,000,000 00

Public works:	·
Treasury Department	\$3,583,022 56
War Department	9, 896, 050 00
Navy Department	931, 421 05
Interior Department	605, 042 07
Post-Office Department	36,000 00
Department of Agriculture	8,000 00
Postal service	3, 630, 757 90
Miscellaneous	16, 794, 646 91
District of Columbia	3, 352, 000 00
Permanent annual appropriations:	•
Interest on the public debt	88, 877, 410 00
Sinking-fund	41, 639, 840 20
Refunding—customs, internal revenue, lands, &c.	5, 832, 900 00
Collecting revenue from customs	5, 500, 000 00
Miscellaneous	1,514,261 25
Total estimated expenditures, including sink-	
ing-fund	301, 554, 722 28
Or, an estimated surplus of	\$48, 445, 277 72

Excluding the sinking-fund, the estimated expenditures will be \$259,914,882 08, showing a surplus of \$90,085,117 92.

The Secretary respectfully renews his recommendation of last year that, with a view to promote economy in the public service, a permanent organization of an appropriation committee for each House be established, who shall have leave to sit during the recess of Congress, with power to send for persons and papers, and to examine all expenditures of the Government; that rules be adopted by the respective Houses limiting appropriation bills to items of appropriation and excluding legislative provisions; that all appropriations, except for the interest on the public debt, be limited to a period not exceeding two years, and that the expenditure of appropriations be strictly confined to the period of time for which they were appropriated.

REDUCTION OF TAXES.

It appears from the foregoing statements that the surplus revenue, actual and estimated, for the fiscal years 1880, 1881, and 1882, after providing for the sinking-fund for each year, is as follows:

For the year ended June 30, 1880	\$27,952,009	65
For the year ending June 30, 1881	50, 198, 115	52
For the year ending June 30, 1882	48, 445, 277	72

This naturally presents to Congress the question whether the surplus revenue accruing after the present year should be applied to the further reduction of the public debt, or whether taxes now imposed should be repealed or modified to the extent of such surplus. many and sudden changes that have heretofore occurred in the amounts realized from our system of taxation are a sufficient warning that revenue should not be surrendered unless it satisfactorily appears that the surplus is permanent, and not merely temporary. If the taxes imposed by existing laws are not oppressive in their nature, it is perhaps better to bear with them than to endanger the ability of the Government to meet the 'current appropriations and the sinkingfund. A large portion of the surplus of revenue over expenditures is caused by the reduction of the rate of interest and the payment of the principal of the public debt. The reduction of annual interest caused by refunding since March 1, 1877, is \$14,290,453 50, and the saving of annual interest resulting from the payment of \$109,489,850 of the principal of the public debt, since that date, is \$6,144,737 50. interest is likely to be still further reduced during the next year in an amount estimated at \$12,101,429 50, by the refunding of bonds as hereinafter proposed. To the extent of this annual saving, amounting to \$32,539,620 50, the public expenditures will be permanently diminished. The large increase of revenue from customs on a few articles during the last year may be somewhat abnormal, and the estimates based upon it may not be realized. It is a question for Congress to determine whether any material reduction should be made at a time when the whole surplus revenue may be with great advantage applied directly to the payment of accruing debt, and when such surplus is an important element in aid of refunding. If it should be determined by Congress to reduce taxes, it is respectfully recommended that all the taxes imposed by the internal-revenue law other than those on bank-circulation and on spirits, tobacco, and fermented liquors be repealed. The tax on the circulation of national banks is levied partly in the nature of a moderate charge for a franchise conferred by the Government, and partly to furnish means to pay the expense of printing and issuing national-bank notes. It is easily collected by the Treasurer of the United States, and is a just and proper tax, whether regarded as a charge for the franchise or as a means of reimbursing the Government the cost of printing the notes. The tax on State banks is of the gravest importance, not for purposes of revenue, but as a check upon the renewal of a system of local State paper money which, as it would be issued under varying State laws, would necessarily differ as to conditions, terms, and security, and could not, from its diversity, be guarded against counterfeiting, and would, at best, have but limited circulation.

REFUNDING.

A large portion of the public debt becomes payable or redeemable on or before July 1, next, as follows:

Title of loan.	Rate.	Payable.	Redeemable.	Amount.
Loan of February, 1861 Oregon-War debt Loan July and Aug., 1861. Loan of 1863, (1881's) Funded Loan of 1881	6 per cent. 6 per cent. 6 per cent.	July 1, 1881	June 30, 1881 June 30, 1881	\$13, 414, 000 711, 890 145, 786, 500 57, 787, 250 469, 651, 050
Outstanding Nov. 1, 1880	*	,		687, 350, 600

The bonds maturing December 31, 1880, will be paid from accruing revenue. The surplus revenue accruing prior to July 1, 1881, estimated at about fifty million dollars, (\$50,000,000,) will be applied under existing law to the purchase or payment of the bonds above described, thus leaving the sum of \$637,350,600 to be provided for. section of the act approved July 14, 1870, for refunding the national debt, under which the five per cent. bonds, maturing May 1, 1880, are redeemable, requires the Secretary of the Treasury to give public notice three months in advance of their payment. To enable the Department to avail itself of the option of redeeming these bonds at their maturity, the necessary legislation for that purpose should be passed prior to February 1, next. The five and six per cent. bonds are not, by their terms, payable at a specific date, but they are redeemable at the pleasure of the United States after the dates above named. a much higher rate of interest than the rate at which new bonds can be Any delay in providing for their redemption will compel the continued payment of high rates of interest; it will make necessary the issue of a new series of coupons to the holders of coupon bonds, and may postpone to a less favorable period the completion of the operations of refunding. Under existing law, there is still available for this purpose four per cent. bonds authorized by the acts of July 14, 1870, and January 20, 1871, to the amount of \$104,652,200. could now be sold at a large premium, and, in the absence of legislation, it would be the duty of the Secretary, when any bonds became redeemable, to sell the four per cents and apply the proceeds to the

redemption of such bonds: but the amount of four per cents authorized is inadequate to the purpose stated. It is therefore advisable, by new and comprehensive legislation, to authorize the sale of other securities sufficient to redeem the whole sum soon to be redeemable. and conditions of the securities to be authorized for this purpose have received the careful attention of this Department. Hitherto the policy has been to sell bonds bearing as low a rate of interest as possible, running a number of years; but, in view of the requirements of the sinking fund, it is believed that a large portion of the public debt to be redeemed can be provided for by Treasury notes, running from one to ten years, issued in such sums as can, by the application of the sinkingfund, be paid as they mature. The purchase of bonds not due has heretofore involved the payment of premiums, which it is believed can, in future, be avoided by the issue of such Treasury notes. The large accumulation of money now seeking investment affords a favorable opportunity for selling such notes bearing a low rate of interest. is believed that they will form a popular security, always available to the holder, and readily convertible into money when needed for other investment or business. They should be in such form and denominations as to furnish a convenient investment for the small savings of the people, and fill the place designed by the ten-dollar refunding certificates authorized by the act of February 26, 1879. No other United States bonds than those stated become redeemable prior to the 1st of September, 1891, the date of maturity of the four-and-ahalf per cent. bonds. The requirements of the sinking-fund prior to the maturity of the four-and-a-half per cent. bonds, for a period of ten years, from 1882 to 1891, both inclusive, are estimated as follows:

	The state of the s
For the fiscal year ending June 30, 1882	\$43,386,645 00
For the fiscal year ending June 30, 1883	45, 122, 110 80
For the fiscal year ending June 30, 1884	46, 926, 995 24
For the fiscal year ending June 30, 1885	48, 804, 075 04
For the fiscal year ending June 30, 1886	50, 756, 238 04
For the fiscal year ending June 30, 1887	52, 786, 487 56
For the fiscal year ending June 30, 1888	54, 897, 947 07
For the fiscal year ending June 30, 1889	57, 093, 864 95
For the fiscal year ending June 30, 1890	59,377,619 55
For the fiscal year ending June 30, 1891	61, 752, 724 33
·	

It may be that during this period, by the change of our financial con-

520, 904, 707 58

dition, or from unforeseen events, the Government will not be able, as in times past, to apply sums so large to the reduction of the debt; but it is probable that any temporary deficiency would soon be made good by increased revenue. This contingency may be provided for by the terms of the bonds.

The Secretary, therefore, recommends that provision be made for the issue of an amount not exceeding \$400,000,000 of Treasury notes in denominations not less than ten dollars, bearing interest not exceeding four per cent. per annum, and running from one to ten years, to be sold at not less than par, the amount maturing during any year not to exceed the sinking fund for that year, and the proceeds to be applied to the payment of five and six per cent. bonds, maturing in 1881. It is believed that, with the present favorable state of the money-market, a sufficient amount of such Treasury notes, bearing an annual interest of three per cent., can be sold to meet a considerable portion of the maturing bonds; but it is better to confer upon the Department a discretionary power to stipulate for a higher maximum rate, to avoid the possibility of failure. Such a discretion is not likely to be abused, while a power too carefully restricted may defeat the beneficial object of the law.

It is also recommended that authority be given to sell at par an amount not exceeding \$400,000,000 of bonds of the character and description of the four per cent. bonds of the United States now outstanding, but bearing a rate of interest not exceeding three and sixty-five one-hundredths per cent. per annum, and redeemable at the pleasure of the United States after fifteen years, the proceeds to be applied to the payment of bonds redeemable on or before July 1, 1881. Though the amount of the two classes of securities recommended exceeds the amount of bonds to be redeemed, no more can be sold than the bonds to be redeemed, while the alternative authorized will permit a limited discretion to sell the securities most favorable to the Government. With the authority thus recommended, it is believed that the Department can within a year redeem all the five and six per cent. bonds now outstanding, and thus reduce the interest of the public debt \$12,000,000 per annum, and leave the debt in a form most favorable for gradual payment by the application of the sinking-fund without cost or premium.

RESUMPTION.

Nothing has occurred since my last annual report to disturb or embarrass the easy maintenance of specie payments. United States notes

are readily taken at par with coin in all parts of this country and in the chief commercial marts of the world. The balance of coin in the Treasury available for their redemption on the first day of November last was \$141,597,013 61, and the average during the year has not materially varied from that sum. The only noticeable change in the reserve is the gradual increase of silver coin caused by the coinage of the silver dollar and the redemption of fractional silver coin, more fully stated hereinafter.

The amount of notes presented for redemption for one year prior to November 1, 1880, was \$706,658. The amount of coin or bullion deposited in the Treasury, assay office, and the mints, during the same period These deposits have usually been paid for was \$71,396,535 67. in coin, through the clearing house, but at times, when the currency in the Treasury would allow, and at the request of the depositors, they have been paid for in United States notes and silver certifi-Gold coin now enters largely into general circulation. the revenue from customs collected in New York for one year ending November 1, 1880, .57,475 per cent. was paid in gold coin, .00,125 per cent. in silver coin, .31,087, in silver certificates, and .11,313 per cent. in United States notes. While no distinction as to value is made between coin and notes in business transactions, a marked preference is shown for notes, owing to their superior convenience in counting and carrying. Many of the current payments from the Treasury are necessarily made in coin, and much of the funds held for the redemption of national bank notes and of notes of banks that have failed or suspended is in coin. The total coin in the Treasury, at the close of business, November 1, was \$218,710,154, of which \$141,597,013 61 constituted the reserve fund for the redemption of United States notes, as above stated.

All the requirements of the resumption act have thus far been executed, and its wisdom has been fully demonstrated. It only remains to inquire whether any further measures are necessary or expedient to secure the maintenance of resumption. The Secretary expresses the utmost confidence that without new legislation the entire amount of United States notes now authorized and outstanding can be easily maintained at par in coin even if the present favorable financial condition should change; but, in order to accomplish this, the coin reserve must be kept unimpaired except by such payments as may be made from it in redemption of notes. Notes redeemed should be temporarily held in place of the coin paid out, especially if it appears that the call for coin is greater in amount than the coin coming in due course into the

Treasury or the mints. Ordinarily the superior convenience of notes will, as at present, make a greater demand for them than for coin; but in case of an adverse balance of trade or a sudden panic, or other unforeseen circumstances, the ample reserve of coin on hand becomes the sure safeguard of resumption, dispelling not only imaginary fears, but meeting any demand for coin that is likely to arise. In a supreme emergency, the power granted to sell bonds will supply any possible deficiency.

It is suggested that Congress might define and set apart the coin reserve as a special fund for resumption purposes. The general available balance is now treated as such a fund, but, as this balance may, at the discretion of the Secretary of the Treasury, be unduly drawn upon for the purchase or payment of bonds, it would appear advisable that Congress prescribe the maximum and minimum of the fund.

United States notes are now, in form, security, and convenience, the best circulating medium known. The objection is made that they are issued by the Government, and that it is not the business of the Government to furnish paper money, but only to coin money. The answer is, that the Government had to borrow money, and is still in debt. The United States note, to the extent that it is willingly taken by the people, and can, beyond question, be maintained at par in coin, is the least burdensome form of debt. The loss of interest in maintaining the resumption-fund, and the cost of printing and engraving the present amount of United States notes, is less than one-half the interest on an equal sum of four per cent. bonds. The public thus saves over seven million dollars of annual interest, and secures a safe and convenient medium of exchange, and has the assurance that a sufficient reserve in coin will be retained in the Treasury beyond the temptation of diminution, such as always attends reserves held by banks.

Another objection to the issue of United States notes is; that they are made a legal-tender in the payment of debts. The question of the constitutional power of Congress to make them such, is one for another branch of the Government. The Secretary of the Treasury is still of the opinion that this quality of legal-tender does not add to the usefulness, safety, or circulation of United States notes. So far as it excites distrust and opposition to this form of circulating notes it is a detriment. The fear that a withdrawal of this attribute will contract the currency is as delusive as was the fear that resumption would have a like effect. The notes would still be received and paid out by the Government, and, like bank-notes, would not be refused in payment for debts while they were redeemable and

promptly redeemed in coin on presentation. As the quality of legal tender was attached to these notes when first issued, and was then essential to their value and circulation, the public mind is sensitive when any proposition is made that by possibility might impair their value, but it is their redemption in coin that makes them now equal to coin and of ready circulation in all the marts of the world. While this is maintained it becomes comparatively immaterial whether they are a legal-tender or not, and if by the action of Congress or the courts they are deprived of this quality they will still be the favorite money of the people.

Another objection to United States notes is, that the amount of the issue may be enlarged by Congress, and that this power is liable to abuse. This objection may be made to all the great essential powers of the Government. A sufficient answer is that, since their first issue, they have been carefully limited in amount, and invested with every quality to improve their value and circulation. Every effort to increase the amount, made during a period of great depression, failed. Now that they are redeemable in coin there is no temptation for over-issue.

These objections will, no doubt, in due time receive the careful consideration of Congress, and any practical difficulties in maintaining resumption will be met by new legislation. But the Secretary ventures to express the opinion that the present system of currency, the substantial features of which are a limited amount of United States notes, (with or without the legal-tender quality,) promptly redeemable in coin, with ample reserves in coin and ample power if necessary to purchase coin with bonds, supplemented by the circulating-notes of national banks issued upon conditions that guarantee their absolute security and prompt redemption, and all based on coin of equal value, generally distributed throughout the country, is the best system ever devised, and more free from objection than any other, combining the only safe standard with convenience for circulation and security and equality of value.

COINS AND COINAGE.

The coinage executed at the mints during the fiscal year has exceeded in value that of any previous year since the organization of the Government. Its total amount, not including the minor coinage, was \$84,100,172 50, of which it is estimated \$62,000,000 was probably from domestic, and \$21,000,000 from imported bullion.

The annual report of the Director of the Mint furnishes detailed statements of the coinage of gold and silver, the amount deposited,

parted, refined, or made into bars, the earnings, receipts, and expenditures, and other transactions and business operations of the mints and assay offices during the year, and contains valuable statistics and careful estimates of the production, consumption, and circulation of the precious metals in the United States and many other countries.

The inquiries as to the production, use in arts, coinage, and circulation of the precious metals, and the collection of other monetary statistics in our own and foreign countries, have been continued by the Mint Bureau, and much valuable information on these subjects has been obtained, and will be found in the report of the Director.

The deposits of gold during the last fiscal year amounted to \$98,835,096 S5, being \$56,580,940 O5 in excess of that in the previous year, notwithstanding a probable slightly diminished domestic production. Out of a total import at the port of New York of \$60,947,672 of foreign-gold coin and bullion, \$60,584,395 13 were deposited at the New York assay office, and there exchanged for United States coin or bars, or for current money. Nearly all of this coin and bullion, being at or above the United States standard, is excepted from a melting-charge under present regulations, and is transported at Government expense to the mint for coinage. The coinage law makes no provision for any charges for melting gold bullion which is not below the United States standard, when deposited for coin, and requires such deposits to be transported from the New York assay office to the Philadelphia mint at the expense of the Government. As nearly all the imported bullion deposited is in such a form that it is necessary to melt it, in order to ascertain its fineness and value, a modification of the law so as to authorize a charge for melting is recommended.

The gold imported at New York, during the earlier part of the last fiscal year, exceeded the capacity of the Philadelphia mint for coinage, with its ordinary working-force, without incurring expenses much above the specific appropriations for its support. The coinage of gold at Philadelphia had to be made subordinate to that of silver, in order to comply with the requirements of the law directing the purchase and coinage of \$2,000,000 worth of silver bullion in each month, and to satisfy the demand for minor coins authorized to be struck only at that mint. The mint was able, with its other work, to coin in gold an amount little exceeding on the average \$2,000,000 per month, but this was found sufficient to satisfy the immediate demands upon it for coin. At the close of the year there remained in the mints and New York assay office \$40,724,337 91, in gold bullion uncoined, nearly all of it imported.

The amount of coinage executed at the mints of the United States,
during the fiscal year, was—
Gold\$56, 157, 735 00

XVIII REPORT OF THE SECRETARY OF THE TREASURY.

There was in the mints and assay offices on the 1st of November, bullion held for coinage amounting to \$78,558,811 55 of gold, and \$6,043,367 37 of silver, making the total coin circulation and bullion available for coinage in the country of—

Gold	\$453, 882, 692°

STANDARD-SILVER DOLLAR.

In compliance with the provisions of the act of February 28, 1878, during the last fiscal year 24,262,571.38 standard ounces of silver bullion, costing \$24,972,161 81, (an average of \$2,081,013 48 per month,) were purchased, of which 24,005,566.41 ounces were coined into 27,933,750 standard-silver dollars. The total coinage of standard-silver dollars since the passage of the act, up to November 1, 1880, has been \$72,847,750, at which date \$47,084,450 were in the Treasury. Of the latter amount \$19,780,241 were represented by outstanding silver certificates, the amount in actual circulation at that date being \$25,763,291.

Since the passage of that act, the Department has issued numerous circulars and notices to the public in which it has offered every inducement which it could under the law, to facilitate the general distribution and circulation of these coins. It has required United States disbursing officers to pay them out in payment for salaries and for other current obligations, and it has offered to place the silver in the hands of the people throughout the United States without expense for transportation, when sent by express, and at an expense for registration-fee only, when sent by registered mail.

Notwithstanding these efforts, it is found to be difficult to maintain in circulation more than 35 per cent. of the amount coined. While at special seasons of the year, and for special purposes, this coin is in demand, mainly in the South, it returns again to the Treasury, and its reissue involves an expense for transportation at an average rate of one-third of one per cent. each time. Unlike gold coin or United States notes, it does not, to the same extent, form a part of the permanent circulation, everywhere acceptable, and, when flowing into the Treasury, easily paid out with little or no cost of transportation. The reasons for this popular discrimination against the silver dollar are:

1st. It is too bulky for large transactions, and its use is confined mainly to payments for manual labor and for market purposes or for

change. The amount needed for these purposes is already in excess of the probable demand.

2d. It is known to contain a quantity of silver of less market value than the gold in gold coin. This fact would not impair the circulation of such limited amount as experience shows to be convenient for use, but it does prevent its being held or hoarded as reserves, or exported, and pushes it into active circulation, until it returns to the Treasury, as the least valuable and desirable money in use.

For these reasons the Secretary respectfully but earnestly recommends that the further compulsory coinage of the silver dollar be suspended, or, as an alternative, that the number of grains of silver in the dollar be increased so as to make it equal in market value to the gold dollar, and that its coinage be left as other coinage to the Secretary of the Treasury or the Director of the Mint, to depend upon the demand for it by the public for convenient circulation.

The continued coinage of the silver dollar necessarily involves the expenditure of two million dollars per month of the current revenue, the proceeds of which must, as experience shows, mainly lie idle in the Treasury, involving a large expense for storage and custody. issued, a considerable expense for its transportation is involved, it is taken reluctantly by the people, and is soon returned to the vaults of the Treasury. The tendency of this process is to convert into silver coin the reserve of gold coin held in the Treasury to maintain United States notes at par. The inevitable effect of the continuance of this coinage for a few years more will be to compel the Department to maintain its specie reserve in gold coin, irrespective of the silver on hand, or to adopt the single silver standard for all Government purposes. object manifestly designed by the passage of the act for the coinage of the silver dollar was to secure to the people of the United States the benefits of a bimetallic standard of value. It was forcibly urged that to demonetize silver would increase the burden of debts, and rest the value of all property upon the quantity on hand of a single metal. was not the intention of the framers of the act to demonetize gold, but to maintain both gold and silver as standards of value. This has been done for thousands of years; but only by adopting, as nearly as possible, the relative market value of the two metals as the ratio for coinage, and by changing the ratio adopted whenever for a period of years it was demonstrated that the market ratio had changed. The United States has conformed to this custom of civilized nations, and the Constitution recognized it by authorizing Congress to coin money, and to regulate its value.

Under this authority Congress provided, in 1793, that the ratio should be one ounce of gold to fifteen ounces of silver; and on the 28th of June, 1834, it changed the ratio to one ounce of gold to sixteen ounces of silver.

It would appear that Congress somewhat overrated silver in 1793, and underrated it in 1834, but it is now certain that sixteen ounces of silver are not worth one ounce of gold, and if silver were coined without limit on that basis, it would eventually bring us to a single silver standard, and reduce gold to a commodity, or drive it to foreign countries—a result not intended by the act of February 28, 1878.

The average cost of the silver in a standard dollar, as shown by the purchases for the Government from the date of the resumption act to this time, measured by the gold standard, is \$0.906, or in a ratio of 1 to 17.64. Upon this ratio a silver dollar, in order to be of equal value to a gold dollar, should contain 455.3 grains. As the expense of coining a silver dollar is equal to the value of about five grains of standard silver bullion, it is confidently believed that a silver dollar containing 450 grains, based upon a ratio of one of gold to about 17.5 of silver, could be safely coined, as demanded for use or exportation, without demonetizing gold or disturbing contracts or business, and with great advantage to the silver mining interests of our country. Upon the facts stated, it would seem to be wise policy now, in the spirit of the Constitution, to regulate by law the coin-value of the two metals so as to conform to the market ratio.

The cost of recoining the silver dollars already issued into dollars of the weight suggested is estimated at about one per cent., or \$728,477 50. Much confusion and delusion have arisen from treating as a profit the difference between the cost of the silver bullion coined into silver dollars and the face-value of the dollars coined therefrom. ence, from February 28, 1878, the date of the act authorizing their coinage, to November, 1880, is \$8,520,871 45. From this should be deducted the expense already incurred in distributing the coin and by wastage, which amounts to \$262,008 01, leaving as the net nominal profit the sum of \$8,258,863 44, of which \$7,198,294 56 have been deposited in the Treasury, and \$1,060,568 88 remain in the mints. This nominal profit is burdened with the necessity of receiving, and thus practically redeeming, these dollars at their nominal value in gold coin, and of reissuing, transporting, and maintaining them in circulation. burden will soon exhaust the nominal profit. When held by the Government the coins are of no more real value than an equal weight of standard-silver bullion. To the extent of the difference between their

bullion and nominal value, they are purely fiat money. This nominal profit applied to the purchase of silver bullion would be sufficient to meet the entire cost of converting the present dollars into an equal number of the proposed dollars; or, in other words, if the present dollars were converted into the less number of the proposed dollars, the nominal loss would be fully covered by the nominal profit now in the Treasury and the mints.

It may be better for Congress at the present time to confine its action to the suspension of the coinage of the silver dollar, and to await negotiations with foreign powers for the adoption of an international ratio; but, compelled by official duty to report upon this subject, the Secretary feels bound to express his conviction that it is for the interest of the United States now, as the chief producer of silver, to recognize the great change that has occurred in the relative market value of silver and gold in the chief marts of the world, to adopt a ratio for coinage based upon market value, and to conform all existing coinage to that ratio, while maintaining the gold eagle of our coinage at its present weight and fineness. He confidently believes that the effect of this measure would be to make our gold and silver coins the best international standards of value known. Already the double-eagle, issued without cost for coinage, and in greater sums than any other gold coin, and of equal value to any other coin, whether measured by weight or tale, is received without question in all commercial countries as the most convenient medium of exchange. It is believed that a silver dollar of the weight and ratio of the proposed coinage would be the best silver standard for international exchange, and that it would tend to fix the market value of silver bullion at the ratio proposed. and would thus, as far as practicable, avoid the changing relative value of the two metals, while giving a steady market for the silver product of our country.

In this connection, the attention of Congress is respectfully invited to the operation of the act approved June 9, 1879, requiring the redemption in lawful money, at the office of the Treasurer or any assistant treasurer of the United States, of the silver coins of the United States of smaller denominations than one dollar.

When fractional silver coins were authorized by the act approved February 21, 1853, they were made to contain 384 grains of standard silver to the dollar. This was subsequently changed by the coinage act of 1873 to 25 grammes or 385.8 grains. They thus contain 26.7 grains, or nearly $6\frac{1}{2}$ per cent., less than the standard dollar. Prior to 1853, by reason of the large production of gold in California, the standard-

silver dollar and its fractional parts had risen in market value above par in gold, and were largely exported. To prevent their exportation, and in accordance with the example of Great Britain, the policy was adopted, by that act, of reducing the weight of the minor silver coin, and this policy operated well until, in the spring of 1862, both gold and silver ceased to circulate as money. During the suspension of specie payments a remarkable decrease in the value of silver occurred, and now the market value of the silver in a dollar of the fractional coin is only 82\frac{1}{3} cents.

The amount coined prior to November 1, 1880, under the provisions of the resumption act, which substituted silver coin for fractional curreńcy, was \$42,974,931. To this has been added a very large sum issued before the war, and again introduced into circulation since the resumption of specie payments. It is difficult to determine the amount of such old coinage in circulation, but it is believed to exceed \$22,000,000. Prior to the act of June 9, 1879, this fractional coin filled the channels of circulation, especially in commercial cities, and gave rise to the passage of that act. At that date there was in the Treasury \$6,813,589 fractional coin; on the 1st of November, 1880, the amount was \$24,629,489, from which it appears that \$17,815,900 has been redeemed The whole amount in the Treasury is counted with lawful money. as a part of its reserve, although it is a legal-tender only in sums not exceeding ten dollars, and is, therefore, not available as cash for general purposes. It would seem wise that the excess not needed for change should be coined into standard dollars, and that any further fractional coin, hereafter needed, should contain silver of approximate relative value to the standard coin. The nominal profit heretofore derived from this coinage is quite sufficient to cover the cost of this change. It is also respectfully suggested that the act of July 9, 1879, should be repealed. When fractional coin is issued as money, it should be treated like other coin, to be received by the Government upon the same conditions as by the people, but not, like paper money, to be redeemed. If it must be classed as money to be redeemed, it should be supported by a reserve, like other redeemable money.

NATIONAL BANKS.

The report of the Comptroller of the Currency contains much information in reference to the national banking system, and gives tables showing the resources and liabilities of the national banks from the date of their organization to the present time, and also tables showing the number, capital, and deposits of the State banks, savings banks,

and private bankers of the country, by States and geographical divisions, for a series of years.

The capital stock of the national banks on October 1, 1880, was \$457,553,850; surplus, \$120,518,583; and the total circulation outstanding, \$343,949,893.

National banks are organized in every State of the Union except Mississippi, and in every Territory except Arizona; and the total number in operation is 2,095, which is the greatest number that has been in operation at any one time.

The Comptroller devotes considerable space to the discussion of the operations of the national banks since the date of resumption of specie payments, and the evils as well as the benefits which are likely to arise from the large addition of coin to the circulating medium made since that date.

The capital stock of the national banks is \$47,000,000 less and the surplus nearly \$14,000,000 less than at the corresponding date in 1875. The loans of the banks at the date of their last returns were \$1,037,000,000, and the individual deposits \$873,000,000, the highest points reached since the organization of the system, the loans being \$207,000,000 greater and the individual deposits \$253,000,000 greater than in October, 1878, while the capital and surplus at the previous date were \$5,000,000 in excess of their present amounts.

The individual deposits and the public, private, and bank deposits, not deducting the amount due from banks and the amount of the clearing-house exchanges, have increased more than \$322,000,000, and amount to the unprecedented sum of \$1,155,000,000.

The Comptroller states that the abundance of money, and the low rates of interest, have made it difficult for capitalists to find satisfactory investments, and that he has, therefore, examined the statements of the banks for a series of years to ascertain if the banks have found use for their increased deposits. The amount of the loans of the banks in New York city, in October, 1879 and 1880, was 70.8 per cent. of the capital, surplus, and net deposits; while in 1878, it was 65.4 per cent.; in 1877, 68 per cent.; and in 1876, 65.1 per cent.; and the loans are now proportionably higher than at any time since 1873. The resources of the banks in the other principal cities of the country are shown by their reports for October 1, last, to have been then more fully employed than they were at the corresponding dates for the two previous years, although their business was not so much extended as it was during the four years following the crisis of 1873. The ratio of the loans of the banks in the country districts to their

capital, surplus, and net deposits was, on October 1, 7.3 per cent. less than it was at the corresponding date in 1875, and 5.2 per cent. less than in 1877. The opportunities for using money in this group of banks is not in proportion to the increase of their deposits, and their balances in other banks have by no means diminished.

The tables given by the Comptroller show that, during the past two years, the loans of the banks in the city of New York have been extended to a much greater degree proportionably than the loans in other parts of the country, and that the cash reserves of the banks in New York have been unprecedentedly low. While the aggregate lawful-money reserve has, as far as known, always been held by this class of banks, it has frequently been very close, some of the banks expanding their loans beyond reasonable limits, and relying upon imports of gold and purchases of bonds by the Treasury to replenish their deficient reserves.

The act of June 20, 1874, repealed the law requiring reserves to be held upon circulation, thus largely reducing the amount of legal reserve required. The enormous increase of individual and bank deposits during the last year should not be accompanied with a proportional increase of loans, since such increase would, it is believed, have the effect, indirectly, of increasing the market prices of many railroad and other stocks and bonds largely beyond their actual value. The banks in New York city hold more than \$100,000,000 of the funds of other banks, which are payable on demand, and it is of the greatest importance that they should at all times exhibit great strength if they would keep themselves in condition for an adverse balance of trade, and for the legitimate demands of those dealers who confide in them.

The Comptroller gives some interesting tables showing the amount of coin and currency in the country on the day of resumption of coin payments, and on November 1 of the present year, together with the amount of coin and currency in the Treasury and in the banks, and the amount in the hands of the people outside of these depositories, from which it will be seen that while the amount in the Treasury and in the banks has increased more than \$50,000,000 during that period, the amount in the hands of the people has also increased more than \$195,000,000.

The most gratifying exhibit in the condition of the national banks is, that they are now doing business upon a specie basis, the amount of gold coin held by the national banks having increased since the day of resumption from \$35,039,201 to \$102,851,032, which is but about \$18,000,000 less than the whole cash reserve required by law.

The national banks hold nearly \$200,000,000 of United States bonds, which will mature on or before July next.

The whole amount of United States bonds held by the national banks as security for circulation and for other purposes is \$403,369,350, and the average amount of capital invested by the State banks, savings-banks, and private bankers for the six months ending May 31, 1880, as shown by the returns to this Department for purposes of taxation, is \$228,053,104, making a total of \$631,422,454.

The profit upon circulation, to the national banks, at the present price of bonds in the market is estimated not to exceed one and one-half per cent. upon the capital invested, and the amount of State and National taxes is more than four per cent. upon the amount of circulation.

The banks and bankers of the country have complained that the taxes upon bank deposits and bank capital since the passage of the first internal-revenue act, have been greatly disproportioned to the amount paid by other classes of property, and it would seem that the time has now arrived, as hereinbefore recommended, when Congress might properly repeal all taxes on capital and deposits, retaining the present tax on circulation.

The national banking system has fully realized all the expectations of its founders. It has furnished a safe currency, of uniform circulation, carefully guarded against counterfeiting, protected by ample reserves, and promptly redeemed both at the banks and the Treasury. No other legislation in respect to these important corporations seems to be required at the present session.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the offices of the United States Treasurer, nine assistant treasurers, one depositary, and one hundred and thirty national bank depositaries.

The receipts of the Government, amounting, during the fiscal year, as shown by warrants, to \$545,340,713 98, were deposited as follows: In independent treasury offices, \$404,301,155 37; in national-bank depositories, \$141,039,558 61.

As far as accounts have been adjusted for the last fiscal year there appear to be no losses to the Government by public officers engaged either in the receipt, safe-keeping, or disbursement of the public moneys. It is to be regretted, however, that the apprehension of loss through the issue of duplicates of coupon bonds, expressed by the First Comptroller, in his report for last year, has proven too well founded. Upon

what seemed to be sufficient evidence of the destruction of a \$500 coupon bond, a duplicate was issued several years since, and subsequently redeemed, as required by law. Sometime after this redemption the original bond was presented intact by an innocent holder, and, upon the recommendation of the Comptroller, it was redeemed. While there seemed to be no alternative but to pay this bond, the availability of any existing appropriation for the purpose may be questioned, and Congress will be asked for some needed legislation to meet such cases.

Additional legislation to authorize the refund of moneys paid into the Treasury, in excess, by receivers of public moneys, is recommended by the First Comptroller and meets with my approval.

The coinage of the silver three-cent and five-cent pieces was discontinued by the coinage act of 1873, and that of the silver twenty-cent piece by the act of May 2, 1878. Since the act of June 9, 1879, providing for the exchange of subsidiary coins for lawful money of the United States, a large amount of silver coins of the above-mentioned denominations has accumulated in the several sub-treasury offices. These coins constitute a portion of the Treasury balance, and, as they are not again paid out after being received in exchange for lawful money, they become practically unavailable for current use. The necessary legislation for their proper disposition is recommended.

By reference to the tables accompanying this report, it will be seen that, since the organization of the Government, there has been paid into the Treasury to the close of the last fiscal year. \$18,570,348,647 05 And that there has been paid out upon warrants in consequence of appropriations made by law, to the

same date, the sum of	18,334,854,201 62
Leaving unexpended, charged to the Treasury, the sum of	, ,
	4.1

This amount, however, is not all in actual cash, but is made up of items as follows:

Amount deposited with the States under act of Con-		
gress approved June 23, 1836	\$28, 101, 644	91
Amount arising from defalcations, irredeemable		•
bills, &c	2,708,964	18
«Cash	204, 683, 836	34

As the first two items are not available for disbursement, it would

seem unnecessary to carry them longer as part of the balance; but neither of them can be disposed of without authority of law, though the amounts represented have passed beyond the control of the Department, or entirely disappeared.

The first amount was by law deposited with the States, not paid to them, and the Department cannot withdraw it without further authority. The second item mentioned arose many years ago from the failure of State banks to redeem their notes which the Government held, and of public officers to properly account for moneys received by them for the credit of the Treasury. These items, for convenience, have already been informally omitted from the current cash books and the monthly debt statements of the Department. There are also a few other items of like character, still treated as cash, on which no such action has yet been taken. To their amount they would further reduce the available balance on hand. A full statement of these unavailable amounts has been published for several years in the annual reports of the Treasurer of the United States.

It is recommended that authority be given to reimburse the Treasurer for these unavailable amounts, they being no longer under his control, though he is charged therewith, and to charge the amounts to the parties from whom they are respectively due. Such a course would take no money from the Treasury, would relieve no public debtor from any legal liability, while it would greatly simplify the accounts of the Treasury, and would cause the books of the Department to show always the real instead of the apparent balance of cash on hand available for disbursement.

It will be understood that the apparent discrepancies which have arisen from these unavailable amounts are due to no fault of accounting or book keeping. On the contrary, it is worthy of note that the amount of these unavailable items, together with the actual money in the Treasury, makes precisely the amount of the moneys received by the Treasury and not expended, as shown by the books of the several bureaus of the Department. No better proof of the accuracy with which the accounts of the great fiscal operations of the Government have been kept could be asked for or obtained.

The amount of money reported on hand to the credit of the Treasurer is not, however, the entire amount of public moneys held by independent-treasury officers and depositary banks. As fiscal agents of the Government these officers and banks have held the funds advanced for disbursement to public officers, and also other funds in trust for the redemption of national bank notes and for other purposes, aggregat-

XXVIII REPORT OF THE SECRETARY OF THE TREASURY.

ing a monthly average during the past year of over sixty millions of dollars. Under the existing system, by which the Government practically holds and disburses its own money and that of its officers, the fiscal operations are conducted without disturbance, embarrassment or favoritism, and with satisfaction to all concerned.

CUSTOMS.

The revenue from customs for the year ended June 30, 1880, was \$186,522,064 60; the revenue for the preceding year was \$137,250,047 70, an increase of \$49,272,016 90. This large gain was due in part to an exceptional demand for certain classes of foreign merchandise, principally iron and steel and their manufactures, which is not likely to be maintained during the present year. Of this sum, about \$42,000,000 was collected on sugar; \$18,500,000, on manufactures of silk; \$19,000,000, on manufactures of iron and steel; \$10,000,000, on manufactures of cotton; \$29,000,000, on wool and manufactures of wool; and \$6,000,000, on wines and spirits, making a total of nearly \$125,000,000 collected on these six classes of articles. The precise amounts, however, cannot be given, because the statistics are based, to a certain extent, on incliquidated entries.

The expenses for collection for the past year were \$5,995,878 06, an increase over the preceding year of \$510,099 03, occasioned to a large extent by the increase in the importation of bulky articles.

The expenses of collection and percentage of cost for the past four years were as follows:

	Expenses.	Percentage.
1877	\$6,501,037 57	4. 90
1878	5, 826, 974 32	4.41
1879	5,485,779 03	3.94
1880	5, 995, 878 06	3. 18

It is believed that, by reason of the vigilance of the customs officers, frauds upon the customs revenue have not during the past year been so extensive as formerly. The measures referred to in the last report of the Secretary for a more faithful collection of the duties on sugar have been continued in force, but they are and should be regarded as but temporary, and not as justifying longer delay in the legislation necessary to place this most important feature of our commerce upon a foundation which will enable the Government and the importers to conduct their business with greater certainty than at present. It is earnestly hoped that a settlement of this much-vexed question may be made by Congress at its present session.

The present tariff is but a compilation of laws passed during many succeeding years, and to meet the necessities of the Government from time to time. These laws have furnished the greater part of our revenue, and have incidentally protected and diversified home manufactures. The general principle upon which they are founded is believed to be wise and salutary. No marked or sudden change, which would tend to destroy or injure domestic industries built upon faith in the stability of existing laws, should be made in them. Changes, however, have occurred in the value of some articles, caused mainly by important inventions and improvements in the mode of manufacture. These have produced irregularities and incongruities in the rates of taxation, so that on some articles the duties have become prohibitory, while on others the rate of taxation is too low. Some duties ad valorem might, with the experience acquired under existing laws, be converted into specific duties. Many articles which do not compete with domestic industry, and yield but a small amount of revenue, might be added to the free list. The changes suggested would tend to simplify the work of appraisement, remove the irritations among business men, which so often arise in an enforcement of the laws imposing duties ad valorem, and reduce the cost of collection. Former reports of the Secretary exhibit many facts, showing in detail the necessity of such modifications.

By section 2501 of the Revised Statutes, an additional duty of 10 per cent. ad valorem is imposed on all goods (except wool, raw cotton, and raw silk) the growth or production of countries east of the Cape of Good Hope, when imported into the United States from places west of the cape. Coffee produced in the Dutch Colonial possessions beyond the cape, and imported from places this side of the cape, has been charged with this additional duty. The fifth article of the Treaty with the Netherlands, of February 26, 1853, provides that discriminating duties against tea and coffee, the products of the possessions of the Netherlands, shall be removed by the United States whenever the discriminating export-duties imposed by the government of the Netherlands in favor of direct shipments to Holland of the products of its colonial possessions are removed. The discriminating export-duties were sometime since removed by the Netherlands government, and it is, therefore, incumbent upon the United States, under the treaty, to remove the discriminating import-duties on tea and coffee produced in the possessions of the Netherlands. It is recommended that early action be taken by Congress in the matter.

In this connection it may be questioned whether the discriminating

duties imposed by section 2501 of the Revised Statutes, should not be altogether repealed. The provision of law now embodied in that section was originally passed to encourage the direct shipment to the United States of goods around the Cape of Good Hope, as against the shipment of such goods to Europe and their transshipment thence to the United States.

The Suez Canal has, however, so changed the course of trade, that most of the goods which are produced beyond the cape and imported into the United States are sent to European ports and transshipped thence for the United States. It therefore often becomes difficult to decide whether such goods, when shipped from the country of production, were destined for the American or European markets, the shipments being rarely made on through-bills of lading. The total revenue derived from this source for the past year was only \$167,436 31. It is recommended that the provision of law in question be repealed.

INTERNAL REVENUE.

From the various sources of taxation under the internal-revenuelaws, the receipts for the fiscal year ending June 30, 1880, were as follows:

From spirits	\$61, 185, 508	79
From tobacco	38, 870, 140	08,
From fermented liquors	12,829,802	84
From banks and bankers	3,350,985	28
From penalties, &c	383,755	08
From adhesive-stamps	7,668,394	22
From arrears of taxes under repealed laws	228,027	73
Total	124, 516, 614	02

The foregoing statement does not include the tax collected by the Treasurer of the United States from national banks, which amounts to \$7,014,971 44.

The amount of collections exhibited in the foregoing table includes commissions on sales of stamps, paid in kind, as well as amounts collected in 1879, but not deposited till within the last fiscal year. An apparent variation consequently arises between the amounts of collections given in the tables and those shown by the covering warrants of the Treasury.

The increase of the revenue from spirits during the last fiscal year was \$8,615,224 10. But there was a decrease in the revenue from to-

bacco in its various forms of manufacture, for the same period, of \$1,264,862 57, which was to be expected on account of the reduction in the rate of taxation upon that commodity. The increase of income from the tax on fermented liquors was \$2,100,482 76. The total increase of revenue from spirits and fermented liquors was \$11,934,075 99. The increase of revenue from taxes on banks and bankers was but \$152,101 69 over the income for 1879. The total increase of internal revenue, after deduction of the decrease of income from tobacco and the decrease from collections on the arrears of taxes, was \$10,598,147 15.

The Secretary cannot too strongly urge the importance of stability in the rates imposed on spirits, tobacco, and fermented liquors. These articles are regarded by all Governments as proper objects of taxation. Any reduction in the rates imposes a heavy loss to the owner of the stock on hand, while an increase operates as a bounty to such owner. When the rate is fixed, the trade adapts itself to it. A change disturbs the collection of the tax and the manufacture of the article. As already suggested, the time is opportune for reducing the subjects of internal taxation to the articles named and the taxes on circulatingnotes of banks. The taxes proposed to be repealed yielded during the last fiscal year as follows:

From banks and bankers other than national	\$3,350,985 28
From national banks other than on circulation	4, 438, 134 80
From adhesive stamps	7,668,394 22
In all	15, 457, 514 30

In case of such repeal, ample time should be given to exhaust the tax-paid stamps without loss to the manufacturer.

EXPORTS AND IMPORTS.

The exports and imports during the last fiscal year have been as follows:

ionows.	
Exports of domestic merchandise	\$823,946 353
Exports of foreign merchandise	11,692,305
Total	835, 638, 658
Imports of merchandise	667, 954, 746
Excess of exports over imports of merchandise	\$167, 683, 912
Aggregate of exports and imports	1,503,593,404

Compared with the previous year, there was an increase of \$125,199,217 in the value of exports of merchandise, and an increase of \$222,176,971 in the value of imports. The annual average of the excess of such

XXXII REPORT OF THE SECRETARY OF THE TREASURY.

imports over exports for ten years previous to June 30, 1873, was \$104,706,922, but for the last five years there has been an excess of exports over imports of merchandise amounting to \$920,955,387—an annual average of \$184,191,077. The specie value of the exports of domestic merchandise increased from \$376,616,473 in 1870, to \$823,946,353 in 1880—an increase of \$447,329,880, or 119 per cent. The imports of merchandise increased from \$435,958,408 in 1870, to \$667,954,746 in 1880—an increase of \$231,996,338, or 53 per cent.

There was an increase in the value of the exports of wheat, wheat-flour, and corn, as compared with similar exports of the preceding year, of \$78,253,837, or 39 per cent.; an increase in the value of the exports of cotton of \$49,231,655, or 30.3 per cent.; an increase in the value of the exports of provisions of \$10,184,592, or 8.7 per cent.; and an increase in the exports of live animals of \$4,394,366, or 38.3 per cent. There has also been a noticeable increase in the value of the exports of tallow, oil-cake, vegetable oils, seeds, clocks and watches, hops, wool, and a few other commodities. During the last fiscal year breadstuffs constituted 35 per cent. of the value of our exports of domestic merchandise, cotton 27 per cent., and provisions 15 per cent.

The imports of merchandise for the past year exceeded such imports during any previous year in the history of the country. The leading articles, showing marked increase in quantity or value imported, are coffee, hides and skins, raw silk, and tea, all of which are free of duty, and copper, manufactures of cotton, silk, and wool, fruits, glass, iron and steel, lead, leather, precious stones, leaf tobacco, wool, and zinc. The imports of unmanufactured wool increased from 39,000,000 pounds in 1879 to over 128,000,000 pounds in 1880. The value of the imports of railroad-bars of iron and steel increased from \$70,071 in 1879, to \$4,952,286 in 1880.

During each year from 1862 to 1879, inclusive, the exports of specie exceeded the imports thereof. The largest excess of such exports over imports was reached during the year 1864, when it amounted to \$92,280,919. But during the year ended June 30, 1880, the imports of coin and bullion exceeded the exports thereof by \$75,891,391. During July, August, September, and October of the current fiscal year the imports of specie were \$47,940,805, and the exports were \$4,721,828, making an excess of imports over exports of \$43,218,977.

The large and continued excess of the value of the exports of merchandise over the imports of merchandise appears to render it probable that we shall see a continuation of, and, perhaps, a large increase in, the flow of specie into this country.

EXPORTATION AND IMPORTATION OF CATTLE.

In a letter of February 19, 1880, from this Department to the Speaker of the House of Representatives, the attention of Congress was called to the prevalence of the disease known as pleuro-pneumonia, or lungplague, in neat-cattle, and some recommendations were made as to the proper legislation on the subject.

It may be assumed that this disease has never existed in this country west of the Alleghany mountains; and that it has not for a long time existed in Canada, or in this country near the line of Canada. The exportation of live horned cattle from the United States is very large, and is rapidly increasing, the cattle going mostly to Great Britain. For the eight months ended August 31, 1880, the value of such animals exported was \$12,462,837, which is nearly double the value of the exportation for the same period in 1879.

By an order of the Privy Council of Great Britain, all American cattle must be slaughtered at the port of arrival within ten days. effect of this order is to prevent the shipment of any but fat cattle; and it entails great loss as to that class of animals, by compelling the immediate slaughter of such as are injured, or become sick upon the voyage, and therefore of little value for food. It also prevents the owners from driving the cattle from the port of importation to a better market, or from keeping them until the market improves. Furthermore, there is a large demand in England for store or stock-cattle, to be fed and fattened in that country for its own markets, a demand which this country could supply to an unlimited extent. It is believed that this trade, if unrestricted, might far exceed the trade in fat cattle. The losses and embarrassments by reason of the order for immediate slaughter are, commercially considered, very great. The British government, however, is ready to rescind it when it may be done without danger of spreading pleuro-pneumonia in their country through importations from the United States.

The question of the rescission of the order has been the subject of official discussion between this Government and the Government of Great Britain, as well as in Parliament. It is believed that whenever Congress makes provision for the extinction or prevention of the disease, or for such security of the great routes of travel from the West to the seaboard as will make it reasonably certain that the cattle shipped from our ports, or any of them, will not carry infection with them, the order of Council requiring immediate slaughter will be rescinded.

The recommendation that a commission be created, whose duty it shall be to investigate reports of the existence of the disease, and to iii

XXXIV REPORT OF THE SECRETARY OF THE TREASURY.

collect information respecting it, reporting the results to some Department for official publication, is renewed. It is further recommended that such commission be authorized to co-operate with State and municipal authorities, and corporations and persons engaged in the transportation of neat-cattle, and establish regulations for the safe conveyance of such cattle from the interior to the seaboard, and the shipment of them, so that they may not be exposed to the disease; and that such commission, also, may establish such quarantine stations and regulations as may be deemed necessary to prevent the spread of the disease by importations from abroad. It is believed that the legislation thus indicated, properly executed, will induce the Government of Great Britain to rescind its order for immediate slaughter, and thus promote a very large increase in the exportation of neat cattle from this country. Whether Congress should go further, and undertake the extirpation of the disease in the States where it now exists, is a question of more difficulty, and it is deemed best to leave that part of the subject for independent consideration.

COMMERCE AND NAVIGATION.

The records of the Register of the Treasury show that the total tonnage of vessels of the United States, at the close of the fiscal year ended June 30, 1880, was 4,068,034 tons. Of this amount 1,352,810 tons were comprised in 2,378 vessels registered for the foreign trade, and 2,715,224 tons in 22,334 vessels enrolled and licensed for the coasting trade and fisheries. There has been a decrease of 138,723 tons in vessels employed in the foreign trade, and a decrease of 37,157 tons in such as were engaged in the domestic trade.

The vessels built during the last fiscal year, with their tonnage, are exhibited in the following table:

OMMIDIOU IN DECIDIO WING COMMING	Number.	Tonnage.
Sailing-vessels	460	59,057
Steam-vessels	348	78,854
Canal-boats enrolled	17	1,887
Barges	77	17,612
Total	902	157,410
	====	

The decrease in the tonnage built during the last fiscal year, as compared with that of the preceding year, was 35,620 tons.

TRADE IN AMERICAN AND FOREIGN BOTTOMS.

The total tonnage of vessels entered at the seaboard ports from foreign countries was 13,768,137 tons during the year ended June 30, 1879, and 15,240,534 tons during the last fiscal year, showing an increase

0

of 1,472,397 tons, or about $10\frac{1}{2}$ per cent. The American tonnage entered exhibited an increase of only 78,631 tons, or $2\frac{1}{2}$ per cent., while the foreign showed an increase of 1,393,766 tons, or about 13 per cent. The tonnage in these cases is computed on the basis of the number of entries of vessels and not on the number of vessels, and is restricted to the seaboard ports. Of the merchandise brought in at seaboard, lake, and river ports during the last fiscal year, an amount of the value of \$149,317,368, was imported in American vessels, and \$503,494,913 in foreign; of the exports of merchandise an amount of the value of \$109,028,860 was shipped in American and \$720,770,521 in foreign vessels. Of the combined imports and exports of merchandise 17 per cent. only of the total value was conveyed in American vessels.

In 1856 over 75 per cent. of the total value of the imports and exports was carried in American vessels, while last year but 17 per cent. was carried in such vessels, though the total volume of commerce has risen from a value of \$724,000,000, to over \$1,500,000,000.

The disproportion between the commodities carried in American and those carried in foreign vessels still continues, and is even greater than during the fiscal year 1879, the amount of merchandise transported in our vessels during the fiscal year 1880, estimated on the basis of value, being five per cent. less than that transported during the former year.

The foreign carrying trade in American bottoms is more than 50 per cent. less than it has been, or than it might be, and if it is desirable to save to the country the annual freightage on merchandise of the value of twelve hundred millions of dollars, the only course to reach that result would seem to be to increase our registered shipping. But while the ordinary demand for increased tonnage causes no annual increase in the building of vessels, the only method available, as a measure of public policy, of effecting such an increase, is either to allow American citizens the privilege of purchasing vessels of foreign build, to give a bounty on home built vessels, or to await the increase of American-built vessels and their tardy substitution in the foreign trade for those of other Doubtless the number of vessels of home-build will be adequate in time to take up the freightage lost to American bottoms in consequence of the war of the rebellion. At present, however, the demand for vessels to carry on our immense import and export trade does not seem to so stimulate the ship-building industry as to prevent an annual decrease in the number of ships built. The present facilities for freighting in foreign vessels appear to be a greater discouragement to that industry than would be the privilege of purchasing such vessels.

XXXVI REPORT OF THE SECRETARY OF THE TREASURY.

PREVENTION OF COLLISIONS AT SEA.

In 1864, Congress established certain rules and regulations for preventing collisions on the water which are still in force. The principal maritime nations of the world have recently concurred in adopting a new code of regulations for the same purpose. These regulations went into operation on the first of September last. In many points they differ materially from those adopted in 1864 which govern our own mercantile and naval marine. The result is, that our vessels are subject, in certain contingencies, to one set of rules for navigation in foreign waters and to different ones when sailing in our own. In cases of collision accordingly, they are subject to liabilities, which vary with the waters in which they are employed, most foreign maritime courts conforming in their decrees to the new regulations, while our own adhere to the regulations of 1864.

I would recommend that this uncertain status of our vessels be removed by the prompt acceptance by statute of the regulations already adopted by other nations, leaving the correction or amendment of the regulations to international arrangement if Congress should consider such amendment imperatively required.

INTERNAL COMMERCE.

The reports of tonnage moved on the principal trunk-railroad lines of the country, and the more recent data in regard to traffic on inland water lines and coastwise upon the ocean, indicate that the internal commerce of the United States has rapidly increased during the past year. Railroads now constitute the principal avenues of our internal trade. The traffic over the four east and west trunk lines greatly exceeds in value both the commerce of the Mississippi river and its tributaries and the commerce on the Great Lakes.

Through the facilities afforded for continuous traffic by means of combinations entered into between connecting railroads and between railroads and ocean-steamer lines at the principal seaports of the country, the interior cities are now able to carry on a direct trade not only with all parts of the country, but are also able to engage in direct foreign commerce, both as to the exportation of American products to other countries and to the importation of foreign merchandise into the United States. Through these facilities all the principal cities of the country have been brought into direct competition with each other. The sphere of the commercial operations of each city has been greatly extended, while competition has become sharper and profits have been reduced to a narrower margin. The varied productions and industries

of the different States and sections of our country present highly favorable conditions for the development of internal trade. Already our internal commerce many times exceeds in value our foreign commerce. Its rapidly-increasing importance seems to justify a more liberal appropriation than has heretofore been made for the purpose of collecting and presenting annually information in regard to it, especially such information as may be of service for the use of Congress.

CLAIMS.

If the necessity of legislation for the adjudication of claims now within the jurisdiction of this Department has been called to the attention of Congress in several former reports. It is deemed unnecessary to repeat in detail the reasons which exist for the enactment of the measures which have heretofore been recommended. It will be sufficient to call the attention of Congress, in a condensed statement, to the objects which it is proposed to accomplish.

As suggested in a former report, the great object of legislation on the subject of claims is, to render their adjustment speedy and final and to discourage the allowance of old demands, or the re-examination of those already settled. A general provision of law by which all important disputed questions of law or fact may be referred to the Court of Claims for trial, would greatly relieve the officers of this Department, and tend to promote the ends of justice. That tribunal adopts the methods used by all courts of justice for ascertaining the truth, which include the requirement of the best evidence of which the nature of the case admits; the cross-examination of witnesses, instead of ex parte statements; and public hearings, and a public record of proceedings. In such legislation express provision should be made against the rehearing of claims which have been once adjudicated in any court, or by Congress, or by the accounting officers of the Treasury, or that have been barred by any statute of limitations.

The former recommendation that some limitation of time within which claims against the Government shall be prosecuted, or, for want of such prosecution, be forever barred, is renewed. For the reasons which have introduced statutes of limitation into the codes of all civilized nations, it is again recommended that it be provided by law that no claim pending in any of the Executive Departments shall be allowed unless presented for payment within six years after such claim has accrued, with the usual exception in the case of those prevented by infancy or otherwise from presenting their claims within such time, and that provisions of a similar character in favor of those against whom the Government holds claims may be enacted. The Department

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

is well organized for the investigation of claims accruing in the ordinary course of current business, and decisions thereon by the accounting officers made final by existing laws should not be referred to the Court of Claims or any other tribunal for examination.

TRIBUNAL FOR TRIAL OF REVENUE CASES.

About two thirds of the customs business of the country is transacted at the port of New York. The multiplicity of suits growing out of the vast amount of business constantly crowds the dockets of the courts, so that there is great delay in the decision of cases. The speedy decision of customs cases is of great importance both to the Government and to the importers, and great embarrassment ensues in the administration of the customs laws from the usual delay of three or four years before a final decision can be reached.

The Secretary renews his recommendation that a special tribunal be created by law for the trial of customs-revenue cases at the port of New York.

He also repeats his recommendation that the Secretary of the Treasury be authorized, in cases of variance between the appraised value, or classification for duty, of similar merchandise at two or more ports of the United States, to prescribe regulations under which the board of general appraisers, or a majority of them, may decide upon the true dutiable value or classification of such imports; and that authority be given for the appointment of three additional general appraisers.

BUREAU OF ENGRAVING AND PRINTING.

During the year the building for the Bureau of Engraving and Printing, authorized by the act of June 20, 1878, has been completed, and the bureau has been removed from the Treasury Department building, without occasioning any material delay in its business, and successfully established in its new quarters.

The bureau now has superior facilities for executing the work pertaining to it; and, as it has been demonstrated that such work can be executed therein more safely and more economically, all things considered, than elsewhere, the necessary steps have been taken to have all the work of engraving and plate-printing, required by the Treasury Department, to be performed in the bureau.

PRINTING INTERNAL-REVENUE STAMPS.

In making the appropriation for "dies, paper, and stamps" for the present fiscal year, Congress required that the engraving and printing of internal-revenue stamps should be done in the Bureau of Engraving and Printing of the Treasury Department, provided the cost did not

exceed the price paid under existing contracts. In accordance with this requirement, an estimate was procured from the bureau for the printing of certain internal revenue stamps, then being done under contract with the American Bank-Note Company of New York, and, as the rates proposed in the estimate appeared to be lower than those paid to the company, the contract with the company was annulled as soon as practicable, and, in the month of October, the printing of the stamps was transferred to the Bureau of Engraving and Printing, where it is now being done with advantage to the Government.

DISTINCTIVE PAPER.

The new distinctive paper, the adoption and manufacture of which was mentioned in the last annual report, has been used for printing notes, certificates, checks, and other obligations since January last, and has been found to answer the requirements of the Government in all respects. It is believed that the special features of this paper will afford increased protection against counterfeiting, while its superior quality, and consequent longer life while in circulation, renders its adoption a measure of economy as well as safety.

It is estimated that the saving on account of the reduction in its price below that paid for the paper heretofore used will be not less than \$50,000 for the present fiscal year. If a large supply of paper should be required for an issue of bonds during the year, the saving will be correspondingly greater.

LIGHT-HOUSE ESTABLISHMENT.

The Light-house Establishment continues in its usual satisfactory condition. During the fiscal year it has put into operation twenty-five new light-houses, eighty-two new river-lights, one new fog signal, eleven new automatic whistling-buoys, and fifteen new buoys of the ordinary kind. It has discontinued eight lights, which were no longer needed, and has changed the characteristics of twelve others, so that they will be more useful than heretofore to commerce and navigation.

The board has continued the work of changing the burners of the smaller lights in the several light-house districts, so as to substitute mineral oil for lard-oil as an illuminant, until mineral oil is now used in all its lights, with the exception of about one hundred and twenty five of the first, second, and third orders. The board has also, by careful and long-continued experiment, been enabled to use mineral-oil as an illuminant on light-ships and in screw-pile light-houses, as it is believed, without danger to these isolated stations. In so doing it has, in each instance, increased the power of the light, while it has at the same time decreased its cost.

The board has continued its experiments with the electric light as far as was possible in the laboratory. It will be unable to determine its practical value until it has a working-test in a light-house. It has again submitted an estimate for this purpose, which is commended to the attention of Congress.

The curious and interesting experiments of the board, to ascertain the laws of sound when acting through fog and snow, have been continued, and seem to be tending to practical results of importance to commerce.

COAST AND GEODETIC SURVEY.

In the coast and geodetic survey, the work of its several branches has advanced steadily. For public uses essential in engineering and in local development generally, information is gathered by a comprehensive system, which gives results of great exactness. Relative positions along the coast and on the continent are ascertained by final measurements. Permanent dangers to navigation are carefully marked on the charts of the survey, as well as their relation to lighthouses, buoys, beacons, and sailing lines. The publication of a third volume of the Atlantic Coast Pilot, with sailing directions and descriptions of the local dangers, is in progress, and good advance has been made in a compilation of the same kind for the Pacific coast. For the principal ports of the eastern and western coasts of the United States, tide-tables are computed one year in advance, and printed for the use of navigators. All the publications of the survey are in great request. The demand for its charts has greatly increased. Of upwards of eighteen thousand points determined in latitude and longitude along the coast, and in parts of the interior, the intervening distances and bearings of the junction-lines are recorded in the office, with descriptions of the ground-marks; and thus, what was indispensable for the coast development avails for State surveys. The requisitions for such data increase in number yearly. The annual reports of the survey show that the Engineer department, the Light-house Board, harbor commissions, and State authorities have drawn largely from this source for information necessary in connection with proposed improvements-Calls are frequent in regard to the variation of the compass for the past as well as for the present time. For the present era the variation in all parts of the United States is shown by a map published within the year. Deep-sea soundings made within the year have incidentally added subjects of special interest for the study of naturalists. Within the year the survey has co-operated with the Mississippi River Commission.

THE MARINE-HOSPITAL SERVICE.

The Supervising Surgeon-General of the Marine-Hospital Service reports that 24,860 seamen were afforded relief during the fiscal year ended June 30, 1880, and 290,501 days' relief in hospital were furnished; 13,697 patients were treated at the dispensaries; 795 persons were examined physically as a preliminary to shipping them; 2,870 pilots were examined for color-blindness, of whom 64 were found to be color-blind; and 25 seamen, hopelessly diseased, have been furnished transportation from hospitals to their own homes. The number of patients treated shows an increase of nearly 4,000 over the previous year, and the cost per capita has been reduced to \$1618, the lowest rate yet reached. The ordinary expenses of the service have been \$370,744 64, and the extraordinary expenses \$31,440 85, making a total of \$402,185 49, the details of which will be found in the report of the Surgeon-General.

The first section of the act approved March 3, 1875, directed the Secretary to "cause to be prepared a schedule of the average number of seamen required in the safe and ordinary navigation of registered, enrolled, and licensed vessels of the United States, basing such schedule upon the differences in rig, tonnage, and kind of traffic;" and, after its preparation, to assess and collect hospital dues from the master or owner of the vessel upon the average number of seamen as set forth in the schedule. The Department has made every effort to prepare such a schedule as would meet the requirements of the law, but has found it to be impossible. It is therefore recommended that the provision be repealed. The details of the subject will be found in the report of the Surgeon-General.

The recommendations made in the last annual report relative to statutory provisions for appointments and promotions in the medical corps of this service, and for the compulsory physical examination of seamen, are respectfully renewed.

Provision should be made for the return to the marine-hospital fund of the proceeds of sale of all property originally purchased for or produced from it, such proceeds being now covered into the Treasury. There is now in the Department, as a special deposit, \$1,309 14, unclaimed money of deceased seamen, and there are in the several custom-houses and marine-hospitals unclaimed effects, such as watches, jewelry, and clothing, of considerable value. It is recommended that the sale of such effects be authorized, and that the proceeds thereof, and the unclaimed money referred to, be permitted to be carried to the credit of the marine-hospital fund.

The Secretary recommends that a National Sung Harbor or Sailors'

Home be established by law for the reception of destitute American seamen incurably diseased or permanently disabled in the line of duty, and placed under the direction of the Marine-Hospital Service. After provision is made for a site and buildings, it is believed that the ordinary expenses could be met from the marine hospital fund. The physical examination of seamen, before allowing them to be shipped, would, by keeping disabled men out of the merchant service, rid the hospitals of hundreds, and thus leave a surplus for this purpose. The number of American seamen in our vessels is diminishing from year to year, and their places are filled by foreigners. A provision for the support of seamen in disease and old age, it is believed, will greatly increase the enlistment of native citizens in the merchant marine.

As a measure in the interest of American commerce, it is also recommended that the "advance wages," authorized by section 4532 of the Revised Statutes, be abolished; and the form of "articles of agreement," in section 4612, be amended accordingly.

It is recommended that section 4569, Revised Statutes, which requires a medicine-chest to be kept on merchant vessels, be amended by providing that each vessel, before clearance, shall present, to the collector of customs, a certificate of an officer of the Marine-Hospital Service that the medicine-chest is properly supplied.

It is also recommended that an appropriation be made, to be expended under the direction of this service, for the relief of seamen shipwrecked in places beyond the reach of the Life-Saving Service.

LIFE-SAVING SERVICE.

The pastyear appears to have been remarkable in the operations of the Life-Saving Service. The season was marked by numerous storms of great severity, resulting in disaster to a larger number of vessels upon our shores than in any previous year since the organization of the service, and severely testing the ability and fidelity of its crews, and the methods employed for the saving of life. The gales upon the lakes were especially violent, the consequent casualties to shipping within the reach of this service being one hundred and thirty-six, but of the nine hundred and seven lives endangered in these disasters only a single one was lost.

On the Atlantic coast, also, the storms were very destructive to shipping. The number of lives imperilled in disasters within reach of the service was one thousand and forty-nine, of which only eight were lost.

The whole number of disasters to vessels during the year, reported by the district officers, is three hundred. The number of persons on board these vessels was nineteen hundred and eighty-nine, of whom nineteen hundred and eighty were saved, and nine lost. Succor was given at the stations to four hundred and fifty persons. The number of days' relief afforded was twelve hundred. The estimated value of property involved was \$3,811,708, of which \$2,619,807 was saved, and \$1,191,901 was lost. The number of vessels totally lost was sixty-seven.

It may be proper to call special attention to the loss of six men of the crew at the Point aux Barques station, a crew distinguished for many brilliant rescues, the members of which, after having this year saved nearly a hundred lives, all perished, except one, in a gallant effort to reach a distressed vessel.

Six new stations have been completed and put in operation during the year upon the Gulf coast, involving the organization of a new life-saving district, designated the eighth. For the remaining stations authorized by Congress to be erected, plans and specifications are ready, and they will be constructed as soon as practicable.

The advance of wages in some localities renders it difficult to retain in the service the trained men, who now render it so efficient, and who cannot easily be replaced. It is recommended, therefore, that the General Superintendent be allowed to fix the compensation of the surfmen, employed at the several stations within defined limits.

Attention is invited to the recommendations of the Superintendent, in his annual report, in relation to increasing the number of stations, to supplying draught-horses for stations where they cannot be readily obtained in emergencies, for the employment of an additional man in each crew, and for additional apparatus at the stations. A bill, in which provision is made for most of these objects, is now pending, and deserves the attention of Congress.

It is worthy of remark that the successes of the service have, during the past year, excited attention abroad, and that the Department has been solicited for aid in introducing the American system into foreign countries.

NATIONAL BOARD OF HEALTH.

The National Board of Health has submitted to the Secretary of the Treasury its annual report of operations, for transmission to Congress, according to the requirement of the act of June 8, 1879.

It appears that the expenditures of the board for the year ended September 30, 1880, amounted to \$266,762 16. While the act provides that the appropriation made by said act shall be disbursed under the direction of the Secretary of the Treasury, on estimates made by the National Board of Health, to be approved by him, no further duty devolves upon the Secretary as to such disbursements than to decide

whether the requisitions made by the board are for purposes within the provisions of law making the appropriation. A large proportion of the amount expended appears to have been used by the board under section third of said act, in co-operating with and aiding State and municipal boards of health in the execution and enforcement of the rules and regulations of such boards to prevent the introduction of contagions or infectious diseases into the United States from foreign countries or into one State from another.

The several amounts for these and other purposes, and for the general expenditures of the board, having been drawn by the board upon requisitions specifying in general the legal and proper purposes for which the funds were to be used, neither the Secretary nor the accounting officers of the Treasury have deemed it their duty to exercise any supervision over the details of the various expenditures of the amounts thus drawn from the Treasury. The Secretary has no reason to believe, however, that the funds have not been properly expended.

PUBLIC BUILDINGS.

The Supervising Architect reports the progress of work on the public buildings as generally satisfactory, but, in several instances, suspension of work has been caused by insufficient appropriations.

It appears that twenty-one buildings are now in process of construction, of which nine are approaching completion. The estimated amount of the appropriations available for their completion is \$217,000. The buildings in the cities of Albany, N. Y., Boston, Cincinnati, New York, (barge office,) Philadelphia, St. Louis, and Topeka, are so advanced that it is estimated that a further appropriation of \$3,700,000 will complete them. Comparatively little progress has been made on the remaining buildings.

It is respectfully recommended that Congress, having fixed upon such an amount as it may deem best to expend on public buildings, shall, out of that sum, appropriate sufficient to complete the nine buildings above referred to, and make liberal appropriations for the work on the buildings in the cities uamed. It is also recommended that, in authorizing the erection of new buildings, consideration be given only to those for localities where the rental paid for accommodations for Government offices, represents a fair percentage on the cost of the construction of suitable buildings. It would seem to be better, and it is certainly more economical, to appropriate freely for buildings in process of construction, than to commence too great a number for the amount appropriated.

The accompanying report of the Supervising Architect will furnish

full details of the progress made in the buildings now in process of erection.

REVENUE MARINE.

The Revenue Marine has performed efficient service during the past year. Its vessels have cruised an aggregate of 265,763 miles, and its officers have boarded and examined 36,318 vessels, of which 23,243 were American, and 13,075 foreign. Of the number examined, 3,556 were found to have violated the law in some particular, and were seized or reported to the proper authorities.

The expenses of the service for the year were \$845,333 74.

Under the provisions of section 1536 of the Revised Statutes, vessels of the Revenue Marine, in addition to their regular duties, are yearly charged with cruising during the inclement season, for the relief of distressed mariners. In the performance of this duty one hundred and fourteen distressed merchant-vessels, representing with their cargoes a value of \$2,011,509, and having on board nine hundred and thirty-five persons, have been assisted during the past year, and sixty-five persons have been rescued from drowning.

Besides the regular duties which officers of the Revenue Marine have performed under the law, in connection with the Life-Saving Service, its vessels have rendered frequent assistance in transporting persons and supplies for that service. They have also rendered special services to the Light-house Establishment and to the United States Commissioner of Fish and Fisheries.

It is recommended that an appropriation be made for the construction of two revenue-vessels to be stationed on the southern coast, and for the rebuilding of the revenue-steamer "Fessenden," now laid up as unseaworthy at Detroit. For these purposes the sum of \$225,000 has been included in the estimates.

Under the provisions of the acts of May 31 and June 16, last, the revenue-steamer "Corwin" was dispatched from San Francisco to cruise within the Arctic ocean and on the northern coasts of Alaska, to assist in the enforcement of the laws governing that Territory, and to relieve the officers and crews of the whaling-barks "Mount Wollaston" and "Vigilant," which are supposed to have been shipwrecked in that region. The cruise of the "Corwin" has resulted in the seizure of two vessels engaged in illicit traffic, the discovery and location of important coal deposits on the coast of Alaska within the Arctic ocean, the collection of valuable ethnological statistics, and the making of useful hydrographic surveys and soundings, but no trace was found of the missing whalers.

STEAMBOAT INSPECTION.

During the past year 4,536 steam-vessels have been inspected, of an aggregate tonnage of 1,121,808 tons, and licenses have been issued to 16,661 officers—an increase over last year of 248 vessels, of 29,454 tons, and of 1,449 officers.

The total receipts, from the inspection of vessels and licensing of officers, were \$282,468 96, and the total disbursements for salaries, and travelling and other expenses, were \$212,849 88, leaving a surplus of receipts over expenditures of \$69,619 08.

There were carried during the year some 220,000,000 passengers, of which number 103 lost their lives by various casualties.

The Board of Supervising Inspectors, at its meeting in January last, adopted a rule relative to the examination of pilots for color-blindness, which requires that, before granting or renewing a license to any person to act as a pilot, inspectors shall satisfy themselves that the applicant can properly distinguish the colored lights used as signals on steam-vessels. To carry this rule into effect, it was deemed advisable that such examinations should be made by the surgeons of the Marine-Hospital Service, and free of charge.

Considerable opposition to this rule was at first manifested, but as every pilot who successfully passed the required examination became its advocate, its opponents now consist of a portion only of the rejected applicants, some, even of these, admitting its propriety, and their own defective vision in regard to colors.

It is believed that the rule referred to will have a tendency to decrease night-collisions between steamers and other vessels.

The Supervising Inspector-General, in his annual report, suggests several amendments to the steamboat laws, deemed by him necessary to further increase their efficiency, which are commended to the consideration of Congress.

ALASKA.

In the last report of this Department attention was called to the necessity of establishing some form of government for Alaska. A form of bill to accomplish this end was subsequently prepared in this Department and transmitted to the House of Representatives for consideration, but thus far no final action on the subject has been taken. The adoption of some simple form of government to protect persons and property, to provide for the record of wills and transfers of property, and possibly to extend the land laws of the United States over the main-land, would encourage immigration and tend to develop the resources of the Territory. A peaceful condition of affairs has, however, prevailed in Alaska during the past year, owing largely to the

presence of a naval vessel at Sitka, and the cruise, already referred to, of the revenue-cutter "Corwin" to its northern and western waters. The inhabitants, except those of the Seal Islands, depend to a large extent for a livelihood upon the traffic in furs obtained from the sea-otter and other valuable fur-bearing animals; and the oft-repeated visits of white men to the haunts of these animals, using fire arms in hunting them, must soon result in their extermination and the reduction of the natives to extreme poverty. The commander of the "Corwin," who visited St. Lawrence Island, reports the death by starvation of over four hundred of the natives, from neglect to make proper provision for the winter, owing to their use of rum, furnished them by the illicit traders.

To protect the sea-otter hunting-grounds and suppress illicit traffic in fire-arms and whiskey, as well as to guard the extensive coast-line against smuggling, there should be provided a steam-vessel especially adapted to cruising in Alaskan waters. The recommendation heretofore made for legislative action to that end is accordingly renewed.

The captain of the revenue-cutter reports the presence of an increased number of seals at the Seal Islands the past season.

The Alaska Commercial Company have taken during the past year the maximum number of seals allowed by law under their lease.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1880, were \$3,272,384 63. The revenues deposited in the Treasury for the same period were \$1,809,469 70.

From December 1, 1879, to June 30, 1880, the bonded indebtedness has been reduced, by operation of the sinking fund, \$200,423 33; and the annual interest-charge upon the District debt has been reduced \$8,827 66. Since the offices of the commissioners of the sinking fund of the District of Columbia were abolished, and their duties and powers transferred to the Treasurer of the United States by the act of Congress of June 11, 1878, the principal of the funded debt has been reduced \$618,750, and the annual interest-charge has been reduced \$38,981 77.

Under existing law the sinking-fund of the three-sixty-five loan of the District must be invested in bonds of that loan, which do not mature until August 1, 1924; while District bonds bearing higher rates of interest, in which investments can more profitably be made, mature at earlier dates, from time to time. It is recommended, therefore, that authority of law be given for the investment of that sinking-fund in any bonds of the District of Columbia.

PUBLIC SERVICE.

In closing his annual report the Secretary takes pleasure in bearing testimony to the general fidelity and ability of the officers and employés of this Department. As a rule they have by experience and attention to duty become almost indispensable to the public service. The larger portion of them have been in the Department more than ten years, and several have risen by their efficiency from the lowest-grade clerks to high positions. In some cases their duties are technical and difficult, requiring the utmost accuracy; in others, they must be trusted with great sums, where the slightest ground for suspicion would involve their ruin; in others, they must act judicially upon legal questions affecting large private and public interests, as to which their decisions are practically final. It is a just subject of congratulation that, during the last year, there has been among these officers no instance of fraud, The Department is a welldefalcation, or gross neglect of duty. organized and well-conducted business office, depending mainly for its success upon the integrity and fidelity of the heads of bureaus and chiefs of divisions. The Secretary has therefore deemed it both wise and just to retain and reward the services of tried and faithful officers and clerks.

During the last twenty years the business of this Department has been greatly increased, and its efficiency and stability greatly improved. This improvement is due to the continuance during that period of the same general policy, and the consequent absence of sweeping changes in the public service; to the fostering of merit by the retention and promotion of trained and capable men; and to the growth of the wholesome conviction in all quarters that training, no less than intelligence, is indispensable to good service. Great harm would come to the public interests should the fruits of this experience be lost, by whatever means the loss occurred. To protect not only the public service, but the people from such a disaster, the Secretary renews the recommendation made in a former report, that provision be made for a tenure of office for a fixed period, for removal only for cause, and for some increase of pay for long and faithful service.

The several reports of the heads of offices and bureaus are herewith respectfully transmitted.

JOHN SHERMAN,

Secretary.

To Hon. S. J. RANDALL, Speaker of the House of Representatives. TABLES ACCOMPANYING THE REPORT.

1 F.

TABLE E.—STATEMENT of OUTSTANDING PRINCIPAL of the PUBLIC DEBT, &c.—Continued.

Year.	'	Amount.
Tuly 1, 1869		\$2, 588, 452, 213 9 2, 480, 672, 427 8 2, 353, 211, 332 3
1873 1874 1875		*2, 234, 482, 993 2 *2, 251, 690, 468 4 *2, 232, 284, 531 9
1876 1877 1878 1879 1880		*2, 205, 301, 392 1 *2, 256, 205, 892 5

^{*}In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, amounting to \$31,730,000, in 1873; \$53,760,000, in 1874; \$58,415,000, in 1875; \$32,840,000, in 1876; \$54,960,000, in 1878; \$46,755,000, in 1878; \$50,379,000 in 1879, and \$14,465,000, in 1880, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but, being offset by notes held on deposit for their redemption should properly be deducted from the principal of the public debt in making comparison with former years.

STATEMENT of the PUBLIC DEBT, including ACCRUED INTEREST thereon, less cash in the Treasury on the 1st day of July of each year, from July 1, 1869, to July 1, 1880, compiled from the published monthly debt-statements of those dates.

[•] It will be noticed that there is a difference in the amounts represented by these two statements as the principal of the debt July 1, 1869, and July 1, 1870. This difference is explained thus: In the principal of the debt as shown by the monthly debt-statements of these dates, the bonds purchased for the sinking-fund and paid for from money in the Treasury, were included as a part of the outstanding debt and were also treated in the cash as a cash item, or asset, for the reason that at that time there was no authority or law for deducting them from the outstanding debt. Congress, by the sixth section of the act of July 14, 1870, directed that these bonds should be canceled and destroyed and deducted from the amount of each class of the outstanding debt to which they respectively belonged, and such deductions were accordingly made on the books of the department and in the table of the debt in the annual report.

Note 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacino Railway bonds.

Note 4.—In the recent monthly statements of the public debt, the interest accrued has been added to the principal, making the net debt larger in that amount than the amount herein stated for each year.

NOTE 2.—The figures for July 1, 1879, were made up, assuming pending funding operations to have been completed.

NOTE 3.—The temporary loan, per act of July 11, 1862, is included in the 4 per cents. from 1862 to 1863, inclusive, with the exception of the amount outstanding for August 51, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average

Note 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.

*Note 2.—Exclusive of \$8,375,934, amount estimated as lost or destroyed, act June 21, 1879.

Note 3.—The one and two year notes of 1863, and the compound interest notes, though having a legal-tender quality for their face-values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulation for but a few days, if at all, and since maturity, those presented have been converted into circulations.

into other interest bearing bonds, or paid for in eash, interest included.

NOTE 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862, cannot be stated. The amounts stated for 1876, and subsequent years, are the amounts coined

and issued since January, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

TABLE P.—STATEMENT showing the ANNUAL APPROPRIATIONS made by CONGRESS for EACH FISCAL YEAR from 1873 to 1881, inclusive, together with the COIN VALUE of such APPROPRIATIONS computed upon the average price of gold for each year in question.

REPORT OF COMMISSIONER OF INTERNAL REVENUE.

F

57

Digitized for FRASER

REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 24, 1880.

SIR: I have the honor to submit the report of the Bureau of Internal Revenue for the fiscal year ended June 30, 1880, with accompanying tables, exhibiting in detail the receipts from each specific source of revenue by years and collection districts, together with additional facts and figures, showing the operations of the bureau during the months of July, August, September, and October, being the first four months of the current fiscal year.

I am glad to be able to bring to your attention the fact that since my last annual report still further improvement has been made in the con-

dition of the internal-revenue service.

The efforts of the past four years for the suppression of the illicit manufacture and sale of spirits and tobacco have been substantially crowned with success. The frauds upon the revenue and the resistance to authority still existing are confined to a few localities, and I am of opinion that the hearty co-operation of all officers charged with the enforcement of the laws will, before the close of the present administration, have established the authority of the government for the collection of the taxes and the equal enforcement of its laws in all parts of the country.

The discipline, efficiency, and fidelity to duty of the officers of internal revenue have steadily improved; the manner in which they have enforced the laws has promoted the relations of harmony which should subsist between the tax-payer and the government, and I take pleasure in noting the fact of an almost universal disposition on the part of tax-

payers to observe the laws and see them faithfully executed.

* REDUCTION OF TAXATION.

The receipts of internal revenue for the fiscal year 1879 were \$113,449,621.38, showing an increase of \$2,795,458.01 upon the previous year. The receipts for the fiscal year 1880, in the face of the reduction of the tax on tobacco, were \$123,981,916.10, showing an increase of \$10,532,294.72. The receipts for the first four months of the present fiscal year amount to \$43,789,318.30, showing an increase over the corresponding period of last year of \$3,658,213.48. I know of no reason why this increase should not be maintained during the fiscal year, so that the total collections for the year from internal revenue taxes at the present rates would be \$135,000,000.

59

While the receipts from taxes are thus increasing in amount, the demands upon the Treasury are being lessened by the reduction of the public debt, and of the annual interest charge. It is probable, therefore, that Congress will be disposed to relieve the people from some of the internal revenue taxes, and if such a reduction is to be made, I respectfully suggest the following list of taxes collected during the fiscal year 1880 for the consideration of the law-making power:

Bank checks Friction matches Patent medicines or preparations, perfumery, cosmetics, &c Bank deposits Savings-banks deposits Bank capital	3,561,300 1,836,673 2,347,568 163,207	00 22 07 36
Total		

In the event it is deemed advisable to take the tax off matches, patent medicines, perfumery, &c., due consideration should be had to the fact that large stocks of these articles, tax paid, are now in the hands of the trade, and that a very serious reduction in their value, especially of matches, would result if the tax were taken off suddenly, and articles manufactured free of tax were brought into competition with those upon which the existing taxes had been paid. In my opinion an act abolishing these taxes should not go into effect earlier than, say three months from its passage.

The same may be said in regard to check stamps. Considerable stocks of stamped checks are now in the hands of individuals, banks, and bankers, upon which the stamps have been imprinted. I think it would be wise that the operation of the repeal should be delayed at least three

months, so as to give time for the use of these stamps.

Whenever the interests of the government will allow it, I think it will be wise to confine internal revenue taxation to spirits, malt liquors, tobacco, snuff, cigars, and special taxes upon the manufacturers and dealers in these articles. I am of opinion that reliance can be placed upon receiving the sum of \$124,000,000 annually from these sources, which sum would gradually increase with the increase of population, but which would probably be subjected to diminution upon a recurrence of hard times.

In considering the question of relieving patent medicines from internal revenue taxes, it should be understood that many of the articles put upon the market and taxed as medicinal bitters are used as a beverage. Persons engaged in the sale of such articles are not required to pay special taxes as retail dealers in liquors, so that if the articles were relieved from taxation medicinal bitters would be sold everywhere without paying any internal revenue tax whatever.

In passing upon the right of these various medicated bitters to be taxed as such, and sold without payment of the special tax as retail liquor dealers, the office is often seriously embarrassed to find the exact line between a medicinal bitter liable to stamp tax and a compound liquor subject to be sold only as a beverage. In my opinion it would be wise to continue the stamp tax upon all medical bitters containing more than

20 per cent. of proof spirits.

The tax upon savings banks, in my judgment, should be removed, or the whole legislation upon the subject of taxing savings banks should be modified and made more equitable; and there would seem to be no just ground for continuing the tax upon the capital and deposits of banks and bankers if it is found that the revenues are sufficient without it.

ASSESSMENTS ON CIRCULATING NOTES.

The assessments on circulating notes of corporations and individuals under sections 3412 and 3413 United States Revised Statutes, and sections 19 and 20 of the act of February, 8, 1875, amounted, during the year ended June 30, 1880, to \$461,597.82, an increase of \$452,355.20 over those made during the preceding year. The chief motive for issuing the notes upon which these assessments were made was unquestionably to supplement an insufficient capital or to bolster up the waning credit of the firms or corporations making the issues. The large increase in these assessments clearly indicates the disposition of individuals and corporations to flood the country with an insecure "shinplaster" circulation. The existing laws of the United States seem to constitute the only breakwater for the protection of the people against an inundation of every imaginable character of individual and corporate circulalating notes designed to take the place of money. In my judgment those laws should be maintained upon the statute book.

RESISTANCE TO ENFORCEMENT OF THE LAWS.

By reference to the table on page 24, it will be seen that during the last four years and four months, 4,061 illicit distilleries have been seized, 7,339 persons have been arrested for illicit distilling, 26 officers and employés have been killed and 57 wounded, in the enforcement of the internal-revenue laws. During the past sixteen months 1,120 stills have been seized, 1,265 persons arrested, and 10 officers wounded in the enforcement of the laws. While the number of stills seized and persons arrested since my last annual report is very large, I am satisfied that there will be a decrease henceforward in the number of such seizures and arrests.

In January of the present year a combined movement was made, by armed bodies of internal-revenue officers, from West Virginia southward through the mountains and foothills infested by illicit distillers, which resulted in the seizure of a number of illicit distilleries, and the arrest of many persons engaged therein. The effect of this movement was to convince violators of the law that it was the determination of the government to put an end to frauds and resistance to authority, and since that time it has been manifest to all well-meaning men in those regions of country that the day of the illicit distiller is past. Public sentiment has been gradually setting in against these frauds, and I feel assured that if continued efforts are made for the enforcement of the laws the taxes upon whisky and tobacco can soon be collected in the districts where frauds have been so rife without the use of armed posses of men.

For the purpose of preventing old offenders from resuming the business of illicit distilling, I have deemed it advisable to maintain a special force of deputies in many of the districts to police the districts and seize illicit distilleries. These officers are armed and move in small posses so as to deter resistance. They are instructed to establish friendly relations with the people and to encourage the observance of the laws. This system has worked satisfactorily and beneficially, and except in the second district of Georgia there has been very little disturbance during the past few months.

ENCOURAGEMENT OF LEGAL DISTILLERIES.

It has been the policy of this office to encourage the establishment of legal distilleries in those collection districts where illicit distillation has

heretofore prevailed, and there are now 469 licensed grain distilleries in those districts against 380 in 1879, and 177 in 1878. I have felt that if the manufacture of whisky was to be carried on at all in this section of country it was much better that it should be done openly and in full compliance with the requirements of law rather than secretly in violation and defiance of law, and with the demoralizing influences of dishonesty, turbulence, outlawry, and murder, which invariably prevail in a community where illicit distilling is carried on unchecked. The policy thus adopted has worked well. In every county where legal distilleries have been established in any number, illicit distilling has almost entirely ceased, violent resistance to law has become almost unknown, and there has been a large increase of revenue.

It must be understood that many of the legal distilleries thus established have no greater capacity than ten gallons per day, and that it is necessary for the protection of the rights of the government to have a storekeeper and gauger assigned to each distillery. It is thus obvious that the expense of collecting the taxes upon the spirits so made is very heavy, and necessarily increases the estimates for this year for the pay of storekeepers and gaugers. It is, however, unquestionable that it is far preferable to incur this expenditure to secure the collection of the revenue and an orderly observance of the laws than to spend large sums of money in the employment of raiding parties for the seizure of illicit distilleries and the arrest of illicit distillers. So long as the government looks to the tax upon distilled spirits for a large proportion of its revenues, it is just and right that every producer of distilled spirits shall be held to the payment of his legal tax, and such appropriations should be made as will enable the executive branch of the government to enforce the tax law so as to collect the revenues justly from all alike.

I have the honor to earnestly recommend that the appropriation asked

for for this service be granted.

PROTECTION OF REVENUE OFFICERS.

I again recommend additional legislation for the protection of the lives and persons of officers of the United States from the unlawful assaults of those who resist their authority, and refer to the remarks on this subject in my last annual report, page v.

FRAUDS IN THE MANUFACTURE OF VINEGAR.

I respectfully direct attention to House bill No. 6460, entitled "A bill to regulate the manufacture of vinegar by the alcoholic vaporizing process," now pending in Congress, and urgently request that the same be taken up and passed into law at the earliest practicable moment. state without hesitation that the provisions of section 5 of the act of March 1, 1879, authorizing the use of a process for the vaporizing of alcohol in the manufacture of vinegar, has opened the door to frauds upon the revenue which cannot be guarded against successfully under While the great majority of manufacturers of vinegar existing laws. by this process are, no doubt, following a legitimate and honest business, I am convinced that there are many who have engaged in the business for the express purpose of defrauding the government out of its tax upon distilled spirits. As was shown before the Committee on Ways and Means of the House of Representatives, at its last session, it is easy for a manufacturer of vinegar by this process to produce lowwines of 50 or 60 per cent. strength. As there are no storekeepers or

other government officers connected with these establishments, it is obvious that these low-wines may be removed and sold as distilled spirits without the payment of the tax if the vinegar manufacturer sees fit to The law authorizing the vaporizing of alcohol by vinegar manufacturers should either be repealed, or else a government storekeeper should be stationed at each vinegar factory using this process, the expense of such storekeeper to be borne by the manufacturer.

EMPLOYÉS ON THE STAMP ROLL.

Sections 321, 3238, 3312, 3328, 3330, 3341, 3369, 3395, 3445, and 3446 of the United States Revised Statutes charge the Commissioner of Internal Revenue with the duty of procuring and issuing appropriate stamps for all internal revenue taxes imposed by law. Most of these stamps are now being produced by the Bureau of Engraving and Printing. are delivered to the Commissioner of Internal Revenue, and are by him

issued to collectors of internal revenue, and sold to tax payers.

The work of issuing all stamps, except stamps on bank checks and tinfoil tobacco wrappers, directly from the Internal Revenue Bureau, was commenced in September, 1877, since which time nearly \$334,000,000 worth of stamps have been sent out. The accounting officers of the Treasury Department charge to the Commissioner the stamps delivered to him by the Bureau of Engraving and Printing, and credit him with all stamps properly issued and sold. The honorable First Comptroller, who passes upon these accounts, has expressed to the Commissioner the opinion that he (the Commissioner) is personally liable to the government for the safe-keeping and proper issue of these stamps.

When it became necessary to employ a force to perform the work of receiving and issuing these stamps the question arose as to who should exercise that power, the law making the appropriation for dies, paper, and stamps requiring that the sum appropriated should be expended "under the direction of the Secretary of the Treasury." Upon consultation between the Secretary of the Treasury and the Commissioner of Internal Revenue it was then decided that the Commissioner was the proper officer to employ that force. The number of persons to be employed and the salaries to be paid them were fixed by the direction and with the approval of the honorable Secretary. The Commissioner then proceeded to employ the necessary force, and from month to month the pay-rolls for the persons so employed were passed by the accounting officers and paid without question.

On the 28th of June last, the following letter was received:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., June 28, 1880.

SIR: I am in receipt of the letters of the acting Commissioner of the 24th and 26th instant, informing me of the employment of a messenger in your office, and of certain persons to be employed at East Pepperell, Mass., all to be paid from the appropriation

The legislative bill approved the 15th instant, provides that the appropriation for that purpose for the next fiscal year shall be expended under the direction of the Secretary of the Treasury. You will, therefore, please transmit to this office any recommendations which you may have for the employment of the persons named in the two above-mentioned letters, or for the employment of any other persons paid out of the above appropriations, and will notify them that their services will not be required on and after the first proximal unless previously authorized by the Secretary and after the first proximo, unless previously authorized by the Secretary.

Very respectfully,

JOHN SHERMAN, Secretary.

Hon. GREEN B. RAUM, Commissioner of Internal Revenue.

Under the instructions of this letter the persons employed upon the stamp-roll by authority of the Commissioner were discharged, and a majority of them were subsequently re-employed by direction of the Secretary of the Treasury. The effect of this letter was to divest the Commissioner of an authority which had been exercised by him for nearly three years under the sanction of the Secretary.

The principle seems to me well established that no officer shall be held pecuniarily responsible for the neglect or dishonesty of an employé in whose appointment he has no voice, and I respectfully submit that the sections of law above referred to impose such duties and confer such powers upon the Commissioner of Internal Revenue, taken in connection with his pecuniary responsibility for the custody of these stamps, as should carry with them authority to select and employ the persons engaged in the work of receiving, counting, caring for, and issuing said In coming to this conclusion I have duly considered the constitutional provision which authorizes Congress to empower the heads of departments to appoint inferior officers, and that section of the act above alluded to appropriating money for dies, paper, and stamps, which provides that the same "shall be expended under the direction of the Secretary of the Treasury." The persons employed upon this work are not "officers"; they are clerks, book keepers, counters, and messengers. And the statutory provision is, in my opinion, fully met by the Secretary directing the number of persons to be employed and fixing their pay, thus controlling the expenditure of the appropriation. changed system persons who were regarded by the Commissioner as competent and experienced in their work and were satisfactory to him have been removed, and others without experience and unknown to the Commissioner have been substituted.

With the utmost respect to the honorable Secretary I will say that in my opinion this action is erroneous in principle and in law, and in my judgment should be revoked. The Commissioner of Internal Revenue should not be chargeable with the shortcomings of persons employed in the business of handling \$150,000,000 worth of stamps per annum without having the selection of such persons, and I respectfully recommend that if upon a further consideration of this question the honorable Secretary entertains a doubt as to the correctness of the positions above stated, legislation should be asked for to place the authority of selection and employment in the hands of the officer on whom rests the pecuniary responsibility for the conduct of the persons employed.

APPOINTMENT OF STOREKEEPERS, GAUGERS, AND TOBACCO INSPECT-

For about twelve years preceding June 30 last, under a plan adopted by Hon. Hugh McCulloch, Secretary of the Treasury, the correspondence with collectors of internal revenue and others in respect to the appointment and removal of storekeepers, gaugers, and tobacco inspectors was conducted by the Commissioner of Internal Revenue, and the appointments were made on his recommendation. This system was changed by the following circular:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., June 30, 1880.

To Collectors of Internal Revenue and others:

On and after July 1, 1880, any application for appointment to the office of gauger storekeeper, storekeeper and gauger, or inspector of tobacco in the internal-revenue service will be made to the Secretary of the Treasury, and in each case will be in the handwriting of the applicant, and signed by him, stating his age, legal residence, where born, and service in the Army or Navy, if any. The application must be accompanied by testimonials as to character for sobriety, industry, and business habits. Collectors of internal revenue will report to the Secretary of the Treasury when-

ever the necessities of the service require new appointments or removals of incumbents, giving the reasons therefor, and forwarding to this office the papers in each case. Removals from office of any of the above-named officers will hereafter be made only

by the Secretary of the Treasury.

JOHN SHERMAN, Secretary.

The correspondence in respect to these appointments and removals is now carried on by the Secretary of the Treasury through the Appointment Division of his office. Having observed the workings of the new system since its inauguration, I deem it my duty in the interest of the public service, to point out the reasons why, in my judgment, this work can be better done by the Commissioner of Internal Revenue.

By existing laws all the officers enumerated in this circular perform their duties under the general instruction of the Commissioner of Internal Revenue, to whom they make return of work done upon forms pre-In the case of storekeepers, they are assigned to duty by the Commissioner, and in the case of gaugers, their accounts are audited by him. Revenue agents, under the instructions of the Commissioner, constantly supervise the work of these officers and report upon the same, and periodically inspect them and report as to their capacity and fidelity to duty. No new distillery can be started without the approval of the Commissioner of Internal Revenue, and reports of the closing of distilleries are promptly made to him; a record is kept in his office of the assignment of all storekeepers and gaugers. are in the Internal Revenue Bureau persons who are experts in the work of gaugers and storekeepers, and who are able to and do criticise their work so as to keep the Commissioner advised upon these matters. This condition of things enables the Commissioner of Internal Revenue to decide when it is proper to appoint new officers in a district, and also when an officer in consequence of neglect of duty or incapacity should be removed. These means of information are not in the Secretary's office.

It may be proper to say that the appointment clerk and his assistants frequently obtain verbal information from this office in regard to matters connected with the appointment and removal of officers of this class. This, however, is always in an informal way, no record being made of

the matter on either hand.

I have not questioned and do not question the right of the Secretary to obtain information from such sources as he may deem proper upon which to make these appointments and removals, but it occurs to me that the officer who by law has charge of the general superintendence of the collection of the revenues and who has so much to do with the officers in question should be consulted as to the necessity of making appointments and the propriety of making removals.

The plan adopted by the foregoing circular was tried for a short time by Secretary McCulloch, with this exception, that he expressly invited the aid of the Commissioner in regard to removing incompetent persons from office, but the system was not found to work well and was aban-

doned.

k I claim that the storekeepers and gaugers have during the past four years steadily improved in their knowledge of law and regulations, in diligence and fidelity in the performance of their duties, and in their pride in the service. This corps of officers for efficiency and discipline is

not excelled by any branch of the civil service, and this state of things is the outgrowth for the most part of the measures set on foot at this office for the improvement of the service. The same system of examination and inspection adopted for collectors' offices, with a similar grading according to a scale of merit, has been applied in the case of storekeepers and gaugers, and the result has been aloudable ambition on their part to excel in intelligence and efficiency in the discharge of their duties. It is obvious that the effect of this system will be lost, and that officers will be made indifferent to or independent of criticism or commendation by this office when it is understood that only on the recommendation of a collector will a removal be made.

In my judgment it would be wise for the honorable Secretary of the Treasury to reconsider this subject with a view to a modification of his

present order.

IMPROVEMENTS IN THE PUBLIC SERVICE.

In administering the Internal Revenue Office during the past four

years I have directed my efforts-

1st. To popularizing the internal revenue system of taxation, so that tax-payers everywhere would cheerfully observe the laws, and a healthy public sentiment would be aroused favorable to their enforcement.

2d. To break up frauds of every kind, especially the illicit manufacture and sale of spirits and tobacco, and thoroughly establish and maintain the supremacy of the laws of the United States.

3d. To correct abuses of administration, especially the institution of

suits and prosecutions for trivial and technical violations of law.

4th. To bring into the public service honest, capable, and efficient men, to increase them in the knowledge of their duty as prescribed by law and regulations, and to stimulate a just spirit of emulation amongst officers in the performance of duty.

5th. To establish a more perfect and uniform system for the transaction of the public business by collectors in their offices and by their deputies in their divisions, and to insure strict accountability for the

public funds.

6th. To secure a prompt and careful transaction of the public business in the Bureau of Internal Revenue, and so to dispose of such business as had accumulated during past years that the labor of the office might be directed to current work.

Some of the leading improvements in the public service which have

been effected are hereinafter recapitulated.

RELATIVES IN OFFICE.

Upon an examination of the *personnel* of the internal revenue service, I deemed it advisable to issue to each collector the following circular, known as Circular Letter 44, which was approved by Hon. R. C. McCormick, Acting Secretary:

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE.
Washington, August 17, 1877.

The reports of collectors, in reply to Circular No. 42, dated June 19, 1877, disclose the fact that in a number of districts the officers and employés appointed by collectors or upon their recommendation, are, to a large extent, related by blood or marriage to such collectors; or, if not so related, are related to each other, so that, in fact, the selection of officers and employés in many instances is confined to a few families, upon whom alone fall the responsibilities and emoluments of office.

I regard this condition of affairs as an abuse in administration, the continuance of

which is incompatible with the best interests of the public service, as greatly tending

to a lax discipline, and to the condonation of irregularities.

For the purpose of rectifying this condition of things, collectors will observe the following rules in respect to the officers and employes of their respective districts:

First. Of persons related to a collector by blood or marriage, but one shall be retained in office.

Second. Of persons not related to a collector, but related to each other by blood or marriage, but one shall be retained in office.

Collectors will make the necessary recommendations for the appointment of gaugers, storekeepers, and storekeepers and gaugers, and change their force of deputies and clerks so as to have their respective forces conform to the foregoing rules. All changes under this circular will take effect on or before the 1st day of October, 1877.

GREEN B. RAUM, Commissioner.

The principle of this circular has, I think, received the approbation of the public, and its enforcement has been beneficial to the service.

EX PARTE DEPOSITIONS.

In my annual report for the year 1876, I recommended the passage of a law in regard to the taking of depositions for use in internal revenue No such act having been passed by Congress, and believing that the system which had long prevailed of deciding cases upon ex parte evidence should be changed, I issued the following circular:

> TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE. Washington, D. C., October 30, 1877.

In all claims for abatement, refunding, drawback, or reward for information, all applications for compromise, all contested questions as to claims of the government for taxes not assessed, and generally in all matters wherein additional testimony is required to be taken, no ex parte affidavit or deposition will be considered unless the same shall have been taken after due notice to the Commissioner as herein prescribed.

Such notice must state the time and place at which, and the officer before whom, the testimony will be taken; the name, age, residence, and business of the proposed

witness, with the questions to be propounded to the witness, or a brief statement of the substance of the testimony he is expected to give.

The notice shall be delivered or mailed to the Commissioner a sufficient number of days previous to the day fixed for taking the testimony, to allow him, after its receipt, at least five days, exclusive of the period required for mail-communication with the place at which the testimony is to be taken, in which to give, should he so desire, instructions as to the cross-examination of the proposed witness.

Whenever practicable the affidavit or deposition should be taken before a collector

or deputy collector of internal revenue, in which case reasonable notice should be given to the collector or deputy collector of the time fixed for taking the deposition or

It will be observed that these regulations relate to affidavits and depositions additional to those presented with the claim or matter in question as now provided for

under existing regulations.

The foregoing regulations are not intended to preclude the examination of witnesses before the Commissioner; and he also reserves to himself the right to receive and consider affidavits as to which previous notice has not been given where the reason for failure to give such notice shall appear to him to be sufficient, and also in other cases in which, from their exceptional character, or the character of the affidavit, he shall be satisfied that the rule should not be enforced.

These regulations shall apply to all matters of the character first above mentioned pending in this office on and after the first day of December next.

GREEN B. RAUM, Commissioner.

Approved: R. C. McCormick, Acting Secretary.

The enforcement of this circular has rendered the evidence upon which action is had in internal revenue cases very much more definite and satisfactory than was practicable under the system previously prevailing.

PROSECUTIONS FOR TECHNICAL VIOLATIONS OF LAW.

For the purpose of preventing the institution of suits and prosecutions for technical and trivial causes, I addressed to collectors of internal revenue the following letter:

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE Washington, April 25, 1878.

Sir: The number of cases for violations of the internal-revenue laws that are placed upon the dockets of the courts throughout the country is so great, and the expenditure for the trial of these cases is so large, and in many courts, in consequence of the great number of cases, the delay in bringing cases to trial is so great, that it becomes a matter of great importance that the officers of the government should observe the utmost degree of care in bringing cases into court in view of the facts above stated, as well as the rights of the citizeus accused.

You are therefore instructed, before reporting a case to the district attorney for prosecution, to examine into the same with the utmost degree of care, with a view of giving the district attorney such definite information in regard to the case as will engiving the district attorney such definite information in regard to the case as will enable him to determine the question of the propriety of instituting proceedings. It is not the wish of this office that trivial cases, or cases of a mere technical character, involving no loss to the government, and where no fraud has been committed or intended, should be dignified by being brought into court for prosecution.

On the other hand, where persons have knowingly and willfully violated the law with the evident intention of defrauding the government of its revenues, vigorous measures chould be taken to living the parties to triple and numichment.

measures should be taken to bring the parties to trial and punishment.

Very respectfully,

GREEN B. RAUM. Commissioner.

Collectors have, for the most part, been guided by the spirit of this letter, and the number of improper suits and prosecutions, instituted apparently for the creation of costs only, has been very greatly dimin-The principles of this letter have recently been embodied in instructions to district attorneys and United States marshals with the approval of the honorable Secretary.

EXAMINATION OF COLLECTORS' OFFICES.

In March, 1877, I adopted a plan of making quarterly examinations of the accounts of collectors with a view of establishing a more uniform system of transacting the public business, of requiring all the books and accounts to be properly written up to date, of securing rigid accountability for the public funds, and by these means of promoting the efficiency of the collectors and their subordinates. An official standard of a first-class office was established, as follows:

First. Where the officers are honest, capable, and faithful.

Second. Where the collector devotes his best energies to the proper organization and discipline of his clerical and division force, and uses every endeavor to collect all the taxes due the government.

Third. Where every subordinate manifests pride in his position, and ambition to excel in his line of duty.

Fourth. Where no errors or discrepancies are found in the cash or stamp account. Fifth. Where all the entries are made before the close of each day's business, cash balanced, and books and packages of stamps sold from during the day verified. Sixtb. Where every possible effort is made to promptly dispose of each item on the

Seventh. Where all bonds are properly executed, approved, recorded, and filed. Eighth. Where the penalties are collected, compromise cases promptly reported, and

money properly deposited.

Ninth. Where the office is furnished with a view to the preservation of public rec-

ords, the facilitating of business, and in a manner suitable and becoming the purpose for which it is used.

Tenth. Where every record is completed to date, and is without erasures, blots, or any defacement.

Eleventh. Where the Internal-Revenue Record and the lists are bound, and letterbooks and circulars indexed.

Twelfth. Where everything presents the appearance of a first-class business office.

Thirteenth. Where the deputies in charge of stamps are supplied with the proper records, their books, accounts, and stamps in perfect order, and stamp and cash account verified by the collector at least once each quarter.

The following requirement has recently been added:

Fourteenth. Where all required reports and returns are made to the office at Washington, and where there is no unnecessary delay in correspondence with that office.

An office in which all of these requirements are fulfilled is graded as No. 1. Failure to come up to the official standard in any one of these particulars results in the office being marked down at a lower grade. Experience has shown that these examinations have created a splendid esprit de corps in the service; and to-day, out of 126 collectors' offices, 119 are graded as first-class according to the official standard.

INSPECTION OF OFFICERS.

The system of inspecting officers established in 1877 was intended to more thoroughly create and diffuse a knowledge of internal-revenue laws and regulations amongst both officers and tax-payers, to establish a greater uniformity in the enforcement of the laws, and to place upon the files of this office the record of every officer connected with the service. It was believed that this system-would prove an efficient school for the officers, and I am glad to say that my expectations have been more than realized.

The inspections of deputy collectors, taken in connection with their diary reports attached to their monthly accounts, give the collectors and this office an insight into the manner in which they perform their duties, and so with the storekeepers and gaugers the inspection reports taken in connection with their reports of work done enable the collectors and this office to form a proper estimate of the value of these officers to the service. The incompetent officer is soon discovered and the government is enabled to properly dispense with his services, while the diligent and faithful officer has a record in this office which can always be invoked in his behalf.

In connection with the reports of examinations and inspections the officers have been subjected to just criticism for shortcomings and have

received commendation for diligence and efficiency.

An important part of the work of the internal-revenue service is the policing by deputy collectors of their respective divisions. To promote efficiency in this work the great majority of policing deputies have been relieved from the sale of stamps. A system has been introduced of making an annual allowance for traveling expenses to be accounted for by the deputy in his accounts. With the approval of the honorable First Comptroller deputy collectors have been required to render monthly pay accounts instead of quarterly, rendering with said accounts a diary report setting forth the work performed by them. These measures have secured a more thorough system of work on the part of division deputies.

GAUGING.

To secure greater efficiency and uniformity in the work of gaugers, competent experts have, from time to time, been detailed to visit the leading spirit producing districts and inspect the gaugers and correct any errors of work into which they might have fallen. Gaugers have also been required in their reports of work done to give the length and mean diameter of each package gauged, so that their work and calculations can be easily verified. This, added to certain improvements which

have been made in the gauging instruments, has resulted in greatly increased accuracy in the work of gauging.

STOREKEEPERS.

The storekeepers have been greatly improved in diligence and efficiency by periodical inspections and by frequent visits from collectors and revenue agents.

CONDITION OF THE OFFICE.

It is gratifying to be able to state that the work of this office is now thoroughly in hand, and that the time of almost the entire force is exclusively devoted to the transaction of current business. The correspondence of the office receives prompt attention; accounts are adjusted without delay and forwarded to the accounting officers for audit and payment. The redemption of stamps and settlement of drawback claims are part of the current business. Claims for the abatement and refunding of taxes and offers in compromise receive the consideration of the office as soon as the proper proofs are filed. The books containing the accounts with the Bureau of Engraving and Printing, with collectors, and with tax-payers who purchase stamps directly from the office, are kept written up to date and the account of stamps on hand is daily carefully verified and balanced. The work in connection with the establishment and operation of distilleries, breweries, and tobacco and cigar manufactories is promptly and diligently performed.

For this satisfactory condition of the office, I desire to return my sincere thanks to the officers, clerks, and employes for their diligence, fidel-

ity, and zeal in the performance of duty.

AMOUNTS COLLECTED AND ACCOUNTED FOR BY COLLECTION DISTRICTS.

Soon after the close of the fiscal year ended June 30, last, I caused the customary annual examination to be made of the records and accounts of each collector of internal revenue throughout the United States, for the purpose of ascertaining whether the public moneys collected had been duly accounted for. This examination disclosed the gratifying fact that during the past fiscal year \$123,981,916.10 of internal revenue taxes had been collected, and that every dollar had been paid into the Treasury. During the past four fiscal years, \$467,080,885 of taxes have been received by collectors of internal revenue, and the entire sum has been paid into the Treasury. All deficiencies which have occurred in the accounts of collectors during that period have been made good by payments into the Treasury. Fidelity in accounting for the public funds being one of the highest tests of the efficiency of officers intrusted with the collection of revenue and the disbursement of public money, the officers of internal revenue, judged by this rule, are entitled to a high rank in the public service; and I take pleasure in bearing testimony to the fact that, as a body of officers, it will be difficult to improve upon them in respect to integrity, intelligence, fidelity, and zeal in the performance of duty.

I append a statement of the collections made, by districts, during the past fiscal year, with the name of each collector and the amount col-

lected and paid into the Treasury by him.

Collection districts.	Names of collectors.	Aggregate col- lections.
First Alabama	Louis H. Mayer	\$63, 256 41
Second Alabama		72, 633 97
Arizona	Thomas Cordis	26, 984 10
Arkansas		126, 089 12
First California	William Higby	2, 437, 650 82
Fourth California	Amos L. Frost James S. Wolfe	345, 983, 82
First Connecticut	Joseph Selden	168, 259 54 212 856 32

COST OF COLLECTION.

The total cost of collecting internal revenue in the United States for he fiscal year ended June 30, 1880, was as follows:

or salaries and expenses of collectors, including pay of deputy collect-	#1 700 054	C1
ors, clerks, &c	ф1, 190, 904	OF.
gaugers, storekeepers, and miscellaneous expenses		
'or stamps, paper, and dies	423, 558	15
or expenses of detecting and punishing violations of internal revenue laws	74, 797	97
or salaries of officers, clerks, and employes in the office of Commissioner of Internal Revenue	253, 330	00
Total	4, 505, 640	73

Being 3.63 per cent. of the total amount collected.

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal Revenue Service for the fiscal ear ending June 30, 1882, as follows:

'or salaries and expenses of collectors	\$2,000,000
'or salaries and expenses of thirty-five revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for miscel-	
laneous expenses	2, 100, 000
or dies, paper, and stamps	442,000
or detecting and bringing to trial and punishment persons guilty of vio- lating the internal revenue laws, including payment for information and	,
lating the internal revenue laws, including payment for information and	
detection	100,000
or salaries of officers, clerks, and employés in the office of the Commis-	
sioner of Internal Revenue	$253,330^{\circ}$
Total	4,895,330

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors for the fiscal year ending June 30, 1881, are based upon an estimate of their probable ollections according to the following scale, with the qualification that f the actual collections should vary from the amounts estimated, the alaries would be readjusted at the end of the fiscal year:

For collection	of—		
\$25,000 or le	ss		\$2,000
25,000 to	\$37,500—\$12,500		$^{\circ}2,125$
37,500 to	50,000—12,500		2,250
50, 000 to	75,000— 25,000		2,375
75,000 to			$2,500^{\circ}$
100,000 to			2,625
125,000 to			2,750
175,000 to	225,000 50,000		2,875
225, 000 to	275, 000 50, 000		3,000
275,000 to	325,000 50,000	<u> </u>	3,125
325,000 to	375,000— 50,000	·	3,350
375,000 to	425,000 50,000		3, 375
425,000 to	475,000— 50,000	: 	3,500
475,000 to	550,000 75,000	,	3,625
550,000 to	625,000— 75,000		3,750
625,000 to	700,000— 75,000		3,875
700,000 to	775 000— 75 000		4,000

^{*} This includes an estimated deficiency of \$135,000, being the expenses in excess of the mount appropriated.

Twenty-seven clerks	900	One janitor
Eighteen clerks	800	Four janitors
Two clerks		One janitor
Five clerks	700	One janitor
Two clerks	670	
,	,	•

There are also employed 648 gaugers, who receive fees not to exceed \$5 per diem; 945 storekeepers and gaugers, who receive not to exceed \$4 per diem; 543 storekeepers, who receive not to exceed \$4 per diem (all of the foregoing officers are paid only when actually employed); and 56 tobacco inspectors, who receive fees to be paid by the manufacturers.

SALARIES.

I have the honor to recommend that Congress appropriate, for the fiscal year ending June 30, 1882, the sum of \$254,880, as salaries for the following officers, clerks, and employés in this bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	
Seven heads of division, at	2,500
One stenographer, at	1,800
Twenty-three clerks, class four, at.	
Twenty-six clerks, class three, at	1,600
Thirty-six clerks, class two, at.	
Twenty-one clerks, class one, at	1,200
Thirteen clerks, at	1,000
Fifty clerks, at	900
Four assistant messengers, at	720
Ten laborers, at	660

An aggregate of one hundred and ninety-three persons.

An increase in the salary of the deputy commissioner, and of the five

heads of division, is recommended for the following reasons:

The law creating the office of deputy commissioner fixed his salary at \$3,500. The duties of the office are of great importance, and their faithful performance fully entitles the officer to that pay.

The law, creating the office of head of division states that there shall be seven heads of division, who shall receive each a salary of \$2,500. The appropriations for the years ending June 30, 1878, June 30, 1879, June 30, 1880, and June 30, 1881, allowed two heads of division at a salary of \$2,500 each, and five heads of division at a salary of \$2,250 each. There is no just ground for this discrimination; the officers fully earn \$2,500 each, and, in my judgment, should receive that amount.

An increase of \$1,550 over the appropriation for the present year will give the above named officers the salaries to which they are entitled

under the law.

MANUFACTURE OF PAPER.

During the fiscal year, all paper for internal revenue stamps has been made by Messrs. S. D. Warren & Co., of Boston, under the contract entered into with said firm, which was referred to in my last annual report, and a new contract was made with them May 24, 1880. The prices paid under the new contract are for vegetable-sized paper, 11½ cents per pound, and for animal-sized paper, 12½ cents per pound, as against 9¾ cents and 10¾ cents paid under the previous contract. The paper furnished has been satisfactory as to quality, and all orders have been promptly executed.

PRODUCTION OF STAMPS.

Since the close of the fiscal year, viz, on the 15th October, the work of printing documentary and proprietary stamps, which had been done by the American Bank Note Company of New York City, was transferred to the Bureau of Engraving and Printing. At this time all internal-revenue stamps are produced by said bureau except stamps imprinted upon bank-checks, which are supplied by the Graphic Company of New York City, and stamps upon foil wrappers for tobacco, which are printed by John J. Crooke & Co., of New York, both under the superintendence of this office.

NUMBER AND VALUE OF STAMPS ISSUED.

During the fiscal year stamps were received by the stamp division of this office from the printers named, and issued to collectors, agents, and purchasers, as follows, viz:

Kind.	Number.	Value.
Stamps for distilled spirits Stamps for tobacco and snuff. Stamps for cigars and cigarettes. Stamps for fermented liquors and brewers' permits. Stamps for special taxes Stamps for documents and proprietary articles.	219, 862, 792 61, 743, 548 44, 896, 240 716, 620	\$62, 733, 675 00 26, 410, 511 52 15, 130, 078 25 13, 172, 935 00 9, 715, 300 00 7, 780, 360 40
Total	911, 602, 614	134, 942, 860 17

The stamps delivered to this office by the Bureau of Engraving and Printing were, on their receipt, counted, and their issue involved the preparation of 18,547 packages, all of which were transmitted to collectors of internal revenue by registered mail. This business was conducted without the loss of a stamp, either while in the hands of the printers, in the custody of this office, or in the course of transmission. Thanks are due to the officers of the Washington City post-office for the promptness and fidelity manifested in the handling of this large amount of registered matter.

ABOLITION OF THE CHARGE OF TEN CENTS EACH FOR "OTHER THAN TAX-PAID SPIRIT-STAMPS."

By act of Congress approved May 28, 1880, the charge of 10 cents each for distillery-warehouse stamps, stamps for rectified spirits, wholesale liquor dealers' stamps, stamps for imported spirits, and warehousing and rewarehousing stamps for grape brandy was abolished. The change in account was made by inventorying the stamps in collectors' hands and giving them credit for the value of the same, and did not necessitate the return of the stamps or any alteration in the form or style of them.

Collectors have been allowed credit for the stamps in their hands when the act took effect, with one exception, and this account will probably be settled at an early date.

REDEMPTION OF STAMPS.

I renew the recommendation made in my last report that that portion of section 17 of the act of March 1, 1879, which prohibits the redemption of stamps unless the same are presented within three years after their purchase from the government or a government agent for the sale of stamps, be repealed.

STAMPS REDEEMED AND EXCHANGED.

Number of claims for redemption of stamps allowed	590
Amount of claims for redemption of stamps allowed	
Number of claims for exchange of stamps allowed	292
Amount of claims for exchange of stamps allowed	\$30,988 29

MATCH STAMPS SOLD.

Amount of stamps sold to match manufacturers during the following fiscal: years, commissions not deducted.

1876	 	 \$2,849,524
1877	 	 2, 982, 275
1878		 3.064.574
1879	 N	 3, 357, 251
1880	 \	3, 561, 300

A limited number of general proprietary stamps has, no doubt, been purchased by match manufacturers, and are not included in the above statement. Nearly all the stamps sold to match manufacturers are sold on sixty days' credit, under the provisions of section 3425, United States Revised Statutes. There are now pending thirteen suits upon stamp agents' and match manufacturers' bonds for the recovery of \$117,413.01 due on the sale of stamps during the past five years.

REVENUE AGENTS.

During the fiscal year ended June 30, 1880, thirty-five revenue agents were employed, and this force has brought to the discharge of its duties a high order of intelligence, experience, and zeal.

Aggregate salary of agents Aggregate amount for traveling expenses Stationery furnished agents	46,7	411 774 383	46

TAXES COLLECTED FROM RAILROAD COMPANIES.

The following is a statement of unpaid internal revenue taxes, which accrued under former laws, collected from railroad companies during the last four fiscal years:

Fiscal year ended June 30, 18 Fiscal year ended June 30, 18 Fiscal year ended June 30, 18 Fiscal year ended June 30, 18	78 79	 	••••	218, 302 73 101, 340 96
Total				404 141 11

The amount collected during the past fiscal year was received from twenty different railroad companies.

SUITS AGAINST EX-COLLECTORS.

Subjoined is a list of suits against late collectors of internal revenue in which judgments have been rendered during the fiscal year ended June 30, 1880, furnished by the courtesy of the Solicitor of the Treasury:

United States vs. Jarrard O. Rawlins, late collector of internal revenue for the first collection district of California. Judgment for \$28,409.53.

United States vs. James B. Maupin, late collector of internal revenue for the second

collection district of Missouri. Judgment for \$2,666.84.
United States vs. Frederick A. Sawyer, late collector of internal revenue for the second collection district of South Carolina. Judgment for amount of offer of compromise, \$5,219.15.
United States vs. Milton Stapp, late collector of internal revenue for the first collec-

tion district of Texas. Judgment for \$565.52.

COMPROMISES AFTER JUDGMENT.

The records of the Solicitor of the Treasury show that for the fiscal year ending June 30, 1880, thirteen internal-revenue cases were compromised after judgment, the amount accepted being \$12,566.01, besides Thirty-one offers of compromise after judgment were rejected, the amount involved being \$8,025.83. Twenty offers of compromise were pending July 1, 1880, the amount involved being \$6,554.28.

SALE OF REAL ESTATE.

The United States has acquired title to about \$500,000 worth of real estate under the internal-revenue laws. Efforts are constantly made. through collectors and revenue agents and by correspondence, to make sale of this property, but with slight progress. Much of this property has been owned by the government for a number of years, and there seems to be no immediate prospect of being able to sell it at a fair valuation, especially in view of the fact that only quit-claim deeds are given upon the sale of said property.

It has occurred to me that it would be wise after the United States had held real estate so acquired for a period of eight or ten years without being able to sell it at a fair cash valuation that it should be put up as sold for whatever it would bring, and as no officer would probably desi to take the responsibility of ordering such a sale it seems to me the provision of law might well be made for the same.

RECEIPTS FOR FIRST FOUR MONTHS OF PRESENT FISCAL YEAR.

The following table shows the receipts from the several sources of revenue for the first four months of the current fiscal year. The receipts for the corresponding period in the last fiscal year and a comparison of the receipts for the two periods are also given:

TOBACCO.

The total amount of collections from tobacco for the fiscal year ended June 30, 1880, was \$38,870,140.08. This amount includes the collections of internal revenue taxes imposed upon imported manufactured tobacco, snuff, and cigars, and the special taxes paid by manufacturers of and dealers in leaf and manufactured tobacco, and is less than the receipts from the same source for the fiscal year immediately preceding by \$1,264,862.57.

The following exhibit will show the several amounts collected from the different sources of the tobacco tax, and the relative increase or decrease, in each case, as compared with the collections from the same sources for the fiscal year ended June 30, 1879.

PRODUCTION OF MANUFACTURED TOBACCO, CIGARS, ETC.

Adding to the several quantities of tobacco, snuff, and cigars removed for consumption during the fiscal year ended June 30, 1880, as computed from the amount of revenue derived therefrom, the quantities removed in bond for export, we have the following results, which show the entire production for the last fiscal year:

Tobacco, taxed at 16 cents per pound. Tobacco, taxed at 20 cents per pound. Tobacco, taxed at 24 cents per pound.	1. 222.
Total quantity removed for consumption. Snuff, taxed at 16 cents per pound, removed for consumption. Tobacco and snuff removed for exportation.	132, 309, 527 3, 966, 308 9, 807, 050

Increase during fiscal year 1880 of	

APPARENT EFFECTS OF REDUCTION OF TAX RATE.

From the foregoing statement it will be seen that the entire receipts from manufactured tobacco, including snuff, for the fiscal year ended June 30, 1880, were \$21,804,763.74. This is \$3,801,246.51 less than the receipts from the same sources during the fiscal year ended June 30, 1879, and \$4,579,108.56 less than the receipts from the same sources during the fiscal year ended June 30, 1878, when the taxes on snuff were collected at the rate of 32 cents per pound, and on manufactured tobacco at 24 cents per pound. These collections were made from 3,966,308 pounds of snuff and 132,309,527 pounds of smoking and chewing tobacco.

Had there been no reduction in the rate of tax on snuff and tobacco, the number of pounds which reached taxation during the last fiscal year would have yielded a revenue of \$33,023.505.04, or \$11,218,741.30 more than was collected.

The total collections from cigars, cheroots, and cigarettes for the fiscal year ended June 30, 1880, were \$14,922,088.88. This is \$2,389,636.16 more than the receipts from the same sources during the previous fiscal year.

Owing to the large increase in the collections from cigars and cigarettes, the total collections from tobacco, snuff, cigars, and cigarettes amount to \$36,726,852.62, which is only \$1,411,610.35 less than the collections from the same sources for the previous fiscal year.

To fairly determine the effects of the reduction of the rate of tax on nanufactured tobacco, including snuff, made by the act of March 1, 879, a comparison should be made of the receipts of the two entire fiscal lears—1878, when the rate of tax on snuff was 32 cents per pound, and

the rate of tax on chewing and smoking tobacco was 24 cents per pound, and 1880, when the tax was uniformly collected on all classes of manufactured tobacco, including snuff, at 16 cents per pound—leaving out all collections made from cigars and cigarettes, as no change was made in the rate of tax on cigars and cigarettes by the act of March 1, 1879.

This comparison shows a falling off in the receipts from chewing and smoking tobacco and snuff, due to the reduction of rates of \$4,579,108.56.

The apparent increase in the consumption of manufactured tobacco, or in the quantity placed on the market tax paid, is not thought to be due to a reduction of the cost of tobacco to consumers as has been claimed, for the reason that there has been no reduction of the price of tobacco paid by consumers, excepting, perhaps, a slight reduction on the very lowest grades of smoking and chewing tobacco.

The true cause of the increase in consumption is to be found in the general revival of business within the last two years, more and better

pay to laborers, and increased means to purchase with.

The natural increase in population, and the large influx into the country of foreigners during the last two years, nearly all of whom are consumers of tobacco, have also tended to increase consumption. The presumption is by no means a violent one that the increased consumption would have been about equal if there had been no reduction of rate, and that the collections, instead of being less than \$22,000,000 during the last fiscal year, would have been more than \$33,000,000 from chewing and smoking tobacco and snuff, and the total collections from all tobacco sources would have reached the round sum of \$50,000,000.

IMPORTED CIGARS.

The cigars imported during the fiscal year ended June 30, 1880, as given by the Bureau of Statistics—

Aggregated in weightOf this quantity there were exported	Pounds. 652, 402 41, 329
Leaving to be withdrawn for consumption	611,073
Allowing 13½ pounds to the thousand as the weight of imported cigars, the number of imported cigars included in the above table would be. Number withdrawn in 1879 was	45, 264, 667
Increase during fiscal year 1880 was	

LEAF TOBACCO.

Assuming that for every one hundred pounds of leaf tobacco used in the manufacture of tobacco and snuff eighty-five pounds of manufactured products have resulted, and that for every one thousand cigars manufactured twenty-five pounds of leaf tobacco were used, and that for every thousand cigarettes made five pounds of leaf tobacco were required, the leaf tobacco used during the fiscal year ended June 30, 1880, for manufacturing tobacco, snuff, and cigars aggregated in pounds as follows:

For manufacturing tobacco and snuff. For manufacturing cigars and cigarettes	171, 862, 218
Total leaf manufactured Deduct imported leaf used.	232, 238, 422 8, 876, 515
Total domestic leaf used	223, 361, 90 215, 910, 18
Total leaf accounted for	439 272 094

SUGGESTED CHANGE IN CIGAR STAMPS.

The attention of the Secretary of the Treasury and of the Commissioner of Internal Revenue, as well as of both Houses of Congress, has been called to suggested changes in the present mode of collecting the tax on cigars by placing the stamp upon the box, and the question arose whether the penal provisions of the law would still apply if for the present mode of affixing the stamp some plan were substituted which contemplated the destruction of portions of the stamp piecemeal as the cigars were sold from the box. The question was submitted to the Attorney-General, who held that the penal provisions of the law would not so apply. As this subject has been considered by appropriate committees of Congress, I respectfully submit whether it would not be proper to have the law so modified as to allow such changes in the form of the stamps as the Secretary of the Treasury and the Commissioner of Internal Revenue might deem would best protect the interests of the government.

DISTILLED SPIRITS.

In my report for the fiscal year ended June 30, 1879, attention was called to the collection of the taxes on the spirits withdrawn from distillery warehouses for exportation and lost in transportation between the distillery and the port of exportation, and to the complaint made by distillers and others engaged in the export trade as to the hardship of such collections. In accordance with my recommendation in the matter, exporters were relieved from this tax by an act of Congress passed December 20, 1879. Pursuant to the provisions of the act allowance was made during the year for loss by leakage in transportation amounting to 8,484 gallons.

EXPORTATION OF ALCOHOL IN METALLIC CANS.

In connection with the subject of deficiency taxes on spirits withdrawn for exportation I had the honor to recommend in my last annual report that provision be made by law for the exportation of alcohol in metallic cans of ten gallons and upward. In accordance with this recommendation certain changes were made in sections 3287 and 3330 Revised Statutes; by sections 6 and 11 of the internal-revenue act of May 28, 1880, providing for the withdrawal of spirits from receiving cisterns into casks or packages of not less capacity than ten gallons, wine measure, and providing for the exportation of spirits in original packages. exports of alcohol in tin cans have, however, been made under these privileges, as it appears that there is no foreign demand for packages of alcohol in cans of larger size than five gallons. As it also appears that exporters are willing to encase two five gallon tin cans in one wooden inclosure, and as I believe such a package may be properly protected by stamps, I would recommend that the law be so amended as to provide for the exportation of alcohol in metallic cans of five gallons and upward, provided the quantity contained in the wooden inclosure is not less than ten gallons.

PRODUCTION OF SPIRITS DURING THE YEAR.

The quantity of spirits (90,355,270 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1880, ex-

ceeded the production of the previous year by 18,462,649 gallons, the product for 1879, as was shown in my report for that year, having been greater than for any previous year.

The increase in production for the fiscal year 1880 over the production for the fiscal year 1879 is distributed among the different varieties known

to the trade, as follows:

Increase in production of—				
•				Gallons
Sourbon whisky	 	•• ••••	• • • • • • • • • •	. 6,827,06 . 2,340,94
lye' whisky	 	-,,	• • • • • • • • • • • • • • • • • • • •	2, 340, 94
Rum				
in	 5.4			21 89
ure, neutral, or cologne spirits fiscellaneous	 			7, 198, 48
fiscellaneous	 	• • • • • • • •		2,664,94
		•		
Total	 			. 21, 285, 91
Decrease in production of—			* *	
ligh wines	 			. 2,823,26
	 , ,			
Net increase	 			. 18, 462, 64

The causes which, in addition to the improvement of the times, have led to this great increase in the production of distilled spirits, are the amendments of the internal-revenue laws, which have secured—

1. The increase in the bonded period from one year to three years;

2. The allowance for loss by leakage while in warehouse;

3. Relief from the payment of interest on taxes while in bonded warehouse; and

4. The allowance for leakage of spirits while in transportation for export or to manufacturing warehouse.

APPARENT OVER-PRODUCTION OF SPIRITS.

I take the liberty of calling especial attention of distillers and the trade to the fact that on the 1st July, 1879, there were on hand in distillery warehouses 19,212,000 gallons of spirits, which was an increase of about 5,000,000 of gallons over the stock on hand at the same period of the previous year, and that on the 1st day of November, 1880, the amount of spirits on hand was 32,640,000, being an increase of 13,400,000 gallons over the amount on hand on the 1st July, 1879. The steady increase in the number and capacity of distilleries in operation, suggests the probability of the continued enlargement of the stock on hand. It has occurred to me that this business was on the eve of being overdone, and that in the event of a recurrence of the agitation for a reduction of the tax, the holders of these spirits would be in danger of loss.

RECEIPTS FROM DISTILLED SPIRITS.

The following statement shows the receipts from the several articles or occupations relating to distilled spirits subject to tax under internal revenue laws now in force, for the fiscal years ended June 30, 1879 and

1880, together with the increase or decrease on each article or occupation:

Articles or occupations.		iscal year ended e 30—	Increase.	Decrease.
	1879.	1880.

Note.—Many tabular statements are omitted for want of space, but they can all be found in the bound volume of the Commissioner's report.

SPIRITS AND TOBACCO REMOVED IN BOND FOR EXPORT.

The following statement shows the quantity and percentage of production of distilled spirits and manufactured tobacco (including snuff) removed in bond for export during each fiscal year since the passage of the act of June 6, 1872:

	Distilled sp	irits.		Manufactured	tobacco.
Year	Taxable (proof) gallons ex- ported.	Percentage of production.	Year.	Pounds of to- bacco ex- ported.	Percent age of produc- tion.
1873: 1874 1875 1876: 1877: 1877: 1878: 1879: 1889: Total.	587, 413 1, 308, 900 2, 529, 528	3. 45+ 5. 90+ 0. 96+ 2. 25+ 4. 22+ 9. 80+ 20. 63+ 18. 55+	1873 1874 1875 1876 1877 1878 1878 1879 1880	10, 140, 045 10, 800, 927 9; 179, 316 9; 434, 485 11, 335, 046 10; 581, 744 11, 034, 951 9, 808, 409	8. 59. 9. 11+ 7. 13+ 7. 87+ 8. 88+ 8. 89+ 6. 71+

EXPORTATION OF DISTILLED SPIRITS.

The following figures show the increase or decrease as to the various kinds of spirits exported in the year 1880, as compared with the year 1879:

Increase in alcohol Increase in rum Increase in pure, neutral, or cologne spirits Increase in high wines	85, 861 548, 908
Total increase Gallons Decrease in bourbon whisky 17, 563 Decrease in rye whisky 5, 013 Decrease in miscellaneous 1, 229	1,951,890
Total decrease	23, 805
Net increase	

As was the case in the fiscal years 1878 and 1879, the bulk of the spirits exported during the fiscal year 1880 was alcohol produced in the northern part of Illinois, shipped on foreign-bound vessels at New York, and consigned to Marseilles, France. During the year 1880 the exportations to Genoa, Gibraltar, and Valencia have in each case exceeded one million gallons, and the quantity exported to each of the ports of Bilboa and Palma, Spain, has nearly reached one million gallons.

The number of ports to which alcohol was exported in 1879 was forty-four, and during 1880, fifty-three. During the fiscal year 1879 the total number of ports to which spirits were exported was sixty-four, and during the fiscal year 1880 was seventy-one.

It will be observed that the foreign demand for American spirits is still increasing, and that the quantity exported during each fiscal year continues to be greater than during the preceding year.

Realizing the importance of placing the legitimate distilling interests of the country on a sound business basis, and thus discouraging the production of illicit spirits, this office has encouraged the exportation of spirits, affording such facilities as was consistent with the due protection of the interests of the government from time to time as occasion required.

Those features of the act passed during last session of Congress, providing for the allowance for actual loss during transportation and for removing the restriction as to size of exported packages and as to the thousand gallons limitation, were passed upon my recommendation.

Railroads and other transportation companies have also been authorized by regulations of the department to become sureties for exporters where it has been shown that such corporations have legal ability to act in that capacity. This measure has been found to operate satisfactorily. Under this system the security of the United States has been of the best character, and the exporters have been enabled to land spirits at foreign ports at quite a saving in brokerage charges incurred in obtaining sureties who were not jointly interested with them in the due delivery of the goods.

TRANSFER OF SPIRITS TO MANUFACTURING WAREHOUSES.

Section 20 of the internal-revenue act of March 1, 1879, providing for transfers of spirits from distillery warehouses to manufacturing warehouses, was amended by section 14 of the act of May 28, 1880, so as to read as follows:

That under such regulations and requirements as to stamps, bonds, and other security as shall be prescribed by the Commissioner of Internal Revenue, any manufacturer

of medicines, preparations, compositions, perfumeries, cosmetics, cordials, and othe liquors, for export, manufacturing the same in a duly constituted manufacturing ware house, shall be authorized to withdraw, in original packages, from any distillery ware house, so much distilled spirits as he may require for the said purpose, without the payment of the internal-revenue tax thereon.

The amendment made by the act of May 28, 1880, enlarged the scope of the act of March 1, 1879, so as to provide for the withdrawal of any kind of distilled spirits from distillery warehouses, the articles to be withdrawn having theretofore been limited to alcohol.

The section as amended also provides for the use of the spirits in man ufacturing warehouses in all of the articles authorized by law to be made in such warehouses. The effect of the amendment has been to make a new outlet for the exportation of American spirits.

Section 15 of the act of May 28, 1880, also makes provision, in case o transfers of spirits to manufacturing warehouses, for an allowance for loss by unavoidable accident, without fraud or negligence, as in the

case of spirits shipped in bond for exportation.

The transfers during the fiscal year 1879 were 13,213 gallons, and during the fiscal year 1880 were 218,212 gallons. Attention, however is called to the fact, that inasmuch as the original act was passed Marcl 1, 1879, and the amendatory act May 28, 1880, the transactions of the respective fiscal years are not fair indications of the quantity that will probably be annually withdrawn under said acts.

SPIRITS WITHDRAWN FROM WAREHOUSE FOR SCIENTIFIC PURPOSES AND FOR USE OF THE UNITED STATES.

The quantity of alcohol withdrawn free of tax from distillery ware houses for the use of colleges and other institutions of learning in the preservation of specimens of natural history in their several museums, or for use in their chemical laboratories, and of spirits of various kinds for use of the United States, amounted during the year to 23,048 gallons an increase of 5,362 gallons over the quantity withdrawn during the previous year.

SPIRITS LOST BY CASUALTY DURING THE YEAR.

m	Gallons.
The quantity of spirits on deposit in distillery warehouses at commencement of fiscal year was	19 212 47(
The quantity deposited during the year was.	
_	

Of this quantity, 14,231 gallons were lost by casualty, being about

Of this quantity, 14,231 gallons were lost by casualty, being about one-seventy-seventh of one per cent., or one gallon of each 7,696 + gallons was so lost.

It was my pleasure, in my report of last year, during which the loss of spirits was less than one fiftieth of one per cent. of the quantity stored in warehouses, to call attention to the care exercised by the distillers and storekeepers in the preservation of this inflammable material. As the loss this year is much less than that occurring during the year 1879, it is deemed proper to call renewed attention to the diligence exercised by the distillers and government officers in the preservation of this class of property.

It is quite evident, from the slight loss for the past four years, that the fire insurance on spirits in distillery warehouses might with safety

be fixed at the very lowest rate.

The quantity of spirits lost by casualty, on which the tax was abated, during the year, under sections 3221, 3222, and 3223, Revised Statutes, was 4,276 gallons.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORA-TION IN WAREHOUSES.

The quantity of distilled spirits allowed under the provisions of section 17 of the act of May 28, 1880, for loss by leakages or evaporation in warehouses during June, 1880 (the only month of the fiscal year in which the act was in force), was 75,834 gallons.

The quantity allowed during the first four months of the current fiscal

year was 271,169 gallons.

SPIRITS REMAINING IN WAREHOUSES AT THE CLOSE OF THE YEAR.

In my report for the year ended June 30, 1879, it was shown that the quantity (19,212,470 gallons) in warehouses June 30, 1879, exceeded the quantity in warehouse at the close of any preceding fiscal year. This quantity, however, is greatly exceeded by the quantity (31,363,869 gallons) remaining in warehouses June 30, 1880.

The following table shows the quantity remaining in distillery warehouses at the close of each of the twelve fiscal years during which spirits

have been stored in such warehouses:

	Ganons.
Quantity remaining June 30, 1869	16, 685, 166
Quantity remaining June 30, 1870	11,671,886
Quantity remaining June 30, 1871	6,744,360

Quantity remaining June 30, 1873	
Quantity remaining June 30, 1874	. 15, 575, 224
Quantity remaining June 30, 1875	
Quantity remaining June 30, 1876	. 12,595,850
Quantity remaining June 30, 1877	
Quantity remaining June 30, 1878	. 14, 088, 773
Quantity remaining June 30, 1879	19, 212, 470
Quantity remaining June 30, 1880	31, 363, 869

It is understood from leading distillers that since the extension of the bonded period the business of selling spirits in bond has largely increased, and that the greater portion of goods now in bond is owned by dealers in various parts of the country who have assumed to the distiller the payment of the taxes as they fall due.

It is evident that the causes adverted to in my last year's report as leading to this great increase in the stock of spirits remaining in distillery warehouses, and as indicating the growing ability on the part of distillers to discharge their obligations to the government, have been

in full operation the past fiscal year.

The case of the sixth district of North Carolina was then cited as illustrating the great increase in the number of the legally authorized distilleries in sections of the country recently infested by illicit distillers. The same district can be again used as illustrating this fact, the number of distillery warehouses in that district having increased from

184 July 1, 1879, to 229 June 30, 1880.

In my last year's report reference was made to the building of the largest distillery in the United States at the close of the fiscal year. I have now to report that this distillery has been in successful operation during the year, and that others of its class have been greatly enlarged and fitted up with the latest improvements, thus enabling them to materially reduce the cost of production and to improve the character of their products. By the use of the latest improved purifying, refining, and redistilling apparatus, and the employment of experts, fine grades of alcohol,

and pure, neutral, or cologne spirits are produced in distilleries ready for use in the arts and sciences without additional manipulation.

The decrease in the production and withdrawal of high wines, and the increase in the production and withdrawal of all other and finer kinds of spirits, are facts satisfactorily showing the improvement in the methods of producing distilled spirits.

Nearly nine-tenths of the spirits remaining in warehouse June 30, 1880 (27,311,138 gallons out of 31,363,869 gallons), were bourbon and rye whiskies, and the increase in the quantity in warehouse that day over that in warehouse June 30, 1879, was mainly the increase in these two varieties.

There was an increase in all varieties except high wines, as follows:

Increased quantity in warehouse, of—		Gallons.
Bourbon whisky		7,747,856
Bourbon whisky Rye whisky Alcohol		3, 482, 525 56, 056

FERMENTED LIQUORS.

The receipts from fermented liquors for the fiscal years ended June 30, 1879 and 1880, are shown in the following statement:

Sources.	Receipts for fiscal year ended June 30—	Increase.	Decrease.	
	1879. 1880.			
Fermented liquors, tax of \$1 per barrel on Brewers' special tax	\$10, 270, 352 83 \$12, 346, 077 26 202, 779 61 201, 395 97 256, 187 64 282, 329 61	\$2, 075, 724 43 26, 141 97	\$1, 383 6	
Total	10, 729, 320 08 12, 829, 802 84	2, 100, 482 76		

The following statement shows, by fiscal years, the aggregate production of fermented liquors from September 1, 1862, to June 30, 1880:

Fiscal years ended June 30—	Barrels of not more than 31, gallons each.	Fiscal years ended June 30—	Barrels of not more than 31 gallons each.
1863 (4 1864 (4 1865 (4 1866 (4 1867 (4 1868 (4 1868 (4 1868 (4 1868 (4 1868 (4 1868 (4 1869 (1, 765, 827 3, 459, 119 3, 657, 181 6, 207, 401 6, 291, 184 6, 146, 663 6, 342, 055 6, 574, 616 7, 740, 260	1872 1873 1874 1875 1876 1877 1877 1878 1879 1880	9, 600, 897 9, 452, 697

Prior to September 1, 1866, the tax on fermented liquors was paid in currency and the full amount of tax was returned by collectors. From and after that date the tax was paid by stamps on which a deduction of 7½ per cent. was allowed to brewers using them. Of the 6,207,401 barrels produced during the fiscal year 1866, the tax on 1,033,319 barrels was paid in money, and the tax on 5,174,082 barrels was paid by stamps.

The foreign demand for American malt liquors is still increasing, the applications for drawback during the fiscal year ended June 30, 1880, upon exports made to foreign ports having more than quadrupled those made for the fiscal year ended June 30, 1879. I take this occasion to renew my recommendation that provision be made in internal revenue

laws for the exportation of this article in bond.

EXPORTATION OF MANUFACTURED TOBACCO AND SNUFF IN BOND.

The subjoined table shows, as removed and unaccounted for July 1, 1879, and July 1, 1880, the quantity in pounds of manufactured tobacco and snuff which had been removed for exportation in bond, and concerning which the proofs of landing at a foreign port had not been furnished prior to the dates named.

AMENDATORY ACT REGULATING THE EXPORTATION OF TOBACCO, SNUFF, AND CIGARS IN BOND.

By an act of Congress passed during the latter part of the fiscal year, namely, on the 9th of June, 1880, section 3385 of the Revised Statutes, governing the exportation of manufactured tobacco, snuff, and cigars in bond, was amended so as to provide that export bonds which had been given or which should thereafter be given under the provisions of that section should be canceled upon the presentation to the collector of internal revenue of the detailed report from the inspector of customs and a certificate of the collector of customs at the port from which the goods are exported, that the goods removed from the manufactory under bond and described in the permit of the collector of internal revenue had been received by the said collector of customs, and that said goods were duly laden on a foreign-bound vessel, naming the vessel, and that the said merchandise was entered on the outward manifest of said vessel, and that said vessel and cargo were duly cleared from said port, and on the payment of the taxes on the deficiency, if any.

The effect of the amendment is to relieve exporters of tobacco, snuff, and cigars, exporting under the provisions of the law as amended, from the production of evidence showing landing of the goods at a foreign The law has not yet been sufficiently long in operation to show whether the release from the obligation to produce a landing certificate will be accompanied by a corresponding large increase of exportations. It, however, appears that in striking out a portion of section 3385, Révised Statutes, and substituting for the portion stricken out the amendatory provisions of the new law, the language of that part of section 3385 relied upon as authorizing the exportation of tobacco, snuff, and cigars by railroad cars or other land conveyances was, through inadvertence, not restored. I see no good reasons why the exportation of these articles under section 3385, as amended, should be confined to vessels, and I would therefore recommend that as early as possible in the next session of Congress the law be amended so as to clearly provide for the exportation of tobacco, snuff, and cigars by railroad or other land conveyances.

Exportation of friction matches and proprietary articles under section 19 of the act of March 1, 1879.

^{*} Distilled spirits.

In connection with the foregoing statement I have to call attention to the fact that while a drawback of tax on exported stills is authorized by section 3244, Revised Statutes, as amended by section 16 of the act of March 1, 1879, no provision has been made for the allowance of drawback on exported worms belonging to stills, which, like stills, are subject to a tax of \$20 each.

I have, therefore, to renew the recommendation made in my last annual report, that section 3244 named be amended so as to include such worms exported subsequent to March 1, 1879, the date above referred to. I have also to call attention to the fact that no appropriation for the payment of drawback authorized by sections 3244 and 3329, Revised Statutes, has been made, and I would therefore further recommend that section 3689, Revised Statutes, making appropriation for the payment of internal-revenue drawback be also amended so as to include all articles exported under the provisions of said sections.

The following table shows the number of persons who paid special taxes during the special-tax year ended April 30, 1880:

States and Territories.	Rectifiers.	Retail liquor deal- ers.	Wholesale liquor dealers.	Manufacturers of stills.	Manufacturers of cigars.	Dealers in leaf to-bacco.	Retail dealers in leaf tobacco.	Dealers in manu- factured tobacco.	Manufacturers of tobacco.	Peddlers of tobac-	Brewers.	Dealers in malt liquors.

ASSESSMENTS.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1879, and

June 30, 1880, respectively, and the increase or decrease on each article or occupation:

Article or occupation.	Amount ass	sessed during or ended—	Fiscal year ended June 30, 1880.			
	June 30, 1879.	June 30, 1880.	Increaseover 1879.	Decrease from 1879.		
Tax on deficiencies in production of distilled spirits Tax on excess of materials used in the production of distilled spirits Tax on deposits and capital of banks and bankers. Tax on circulation of banks and others Tax on distilled spirits fraudulently removed or scized Tax on fermented liquors removed from brewery unstamped Tax on tobacco, snuff, and cigars removed from factory unstamped. Tax on proprietary articles removed unstamped Assessed penaltics Legacies and successions Unassessed and unassessable penalties, in-	126, 002 14 6, 144 33 61, 917 45 2, 614 95 162, 285 72	\$73, 158 63 2, 829 97 3, 247, 998 90 461, 597 82 53, 312 18 877 75 88, 584 85 1, 529 86 93, 265 14 135, 532 80	452, 355 20 26, 667 40	\$2, 220 30 72, 689 96 5, 266 58 1, 085 09 9, 020 58		
terest, taxes previously abated, conscience money, and deficiencies in bonded accounts which have been collected; interest tax on distilled spirits; also fines, penalties, and forfeitures, and costs paid to collectors by order of court, or by order of Secretary, and unassessable taxes recovered; also amount of penalties and interest received for validating unstamped instruments (Form 58) Special taxes (licenses) Tax on income and dividends	401, 978 22 97, 068 91 34, 539 54	555, 315 50 59, 776 56 40, 614 60	153, 337 28 6, 075 06	27, 292 35		
Total	4, 235, 758 00	4, 814, 394 56	578, 636 56			

It will be observed that a decrease has occurred in the assessment of the following taxes, viz: On excess of materials used in the production of distilled spirits; on distilled spirits fraudulently removed; on fermented liquors removed from the brewery unstamped; on proprietary articles removed unstamped; on assessed penalties; and on occupations (special taxes).

This indicates a better observance of the laws on the part of taxpayers,

and a more prompt payment of their taxes.

The assessment of taxes on legacies and successions is under a law long since repealed, and in the nature of things such assessments must

naturally decrease.

There has been an increase in (1) the assessments on deficiencies in the production of distilled spirits; (2) of the tax on tobacco, snuff, and cigars removed from factories unstamped; (3) on the capital and deposits of banks and bankers; (4) on the circulating notes of individuals and corporations; (5) taxes recovered by suit, and (6) on incomes and dividends.

As to the first two classes named the slight increase is not regarded as significant of increased violations of law, as the assessments are below the average.

An increase in the third class is a gratifying evidence of increased prosperity in the business of the banks and bankers of the country.

The increase in the fifth class arises mainly from collections of taxes on net earnings and gross receipts of railroad-and other State corporations.

The following statement shows the amount of assessments in each of the several States and Territories of the United States during the fiscal vear ended June 30, 1880:

Alabama	\$33, 402 91	Montana	\$4,129 60

TABULAR STATEMENTS.*

I append tabular statements to accompany the bound volume, as fol-

Table A, showing the receipts from each specific source of revenue, and the amounts refunded in each collection district, State, and Territory of the United States, for the fiscal year ended June 30, 1880.

Table B, showing the number and value of internal-revenue stamps ordered monthly by the Commissioner and from the office of the Commissioner; the receipts from the sale of stamps and the commissions allowed thereon; also the number and value of

same of stamps and the commissions anowed thereoff, and the fittilled spirits, and fermented liquors, issued monthly to collectors during the fiscal year ended June 30, 1880. Table C, showing the percentages of receipts from the several general sources of revenue in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1880.

Table D, showing the aggregate receipts from all sources in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1872, to June 30, 1880.

June 30, 1880.

Table E, showing the receipts in the United States from each specific source of rev-

enue, by fiscal years, from September 1, 1862, to June 30, 1880.

Table F, showing the ratio of receipts in the United States from specific sources of revenue to the aggregate receipts from all sources, by fiscal years, from July 1, 1863, to June 30, 1880.

Table G, showing the returns of distilled spirits, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1880.

Table H, showing the receipts from special taxes in each collection district, State,

and Territory for the special-tax year ended April 30, 1880.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1880.

Table K. Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1880.

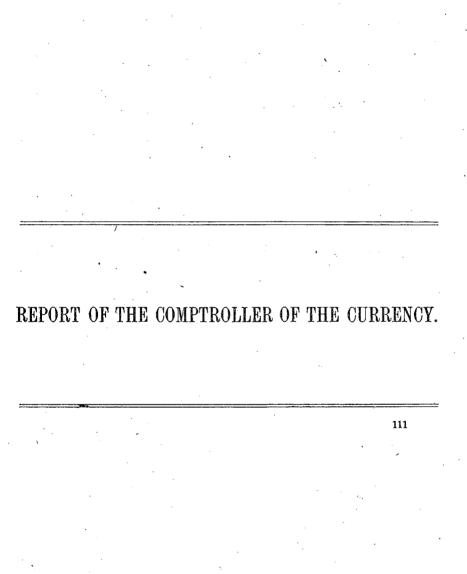

Very respectfully,

GREEN B. RAUM, Commissioner.

Hon. JOHN SHERMAN, Secretary of the Treasury.

REPORT

OF

THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, November 27, 1880.

I have the honor to submit for the consideration of Congress the eighteenth annual report of the Comptroller of the Currency, in compliance with section 333 of the Revised Statutes of the United States.

Fifty seven national banks have been organized since November 1, 1879, with an aggregate authorized capital of \$6,374,170, to which

\$3,662,200 in circulating notes have been issued.

Three banks, having a total capital of \$700,000, have failed, and dividends amounting to sixty-five, eighty, and ninety per cent., respectively, have been paid to the creditors of these banks during the year and since the date of failure.

Ten banks, with an aggregate capital of \$1,070,000 and an aggregate circulation of \$928,800, have voluntarily discontinued business during the year; and one bank, which had formerly gone into liquidation, has been placed in the hands of a receiver for the purpose of enforcing the individual liability of the shareholders. The total number of national banks organized from the establishment of the national banking system, February 25, 1863, to November 1 of the present year, is 2,495. Of these, 314 have gone into voluntary liquidation by the vote of shareholders owning two-thirds of their respective capitals, and 86 have been placed in the hands of receivers for the purpose of closing up their affairs.

National banks are located in every State of the Union except Mississippi, and in every Territory except Arizona; and the total number in operation at the date last named was 2,095, which is the greatest

number of banks that has been in operation at any one time.

The 13 States having the largest capital are Massachusetts, New York, Pennsylvania, Ohio, Connecticut, Rhode Island, Illinois, Indiana, Maryland, New Jersey, Maine, Kentucky, and Michigan, in the order named. The shares of the national banks which in the year 1876 numbered more than six and a half millions, and were held in average amounts of \$2,400, were then distributed among more than 208,000 persons residing in every State and Territory of the Union, in eleven countries or provinces of this continent and adjacent islands, and in twenty-five countries in Europe, Asia, and Africa.*

Included in the aggregate number of national banks organized are ten national gold banks, three of which, still in operation, are located in the State of California, having an aggregate capital of two millions

^{*} Interesting information in reference to the distribution of national-bank stock will be found on pp. 69 and 144 to 148 of Comptroller's Report for 1876.

of dollars and a total circulation of \$840,000. Four of these banks have changed into other organizations under the act of February 14, 1880,

which provided for such conversions.

A bill is now pending in Congress providing for the repeal of section 5176 of the Revised Statutes, which limited the amount of circulation to be issued to the national banks organized subsequently to July 12, 1870, to \$500,000, and also authorizing all national banks to issue circulation not exceeding the amount of their capital, upon the deposit of the necessary amount of United States bonds. The passage of this act will entitle all national banks to the same proportion of circulation upon capital and bonds as is possessed by those organized prior to March 3, 1865, and the passage of this bill is recommended.

The following table exhibits the resources and liabilities of the national banks at the close of business on the first day of October, 1880, the returns from New York City, from Boston, Philadelphia, and Baltimore, from the other reserve cities, and from the remaining banks of the coun-

try, being tabulated separately:

THE BANKS SINCE RESUMPTION.

The movement of the currency and the operations of the banks have never been more interesting than during the months which have intervened since the resumption of specie payments. To most of the political economists of this and other countries the resumption of coin payments by the United States at the time fixed by law, and its successful maintenance, were deemed almost impossible. No country had ever before successfully maintained payments in coin with so large a volume of currency outstanding, or with an amount of currency greatly in excess' Even those who were known to be earnestly in favor of resumption, both in and out of Congress, doubted the ability of the government and of the banks to commence and continue coin payments without a preparatory reduction of the amount of notes in circulation. said, truthfully, that no nation maintains at par a convertible paper currency which has not in its banks or among its people an equal amount of coin, and that, if successful, the United States would be an exception, and the only exception in this respect, among commercial nations. the resumption act giving authority for the purchase of coin in the markets of the world with United States four, four and one-half, or five per cent. bonds made resumption certain, if the bonds for a sufficient amount could be readily marketed at not less than par, as authorized by law. Purchasers for the bonds were promptly found, and resumption came so easily that many persons now believe it could have been as well

accomplished one year earlier, if Congress had fixed upon January 1.

1878, instead of upon the following New Year's day.

Since the date of resumption the country has been month by month growing richer in coin, not by the sales of bonds, which have been rapidly increasing in value, but by the production of the mines and the influx of specie in return payment for the excess of exports of our abundant products over our imports. The whole country has become so habituated to the use of paper money that the difficulty has been—not to provide means for its payment, for scarcely a dollar has been demanded but to supply the people with Treasury and national bank notes, which have been almost universally preferred.

For many years past, large amounts of currency have been annually drawn from the banks of the city of New York by the banks in the interior, for the purchase and shipment of grain and other products. The banks in the West and South supply the grain buyers with money, who pay it to the farmers, and by them it is disbursed to the country It then goes to the wholesale merchants in the larger cities of the interior, by whom it is deposited in the banks and returned again to the money centers in the Eastern States. Thus the money which was paid out in the fall returns again to the city of New York long before midwinter, whereby much of the currency of the country, instead of continuing to circulate, accumulates in the New York banks both before and after the time for the large movements of produce.

This ebb and flow of the currency continued yearly up to the time of the great harvest of 1879. The drain of coin and currency from the large cities, amounting to more than 100 million dollars during the fall of that year, made currency scarce in New York notwithstanding the unprecedented influx of gold from abroad. The usual return of the cur-

rency in the winter was expected, but did not occur.

The experience of 1879 was considered exceptional, but another year has nearly passed and the experience of the former year has been, to a considerable extent, repeated. A large portion of the avails of produce has been retained, either for the liquidation of debts, for employment in trade and commerce at home, or in the many new and extensive enterprises for which the West is distinguished, where there would appear to be no limit for the safe and profitable employment of capital. The coin in the banks has increased from 41 millions on January 1, 1879, to 109 The Treasury holds its immense hoard of millions on October 1, 1880. gold, not surpassed in amount by any other depository in the world.

The merchant, the manufacturer, and the farmer are alike prosperous; the people have paid their debts to an unprecedented degree, and hold their earnings in the paper currency of the government and of the banks in larger amounts than have hitherto been known. The receipts of the government have been so large that, after refunding many millions of 5 and 6 per cent. bonds into 4 per cents., it has still been able during the year to purchase in the market at a premium more than 100 millions of its bonds for cancellation. The deposits of the banks have everywhere increased, and money has been abundant wherever business or investment has invited capital, and there has probably never been a period when it has generally commanded so low a rate of interest as during the last two years.

The rate at the Bank of England and the Bank of France has, for a considerable portion of this period been 2½ per cent. The English consols have for the first time in twenty-seven years advanced to par, while the rate for call loans in London has at times been at what may be termed the infinitesimal rate of from one-half to seven-eighths of one per cent.

Low rates have also prevailed in this country. York for some months past money at call, upon the best collaterals, could be obtained at from 2 to 3 per cent. The average rate upon firstclass commercial paper during the fiscal year of 1879 was 4.4 per cent., while the average rate during the succeeding fiscal year has been 5.3 per cent., owing not to natural but to artificial causes. The rate, however, for first-class mercantile paper in the past four months has been from 4 to 41 per cent. Low rates have prevailed, not only in New York City, where money is not unfrequently borrowed upon good collaterals for speculative purposes, but also throughout the country, including many places where money has heretofore been loaned, if at all, at usuri-The rates during the past year on large transactions in firstclass commercial paper have been: In Philadelphia 3 to 5 per cent.; Boston and Baltimore, average 5; Washington, 7; Chicago, 4 to 7; Saint Louis, 5 to 7; Milwaukee, 6 to 8; Cincinnati, 6 to 7; Cleveland, 8 to 8; Saint Paul, 8 to 10; Omaha, 10; Denver, 10 to 15; San Francisco, 8; California (country), 9 to 12; Louisville, 6 to 7; Richmond, 7; Charleston, 7 to 8; Savannah, 8; Selma, average 9; Atlanta, 10; New Orleans, 4 to 6. Rates at nearly every point are less than for previous vears.

The borrowing power of the government for a considerable portion of the year has been at 3½ per cent., and that of many of the leading States and cities 4 per cent. The legal rate in the State of New York has been and cities 4 per cent. reduced from 7 to 6 per cent. There has also been a large reduction in rates at remote points, which, until recently, have been considered upon Many seven per cent. railroad bonds were until recently placed with difficulty, even at a discount; now six per cent. bonds, upon lines at more remote points, are, in many instances, sold at par. tions of the country the rates for loans upon real estate are higher than In some of the Southern States it is difficult to loan for business paper. money upon real estate, on account of the legal obstacles in the way of The highest prevailing rates are found in the country districts of the South, but it is now believed they will be gradually reduced, both by the increasing value of its productions and by the introduction of foreign capital to be employed in manufactures, which have already been introduced with great success. In large districts of the West, where formerly money could not be readily obtained upon real estate, the number of borrowers is much less, and the demand by no means equal to the supply of funds seeking investment in that class of securi-Such loans are now regarded not only as desirable investments, so far as security is concerned, but are made at a much less rate of interest The rates in New York are subject to frequent changes, not only on account of the importation of coin, the drain in payment for produce from the interior, and the purchase of bonds by the govern ment, but by the influx of foreign capital seeking employment in consequence of the prevailing depression in business elsewhere. If the rates are favorable, large amounts of money are placed by cable by residents in foreign countries, and by telegraph between remote points in our own country, with as much certainty and safety as by the use of bills of exchange or by the movement of coin itself. So reliable has this means of transfer become that not only are payments thus made at home and abroad, but large sales of breadstuffs and other products are accomplished by parties in the interior cities without the intervention of agents at the sea ports, thus shortening the time of bills drawn upon shipments of products.

Many men who were formerly borrowers have become lenders; and numerous lenders now seek investment in government bonds and other securities which yield much less than the legal rate of interest.

The abundance of money and the low rates of interest have made it difficult for capitalists to find satisfactory investments and have led the Comptroller to examine the statements of the banks for a series of years in order to compare their ratios of loans to their means, and to ascertain if, during the past two years, they have found use for their increased deposits.

In order to show this, the following table is given, which exhibits concisely the ratios of the loans of the banks to their capital, surplus, and net deposits, and the ratios of specie and legal-tender notes to net deposits, in New York and in the group of other principal cities sepa-

rately, at corresponding dates from 1870 to 1880, inclusive:

If the ratios of the loans of the banks in New York City to their capital, surplus, and net deposits be examined, it will be found that in October of 1879 and 1880 they were 70.8 per cent., in 1878 but 65.4 per cent., in 1877 but 68 per cent., and in 1876 65.1 per cent.; and that the loans are now proportionately higher than at any time since 1873. The means of the banks in Boston and the other reserve cities were more fully employed in October than they were at the corresponding dates for the two previous years, though the business of the banks was not as much extended as it was during the four years following the crisis of 1873.

It will surprise those whose attention has not heretofore been called to the subject to find how closely the means of the banks in the commercial cities have been employed during the last eleven years, notwithstanding the variations in rates of interest, and particularly during the last two years, when money has been so abundant and the deposits have

so rapidly increased. It will be seen that prior to 1876, with the exception of a single year, the loans in New York exceeded the net deposits, while since that time, though there has been considerable variation, the net deposits have been somewhat in excess of the loans at the dates given. In the other principal cities, which continually keep large amounts of money in New York subject to demand, and thus diminish their own net deposits as given in the above table, the loans have always largely exceeded their deposits. The same remark is more emphatically true of the banks in the country districts which have in New York, as well as in other cities, large amounts of money on deposit subject to call. The capital of this class of banks is also much larger as compared with their deposits than is that of the banks in the large cities, and their loans therefore relatively greater.

The ratio of the loans of this group of banks to their capital, surplus, and net deposits will be seen in the statement below, which also includes a table showing the loans, capital, surplus deposits and cash reserves of all the national banks of the United States:

The ratios of the loans of the banks in the country districts were, on October 1, last, 7.3 per cent. less than at the corresponding dates in 1875, and 5.2 per cent. less than in 1877. The opportunities for using money in this group of banks are not in proportion to the increase of deposits, and their balances in other banks have by no means diminished.

It will be seen that the loans of the banks now exceed 1,041 millions, which is 207 millions more than at the corresponding date in 1878, while the capital and surplus at the previous date was 5 millions in excess of the present amount. The net deposits in the same period increased nearly 290 millions, and the total individual and bank deposits,

not deducting the amount due from banks and the clearing-house exchanges, more than 322 millions, amounting to the large and unprecedented sum of 1,155 millions, as may be seen from a previous table.

The following table gives a classification of the loans of the banks in the city of New York, in Boston, Philadelphia, and Baltimore, and in the other reserve cities, for the last two years, at the dates of their reports in the month of October:

1879.

Classification.	New York City.	Boston, Phila- delphia, and Baltimore.	Other reserve cities.	Country banks.	Aggregate.	
•	47 banks.	99 banks.	82 banks.	1,820 banks.	2,048 banks.	
On U.S. bonds on demand On other stocks, bonds, &c., on demand On single-name paper without other security. All other loans	\$8, 286, 525 78, 062, 085 22, 491, 926 87, 011, 366	\$2, 017, 226 22, 605, 795 13, 136, 911 118, 267, 128	\$4, 360, 523 11, 445, 079 7, 150, 239 65, 023, 494	\$435, 154, 810	\$14, 664, 274 112, 112, 959 42, 779, 076 705, 456, 798	
Totals	195, 851, 902	118, 267, 128	65, 023, 494 87, 979, 335	\$435, 154, 810 435, 154, 810	875, 01	

1880.

	47 banks.	101 banks.	83 banks.	1,859 hanks.	2,090 banks.
On U. S. bonds on demand	\$3, 915, 077	\$525, 445	\$1, 378, 168		\$5, 818, 690
On other stocks, bonds, &c., on demand On single-name paper without	92, 630, 982	30, 838, 692	16, 558, 260		140, 027, 934
other security	27, 755, 152 114, 127, 290	22, 542, 776 137, 405, 246	10, 4 0 2, 295 75, 687, 334	\$503, 294, 724	60, 700, 22 3 830, 514, 59 4
Totals	238, 428, 501	191, 312, 159	104, 026, 057	503, 294, 724	1, 037, 061, 441

In this table will be seen—what would be expected from a large increase in the clearing-house exchanges, which are 38 millions more than in 1878, and larger than at any time since 1873—a large increase in loans upon stocks and bonds payable on demand. Much of this increase is due to operations at the stock board, which are always most buoyant in prosperous times; but a considerable portion may be due to loans made to banks and bankers in the interior upon collateral security, at rates so low as to leave room for profit in reloaning to their own dealers.

The amount invested by the banks in United States and other stocks and bonds is more than 92 millions of dollars, as may be seen in a previous table, which fact is evidence either of a difficulty in obtaining satisfactory loans or of a preference for such temporary investments.

When the rates of interest are low there is danger that bank managers, in their desire to use their available means, may be induced to loan upon securities which are not of the best character, and thus in the end diminish rather than increase their earnings. The loans were at the highest point in the year 1875, and the two previous years, and the national banks were then enthusiastic over the high rates of interest, their large deposits, and their large earnings and dividends; but the delusion has been dispelled by the enormous losses which they have been obliged to charge off during the past five years, reaching the extra-

ordinary sum of 100 millions, which were largely the result of overtrading during the period when gold coin was a commodity, and the legal standard a promise to pay, unfulfilled and fluctuating in value for seventeen years. The great losses experienced during these years, which will not soon be forgotten, enforce the principle that no legitimate business is safe which is conducted upon a varying standard of value; and the crisis of 1873 will always be remembered as a striking example of the evil results arising from business conducted during "good times" upon a fictitious basis.

The amount of legal cash reserve required of the banks in New York City is 25 per cent. of their deposits, of the banks in the other reserve cities one-half of this ratio, and of the banks in the country districts six per cent. of their deposits. The amount required has in the aggregate always been held, except in a single instance in the city of New York, during the last ten years (without including the redemption fund in the Treasury), by the three different groups of national banks; but the aggregate amount in the city of New York has been at times very close, and particularly during the last three years, and some banks have frequently, if not habitually, expanded their loans beyond reasonable limits, relying upon imports of gold or purchases of bonds by the Treasury to replenish their deficient reserves.

The banks in the interior, if we consider their large deposits elsewhere, are as a rule found to be much stronger in available means than the banks in New York City; while the reverse of this should always be true when such large balances, amounting to more than 100 millions of the funds of other banks, are constantly on deposit in the latter city subject

to demand.

The imports of gold in excess of exports, from the date of resumption to November 1, 1880, have been \$119,384,795,* and the estimated gold production of the mines is \$67,449,929; in all, \$186,834,724. During this period the gold in the Treasury has increased \$20,976,007, and in the banks \$73,976,149, and the remainder, \$91,882,568, has been dispersed throughout the country or used in the arts.

The amount of currency and coin in the country is known to be much greater than at any former time, and its distribution, together with its partial disappearance from the money-centers, has been an interesting

subject for discussion.

Tables are herewith given showing the amount of coin and currency in the country on January 1 and November 1, 1879, and on November 1 of the present year; the amounts of silver and gold coin, which include the bullion in the Treasury, being the estimates of the Director of the Mint:

	January 1, 1879.	November 1, 1879.	November 1, 1880.
Legal-tender notes National-bank notes Gold coin Silver coin	\$346, 681, 016 323, 791, 674 278, 310, 126 106, 573, 803	\$346, 681, 016 337, 181, 418 355, 681, 532 126, 009, 537	\$346, 681, 016 343, 834, 107 454, 012, 030 158, 271, 327
Total	1, 055, 356, 619	1, 165, 553, 503	1, 302, 798, 480

The amount of Treasury notes has remained the same since January 1, 1879, as provided by law. There was an increase of bank notes for the first ten months of 1879 of \$13,389,744, and for the present year of

^{*} Not including imports outside of New York City in October of this year.

\$6,652,689. The total net increase of national-bank notes issued since resumption is \$20,042,433, and the total increase of gold \$175,701,90 and of silver \$51,697,524. The statement below gives the amount ocurrency and coin in the Treasury at the same dates as in the previous tables, and the amount in the national banks, on the dates of their returns nearest thereto—namely, January 1 and October 2, 1879, and October 1, 1880, respectively. The amount given for the State banks and trust companies and the savings banks is at the nearest comparative dates of their official reports. The banks in the State of California report their coin and currency in the aggregate, and in this table the coin is estimated to be three-fourths of the total amount and the currency one-fourth.

	January 1, 1879.	November 1, 1879.	November 1, 1880.
Gold—In the Treasury, less certificates In National banks In State banks	35, 039, 201	\$156, 907, 986 37, 187, 238 12, 171, 292	\$133, 679, 34 102, 851, 03 17, 102, 13
Total gold	158, 680, 355	206, 266, 516	253, 632, 51
Silver—In the Treasury, standard silver dollars In the Treasury, bullion In the Treasury, fractional coin In National banks, including certificates Total silver	9, 121, 417 6, 048, 194 6, 460, 557	32, 115, 073 3, 824, 931 17, 854, 327 4, 986, 492 58, 780, 823	6, 495, 47
Currency—In the Troasury In National banks In State banks In savings banks	25, 944, 485	41, 906, 376 118, 546, 369 25, 555, 280 15, 880, 921	26, 846, 820 86, 439, 920 25, 828, 790 17, 072, 680
Total currency	244, 565, 639	201, 888, 946	156, 188, 228
Grand totals	442, 125, 902	466, 936, 285.	494, 293, 36

The silver certificates, of which \$1,165,120 was held by the nationa banks and the remaining \$18,615,121 was in circulation on November 1, 1880, are not included in the above exhibit.

If from the amount of coin and currency in the country, as given in the first table, the amount in the Treasury and the banks be deducted the remainder will give the amount of each kind then in the hands of the people outside of these depositories, as follows:

	January 1,	November 1,	November 1,
	1879.	1879.	1880.
Gold	\$119, 629, 771	\$149, 415, 016	\$200, 379, 519
Silver	67, 693, 895	67, 228, 714	73, 798, 707
Currency	425, 907, 051	481, 973, 488	534, 326, 898
Totals	613, 230, 717	698, 617, 218	808, 505, 118

The gold in the Treasury has increased \$20,976,007, and in the banks \$73,976,149, releasing \$50,768,829 of paper currency in the Treasury and \$37,608,585 in the banks. The increase of gold outside of the Treasury and the banks is 80.7 millions and of paper currency 108.4 millions. The amount of standard dollars coined is \$72,847,750, of which \$47,156,588 are in the Treasury and \$25,691,162 in circulation. The remainder of

the silver, \$85,423,577, is subsidiary and trade dollars, and bullion, of which \$30,820,561 is in the Treasury and \$54,603,016, is in use in place of the previous fractional paper currency which, on March 23, 1874, was at its highest point, and amounted to \$49,566,760. The additional amount of gold coin, of silver dollars, and paper currency outside of the Treasury and the banks is thus estimated to be \$195,274,401, which amount has been dispersed among the people since the date of resumption.

The average prices and value of manufactured goods, of breadstuffs, of provisions, and of other products have largely increased. The laborer has been steadily employed at remunerative wages. The frontier has rapidly receded. All classes of people have been liquidating their debts, and much greater amounts of money have been held in the tills of country traders and at home for ready use. The hoarding of a small amount by each of fifty millions of people, or by ten millions of families, is of itself sufficient to account for the disappearance from the usual places of deposit of a large portion of the addition to the circulating me-

dium since the date of resumption.

The most gratifying exhibit in the above statement is the fact that the national banks are now doing business upon a specie basis and with a true standard. For the ten years preceding the resumption of specie payments the average amount of coin held by the banks was but \$26,303,309, and all but \$8,540,252 of this amount was held by the banks in the city of New York. The amount of coin held has, of course, at times largely exceeded this average, as on January 20, 1877, when it was more than 49 millions. But this amount was soon reduced, and in the following April it had fallen to 27 millions, the previous increase having been due chiefly, not to deposits of dealers or payments on loans, but to disbursements of interest by the gov-At other times the banks have held much less than the average amount stated. For instance, on October 1, 1875, they held but \$8,050,329, of which the banks in the city of New York held but \$4,955,-.624, and on May 1 of the same year they held but \$10,620,361, of which the banks in the city of New York held \$6,683,325. This was at the time when both the paper issues of the government and the circulation of the banks were at their highest amounts, the former being 428 millions and the latter 354 millions, in all, 782 millions, while the proportion of coin to their circulation then held by the banks was only about three per cent.

One year ago it was urgently recommended "that all the national banks should take advantage of the present influx of gold to accumulate in their vaults an amount equal to the total cash reserve required by law," and the hope was then expressed "that the reports of another year might show them to be possessed of at least 100 millions in gold coin." On June 14 of the present year the banks reported 99 millions of specie, and on October 1 more than 109 millions of coin (including nearly six and one-half of silver), which more than equals one-third of the total circulation of the banks in operation. The amount of gold coin now held is but 18 millions less than the whole cash reserve required, and would undoubtedly have been still greater except for the high rates charged for the transportation of gold coin, which are greatly disproportioned to the cost of moving paper currency and which, it is to be

hoped, will, by some means, be largely reduced.

Much newspaper criticism has appeared in the mean time, complaining of the comparatively small amount of legal-tender silver dollars held by the banks, and some of the banks have themselves encouraged this criticism. The arguments used in favor of the accumulation of silver under existing laws are unsound in principle and against all experience. No one prefers to put away for future use a product which will spoil by lapse of time, or which will deteriorate in value. The banks, if well managed, will transact business upon the same general principles as those on which an individual of superior judgment would conduct his own affairs, holding in reserve that coin which is known to be of uniform value everywhere in preference to that which, by the operation of the laws of trade or business, will be likely to become of less value. The law compels the citizen and the corporation to receive all legal-tender money in payment of debts; but it does not, and ought not to, require any one to receive on deposit that which will not as readily be received

in turn by the depositor.

The Bank of France on January 1, 1877, as will be seen in a subsequent table, held 306 million dollars of gold and 127 millions of silver, or seventy-one per cent. of gold and twenty-nine per cent. of silver. On November 4, 1880, it held \$113,855,000 of gold and \$365,929,000 of silver, or twenty-four per cent. of the former and seventy-six per cent. of the latter, having lost in the interval 192 millions of gold and gained 239 millions of silver, thus very nearly reversing the percentage of each; and it is said that about 70 millions of this amount is distributed among the 90 branches of the Bank, and adds but little to the strength of the reserve of the parent bank.* Since September 23 last, while its circulation was 475 million dollars, and its deposits 115 millions, it has lost \$31,300,000 of gold. "During a part of this time it has endeavored to check the demand for export by various expedients, without raising the rate of discount. Gold was offered by the Bank in pieces of ten francs, in coins not of full weight, and other restrictive measures were Gradually the inutility of these expedients became obvious. The drain of gold still continued. The Bank then proceeded to employ the only efficacious method of protecting the reserve, and raised the rate of discount. At the same time it removed all restrictions on the issue This also had a good effect. * * * Confidence in fact was restored by following the ordinary rules of business, and the first of these rules is, that the price of an article should follow its demand."

France is fast traveling the road open for all nations who try to maintain a double standard where the intrinsic value of gold and silver coin is widely at variance. Sooner or later the time will come when the creditors of the Bank will prefer payment in the dearer metal, and the refusal to pay the kind of coin asked for by the creditor who has the option will bring down the cheaper coin to its value in the markets of the world. Then the Bank must replenish its store by selling its bonds under disadvantageous circumstances or remain permanently upon the

silver basis.

The United States is at the present time in a similar situation to the Bank of France, except that its liabilities are less and its store of gold somewhat greater. On September 30, 1877, the Treasury held 107 millions (\$107,039,529) of gold and nearly seven and one-half millions of silver (\$7,425,454), or ninety-three and one-half per cent. of the former and six and one-half per cent. of the latter. On November 1, 1880, it held in all 141 millions of gold (\$141,133,849), including \$7,454,500 held for the redemption of certificates outstanding, and 77 millions of silver (\$77,977,149), or sixty-four per cent. of gold and thirty-six per cent. of silver. Everything is favorable at the present time, but the operation

^{*} The Public, November 18, 1880.

of laws now in force will continue to reduce the gold and increase the silver. The government, by trying to force silver upon the holder of bonds matured, or in payment of legal-tender notes—thereby assuming that the silver dollar is not the equal of the gold dollar—and by taking the option away from the holder of the note, may any day bring the nation upon the silver standard, which will at once advance the price of all products, and place gold at such a premium that an investment in it at par would be at least twice as profitable as in United States bonds. Such a situation is not satisfactory to any intelligent business man, and no effort should be spared to enlighten the people upon the silver question and to effect the repeal of the present law. The banks as a class have no prejudice against silver coin other than that occasioned by its inconvenience. If Congress shall, by wise legislation, diminish the issue of small notes, and restrict the silver coinage within judicious limits, the standard silver dollar will do good service, and soon accumulate in bank vaults and find its way into general circulation. If not, it is wisdom on the part of bank officers, who act for the interest of their stockholders, to keep their reserves and all their ready means as nearly as possible in gold coin.

This brief outline of some of the transactions of the national banks covers the most important period of the financial history of the country, and shows the immense advantage experienced by this country from having, during the years following the great war, an excellent banking system. The system was established, not for the benefit of the stockholders of the banks, but for the benefit of all the people. Its ample basis of unimpaired capital, its large surplus, its large cash reserves, its secured circulation, its protection to depositors, and its general management, must commend it to every student of political economy; and it is among the most gratifying of political signs that during the late exciting campaign, while both parties have claimed the credit of having brought about a return to specie payments, neither party has urged the abolishment of the system. The national banks have now entered upon a new career. The machinery is in excellent working order, and but little legislation is needed to perfect it into a homogene-

ous system which will be part and parcel of the nation.

But it does not follow because the banks are transacting business upon a true standard that they will be exempt from further losses. The hazards of business are certainly much less on that account, but the rapid and unprecedented increase of the circulating medium, such as has been experienced during the last two years, may result in great injury as well as benefit to the country. The good harvests, the large products of the mines, the influx of specie from abroad, the increasing demand for produce and manufactures, the prosperous condition of trade and of the industries of the country, are sure to be followed by periods of depression which will seriously affect, not only the value of the collaterals upon which large amounts of call loans are based, but also the payment of commercial paper. The amount of legal reserve required to be held by the banks was largely reduced by the act of June 20, 1874, and the percentage held in the larger cities has been greatly diminished during the past few years. The sudden and enormous increase of individual and bank deposits in the commercial centers should be accompanied, not only by the reserve required by law, but by a much greater percentage of coin and a much smaller expansion of loans, if the banks would check unhealthy speculation, and keep themselves in condition for an adverse balance of trade and for the legitimate demands: of the depositors and correspondents who confide in them.

DISTRIBUTION OF LOANS BY THE BANK OF FRANCE, THE NATIONAL BANKS OF THE UNITED STATES, AND THE IMPERIAL BANK OF GERMANY.

The Bank of France.

The report of the transactions of the Bank of France for 1879, made by the general council to the general meeting of the shareholders on the 29th of January, 1880, contains much interesting information in reference to its operations.*

The Bank of France has a capital of 182,500,000 francs, which, expressed in the currency of this country, at the rate of five francs to the dollar, is equal to \$36,500,000. It has ninety branches, as required by law, forty-one of which were carried on in 1878 at a loss of \$162,225; and thirty in 1879 at a loss \$95,840. The circulation of the bank on November 4, 1880, was \$473,805,793; its deposits \$108,892,222, of which \$40,521,965 were government deposits; its coin, \$113,850,000 of gold and

\$249,400,000 of silver; and its loans \$195,707,859.†

The amount of commercial paper discounted at the Bank of France and its branches during the year 1879 reached its maximum on November 28, when it was \$172,360,000, being nearly five times the amount of its capital. The minimum amount of discounts was on March 20, being then \$74,720,000, or about twice the amount of its capital. In addition to commercial paper, or trade bills, discounted, the bank makes advances on collateral securities, such as bullion, railway shares, and government bonds. The highest amount of such advances in 1878 was \$22,960,000, which was increased in 1879 to \$31,100,000. The combined amount of commercial paper, or trade bills, and of advances on securities, ranged from \$190,000,000 to \$200,000,000. In addition to its discounts and loans the bank usually holds about \$54,500,000 in various securities of the French Government.

About one-third of the commercial paper discounted at Paris (\$209,-888,385) was payable in towns where the bank had branches, the remaining two-thirds (\$468,320,475) being payable in that city. The total amount of commercial paper discounted during the entire year was more than 1,452 millions of dollars (\$1,452,175,260). The total number of pieces of paper discounted during the year was 8,071,505, of which number 4,169,292 were payable at the branches and 3,902,213 at Paris:

The reports for 1878 and 1879 give classifications of the Paris bills. The discount of certain classes of these trade bills, which are for very small amounts, is a characteristic of the Bank of France, and the statistics are both interesting and curious. The report gives a classification of the bills on Paris for 1879, as follows:

Bills of 10 francs, or \$2 each, and under Bills of 11 francs to 50 francs each, or \$2.20 to \$10. Bills of 51 francs to 100 francs each, or \$10.20 to \$20. Bills of above 100 francs each, or \$20.	623, 232°
Total	3 909 913

It will be observed that the whole number of these bills was nearly four millions, of which more than two-thirds (2,878,294) were for amounts above twenty dollars. The remaining 1,023,919 bills were all for sums less than twenty dollars, and, at the highest limit, could not much exceed 16 millions. There were 623,232 bills in amounts varying from \$10.20 to \$20. There were also 392,845 bills varying in amount from \$2.20 to \$10, and

^{*}L'Economiste Française, April 10, 1880. †London Economist, November 6, 1880.

7,842 bills as low as two dollars each, or under. The number of trade bills in 1877 below \$20 was 393,503; in 1878, 1,054,381; and in 1879, 1,023,919. The average amount of each of the Paris bills in 1879 was \$171.80; the average of the bills at the branches was \$185.60; and taking the whole number together the average was \$180.

The number, classification, and amount of commercial bills discounted

during the years 1878 and 1879 are stated below in tabular form:

			. 187	78.			
		C	Am	Amount.			
Where discounted.	10 francs, or \$2 and be- low.	11 francs to 50 francs, or \$2.20 to \$10.	100 francs,	frence or	Total number.	In francs.	In dollars.
Paris Branches	4, 898	240, 640	808, 843			3, 106, 226, 250 3, 760, 636, 075	621, 245, 250 752, 127, 215
	4, 898	240, 640	808, 843	2, 428, 508	7, 274, 839	6, 866, 862, 325	1, 373, 372, 465
			. 18	79.	,		
Paris Branches	7, 842	392, 845	623, 232			3, 391, 044, 344 3, 869, 832, 100	678, 208 , 869 773, 966, 420
	7, 842	392, 845	623, 232	2, 878, 294	8, 071, 505	7, 260, 876, 444	1, 452, 175, 289

In 1878 the average amount of each bill discounted at Paris was \$178.40, and at the branches \$198.40, the average of the whole being \$188.80.

The Bank of France receives these bills chiefly from bankers, who keep accounts with it, as it discounts only for its depositors. These bankers in turn discount them for small brokers, who receive them for this purpose from the working classes. The bills are presented to the bank for discount, with accompanying schedules. The rate of interest is the same on small bills as on large ones, and no charge is made beyond the discount or interest. The greater part of them are bills of exchange, and issue from small manufacturers, and also from workmen on their own account, known as makers of the "Articles de Paris."

The National Banks of the United States.

The following table gives by geographical divisions a classification, similar to the foregoing, of the notes and bills discounted held by the national banks on October 2, 1879, when the total amount of loans was \$875,013,107:

		Number and classification of bills.						т		
Geographical divi- sions.	No. of banks.	\$100 and less.	\$100 to \$500.	\$500 to \$1,000.	\$1,000 to \$5,000.	\$5,000 to \$10,000.	\$10,000 and over.	No.	Amount.	Average.
								ļ ———		
New England States Middle States Southern States Western States and		115,285	54, 965 132, 032 24, 480	39, 484	50, 854		5, 276		\$240,552,893 63 416,600,226 30 45,890,807.95	1,175 56
Territories	685	90, 141	84, 563	27, 590	31, 812	5, 381	1, 800	241, 287	171,969,179 22	712 72
United States	2, 048	251, 345	296, 040	95, 380	125, 223	28, 199	12, 082	808, 269	875,013,107 10	1, 082 58

The number of pieces of paper discounted, as will be seen, was 808,269, and the average of each discount, \$1,082.59. If the average time of these bills was sixty days, and the banks held continuously the same amount, the number of discounts made during the year would be nearly five millions (4,849,614), the total discounts more than five thousand millions (5,250,000,000), which would be equal to a discount of \$700 annually for each voter, or \$500 for each family in the country. The number of notes and bills of \$100 each, or less, at the date named was 251,345, or nearly one-third of the whole; the number of bills of less than \$500 each was 547,385, or considerably more than two-thirds of the whole; while the number of bills of less than \$1,000 each was 642,765, which is more than three-fourths of the whole number.

Every State and Territory, except Florida, Dakota and Washington, had single discounts of \$10,000 and over, and every State, except Florida, had discounts of \$5,000 and over. All the States had discounts in amounts varying from \$100, or less, to \$1,000, and over. The discounts of the banks in the State of New York amounted to 260 millions, the number of pieces of paper held being 170,137, which was more than was held by all of the New England banks combined. The discounts of the New England banks were 240 millions, which were represented by 153,869 pieces of paper. The amount of discounts in the New England States was considerably more than those of the Western and Southern States; but the number of loans in New England was only about onehalf the number in the South and West. The banks in New York City held 2,907 pieces of paper of \$10,000 each, and over, and those in the remainder of the State 451. Boston held 2,258 of such pieces, and the remainder of Massachusetts 995. Philadelphia held 809, and the remainder of Pennsylvania 558; Chicago held 322, and the remainder of Illinois 105. The total number of pieces held by the four cities here named was 6,296, which is more than one half of the aggregate of this class of bills held by all the national banks in the United States. bank examiner in the city of New York gives the following estimate of the average amount of loans in the city of New York:

41,598 loans, averaging \$2,500 each, amounting to	\$104,000,000
4,926 loans, averaging 7,500 each, amounting to	37, 000, 000°
2,907 loans, averaging 19,000 each, amounting to	55, 000, 000

Of the loans exceeding \$10,000 each he estimates as follows: 150 of \$50,000, amounting to \$7,500,000, and 80 of \$100,000, amounting to \$8,000,000. He says that the largest loan of any kind which ever passed through his hands was one for the sum of \$1,000,000, secured by United States bonds, and that it was a legitimate loan, understood to have been principally employed in the erection of an enormous oil-refinery in New Jersey. He also says that he has frequently handled demand loans of \$500,000 each.

In answer to an inquiry in reference to small loans, he replies that the tobacco manufacturers receive large numbers of promissory notes, of a small amount each, payable in almost every city, town, and village in the country, and running from thirty to fifty days' time. The sewing-machine companies and the manufacturers of billiard tables, pianos, and farming implements also receive large numbers of notes of from \$10 to \$50 each, being monthly payments on articles sold by them. These small notes are usually received by the banks as collateral security for loans, and are forwarded by them for collection. A charge for collection of from 10 to 25 cents is made upon each small note.

The average amount of each loan in New York City was \$3,962; in Boston, \$3,083; Philadelphia, \$1,688; Pittsburgh, \$1,993; Chicago, \$2,244; Baltimore, \$1,593; Milwaukee, \$2,086; Saint Louis, \$1,575; Cincinnati, \$1,231; Cleveland, \$1,244; Detroit, \$1,320; Louisville,

\$1,007; and New Orleans, \$1,936.

Among the States having the smallest average loans were the following: New York, exclusive of the cities of New York and Albany, \$499; Pennsylvania, exclusive of Philadelphia and Pittsburgh, \$535; Maryland, exclusive of Baltimore, \$505; Kansas, in which the average was \$353; Iowa, with an average of \$375; West Virginia, of \$350; Delaware, \$556; New Jersey, \$566; Minnesota, \$621; Vermont, \$645; North Carolina, \$662; Tennessee, \$651; Maine, \$740; Indiana, \$711; New Hampshire, \$815; South Carolina, \$846; Georgia, \$882.

A table will be found in the appendix giving the number of each class of discounts held, their average amount, and the total amount of money loaned in each of the States and principal cities of the Union. An examination of this table will give full and interesting information relative to the distribution of loans by the banks in the different sections of the

country.

The Imperial Bank of Germany.

The Imperial Bank of Germany has a capital of 30 millions of dollars,

and is situated in the city of Berlin.

The total number of bills of all kinds discounted during the year 1879 was 2,374,394, amounting to \$852,175,650, the average amount of each bill being \$358.90. The bills are classified as follows: There were 533,564 Berlin bills, amounting to \$263,663,280—average \$494.15 each; the number of inland bills was 1,834,351, amounting to \$578,693,335, and averaging \$315.47 each; and the number of foreign bills was 6,479, in amount \$9,819,035, and averaging \$1,515.52 each. The average amount of loans and discounts for the year was \$82,073,500. The loans and discounts were highest on December 31, when they were as follows:

Berlin bills 83, 157, amount	ing to \$44,636,600, aver	aging \$536 77
Inland bills 164, 844, amount	ing to "51, 840, 460, aver	aging 314 48
Foreign bills 1, 442, amount	ing to 3,936,230, aver	aging 2,729 70

Total bills 249,443, amounting to 100,413,290, averaging 402 55

The discounts were lowest on March 23, their total amount being then \$67,349,000.

• The time of the Berlin bills varied from 16 to 76 days, their average being 55 days, and the time of the inland bills was from 14 to 63 days, their average being 26 days.

STATE BANKS, SAVINGS BANKS, AND TRUST COMPANIES.

The first systematic effort to obtain annual statistics showing the condition of banks organized under State laws was commenced by the Treasury Department in 1834, in compliance with a resolution of the House of Representatives, passed July 10, 1832. These statistics were compiled from such returns as were required by the laws of various States to be made to their authorities. This compilation was continued for twenty-nine years, from 1834 to 1863, after which it was discontinued. The annual returns from this source were given for each State, in concise form, in the Comptroller's report for 1876, as were also such other data as could be obtained in regard to the two Banks of the United States, and other moneyed corporations of the country in operation prior to the year 1834. Those returns were incomplete and unsatisfactory.

In many of the States no reports were required from banks organized under their laws, in others reports were infrequently required, and in all there was an entire absence of uniformity as to the dates upon which reports were required to be made.

The act of Congress of February 19, 1873, section 333 of the Revised Statutes, requires the Comptroller to obtain from authentic sources, and to report to Congress, statements exhibiting under appropriate heads the resources and liabilities of such banks and savings banks as are organized under the laws of the several States and Territories. In compliance with this act he has presented annually in the appendices to his reports the resources and liabilities of these corporations, so far as it/has been possible to obtain them.

Through the courtesy of State officers, returns of State banks, savings-banks, and trust and loan companies have during the past year been received from nineteen States. Twenty-seven of the States and Territories, including Illinois, Nebraska, Dakota, Oregon, Virginia, and Tennessee, do not require periodical returns of the condition of the different classes of banks organized under their laws. Statements showing the condition of the banks of each State from which returns could be obtained will, as usual, be found in the appendix. The returns received embrace 650 State banks and trust companies, and 629 savings banks.

Returns were made to the Commissioner of Internal Revenue, for purposes of taxation, showing the average capital and deposits for the six months ending May 31, 1880, by 996 State banks and trust companies, and 658 savings banks. Returns made to the Commissioner are supposed to cover all banks of this description in the United States, as well as private bankers. It can therefore be seen that, while the returns made to the different State authorities omit 346 State banks and trust companies, they are quite complete as to that class of savings banks having no capital, the difference being only 29 banks.

State banks and trust companies.

From returns obtained by the Comptroller from State officers, the following abstract has been compiled, showing the resources and liabilities of 650 State banks and trust companies:

	RESOURCES.

The foregoing table was prepared from returns from five New England States, not including Maine, which has but one State bank in operation; from four Middle States, not including Delaware; and from the Western States, with the exception of Illinois, Kansas, and Nebraska. The only Southern States represented therein are Louisiana, Texas, and Kentucky. The only Pacific State is California. There is but one State bank in New Hampshire, five in Vermont, none in Massachusetts. There are, however, five trust and loan companies in the latter State and ten in Connecticut.

In comparing the capital and deposits reported to State authorities with the same items as reported to the Commissioner of Internal Revenue, it must be remembered that, in addition to the discrepancy in the number of banks reporting, there is an important difference in the character of the reports. The reports made to State authorities give the gross deposits at certain dates, while those made to the Commissioner give the

average deposits for a period of six months.

The total number of banks of all classes which report to the State authorities, and from which reports have been received, is 1,279, having a total capital of \$113,172,078, and total deposits of \$1,117,866,592; the total number of incorporated banks reporting to the Commissioner of Internal Revenue is 1,654, having a total capital of \$118,014,862, and deposits amounting to \$1,136,427,338. It thus appears that 375 banks, with capital and deposits amounting to \$4,842,784 and \$18,560,746 respectively, either do not report to any State authority, or if such reports are made it is impossible to obtain them.

Of the 4,456 banks reporting to the Commissioner of Internal Revenue, there are 2,802 private banking institutions, with a total capital of \$76,121,962, and deposits of \$182,667,237, from which no reports have

been received by the Comptroller through State authorities.

Savings banks.

The following table exhibits the aggregate resources and liabilities of 629 savings banks of the United States, whose returns, as made to the State authorities, have been obtained by the Comptroller. The aggregate of the resources and liabilities of these savings banks, for each State separately, is given in the appendix:

Loans on real estate	
Loans on real estate

Other habitudes	6, 603, 044
' Total	881 677 350

The foregoing table includes the returns from the six New England States, from four Middle States, not including Delaware, from the State of California, and from five savings banks in the other States.

The aggregate of loans in the New England States is \$295,700,696, and of deposits \$378,848,429. In the Middle States the aggregate of

loans is \$114,277,627, and of deposits \$380,666,166.

The amount of average deposits returned to the Commissioner of Internal Revenue by the savings banks of the New England States, for purposes of taxation, was \$368,757,040 for the six months ending May 31, 1880, and by the savings banks of the Middle States the average deposits returned for the same period were \$389,183,856, showing but a slight difference between the returns made by these banks to the State officers and those made by them to the Commissioner.

All but three of the savings banks in the State of California are organized with capital stock, and dividends are paid to stockholders as well as to depositors. The whole amount of deposits is \$47,719,829. Of this amount, banks with capital stock amounting to \$3,853,627 hold \$32,177,037. The remaining three banks, which are without capital,

hold \$15,542,792 of deposits.

Some of the largest savings banks in the city of Philadelphia, organized under old charters, are not required to make reports to any State officer. Returns received directly from four of these banks, having deposits amounting to \$23,956,285, are included in the returns for the State of Pennsylvania.

The reports to the Commissioner of Internal Revenue, which are made by all banks in the United States other than national, show that in the Southern States there are but five savings banks (including three with capital of \$342,912.16), with deposits aggregating \$1,457,924; and that in the Western States and Territories, exclusive of California, there are but 34 savings banks, with deposits amounting to \$14,019,997; making, in the two sections named, 39 savings banks, out of the total in the United States of 658.

The savings bank deposits given in the foregoing table for 1880, based on reports made to the State authorities, are \$819,106,973, and the deposits of the State banks and trust companies were \$298,759,619. These deposits do not include bank deposits. The deposits of the national banks, exclusive of those due to banks on June 11, 1880, were \$845,738,876. These deposits of the national banks bear to those of the savings banks the proportion nearly of 50.8 to 49.2, to those of the State banks and trust companies the proportion of 74 to 26, and to the combined deposits of both the proportion of 43 to 57.

The deposits of the savings banks of the six New England States alone, for the year 1880, were \$378,848,429, while the deposits of the national banks of the same States on June 11, 1880, were \$142,163,316. The former amount bears to the latter the proportion of 73 to 27.

The total population of New England is estimated to be 3,920,000, and the number of open deposit accounts in the savings banks is 1,165,653; which is equal to 30 accounts to each one hundred of the entire population. The average amount of each account is \$325; and if the total deposits were divided among the entire population the average sum of \$96.65 could be given to each individual.

The deposits of the savings banks in the State of New York were \$319,258,501 in 1880, while the population is estimated to be 5,120,000; showing that an equal distribution of the savings-bank deposits among the entire population of the State would give \$62.36 to each individual.

The loans and investments of the savings banks of the six New England States, in United States and other bonds and stocks, amounted in 1880 to \$31,109,999, which is equal to 34.61 per cent. of deposits. In 1873 the amount invested in the same manner by the savings banks of

New England was \$97,692,286, equal to 25.63 per cent. of their deposits, which were \$381,207,058 at that date. The cash on hand in 1880 was \$6,521,510, or say 1.72 per cent. of their liabilities to depositors, while in 1873 it was \$4,290,121, or 1.13 per cent. of the same liability at that date. In the State of New York, in 1880, the amount invested in United States and other stocks and bonds by the savings banks was \$212,103,705,or 66.44 per cent. of deposits, while the cash on hand was \$4,271,445, or 1.34 per cent. of deposits. In 1873 the savings banks in New York had \$153,355,664 invested in this manner, or 53.71 per cent. of deposits, and the cash on hand was \$6,714,404, or 2.35 per cent. of the deposits.

In California, in 1880, the investments of the savings banks in United States and other stocks and bonds were \$4,228,001, or 8.8 per cent. of the deposits, against \$1,294,600, or 4.2 per cent. of the deposits, in 1877. The cash reserve on hand in California savings banks was \$2,897,471, or about 6 per cent. of the deposits, in 1880, and \$1,965,600, or about the same percentage, in 1877. While, as has been seen, the amount invested in United States and other bonds and stocks by the savings banks of the six New England States was \$131,109,999, or 34.61 per cent. of the aggregate deposits, the amount due from banks shown by the returns of the same savings banks was \$6,348,135, or 1.67 per cent. of their deposits; showing that the resources of these savings banks consist largely of deposits in national or other banks, and of investments in United States and other bonds and stocks.

In New York State the amount invested in United States bonds was \$119,985,590, and the amount in other stocks and bonds was \$92,118,115, a total of \$212,103,705, or 66 per cent. of the aggregate deposits, while the amount due from banks was \$13,893,109.

The following statement, compiled from returns made to the Commissioner of Internal Revenue, gives by States and principal cities the average capital and deposits of the State banks, trust companies, private bankers, and savings banks, in each of the New England and Middle States, for the six months ending May 31, 1880, together with the average amount of capital invested in United States bonds:

				Invested in U	Inited States ids.

The total number of State and savings banks, trust companies and private bankers in the United States, with the average amount of their capital, deposits, and investments in United States bonds, for the six months named, were as follows:

Number of banks	4, 456
Average capital	\$194, 136, 825
Average deposits	1, 319, 094, 576
Average investments in United States bonds	

The following table exhibits in a concise form, by geographical divisions, the total average capital and deposits of all State and savings banks and private bankers in the country, for the six months ending May 31, 1880:

		State banks and trust companies.			Private bankers.			Savings banks with capital.			Savings banks with- out capital.

NUMBER, CAPITAL AND DEPOSITS OF NATIONAL BANKS, STATE AND SAVINGS BANKS, AND PRIVATE BANKERS.

The capital of the 2,076 national banks in operation on June 11,1880, as will be seen by a table in the appendix, was \$455,909,565, not including surplus, which fund at that date amounted to 118 millions of dollars; while the average capital of all the State banks, private bankers, and savings banks for the six months ending May 31, 1880, was but \$194,136,825; which amount is but little more than one-third of the combined capital and surplus of the national banks.

The net deposits of the national banks were \$900,788,714, and the average deposits of all other banks, including savings banks, were \$1,319,094,576, of which more than one-half, or \$783,033,149, consisted of the deposits of the 629 savings banks having no capital stock, which

are included in the above aggregate.

The increase in the net deposits of the national banks during the year was \$187,385,075; of the savings banks, \$34,508,295; of the private bankers, \$42,749,684; and of the State banks and trust companies \$61,713,761, making a total increase in the bank deposits of the country of \$326,356,815.

The table below exhibits the aggregate average capital and deposits for the six months ending May 31, 1880, of all classes of banks other than national, and the capital and net deposits of the national banks on

June 11 following:

Geographical divisions.	State banks, savings banks, private bank- ers, &c.			Ŋ	Vational b	anks.	Total.		
	No.	Capital.	Deposits.	No.	Capital.	Net de- posits.	No.	Capital.	Deposits.

United States	4, 456	194. 14	1, 319. 09	2, 076	455. 91	900. 79	6, 532	650. 05	2, 219. 88

From this table it will be seen that the total number of banks and bankers in the country at the dates named was 6,532, with a total banking capital of \$650,049,390, and total deposits * of \$2,219,883,290.

In the appendix will be found similar tables for various periods, from 1875 to 1880, where will also be found other tables giving the assets and liabilities of State institutions during the past year, so far as they could be obtained from the official reports of the several State officers.

A table arranged by States and principal cities, giving the number, capital and deposits, and the tax thereon, of all banking institutions other than national, for the six months ending May 31, 1880, and for previous years, will be found in the appendix.

The following table exhibits, for corresponding dates in each of the last five years, the aggregate amounts of the capital and deposits of each

of the classes of banks given in the foregoing table:

Years		Vational banks. St			ate banks, private bankers, &c.		Savings banks with capital.		Savings banks with- out capital.		Total.

SECURITY OF CIRCULATING NOTES.

The following table exhibits the classes and amounts of United States bonds held by the Treasurer on the 1st day of November, 1880, to secure the redemption of the circulating notes of the national banks:

Class of bonds.	Authorizing act.	Rate of interest.	Amount.
Loan of February, 1861 (81s) Loan of July and August, 1861 (81s) Loan of 1863 (81s) Consols of 1867 Consols of 1868 Ten-forties of 1864 Funded loan of 1881 Funded loan of 1891 Funded loan of 1907 Pacific Railway bonds	July 17 and August 5, 1861 March 3, 1863 March 3, 1865 March 3, 1864 July 14, 1870, and January 20, 1871 do	do	33, 405, 050 17, 027, 100 3, 000 5, 000 526, 900 146, 552, 850 36, 988, 950
	o try 1, 1002, and o ary 2, 1004		

On October 1, 1865, the total amount of bonds held for this purpose was \$276,250,550, of which \$199,397,950 was in six per cents, and

* The terms "gross deposits," "individual deposits," and "net deposits" of national

banks, as used in this report, are explained as follows:

The gross deposits of the national banks are the amounts reported by them to the credit of stockholders for dividends unpaid; to the credit of individuals, companies, and firms; to the credit of the United States and its disbursing officers; and to the credit of other banks. The individual deposits are the amounts reported under that head, consisting of amounts to the credit of individuals, companies, and firms only. The net deposits are arrived at by deducting from the sum of the items making up the gross deposits the amount of clearing house exchanges reported, and the amount of balances due from banks (with the exception of that due from reserve agents) not exceeding the amount due to banks.

\$76,852,600 in five per cents. On October 1, 1870, the banks held \$246,891,300 of six per cents, and \$95,942,550 of five per cents. Since that time there has been to November 1, 1880, a decrease of \$190,286,150 in six per cent bonds, and an increase of \$51,137,200 in five per cents.

The banks now hold \$36,988,950 of four and a half per cents, all of which have been deposited in the Treasury since September 1,1876, and \$119,075,100 of four per cents, which have been deposited since July

1, 1877.

During the last year \$19,243,300 of four per cents have been with drawn by the banks, chiefly for the purpose of realizing the large premiums thereon, and \$22,370,750 of five per cents have been deposited, which will mature in a few months. The banks still hold \$8,000 of six per cent. five-twenty bonds, and \$526,900 of five per cent. ten-forty bonds, upon which interest has ceased. They also hold \$146,552,850 of the fives of 1881, which are redeemable on the 1st of next May; \$2,046,000 of sixes of 1880, payable on the first day of January next; and \$50,432,150 of sixes of 1881, which are redeemable on the 1st of July next.

NATIONAL-BANK AND LEGAL-TENDER NOTES, BY DENOMINATIONS. CIRCULATING NOTES OF THE BANK OF FRANCE AND IMPERIAL BANK OF GERMANY, BY DENOMINATIONS.

The following table exhibits by denominations the amount of national-bank and legal-tender notes outstanding on November 1, 1880, and the aggregate amounts of both kinds of notes for the same date in 1878 and 1879:

		1880.		1879.	1878.

Totals	342, 063, 451	346, 681, 016	688, 744, 467	681, 815, 520	666, 333, 137	

The law provides that, after specie payments are resumed, national banks shall not be furnished with notes of a less denomination than five dollars; and in accordance with this provision no notes of the denominations of one and two dollars have been issued since the first day of January, 1879. The amount of ones outstanding on that day was \$4,793,817, and of twos, \$2,924,930; total, \$7,718,747. Since that date the ones have been reduced \$2,501,355, and the twos, \$1,717,670, making a total reduction of small bank notes of \$4,219,025.

The amount of legal-tender notes of the denomination of one dollar outstanding on that date was \$20,257,109, and of twos, \$20,035,525;

total, \$40,292,634. The increase since that date to November 1, 1880, has been \$3,491,584. Thus it will be seen that while the small notes of the national banks have been reduced more than four millions (\$4,219,025), in compliance with law, since the date of resumption, the legal-tender notes of the same denominations have been increased \$3,491,584. The total amount, in these denominations, of both kinds of notes outstanding on November 1, 1880, was \$47,283,940. The total increase during the year has been \$3,365,575; the decrease during the year previous was \$3,649,451. Of the entire amount of national-bank and legal-tender notes now outstanding, nearly seven per cent. consists of one and two dollar notes, and more than thirty-one per cent. of ones, twos, and fives, while more than fifty-eight per cent. is in the notes of a less denomination than twenty dollars, and about eighty per cent. is in notes of a lower denomination than fifty dollars. Of the entire issue, about twenty per cent. in amount is in denominations of fifty dollars and upwards.

The circulation of the Imperial Bank of Germany, on January 1, 1879, was \$165,933,942; its circulation on January 1, 1880, was \$198,201,144;

showing an increase of \$32,267,202 during the year.

The following table exhibits by denominations the circulation of the Imperial Bank of Germany, on January 1, 1880, in thalers and marks, which are here converted into our currency:

	Thalers.				Marks.					
Number of pieces.	Denominations.	Value of each piece in dol- lars.	Amount in dollars. (Thaler= 75 cents.)	Number of pieces.	Denomina- tions.	Value of each piece in dol- lars.	Amount in dollars. (Mark = 25 cents.)			
185 2, 357 1, 716 8, 934 9, 143	500 thalers, 100 thalers, 50 thalers, 25 thalers, 10 thalers.		69, 375 176, 775 64, 369 167, 512 68, 576	255, 753 213, 384 4, 281, 731§	1,000 marks. 500 marks. 100 marks.	250 125 25	63, 938, 250 26, 673, 000 107, 043, 287

The following table* gives the circulation of the Bank of France and its branches, with the number of pieces, and the denominations in francs and in dollars, on January 29, 1880:

Number of pieces.	Denominations.	Value of each piece in dollars.	Amount in francs.	Amount in dollars. (Fr. = 20 cents.)
5	5, 000 francs.	1,000	25, 000	5, 000
1, 371, 477	1,000 francs.	200	1, 371, 477, 000	274, 295, 400
716, 980	500 francs.	100	358, 490, 000	71, 698, 000
3, 009	200 francs.	40	601, 800	120, 360
5, 716, 919 [.]	100 francs.	20 1	571, 691, 900	114, 338, 380
207, 516	50 francs.	10	10, 375, 800	2, 075, 160
27, 323	25 francs.	5	683, 075	136, 615
335, 635	20 francs.	4	6, 712, 700	1, 342, 540
. 197, 448	5 francs.	1 1	987, 240	197, 448
1, 241	Forms out of date.		429, 850	85, 970
8, 577, 553			2, 321, 474, 365	464; 294, 873

The amount of circulation of the Bank of France on January 30, 1879, was 2,290,970,830 francs, or say \$458,194,166, showing an increase between that time and January 29, 1880, the date of the foregoing table, of 30,503,535 francs, or \$6,100,707.

^{*}London Bankers' Magazine for August, 1880, pp. 656 and 662.

It will be seen that the Imperial Bank of Germany issues no notes of a less denomination than \$7.50, and that the Bank of France issues less than two millions of dollars in notes of a less denomination than five dollars. The Bank of England issues no notes of less than twenty-five dollars, and the Banks of Ireland and Scotland none less than five dollars.

The amount of circulation in this country in denominations of five dollars and under on November 1, 1880, was \$214,326,838. In the foreign countries named a large amount of silver and gold coin of the lower denominations enters into general circulation. It will be impossible to keep in circulation any large amount of small gold coins or silver dollars, unless the coinage of the latter is restricted and the small notes withdrawn.

Section 5182 of the Revised Statutes requires that the circulating notes of the national banks shall be signed by the president or vicepresident and by the cashier of the association issuing the same. written signature of at least one bank officer is necessary as a check between this office and the issuing banks, for if an illegal issue should occur the signature of such officer would be a means of determining the genuineness of the note. The written signatures of the officers of the banks are also necessary as an additional precaution against counterfeiting. A number of the banks, however, issue their notes with printed signatures, and in some cases with badly executed lithographed A bill is now pending in one of the bank committees of Congress, imposing a fine of twenty dollars for every circulating note issued by any national bank without the written signature thereon of at least one of its officers; and the Comptroller respectfully repeats his previous recommendation for the passage of such an act, which act should also impose a fine upon any engraver or lithographer who shall print the signatures of bank officers upon such circulating notes.

UNITED STATES BONDS OUTSTANDING, AND THE AMOUNT HELD BY THE NATIONAL BANKS, STATE BANKS, AND PRIVATE BANKERS.

The following table exhibits the classification of the unmatured, interest-bearing, bonded debt of the United States on August 31, 1865, when the public debt reached its maximum, and on the 1st day of July in each year thereafter, together with the amount outstanding on November 1 of the present year:*

Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.	
August 31, 1865. July 1, 1866. July 1, 1867. July 1, 1868. July 1, 1868. July 1, 1869. July 1, 1870. July 1, 1871. July 1, 1872. July 1, 1873. July 1, 1874. July 1, 1875. July 1, 1876. July 1, 1877. July 1, 1878. July 1, 1878. July 1, 1878. July 1, 1879. July 1, 1879. July 1, 1879. July 1, 1880. ^{*} The Navy pension fund, amounting to \$14,000,000 in 3 per cents., the interest upon which is applied to the payment of naval pensions exclusively, is not included in the table.

Since the year 1865, the national banks have held an average of more than one-fifth, and now nearly one-fourth, of the interest-bearing debt of the United States. Previous to the year 1872 much the larger portion of these bonds bore interest at the rate of 6 per cent., and until the year 1877 all of the bonds bore interest at either five or six per cent. These classes of bonds have since been greatly reduced, and are now less than three-fifths of the amount pledged for circulation, while more than two-fifths of the amount consists of bonds bearing interest at 4 and 4½ per cent. only. This will be seen from the following table, which exhibits the amounts and classes of United States bonds owned by the banks, including those pledged as security for circulation and for public deposits, on the first day of July in each year since 1865, and upon November 1 of the present year:

	United	States bonds	held as sec	urity for circ	ulation.	U. S. bonds held for	
Date.	6 per cent. bonds.	5 per cent. bonds.	4½ per cent. bonds.	4 per cent. bonds.	Total.	other pur- poses at nearest date.	total.

All of the five and six per cent. bonds now held by the national banks, with the exception of Pacific Railway bonds, will mature on or before July 1, 1881, and will probably be replaced by bonds bearing interest at 4 or $4\frac{1}{2}$ per cent., or by new bonds hereafter to be issued by authority of Congress bearing a less-rate of interest.

The amount of United States bonds held by State and savings-banks cannot be accurately ascertained, for the reason that banks in seventeen of the States do not make reports of their condition to State authorities. From such reports as have been received through the courtesy of State officers, it is found that the State banks and trust companies and the savings banks held the following amount of United States bonds, at different dates during the year 1880:

State banks in twenty States	 19, 109, 650
Total	 213, 665, 402

The Commissioner of Internal Revenue receives semi-annual reports from all banks organized under State laws, and also reports from private bankers, giving their average capital and deposits, and the amount of such capital invested in United States bonds; and from these returns the following table has been compiled, showing, by geographical divi-

sions, the average amount of capital invested in United States bonds for the six months ending May 31, in the years 1878, 1879, and 1880:

	-		
Six months ending—	By State banks, private bank- ers, and trust companics.		Total.
May 31, 1878: New England States Middle States	23, 915, 757	\$26, 597, 718 102, 163, 985	\$29, 626, 456 126, 079, 742
Southern States Western States Pacific States and Territories	6, 062, 265	66, 667 1, 172, 598 1, 082, 620	1, 590, 549 7, 234, 863 4, 438, 989
United States	37, 887, 011	131, 083, 588	168, 970, 599
May 31, 1879: New England States. Middle States Southern States Westorn States Pacific States and Territories	25, 686, 469 3, 593, 179 8, 326, 402	34, 941, 378 123, 818, 148 86, 021 2, 164, 668 1, 372, 845	38, 611, 345 149, 504, 617 3, 679, 200 10, 491, 670 6, 388, 798
United States	46, 291, 965	162, 383, 060	208, 675, 025
May 31, 1880: New England States. Middle States Southern States Western States Pacific States and Territories	20, 564, 834 2, 541, 991 8, 137, 554	37, 693, 200 146, 301, 155 1, 000 2, 474, 557 2, 717, 904	41, 430, 293 166, 865, 989 2, 542, 991 10, 612, 111 6, 601, 720
United States	38, 865, 288	189, 187, 816	228, 053, 104

The above table gives the average amount of capital invested in United States bonds, from which should be deducted the amount of premium paid at the time of purchase, which cannot be ascertained.

mium paid at the time of purchase, which cannot be ascertained.

The amount of United States bonds held by the national banks on November 1, 1880, as above shown, was \$403,369,350, and the average amount held by the other banks and bankers of the country, during the six months ending May 31 last, was \$228,053,104. The total amount held by all the banks and bankers is thus shown to be considerably more than one-third of the whole interest-bearing, funded debt of the United States, as follows:

Savings banks	\$189, 187, 816
State banks and trust companies	24, 498, 604
Private bankers	
National banks	403, 369, 350
	204 100 171

If the amount of bonds held by national banks and private bankers be deducted from the last total, the remainder will agree very nearly with the amount of bonds held by State and savings banks as returned by State officers, and shown on the preceding page. These amounts, therefore, seem to be very nearly correct, and to comprise the whole amount of United States bonds held by all the banks and bankers of the country.

A table will be found in the appendix giving the number of each class of banks and of private bankers in each State, together with the amount of their capital, deposits, and United States bonds held.

CLEARING-HOUSE CERTIFICATES.

Section 5192 Revised Statutes provides that clearing house certificates, representing specie or lawful money specially deposited for the purpose of any Clearing House association, shall also be deemed to be lawful money in the possession of any association belonging to such

United States notes.

Clearing House holding and owning such certificate; and section 5193 provides that the Secretary of the Treasury may receive United States notes on deposit, without interest, from any national banking associations, in sums not less than ten thousand dollars, and issue certificates therefor in denominations of not less than five thousand dollars, which certificates may be counted as part of the lawful money reserve, and may be accepted in the settlement of clearing-house balances at the

places where the deposits therefor were made.

The legal-tender note certificates were first issued in the fiscal year 1873. On June 30, 1875, there were outstanding \$59,045,000 of these certificates, of which the national banks held \$47,310,000. On June 30, 1876, the amount outstanding was \$33,140,000, of which the banks held \$27,955,000. On June 30, 1879, the amount had been reduced to \$29,330,000, and the banks held on June 14 of the same year \$25,180,000. The amount outstanding on October 1 was \$9,885,000, and the national banks held on that day \$7,655,000, they having surrendered a large portion of these certificates for the purpose of supplying the demand for

The issue of the gold certificates was authorized by the fifth section of the act March 3, 1863, and they were used for clearing-house purposes soon after the passage of the national-bank act. The first issue was made on November 13, 1865. On June 30, 1875, there were outstanding \$21,796,300, of which the national banks in New York City held \$12,642,180. The issue of these certificates was discontinued on December 1, 1878, and the amount outstanding had decreased on June 30, 1879, to \$15,413,700, and on October 1, 1880, to \$7,480,100. The issue of gold certificates having been discontinued by the government, and the amount of gold coin having rapidly increased, the banks in New York found it necessary to establish a depository of gold coin for the convenience of the Clearing House. This depository at the present time is the Bank of America, by which bank certificates of deposit were first issued on October 14, The amount of such certificates outstanding on November 1, 1879, was \$9,155,000, on January 1, 1880, \$25,610,000, and on June 1, and since that time, \$39,550,000, which is the full capacity of the vault. Of this amount the national banks of New York City held on June 11, 1880, \$33,337,000; on October 1, \$36,189,000.

The Clearing Houses of Boston, Philadelphia, and Baltimore have organized similar depositories in order to utilize their gold coin and save the risk and inconvenience of handling and transporting the coin itself. The total amount of such certificates issued to the national banks in New York up to October 1 was \$36,189,000, in Philadelphia, \$6,040,000, in Boston, \$5,908,000, and in Baltimore, \$30,000; total, \$48,167,000.

TRANSACTIONS OF THE NEW YORK CLEARING HOUSE.

The New York Clearing House Association is composed of forty-five national and twelve State banks, and the assistant treasurer of the United States at New York. The exchanges at the Clearing House for the year ending October 1, 1880, obtained through the courtesy of Mr. W. A. Camp, its manager, were more than thirty-seven thousand millions, and the balances paid in money were more than fifteen hundred millions. The average daily exchanges were more than one hundred and twenty one millions, and the average daily balances paid in money were but about four and nine-tenths millions, or only four and one-tenth per cent. of the amount of the settlements.

The New York Clearing House was organized in 1853, and the following table exhibits its transactions yearly, and the amount and ratio of

currency required for the payment of daily balances, for the last twenty-seven years:

Years.	No. of banks.	*Capital.	Exchanges.	Balances paid in money.	Average daily exchanges.	Average daily bal- ances paid in money.	Ra- tios.

^{*}The capital is for various dates, the amount at a uniform date in each year not being obtainable.

†Yearly averages for twenty-seven years.

†Totals for twenty-seven years.

The Clearing House transactions of the assistant treasurer of the United States at New York, for the year ending November 1, 1880, were as follows:

Exchanges received from Clearing House	\$343,622,365
Exchanges delivered to Clearing House	
Balances paid to Clearing House	
Balances received from Clearing House	958, 819
Showing that the amount paid by the assistant treasurer to the Clearing	· .
House was in excess of the amount received by him	265, 429, 034

The amount of clearings during the last year exceeded any previous year's transactions since the organization of the Clearing House. The average amount per day for the year was \$126,466,232.85. The maximum was on November 3, when it reached \$202,558,252.11. The largest amount of balances in any one day was on November 11, when it was \$11,208,025.20, and \$8,300,000 of this amount, weighing about 15½ tons, was paid in gold coin.

The total amount of transactions in the twenty-seven years since the organization of the Clearing House is \$574,849,719,103, and the average for each year is \$21,290,734,040. The amount of gold coin actually paid in settlement of balances in the last year is \$340,538,000; of Clearing House gold certificates \$1,056,462,000; of United States Clearing House certificates \$34,260,000; and of legal-tenders \$85,218,000. Of the legal-tenders, \$46,852,000 were received in October, 1879, and only \$38,366,000 during the remaining eleven months.

A table compiled, for purposes of comparison, from returns made to the New York Clearing House, will be found in the appendix, giving the clearings and balances weekly, for the months of September, October and Nevember of versions grows from 1872 to 1880

ber and November of various years, from 1872 to 1880.

SPECIE IN BANK AND IN THE TREASURY OF THE UNITED STATES, AND ESTIMATED AMOUNT IN THE COUNTRY—SPECIE IN THE BANK OF ENGLAND AND IN THE BANK OF FRANCE.

The table below exhibits the amount of specie held by the national banks at the dates of their reports for the last eleven years; the coin, coin-certificates, and checks payable in coin held by the New York City banks being stated separately:

	, Held b	y national ba	onks in New Yo	ork City.	Held by			
Dates.	Coin.	U.S. coin- certificates.	Checks paya- ble in coin.	Total.	other national banks.	Aggregate.

The amount of silver coin held by the national banks on October 1, 1877, was \$3,700,703, and on October 1, 1878, \$5,392,628. The amount held on

October 2, 1879, was \$4,986,493, and on October 1, 1880, \$6,495,477, including \$1,165,120 in silver treasury certificates. The aggregate amount of specie held by the State banks in New England, New York, New Jersey, Pennsylvania, Maryland, Louisiana, Kentucky, Ohio, Iowa, Wisconsin, and Minnesota, as shown by their official reports for 1880, was \$6,201,617, of which the banks in New York City held \$4,968,722. In the returns from California the amount of coin is not given separately, but it is estimated to be three-fourths of the amount returned as currency, which was \$13,785,015.

The Director of the Mint, in his report for 1879, estimated the amount of coin in the country on June 30, 1879, at \$398,541,683, of which

\$286,490,698 was gold and \$112,050,985 was silver.

His estimate for the fiscal year ending June 30, 1880, is as follows:

Amount of coin in the country June 30, 1879	\$398, 541, 683
Net gold coinage for the year	55, 948, 407
Net silver coinage for the year	27, 903, 139
Net importation of gold for the year	16, 519, 586
Net importation of silver for the year	2, 642, 896
·	

Of this amount it is estimated that \$358,958,691 consists of gold coin, and \$142,597,020 of silver coin. The Director estimates that from the close of the last fiscal year to November 1 there has been added to the coin \$6,494,528 of gold and \$9,630,940 of silver, making the stock of coin in the country at the latter date \$517,681,179, and consisting of \$365,453,219 of gold coin and \$152,227,960 of silver. The amount of bullion in the mints and New York assay office on November 1 is stated to have been \$78,558,811 of gold and \$6,043,367 of silver, making in all \$84,602,178; which, added to the estimated amount of coin stated above, gives \$602,283,357 as the total estimate of coin and bullion in the country on November 1, of which amount \$444,012,030 was gold and \$158,271,327 was silver.

The amount of gold and silver, and the percentage of each, in the Treasury of the United States, on September 30 in each year from 1876 to 1880, and on November 1, 1880, is shown in the following table:

	Silver.					Per cent. of-

STATE TAXATION OF NATIONAL BANKS.

Section 5219 of the Revised Statutes of the United States provides that nothing in the national-bank act shall prevent all the shares in any national association from being included in the valuation of the personal property of the owner or holder of such shares in assessing taxes imposed by the authority of the State in which the association is located, but that the legislature of each State may determine and direct the manner and place of taxing all the shares of national banking associations located within the State, subject only to two restrictions: first, that the taxation shall not be at a greater rate than is assessed upon other moneyed capital in the hands of the individual citizens of such State; and, second, that the shares of any national banking association owned by non-residents of any State shall be taxed in the city or town where the bank is located, and not elsewhere. The same section provides that nothing herein contained shall be held or construed to exempt the real property of associations from either State, county, or municipal taxes, to the same extent, according to its value, as other real property is taxed.

In the decision of the United States Supreme Court, in the case of Williams vs. The Board of Assessors of the City of Albany, at the October term in 1879, Mr. Justice Miller, who delivered the opinion, commenting on this provision in reference to State taxation of national-bank shares, said:

That the provision was necessary, to authorize the States to impose any tax whatever on national-bank shares, is abundantly established by former decisions of the United States Supreme Court. As Congress was conferring a power on the States which they would not otherwise have had—to tax these shares—it undertook to impose a restriction on the exercise of that power, manifestly designed to prevent taxation which should discriminate against this class of property as compared with other moneyed capital. In permitting the States to tax these shares it was foreseen—the cases we have cited from our former decisions of the United States Supreme Court showed too clearly—that the State authorities might be disposed to tax the capital invested in these banks oppressively. This might have been prevented by fixing a precise limit in amount; but Congress, with due regard to the dignity of the States, and with a desire to interfere only so far as was necessary to protect the banks from any-

^{*}The Bulletin de Statistique, as quoted in the Bankers' Magazine, New York, vol. XIII, page 740; except the items for 1879 and 1880, which were obtained from the London Bankers' Magazine for August, 1880, page 661, and New York Bankers' Magazine for November, 1880, page 335.

thing beyond their equal share of the public burdens, said you may tax the real estate of the bank as other real estate is taxed, and you may tax the shares of the bank as the personal property of the owner to the same extent you tax other moneyed capital invested in your State. It was conceived that by this qualification of the power of taxation equality would be secured and injustice prevented.

Prior to this decision of the Supreme Court, the intent of Congress in providing for the taxation of national bank shares by the States, had been overlooked or evaded, in collecting taxes on such shares under the laws of many of the States. As a consequence, capital invested in national banks has, in the assessment and collection of taxes, been subjected to unjust and severe discrimination in different ways in these States

In New York the law permits the deduction of the just debts of an individual from his personal property, including his moneyed capital, excepting only from his bank shares. In Ohio the law provides certain State boards for equalizing the taxation on real estate, on railroad capital, and on capital invested in bank shares; but there is no State board for equalizing the taxation on personal property other than bank shares, railroad stock or other moneyed capital. The equalizing process as to all other personal property ceases with the county boards. But the county boards throughout the State fixed the valuation of moneyed capital for purposes of taxation at six tenths of its true value, while the State board fixed the value of bank shares at their actual cash value. Thus while the rates of taxation were the same, yet, the valuation being different, bank shares were discriminated against to the extent of four-tenths of their value.

The States have a right to impose whatever tax they choose upon the shares of banks organized under their own laws, but they have no right to impose a greater valuation on national bank shares than on other moneyed capital in the hands of individuals, since thereby the tax becomes heavier on the bank shares than on the moneyed capital, while

the law, rightly construed, says it shall be the same.

The decisions of the United States Supreme Court delivered March 2, 1880, in cases arising under the laws of the two States mentioned, protect national banks from these forms of discrimination, and indirectly protect the State banks, as these States will doubtless so modify their laws as to place State banks within their borders on at least as good a footing in respect to taxation as the national banks. By these decisions also the Supreme Court pointed out the appropriate mode of relief for national banks, when taxes are assessed upon them at a greater rate than upon other moneyed capital in the same State. This mode is to pay such portion of the unjustly imposed tax as is equal to the tax paid on other moneyed capital, and to enjoin the collection of the excess.

But these decisions do not point out any satisfactory method for the recovery of taxes which have been heretofore illegally assessed on national-bank shares and collected by the State authorities. On this point it was decided that the question of the recovery from the assessors of taxes overpaid, through errors in assessments arising from misconstructions of the law of the United States relative to the taxation of national-bank shares by the States, is not one to be decided by the Federal courts, but must be governed by the common law or the statute law of the

State.

As it is in the power of the States, under the present law of Congress, so to legislate that, through mistaken construction of said law by the assessors, bank shares may be discriminated against as compared with other moneyed capital, and as redress for such mistakes depends on the action of the State courts; and as, further, to secure a true construction of the

federal law by the assessors in each State may require protracted litigation, before the question of the legality of the form of taxation in each particular State can be finally decided; it becomes a question whether Congress may not better settle the whole matter by fixing more precisely the amount of taxation which may be imposed by the States on national-bank shares.

The decision of the Supreme Court, heretofore quoted, states that this oppressive taxation "might have been prevented by fixing a precise limit in amount," and it is respectfully suggested to Congress whether it would not be advisable, in order to avoid the expense and annoyance of longcontinued litigation, to pass a law fixing the maximum amount of taxation which may be imposed upon national banks by State authorities. It is true that if this should be done the States so disposed might discriminate in favor of banks of their own creation, or in favor of other moneyed capital, by making the weight of taxation on such property less oppressive than that fixed on national-bank shares by Congress; but such action would be so manifestly unjust that it is more likely that legislation would follow in the more important States, the object of which would be to impose just and equitable assessments upon every class of moneyed corporations. It is also true that if the maximum rate of taxation were fixed by law, the courts and the board of assessors could yet, by construction, discriminate in favor of other moneyed corporations by requiring the tax to be at a uniform rate, while the valuation of the assessors is unequal.

The Supreme Court, in the decision already referred to upon this point,

quotes from the law as follows:

Taxation shall not be at a greater rate than is assessed upon other moneyed capital in the hands of individuals.

The Court then proceeds to say:

Seizing upon the word rate in this sentence as if disconnected from the word assessment, and construing it to mean percentage on any valuation that might be made, the Court of Appeals arrives at the conclusion that since that percentage is the same in all cases the act of Congress is not infringed. If this philological criticism were perfectly just, we still think the manifest purpose of Congress in passing this law should prevail. We have already shown what that was. But the criticism is not sound. The section to be construed begins by declaring that these shares may be "included in the valuation of the personal property of the owner in assessing taxes imposed by authority of the State within which the association is located." This valuation, then, is part of the assessment of taxes. It is a necessary part of every assessment of taxes which is governed by a ratio or percentage. There can be no rate or percentage without a valuation. This taxation, says the act, shall not be at a greater rate than is assessed on other moneyed capital. What is it that shall not be greater? The answer is taxation. In what respect shall it not be greater than the rate assessed upon other capital? We see that Congress had in its mind an assessment, a rate of assessment, and a valuation, and taking all these together the taxation on these shares was not to be greater than on other moneyed capital.

If section 5219 of the Revised Statutes were to be so amended as to read as follows, it would cover the two points under consideration:

But the legislature of each State may determine and direct the manner and place of taxing all the shares of national banking associations located within the State, subject only to the two restrictions, that the maximum rate of taxation shall not exceed—per cent., and that the valuation shall not be at a greater rate than upon other moneyed capital in the hands of individual citizens of such State, and that the shares of any national banking association owned by non-residents of any State shall be taxed in the city or town where the bank is located, and not elsewhere.

Such an amendment would prevent excessive taxation in all the States, and should not effect the imposition of a less rate in any of the States. The valuation would necessarily be equal, and it is probable that the constitution of most of the States would prevent a discrimination against any particular class of moneyed capital.

TABLES OF NATIONAL AND STATE TAXATION.

The Comptroller herewith presents his usual annual tables, giving, as far as can be ascertained, the amount of taxes imposed upon the banking capital of the country, and respectfully repeats his previous recommendation for the repeal of the law imposing a tax upon capital and

deposits, and of the two-cent stamp tax upon bank checks.

The amount collected by the Commissioner of Internal Revenue during the last fiscal year was \$123,981,916, and the whole of this amount, with the exception of \$11,096,464.39, was derived from the tax on spirits, beer, and tobacco. Were the entire tax upon banks and bankers of the country, including the two-cent check tax, as well as the tax upon matches and patent medicines, removed, the amount of revenue received by the government from the tax on spirits, beer and tobacco, and from customs duties, would alone be sufficient to meet its expenses and reduce the

public debt at the rate of at least seventy millions annually.

The principal reason heretofore urged against the repeal of these taxes has been that the amount produced was necessary for the support of the government; but this reason has ceased to exist. the laws imposing taxes, not only upon the national banks, but also upon the State and private banks and savings-banks of the countrywhich institutions hold, as has been seen, one-third of the whole public debt of the United States-will indirectly aid the government in refunding the remainder of the debt at a low rate of interest, by increasing the demand and extending the market for its bonds, thus to a considerable extent saving to the government in interest what may be lost to it in revenue from taxes.

The enormous State taxes which the banks and bankers of the country have paid for a series of years, and still pay, and which are in a much greater ratio to values than are those imposed on any other species of property, are as much as should be imposed upon this great interest, and particularly at a time when the rates of interest throughout the

country are being greatly reduced.

The following table for the year 1879, similar to the one for the year 1878, which was given in the last annual report of the Comptroller, shows the amount of United States and State taxes, and the rate of taxation paid by the national banks, in every State and principal city of the Union for that year. Similar tables for the years 1867 and 1869, and for the years from 1874 to 1878 inclusive, may be found in the appendix.

^{*}California banks pay no State taxes on capital, except on such as is invested in real estate.

The following table exhibits the amount of taxes annually paid by the national banks to the United States, from the establishment of the system to July 1, 1880, the rate of taxation being one per cent. annually upon the average amount of notes in circulation, one-half of one per cent. annually upon the average amount of deposits, and the same rate upon the average amount of capital not invested in United States bonds:

Years.	On circulation.	On deposits.	On capital.	Total.

The table below gives the taxes annually paid under the United States laws, by banks other than national, to the Commissioner of Internal Revenue, on deposits, on circulation, and on capital, for the years from 1864 to 1880, inclusive. The rate of taxation imposed by United States laws on these banks, on account of their circulation, deposits and capital, is precisely the same as that imposed upon national banks. The present duties on their circulation, however, are derived mainly from the tax of ten per cent. imposed upon the amount of such circulation paid out by them:

Years.	On circulation.	On deposits.	On capital.	Totals.
1864	990, 278 11 214, 298 75 28, 669 88 16, 565 05 15, 419 94 22, 781 92 24, 778 62 16, 738 26 22, 746 27	\$780, 723 52 2, 043, 841 08 2, 099, 635 83 1, 335, 395 98 1, 438, 512 77 1, 734, 417 63 2, 177, 576 46 2, 702, 196 84 3, 643, 251 71 3, 009, 302 79 2, 453, 544 26 2, 972, 260 27 2, 999, 530 75	\$903, 367 98 374, 074 11 476, 867 73 399, 562 90 445, 071 49 827, 087 21 919, 262 77 976, 057 61 916, 878 15 1, 102, 241 58 989, 219 61	\$2, 837, 719 82 4, 940, 870 90 3, 463, 988 05 2, 046, 562 46 1, 866, 745 55 2, 196, 054 17 3, 020, 083 16 4, 628, 229 14 3, 771, 081 46 3, 387, 160 67 4, 097, 248 12 4, 006, 688 03
1876 1877 1878 1879 1880 Aggregates	5, 430 16 1, 118 72 13, 903 29 28, 773 37	2, 999, 530 75 2, 896, 637 93 2, 593, 687 29 2, 354, 911 74 2, 510, 775 43 30, 766, 202 28	927, 661 24 897, 225 84 830, 068 56 811, 436 48 12, 533, 033 31	3, 829, 729 33 3, 492, 031 85 3, 198, 883 59 3, 350, 985 28 57, 778, 263 56

It will be seen that of the whole amount of taxes paid to the United States, during the years given in the foregoing tables, by all the banks and bankers of the country, the national banks alone have paid nearly two-thirds. The amount of tax upon circulation has been \$45,941,162, while the cost to the government of the national system since its inauguration in 1863 has been but \$4,934,530.51.

From tables similar to the one first given herein for 1879, the follow-

ing condensed table has been prepared, which shows the taxes, national and State, paid by the national banks during each year from 1866 to 1879, inclusive. The figures given for the year 1868, and for the years from 1870 to 1873, inclusive, are estimated. With these exceptions the amounts of the taxes shown by this table are from complete data obtained by this Office.

In order that the great inequality of the percentage of these United States and State taxes to the capital of national banks in different geographical divisions of the country may be seen, the following tables have been prepared, giving for the years from 1875 to 1879, inclusive, the capital stock invested, and the percentage thereto of taxes paid, in each of such geographical divisions:

TAXATION of NATIONAL BANKS.

In the foregoing tables there appears to be an inequality in the percentages of national taxation as well as in those of State taxation; but this inequality as to national taxation is in appearance only, and arises from the fact that while the rate of United States tax imposed on circulation, deposits, and capital is uniform as to all banks and in all parts of the country, yet in the tables there is given the percentage of the total tax to the capital only. Therefore, in those States where the deposits and circulation are large in proportion to capital the percentage of United States tax in the table is greater. In States where the deposits and circulation are proportionately smaller the percentage of such tax is less. In the case of State taxation the inequality is a real one, and represents very nearly the difference in the rates, as the only tax which can be laid by the States on national banks under the law must be laid directly on the shares of capital stock. It will be seen that the heaviest taxes are paid in the Western and Middle States, and the lightest in the Southern and Eastern.

The table below shows for three different years the great inequality in the rates of State taxation paid in the principal cities of the country:

	Rates of taxation.

The statistics given show that, year by year, the States collect more from the national banks in taxes than does the United States; that on an average, during the past twelve years, the total annual amount paid to both State and national governments by such banks has been about sixteen millions of dollars, or nearly four per cent. upon the capital stock; and that during the past year it was \$14,619,363, or more than four and one half per cent. upon the amount of circulation issued to the banks then in operation.

THE LOSSES, SURPLUS, EARNINGS AND DIVIDENDS OF THE NATIONAL BANKS.

Section 5204 of the Revised Statutes provides that no association, or any member thereof, shall, during the time it shall continue its banking operations, withdraw, or permit to be withdrawn, either in the form of dividends or otherwise, any portion of its capital. If losses have, at any time, been sustained by any such association, equal to or exceeding its undivided profits then on hand, no dividend shall be made; and no dividend shall ever be made by any association, while it continues its banking operations, to an amount greater than its net profits then on hand, deducting therefrom its losses and bad debts. And section 5212 requires that each association shall report to the Comptroller of the Currency, within ten days after declaring any dividend, the amount of such dividend, and the amount of net earnings in excess of such dividend.

These reports, which are made semi-annually, give full information from each bank of its dividends, earnings, and losses for the period named; and from these reports tables have been prepared in this Office for a series of years, containing items of great interest, and of a kind never before regularly given to the public in reference to the gains and losses of any class of corporations. The following table exhibits by States and reserve cities the number of banks which have charged off losses, and the amount of losses charged off by them, in each of the two periods of six months, ending on March 1 and September 1, 1880,

together with the total amount for the year; to which have been added the amounts charged off in each of the four preceding years:

It will be seen from the foregoing table that the total losses charged off by the banks during the current year were \$14,706,406, and for the four previous years \$85,845,069, making an aggregate of more than one hundred millions of dollars of losses which the banks have sustained during the five years named. Of the \$72,656,488 of losses charged off within the last three and a half years, \$10,835,760 was on account of depreciation in the premium on United States bonds held by the banks. The amount of premium thus charged off during the past year was \$2,196,353. The total losses charged off during the last five years are more than 21 per cent. of the entire capital of the banks.

The amount of losses sustained during the last five years by the national banks in several of the principal cities of the United States is shown in the following table:

Cities.	1876.	1877.	1878.	1879.	1880.	Total
New York Boston Philadelphia Pittsburgh Baltimore New Orleans	1, 598, 722 68 152, 976 14 333, 851 56 876, 207 32			2, 655, 390 58	\$2, 054, 381 52 1, 110, 831 72 399, 943 74 258, 128 15 211, 329 01 118, 080 38	\$21, 458, 960 50 10, 047, 196 25 1, 939, 403 01 1, 633, 505 80 1, 951, 557 06 1, 535, 428 03

These losses have to a considerable extent been charged to the current profits of the banks. In some instances, however, where the losses were large, they have been partly met from the accumulated profits and partly from the surplus account. In extreme cases they have been met, either by assessment upon the shareholders, or by a reduction of the

capital stock under section 5143 Revised Statutes. The law requiring losses to be charged off before dividends are paid is rigidly enforced, in order that the reports of the banks may show as far as possible their true condition. These enormous losses are largely attributable to the general depression which, from 1873 to 1879, affected all branches of trade and industry, and it is a gratifying fact to know that the losses for the present year are considerably less than for any of the four years preceding, being \$7,019,249 less than for 1879, and \$9,760,394 less than for 1878.

Surplus.

The law provides that a surplus fund shall be accumulated, by setting aside, before the usual semi-annual dividend is declared, one-tenth part of the semi-annual net profits of the bank. In some cases this legal surplus now exceeds the capital of the bank. The capital and the surplus together form the working fund of the bank, each contributing to its ultimate profits; and the banks which make the largest dividends in proportion to their capital are those which have accumulated a large surplus, such dividends being really earned by capital and surplus combined.

The following table shows the growth of surplus from the commencement of the system to the present time, as nearly as possible by semi-annual periods, with the increase or decrease for each period:

	Sur	plus.		Surplus.		
Dates.	Amount.	Semi-annual increase or decrease.	Dates.	. Amount.	Semi-annual increase or decrease.

Dividends and earnings.

Since the year 1869, the banks have been required to make semiannual returns of their dividends and earnings. From these reports tables have been prepared, showing their profits and dividends, and the ratio of such profits, not alone to capital, but to capital and surplus combined, since the surplus contributes proportionately as much to the semi-annual profits from which dividends are derived as does the capital.

The following table shows the capital, surplus, dividends, and total earnings of all the national banks for each half year, from March 1, 1869,

to September 1, 1880, together with the ratio of dividends to capital and to capital and surplus, and of earnings to capital and surplus:

			•				RATIOS.

The following statement shows by geographical divisions the number of national banks, with their capital, which have paid no dividends to their stockholders during the two semi-annual periods of 1880, together with the totals for each semi-annual period in the four preceding years:

		Six month	Average for the

Totals for 1880 Totals for 1879 Totals for 1878 Totals for 1877 Totals for 1877	226 309 328 245 235	\$0, 407, 200 53, 843, 700 48, 797, 900 40, 452, 000 34, 290, 320	233 299 357 288 273	26, 334, 150 44, 576, 300 58, 736, 950 41, 166, 200 44, 057, 725	230 304 343 266 254	28, 370, 675 49, 210, 000 53, 767, 425 40, 809, 100 39, 174, 022
Average for five years	269	41, 558, 224	290	42, 974, 265	279	42, 266, 244

The number of banks passing dividends in the first dividend period of 1880 was 226, with a total capital of \$30,407,200; in the second period the number was 233, with a capital of \$26,334,150; while during the last five years the average number of banks semi-annually passing dividends on account of losses has been 279. The average amount of capital upon which no dividends have been paid during that time is \$42,266,244. From these facts it follows that, for a continuous period of five years, about one-seventh of the whole number of banks in operation have paid no dividends, and that nearly one-tenth of the total capital has been unremunerative.

The percentage to capital of dividends paid, and of dividends and

earnings to combined capital and surplus, is given by similar divisions in the following table, for the years 1878, 1879, and 1880:

		1878.			1879.			1880.

UNITED STATES LEGAL-TENDER NOTES AND NATIONAL BANK CIRCU-LATION.

The acts of February 25, 1862, July 11, 1862, and March 3, 1863, each authorized the issue of 150 millions of dollars of legal-tender notes, making an aggregate of 450 millions of dollars. On January 30, 1864, the amount of such notes outstanding was \$449,338,902, which was the highest amount outstanding at any one time.

The act of June 30, 1864, provided that the total amount of United States notes issued or to be issued should not exceed 400 millions of dollars, and such additional sum, not exceeding 50 millions, as may be

temporarily required for the redemption of temporary loans.

The act of April 12, 1866, authorized the retiring and cancellation of not more than 10 millions of legal-tender notes, within six months from the passage of the act, and thereafter not more than 4 millions in any one month; and under this act the amount outstanding was so far reduced that on December 31, 1867, the amount was 356 millions. On February 4, 1868, the further reduction of the volume of legal-tender notes was prohibited, leaving the last-named amount outstanding until October 1, 1872. Between that date and January 15, 1874, the amount was increased to \$382,979,815, and on June 20, 1874, the maximum amount was fixed at \$382,000,000; section 6 of the act of that date providing that "the amount of United States notes outstanding and to be used as a part of the circulating medium shall not exceed the sum of 382 millions, which said sum shall appear in each monthly statement of the public debt, and no part thereof shall be held or used as a reserve."

Section 3 of the act of January 14, 1875, authorized an increase of the circulation of national banks in accordance with existing law, without respect to the limit previously existing, and required the Secretary of the Treasury to retire legal-tender notes to an amount equal to 80 per cent. of the national bank notes thereafter issued, until the amount of such legal-tender notes outstanding should be 300 millions, and no more.

Under the operation of this act \$35,318,984 of legal tender notes were retired, leaving the amount in circulation on May 31, 1878, the date of the repeal of the act, \$346,681,016, which is the amount now outstanding. The act of February 25, 1863, and the subsequent act of June 3, 1864, authorized the issue of 300 millions of dollars of national bank circulation, which amount was increased by the act of July 12, 1870, to 354 millions. The act of June 20, 1874, authorized any national bank desiring

to withdraw its circulating notes, in whole or in part, to deposit lawful money with the Treasurer of the United States in sums of not less than nine thousand dollars, and to withdraw a proportionate amount of bonds held as security for such notes; and the act of January 14, 1875, repealed all previous provisions restricting the aggregate amount of national bank circulation. Subsequent to the passage of the acts of June 20, 1874, and of January 14, 1875, which authorized the retirement and reissue of national bank notes at the pleasure of the banks the circulation steadily decreased in volume until the year 1877, the total decrease in this interval being \$30,869,655. During the year ending November 1, 1878, there was an increase of \$4,216,684, and during the year ending November 1, 1879, an increase of \$14,742,503, the total amount now outstanding being \$9,343,288 less than on January 14, 1875.

The act of March 3, 1865 (section 5171 Revised Statutes), which was passed at a time when the legal limit of bank circulation was 300 millions of dollars, proportioned the amount to be issued by each bank to the amount of its capital. Banks having a capital of less than 500 thousand dollars were limited to 90 per cent. of such capital; those whose capital was between 500 thousand dollars and one million to 80 per cent.; those whose capital exceeded one million and was less than three millions, to 75 per cent.; and that class of banks whose capital exceeded three mill-

ions, to 60 per cent. of their capital.

The increase in the issue of circulating notes during the present year has been but \$6,783,864, of which more than one-half was issued to banks recently organized. The profit upon circulation does not exceed one and one-half per cent. per annum, and many banks have reduced their bonds, thus retiring a part of their circulation, in order to avail themselves of the existing high rates of premium, which premium is now equal to the profits upon circulation for six years. While the present small profit upon circulation continues, but little elasticity in the currency can be expected. The New York free-banking act authorized the banks of that State to issue currency without regard to capital, upon the deposit of the necessary amount of bonds. Such legislation by Congress would undoubtedly give elasticity to the national currency, but it would also stimulate a desire to organize banks of circulation only, and it is not recommended.

The bill now pending in Congress authorizes all banks to receive circulation equal to the full amount of their capital, as was the case in the original bank act. The passage of this bill would give the banks the privilege of increasing their circulation up to the limit of their capital, if at certain seasons of the year such an increase should be desirable. This increase would not probably be great, for the amount of circulation outstanding is now much less than that authorized by law, as may be seen in the following table:

Geographical divisions.	Banks having capital not exceeding \$500,000.		Banks hav	ing capital g \$500,000.	Total.	
Geographical divisions.	Issued.	Uncalled for.	Issued.	Uncalled for.	Issued.	Uncalled for.
New England States	\$79, 322, 430 82, 940, 955 23, 162, 985 52, 284, 710	\$7, 046, 763 9, 291, 590 2, 620, 845 11, 620, 690	\$43, 014, 500 29, 681, 740 1, 370, 000 5, 707, 380	\$11, 485, 238 21, 094, 833 510, 000 4, 552, 620	\$122, 336, 930 112, 622, 695 24, 532, 985 57, 992, 090	\$18, 532, 001 30, 386, 423 3, 130, 845 16, 173, 310
tories	3 244, 700	935, 800	640, 000	500, 000	3, 884, 700	1, 495, 800
United States	240, 955, 780	31, 515, 688	80, 413, 620	38, 202, 691	321, 369, 400	69, 718, 379

It will be seen that the banks already organized and in operation are entitled to receive nearly 70 millions of additional circulation, whenever they may see fit to deposit United States bonds to secure it. also shows that the profit upon circulation is, as has been already stated, very small, otherwise the banks would avail themselves of the privilege of issuing additional notes. There is, however, a certain class of banks, with capital exceeding 500 thousand dollars, that would find it convenient during the fall season of the year, when currency is in demand, to increase their circulation, notwithstanding the high price of bonds, to the amount of their capital if authorized to do so, and the passage of the bill now pending is recommended.

Since the passage of the act of June 20, 1874, \$104,075,752 of legaltender notes have been deposited in the Treasury by the national banks. for the purpose of reducing their circulation, and \$87,329,415 of bank notes have been redeemed, destroyed and retired.

The following table exhibits the amount and kinds of outstanding paper currency of the United States and of the national banks, on August 31, 1865, when the public debt reached its maximum, and annually thereafter at the dates named, with the currency price of gold and the gold price of currency at the same dates:

The amount of additional circulation issued for the year ending November 1, 1880, was \$13,402,215; the amount issued to banks organized during the year was \$3,662,200; the amount retired was \$6,618,351, the actual increase for the year being \$6,783,864. During the year ending November 1, 1880, lawful money to the amount of \$13,845,866 was deposited with the Treasurer to retire circulation, of which amount \$947,326 was deposited by banks in liquidation. The amount previously deposited under the act of June 20, 1874, was \$72,786,458, and by banks in liquidation \$17,443,428, to which is to be added a balance of \$3,813,675 remaining from deposits made by liquidating banks prior to the passage Deducting from the total, \$107,889,427, the amount of circulating notes redeemed and destroyed without reissue (\$87,329,415), there remained in the hands of the Treasurer on November 1, 1880, \$20,560,012 of lawful money for the redemption and retirement of bank circulation.

11 F

The following table exhibits by States the issue and retirement of circulation during the year ending November 1, 1880, and the total amount issued and retired since June 20, 1874:

LOST OR UNREDEEMED BANK NOTES.

In his report for 1875 the Comptroller gave some statistics in relation to the percentage of bank notes not presented for redemption under State laws. Returns were given for 286 banks in the State of New York, which included thirty banks now in operation in the city of New York, either as State or national institutions. The maximum amount of circulation issued to the 286 banks was \$50,754,515, and the total circulation then outstanding was \$1,336,337, showing that the proportion of unredeemed circulation was 2.63 per cent. only of the amount issued. The maximum amount of circulation issued to the thirty banks in the city of New York was \$7,763,010, and the amount remaining unredeemed in October, 1875, was \$142,365. The percentage of that unredeemed to

that issued was 1.83. The lowest percentage of unredeemed circulation was 0.58, upon an issue of \$241,174. The highest was 4.81, upon an

issue of \$123,974, seventeen banks of the thirty reporting the percentage of unredeemed notes outstanding at less than two per cent. In his report for 1876 the following table was given, showing the greatest amount of circulation issued to 707 banks organized under the laws of twelve different States, the amount outstanding, and the per-

centage unredeemed, which was 2.35 only.

States.	Number of banks.	Greatest circulation.	Circulation outstanding.	Percentage unre- deemed.
Maine New Hampshire Vermont Massachusetts Rhode Island Connecticut New York New Jersey Delaware Maryland Ohio Wisconsin	27 16 41 44 53 286 25 16 25 140	\$3, 375, 130 2, 520, 339 3, 143, 348 10, 986, 357 6, 369, 652 12, 850, 554, 515 7, 111, 047 950, 770 6, 847, 844 2, 196, 381 7, 565, 409	\$53, 102 35, 660: 37, 027 254, 954 158, 834 253, 190 1, 336, 337 162, 961 35, 461 172, 669 61, 340 134, 747	2.8

From this table it will be seen that the highest amount of circulation issued to fifteen national banks which failed previous to 1870 was \$1,554,400, and the amount outstanding on November 1, 1880, was \$11,628, the proportion of notes remaining unredeemed being only 0.75 per cent. of the amount issued. The percentage of notes unredeemed of the same banks on November 1, 1875, was 1.39, in 1876, 1.35, in 1878, 0.86, and in 1880, as has been seen, it is 0.75; showing a rapid increase in the redemption of the notes of these banks. The total amount issued to twenty-three national banks, in which are included the fifteen banks, already mentioned, which failed previous to the year 1873, was \$3,196,693, and the amount outstanding on November 1, 1880, was \$45,644, the proportion of notes remaining unredeemed being but 1.43 per cent. of the The total amount outstanding of the notes of these amount issued. banks has been reduced \$11,430 since November 1, 1878, and the percentage reduced from 1.78 to 1.43. The total amount issued to thirtyfour national banks which failed prior to 1874 was \$5,599,893, and the amount outstanding on November 1, 1880, was \$177,449, the proportion of notes unredeemed being 3.17 per cent. of the amount issued.

Of the circulation of fifty-one national banks in voluntary liquidation previous to 1870, amounting to \$5,832,940, there yet remains outstanding \$117,467, or 2.01 per cent. only of the amount issued; of the circulation of seventy-five banks in liquidation prior to 1872, amounting to \$8,648,980, there remains outstanding \$177,075, which is equal to a percentage of 2.05; of a circulation of eighty-nine banks in liquidation prior to 1873, in amount \$10,764,080, there remains outstanding \$232,879, or 2.17 per cent. of the amount issued; and of the circulation of one hundred and five banks in liquidation prior to 1874, in amount \$12,709,100, there remains outstanding \$326,568, or 2.58 per cent. of the

amount issued.

The percentage of the fifty one national banks in voluntary liquidation previous to 1870, which is now 2.01, in 1878 was 2.59; the percentage of seventy-five banks in liquidation prior to 1872, which is now 2.05, in 1878 was 2.63; and the percentage of eighty-nine banks in liquidation prior to 1873 is now 2.17, which in 1878 was 2.82.

These statistics show a rapid reduction during the last two years in the amount of outstanding circulation of banks which have ceased to do business, and they indicate that the final loss upon the notes of national

banks will not exceed one or one and a half per cent.

The amount of demand Treasury notes, payable in gold coin, issued from July 17, 1861, to December 31, 1862, was \$60,000,000, in denominations of five, ten, and twenty dollars, and the amount outstanding on November 1 last, was \$60,825, the proportion unredeemed being but little more than one tenth of one per cent.—\$8,882 having been redeemed

within the last five years.

The highest outstanding amount of legal-tender notes of the first issue was \$449,479,222, on February 3, 1864. The amount of these notes outstanding on November 1, 1880, was \$14,947,895, or 3.33 per cent. of the highest amount issued. The issues of Treasury notes of the series of 1869 and 1874 have not been as largely reduced. This is accounted for by the fact that large amounts of the legal-tender notes have been held for years by the national banks as reserve, and have not therefore been returned to the Treasury for destruction and replacement by subsequent issues. As the amount of legal-tender notes held by the national banks as reserves has been recently largely displaced by coin, it is probable that the amount of the early issues of these notes will be speedily reduced.

These tables are given somewhat in detail, for the purpose of correcting the belief, very generally entertained, that the proportion of circulating notes outstanding which will ultimately be lost or destroyed is much greater than is shown therein. It is also believed by many that the loss of such notes is a gain to the bank which issues them. The Comptroller receives frequent letters of inquiry upon this subject, and therefore repeats the following paragraph, which was given in a former

"Section 5222 of the Revised Statutes requires that all national banks which go into voluntary liquidation shall, within six months thereafter, deposit in the Treasury an amount of lawful money equal to the amount of their circulating notes outstanding. The law also requires that full provision shall be made for the redemption of the circulating notes of any insolvent bank before a dividend is made to its creditors. Thus it will be seen that no association can close up its business without first providing for the payment of all its circulating notes, and that the amount deposited for their redemption must remain in the Treasury until the last outstanding note shall have been presented. It is therefore plain that the government, and not the bank, receives all the benefit arising from lost or unredeemed circulating notes."

LOANS AND RATES OF INTEREST OF NEW YORK CITY BANKS.

The following table contains a classification of the loans of the national banks in New York City for the last five years:

•					
Loans and discounts.	October 2, 1876.	October 1, 1877.	October 1, 1878.	October 2, 1879.	October 1, 1880.

The average rate of interest in New York City for each of the fiscal years from 1874 to 1880, as ascertained from data derived from the Journal of Commerce and The Commercial and Financial Chronicle, was as follows:

```
1874, call loans, 3.8 per cent.; commercial paper, 6.4 per cent. 1875, call loans, 3.0 per cent.; commercial paper, 5.6 per cent. 1876, call loans, 3.3 per cent.; commercial paper, 5.3 per cent. 1877, call loans, 3.0 per cent.; commercial paper, 5.2 per cent. 1878, call loans, 4.4 per cent.; commercial paper, 5.1 per cent. 1879, call loans, 4.4 per cent.; commercial paper, 4.4 per cent. 1880, call loans, 4.9 per cent.; commercial paper, 5.3 per cent.
```

The average rate of discount of the Bank of England for the same years was as follows:

```
During the calendar year ending December 31, 1874, 3, 69 per cent. During the calendar year ending December 31, 1875, 3, 23 per cent. During the calendar year ending December 31, 1876, 2, 61 per cent. During the calendar year ending December 31, 1877, 2, 91 per cent. During the calendar year ending December 31, 1878, 3, 78 per cent. During the calendar year ending December 31, 1879, 2, 50 per cent. During the fiscal year ending June 30, 1880, 2, 63 per cent.
```

The rate of interest in the city of New York on November 26 of the present year, as quoted in the Daily Bulletin, was, on call loans, 6 per cent., and on commercial paper of the best grade, from 5 to 5½ per cent.

The rate of interest of the Bank of England on November 29, 1877, was 4 per cent. On January 30, 1878, it was 2 per cent., from which date to October 14, 1878, there were seven changes, and, with a single exception, on May 29, a gradual increase. The rate was fixed at the date last named at 6 per cent., and reduced on November 21, 1878, to 5 per cent., since which time there have been changes in the rate as follows: On January 15, 1879, 4 per cent.; on the 29th of the same mouth 3 per cent.; on March 12 it was reduced to 2½ per cent., and again on April 9 to 2 per cent., at which rate it remained until November 7, 1879, when it was increased to 3 per cent., which was, also, at that time, the rate of the Bank of France.

On June 17, 1880, the rate of the Bank of England was reduced to $2\frac{1}{2}$ per cent., which is the present rate. The London rate of interest, outside of the Bank of England, was, on October 25, on call loans, $1\frac{1}{4}$ per cent., on three months' time, $1\frac{3}{4}$, and on six months' time, $2\frac{1}{4}$; the best bills having actually been placed $\frac{7}{4}$ per cent. below the rate of the Bank

of England.

The rate of discount at the Bank of France, which on October 16, 1878, was raised from 2 per cent. to 3 per cent., was reduced to 2 per cent. on the 23d of May, 1879, and then raised to 3 per cent. on the 23d of the following October. The rate was reduced to $2\frac{1}{2}$ per cent. on April 2, 1880, and advanced on October 14 to $3\frac{1}{2}$ per cent., which is the present rate. The average rate of discount during the year 1879 was 2.58 per cent.

The rate of the Imperial Bank of Germany was reduced from 5½ per cent. to 5 per cent. on October 6, and to 4½ per cent. on October 18 last. The market discount rates in Berlin, Hamburg and Frankfort, during

the month of October, were about 4 per cent.

REDEMPTION OF NATIONAL-BANK CURRENCY.

The expense of redeeming the national bank currency bears oppressively in one respect upon the banks in operation, as they are obliged to pay a proportionate share of the cost of redeeming the notes of associations which are either reducing their circulation, have gone into liquidation, or have become insolvent; the banks continuing business having of course no interest whatever in the circulation thus redeemed.

The Treasury has for a long time had the use of a permanent fund belonging to the assets of banks which are insolvent. It has also a large fund deposited by banks which have gone into voluntary liquidation, or have deposited legal-tender notes for the purpose of reducing their circulation. According to the statement of the Treasurer for November 1 last, the sum of these two funds then amounted to \$20,942,032, the whole of the currency balance at that date being but \$26,846,826. In addition to the use of these funds, which is a great convenience to the Treasury when the currency balance is at a low point, the government, under existing law, receives the whole gain arising from lost or unredeemed notes of the national banks, which gain will ultimately amount to a very large sum—certainly, with no more than the present amount of circulation, to not less than \$3,500,000. Any large national bank in New York City would, on these terms, gladly undertake the redemption of all the notes presented for that purpose at the commercial center—which is the only appropriate place for the redemption of

bank notes—without any charge therefor to the banks whose notes are redeemed. It is recommended that the law now in force on this subject be amended, and that the cost of redemption shall be assessed in such manner as that the banks in operation shall pay for the redemption of their own notes only, the remaining cost being borne by the government. Moreover, the government has for fifteen years received annually an average sum of more than three millions of dollars in taxes upon deposits, under a system unknown elsewhere in any country; and it is certainly only just that it should bear the expense of the redemption of those circulating notes from which it alone receives the entire benefit.

Section 3 of the act of June 20, 1874, provides that every national bank "shall, at all times, keep and have on deposit in the Treasury of the United States, in lawful money of the United States, a sum equal to five per centum of its circulation, to be held and used for the redemption of such circulation." Since the passage of this act the banks have, as a rule, maintained their redemption fund, and their circulating notes have been promptly redeemed at the Treasury without expense to the government.

The following table exhibits the amount of national bank notes received for redemption monthly, by the Comptroller of the Currency, for the year ending November 1, 1880, and the amount received for the same period at the redemption agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

		Received by

From the passage of the act of June 20, 1874, to November 1, 1880, there was received at the redemption agency of the Treasury \$1,038,013,014 of national bank currency. The receipts reached the highest point during the year ending November 1, 1877, when they amounted to \$229,308,507, since which date they have steadily decreased; being for the year 1878, \$202,499,740, for 1879, \$117,191,999, and for 1880, but \$53,526,722.

At this Office, the maximum yearly receipts of currency for redemption was reached during the year ending November 1, 1875, when the amount

was \$140,577,505. There has been a decrease in each succeeding year, but the percentage has been much less as compared with the decrease

at the redemption agency.

During the year ending November 1, 1880, there was received at the redemption agency of the Treasury \$53,526,000 of national-bank notes, of which amount, \$24,312,000, or about 45 per cent., was received from the banks in New York City, and \$5,682,000, or about 10 per cent., from Boston. The amount received from Philadelphia was \$3,531,000; from Baltimore, \$499,000; Pittsburgh, \$597,000; Cincinnati, \$864,000; Chicago, \$1,937,000; Saint Louis, \$446,000; Providence, \$1,229,000. The amount of circulating notes fit for circulation returned by the agency to the banks of issue during the year was \$15,010,700. The total amount received by the Comptroller for destruction, from the redemption agency and from the national banks direct, was \$35,677,355. Of this amount, \$2,966,700 were issues of banks in the city of New York; \$3,088,611, of Boston; \$1,398,800, of Philadelphia; \$1,207,489, of Providence; \$556,550, of Baltimore; \$661,738, of Pittsburgh; and of each of the other principal cities less than \$500,000.

The following table exhibits the number and amount of national-bank notes, of each denomination, which have been issued and redeemed since the organization of the system, and the number and amount out-

standing on November 1, 1880:

		Number.			Amount.	
Denominations.	Issued.	Redeemed.	Outstanding.	Issued.	Redeemed.	Outstanding.

^{*}Portions of notes lost or destroyed.

A table showing the number and denominations of the national-bank notes issued and redeemed, and the number of each denomination outstanding on November 1, for the last twelve years, will be found in the appendix.

The following table shows the amount of national-bank notes received at this Office and destroyed yearly, since the establishment of the system:

Prior to November 1, 1865 During the year ending October 31, 1866 During the year ending October 31, 1867 During the year ending October 31, 1868 During the year ending October 31, 1868 During the year ending October 31, 1870 During the year ending October 31, 1870 During the year ending October 31, 1871 During the year ending October 31, 1872 During the year ending October 31, 1873 During the year ending October 31, 1873 During the year ending October 31, 1874 During the year ending October 31, 1875 During the year ending October 31, 1876 During the year ending October 31, 1876 During the year ending October 31, 1877 During the year ending October 31, 1877	1, 050, 382 3, 401, 423 4, 602, 825 8, 603, 729 14, 305, 689 24, 344, 047 30, 211, 720 36, 433, 171 49, 939, 741
During the year ending October 31, 1877 During the year ending October 31, 1877 During the year ending October 31, 1878 During the year ending October 31, 1879 During the year ending October 31, 1879 During the year ending October 31, 1880 Additional amount destroyed of notes of banks in liquidation	76, 918, 963

NATIONAL BANK FAILURES.

Three banks have failed during the year ending November 1, 1880, and have been placed in the hands of receivers, as follows:

	Capital.
First National Bank of Meadville, Pa	\$100,000
First National Bank of Newark, N. J.	300,000
First National Bank of Brattleboro', Vt	

The Manufacturers' National Bank of Chicago, Ill., which went into voluntary liquidation on September 25, 1873, has been placed in the hands of a receiver for the purpose of enforcing the individual liability of shareholders.

Dividends have been paid to the creditors of these banks during the present year, as follows:

	Per cent.
First National Bank of Meadville, Pa	65
First National Bank of Newark, N. J	
First National Bank of Brattleboro', Vt	90

The aggregate amount of these dividends is \$580,656.70, and their average per cent. to claims proved is 77.4.

Dividends have also been paid to the creditors of banks which had failed prior to November 1, 1879, as follows:

The total amount of dividends paid by the Comptroller to creditors of insolvent national banks during the year ending November 1, 1880, was \$1,712,731.16. The total dividends paid since the organization of the system is \$17,632,639, upon proved claims amounting to \$25,786,261. The dividends paid equal 68.4 per cent. of the amount of the claims.

Assessments amounting to \$7,176,750 have been made upon the share-

Assessments amounting to \$7,176,750 have been made upon the share-holders of insolvent banks, for the purpose of enforcing their individual liability, of which amount \$2,617,571 has been collected in all, and \$801,563 of it during the past year.

A table showing the national banks which have been placed in the hands of receivers, the amount of their capital, and of claims proved,

and the rates of dividends paid, and also one showing the amount of circulation of such banks, issued, redeemed, and outstanding, will be

found in the appendix.

In the case of the Ocean National Bank of New York, there are dividend checks amounting to \$4,189.70 which have never been called for by the creditors, although every effort has been made to find them. Small amounts are also held belonging to creditors of other national banks which are insolvent, and the Comptroller respectfully recommends the passage of a bill, authorizing him to divide these balances among the other creditors at the time of the final closing of such banks.

RESERVE.

The following table exhibits the amount of net deposits, and the reserve required thereon by the act of June 20, 1874, together with the amount and classification of reserve held by the national banks in New York City, in the other reserve cities, and by the remaining banks, at the dates of their reports in October of each year from 1875 to 1880:

APPENDIX.*

Tables will be found in the appendix, exhibiting the reserve of the national banks as shown by their reports, from October 2, 1874, to October 1, 1880; the reserve by States and principal cities for October 1, 1880; and in the States and Territories, in New York City, and in the other reserve cities, separately, at three dates in each year, from 1877 to 1880.

Special attention is called to the synopsis of judicial decisions contained in the appendix, to the numerous and carefully prepared tables in both report and appendix, and to the index of subjects and list of tables to be found at the close of the appendix. At the end of the full volume of more than seven hundred pages is an alphabetical list of the cities and villages in which the national banks are situated.

In concluding this report the Comptroller performs a pleasant duty in acknowledging the zeal and efficiency of the officers and clerks associated with him in the discharge of a finite duty in

ciated with him in the discharge of official duties.

JOHN JAY KNOX, Comptroller of the Currency.

Hon. Samuel J. Randall, Speaker of the House of Representatives.

^{*}The appendix, which is omitted for want of space, may be found in the bound volume of the Comptroller's report.

REPORT

OF

THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT, BUREAU OF THE MINT, November 23, 1880.

SIR: I have the honor to submit the following report of the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1880, being my second and the eighth annual report of the Director since the organization of the Bureau of the Mint:

DEPOSITS AND PURCHASES.

The deposits of gold and silver bullion at the mints and assay offices, including deliveries upon purchases for silver coinage, have been in number and value far greater than in any previous year since the establishment of the Mint. Of gold, besides the deposit of \$35,821,705.40 of domestic production, and \$1,385,834.59 of plate, jewelry, and worn coin, \$61,627,556.86 of foreign coin and bullion, out of a total import of \$62,550,837, was brought to the mints and assay offices during the year, and its value paid to depositors in gold coin and bars.

The aggregate of the gold deposits was \$98,835,096.85, and exceeded by \$29,750,567.11 the amount of gold deposited at the mints and assay offices in 1861, which was the greatest amount received in any previous

year.

The total deposits of silver, including deliveries upon purchases, were in excess of those of the previous year, and only surpassed during the coinage of fractional silver and trade dollars in 1877 and 1878.

The total deposits and purchases of silver bullion were, of domestic bullion \$32,132,756.95, foreign coin and bullion \$2,219,105.83, plate, jew-

elry and American coin \$288,660.01, a total of \$34,640,522.79.

The forms in which the above amounts were brought to the mints

and assay offices were as follows:

<i>i</i>	Gold.	Silver.	Total
Domestic production United States coin Foreign bullion Foreign coin Old jewelry, plate, and jewelers' bars	21, 200, 997 23	\$32, 132, 756 95 39, 298 28 1, 154, 859 57 1, 064, 746 26 249, 361 73 34, 640, 522 79	\$67, 954, 462 35- 248, 627 10 22, 355, 356 80 41, 491, 305 89 1, 425, 867 50 133, 475, 619 64

In addition to the above net amount of deposits, bars amounting to \$36,141,366.83 in gold, and \$2,574,235.35 in silver, made at one institu-

tion were subsequently received and operated upon at another, making the total amounts received and worked \$134,976,463.68 in gold and \$37,214,758.14 in silver.

These amounts were distributed among the mints and assay offices as follows:

Mint or assay office.	Gold.	Silver.	Total.
Philadelphia San Francisco. Carson Denver New Orleans New York Boise Helena Charlotte	28, 545, 544 46 368, 174 51 344, 909 86 97, 620 40 68, 273, 627 74 147, 619 16 473, 532 96	\$16, 671, 599 21 10, 842, 390 58 622, 291 88 4, 443 77 4, 502, 275 24 4, 508, 067 20 2, 052 83 61, 068 23	\$53, 309, 250 66 39, 387, 935 0 990, 466 33 349, 353 66 4, 599, 895 6- 72, 781, 694 9- 149, 671 99 534, 601 19 88, 352 41

COINAGE.

The unusual imports of foreign gold coin and bullion brought to the New York assay office and mints during the first half of the last fiscal year gold bullion beyond the capacity of the mints for immediate coinage. Fortunately the condition of the Treasury and slight demand for coin in redemption of government obligations did not require the immediate conversion of this bullion into coin.

It was deemed advisable to increase the work at the Philadelphia Mint to a monthly coinage, besides the coinage of silver and minor coins, of from \$3,000,000 to \$5,000,000 of gold. This Mint was able with existing facilities, and the employment of additional labor, to coin during the year \$27,639,445 of gold, leaving at the close \$38,468,874 of gold bullion

in that Mint and the New York assay office uncoined.

For the first time a successful effort has been made to obtain a large portion of the coinage of gold pieces in denominations less than twenty To do this has required positive instructions from this office, in accordance with your views. As was said by James Ross Snowden, Director of the Mint in 1860, "The chief design of a national mint is to subserve the interests of the people at large, preferably to a few large owners of bullion or coin. The interests of the public and of depositors are not always concurrent in the matter under discussion. Depositors of large amounts call for coin in a form which gives the least trouble to count; and banking institutions, in addition to that, may prefer it in a form not Many who present their checks at these instilikely to be drawn out. tutions would doubtless ask for specie, but are deterred from doing so by the expectation of receiving double eagles, instead of half or quarter eagles. In a word, the plain effect of issuing gold coin of a large size is to keep down the circulation of specie and increase the use of paper money."

In Great Britain the gold coinage consists almost wholly of sovereigns and half-sovereigns; in France, of twenty and ten franc pieces; and in Germany, of ten-mark pieces, all of these coins being of less value than five dollars. The absorption by France of \$1,100,000,000 of gold imports into her circulation during the thirty years, from 1850 to 1880, may in part be accounted for by the coinage of nearly all this gold into

denominations of less than two and four dollars' value.

Let the people have gold and silver coins for their use, and for the ordinary and smaller business transactions, and the best secured redeemable paper circulation for the larger transactions of trade and commerce.

While the law gives the depositor the option into what denominations his bullion shall be coined, if, in lieu of waiting for such coins to be struck, he asserts his right to be paid the value out of the bullion funds kept by the Secretary of the Treasury at the Mint for such payment, he must take such funds and denominations as are lawfully provided, and loses all claim to the bullion he has deposited or power to control its future disposition. However, while asserting the right to direct the coinage of gold belonging to the United States, as seemed to be for the interests of the community, the wishes and conveniences of depositors and those using large sums of money in their transactions have not been overlooked, and a limited coinage of double eagles has been per-

The total coinage during the year amounted to \$84,370,144, of which \$56,157,735 was gold, \$27,942,437.50 silver, and \$269,971.50 minor The number of pieces of each denomination struck, were as follows, viz, of double eagles, 1,075,768; eagles, 1,883,632; half eagles, 3,158,172; three dollars, 3,030; quarter eagles, 1,230; gold dollars, 3,030; standard silver dollars, 27,933,750; half-dollars, 6,550; quarter dollars, 15,350; dimes, 15,750, five cents, 24,950; three cents, 32,750; and cents, 26,774,150; a total number of pieces of 60,928,112.

Notwithstanding the large number of cents struck, the demand for

this denomination of coin has been so great that the Mint at Philadelphia—the only mint at which minor coins are struck—has been unable to manufacture a sufficient supply to promptly fill the orders received, although the bronze alloy has been purchased in the form of manufactured blanks or planchets ready for striking, and thus greatly lessened the amount of labor required.

The coinage of the last three calendar years has been:

	1877.	1878.	1879.
Gold Silver Minor	\$43, 999, 864 00 28, 393, 045 50 8, 525 00	\$49, 786, 052 00 28, 518, 850 00 58, 186 50	\$39, 080, 080 00 27, 568, 235 00 165, 003 00
Total	72, 401, 434 50	78, 369, 088 50	66, 813, 318 00

Detailed statements of the coinage executed are presented in the appendix.

BARS.

During the year the mints and assay offices manufactured bars to the

amount of \$69,949,778.05 in gold and \$6,924,501.17 in silver.

Of the gold bars, \$57,368,761.15 were made at the New York assay office for transmission to the Mint at Philadelphia for coinage, \$11,524,181.83 were fine bars, and \$1,056,835.07 were unparted.

Of the silver bars made, \$6,811,645.76 were fine, \$24,347.93 sterling, and \$88,507.48 unparted.

PARTING AND REFINING.

The refineries of the coinage mints and of the assay office at New York operated upon 10,537,106.42 ounces gross of bullion, and separated therefrom 1,241,137.981 ounces of standard gold and 8,577,111.12 ounces of standard silver.

The following statement shows in detail the quantities and value of gold and silver operated upon at the respective refineries during the year.

DIES AND MEDALS.

The engraving department of the mint at Philadelphia prepared during the year 1,092 coinage and medal dies. The number of medals struck was 1,347, of which 43 were in gold, 446 in silver, and 858 in bronze. A medal of fine gold was prepared for presentation to Bendix Koppel in recognition of his services as arbitrator in the "Montijo" arbitration. Fourteen medals of fine gold and three of fine silver were made for award to various persons who had exhibited special heroism in saving life from the perils of the sea.

PURCHASES OF SILVER BULLION.

Purchases of silver bullion for delivery at the mints at Philadelphia, San Francisco, Carson, and New Orleans have been made in the manner described in the last annual report, with the exception that the day for receiving offers was changed January 3, 1880, from Wednesday, three o'clock p. m., to Thursday, two o'clock p. m.

o'clock p. m., to Thursday, two o'clock p. m.

The superior facilities at San Francisco for filling with dispatch orders for speedy delivery of silver bullion in China, and the diminished production of silver in the States and Territories contiguous to the Pacific coast, have frequently operated to carry the price of silver bullion at San Francisco above the prices at New York and London, and to render it difficult at times to purchase at market rates silver bullion for delivery at the Pacific Coast Mints. During the year the department was able to procure for those mints bullion only sufficient to coin 8,318,000 standard silver dollars. This inability compelled the suspension of coinage at the Carson Mint from November 1, 1879, to May 1, 1880, the stock of silver bullion at the former date having become reduced to 12,342.41 standard ounces. The purchase and reception of silver bullion was, however, in the mean time continued, and a stock accumulated by the

6th of April, 1880, of 227,087.54 standard ounces. This amount, with he prospect of additional supplies, justified the resumption of coinage, ut the whole amount of silver bullion obtained for the Carson Mint uring the year amounted at its coining value to \$597,624.28 only.

In preference to purchasing bullion for delivery at the New Orleans lint at figures regarded as in excess of the market price, it was at first eemed advisable to transfer from the New York assay office 1,798,167.82 andard ounces purchased prior to June 30, 1879. This was insufficient supply that mint with an amount of bullion equal to its capacity and ie demand upon it for silver coinage; it therefore became necessary to urchase additional bullion at such rates as were offered or to suspend inage at that mint.

The rates, though at first above the New York price, were less than ie cost to the department to purchase and transfer from Philadelphia Offers were accepted during the year for the delivery at New York. ew Orleans of 1,684,158 standard ounces at the lowest rates attaina-

le, but above the New York price.

Treasury and public demands for coin in exchange for the heavy imortation of foreign gold, and the urgent and increasing demand for one ent bronze coins, rendered it impossible to increase the coinage of andard silver dollars at the Philadelphia Mint. It was also found ore advantageous to purchase and coin silver bullion at New Orleans an at San Francisco, as the resulting coin could be far more rapidly id economically distributed from the former than the latter. No diffilty was experienced in procuring at market rates during the year all e silver bullion necessary for the Philadelphia Mint. At no time durg the year was that institution without an ample stock of bullion. The purchases during the year, as will be seen from the accompanyg table, were 24,069,134.02 standard ounces, at a cost of \$24,778,724.45, lile the silver parted from gold deposits and purchased in pursuance section 3527, Revised Statutes, at a price fixed by the Director of the int, and which during the year was \$1. per standard ounce, amounted 193,437.36 standard ounces, costing \$193,437.36, making the total quany purchased 24,262,571.38 standard ounces, at a cost of \$24,972,161.81, d an average per month of \$2,081,013.48 worth of bullion. The average London price of silver during the year was $52\frac{7}{16}$ pence, th exchange at par (\$4.8665) equivalent to \$1.14436 per ounce fine,

d at the average monthly price at New York, of exchange on London, .8634, equivalent to \$1.14397 per ounce fine. The average New York ice of silver during the year was \$1.14162 per ounce fine.

DISTRIBUTION OF SILVER DOLLARS.

On the first of July, 1879, the amount of standard silver dollars in circulation was 7,653,649, and on the first of July, 1880, 19,309,435, showing

an increase in the circulation during the year of 11,645,786.

Up to November 1, 1880, there had been coined 72,847,750 standard silver dollars, of which 19,780,241 were held by the Treasury for the redemption of silver-certificates and \$27,304,218 for distribution, \$12,918,505 of the latter being in the mints, making the total amount in the Treasury \$47,084,459, and in circulation \$25,763,291, an increase of \$6,453,856 in the circulation from July 1 to November 1, 1880.

The authority for the issue and distribution of standard silver dollars at the mints other than in payment for purchases of silver bullion, and other expenses is contained in the coinage act of 1873, and the act of February 28, 1878, providing for the coinage of the standard silver dollar.

Section 28 of the coinage act of 1873 provides "that silver coins other than the trade dollar shall be paid out at the several mints and the assay office in New York City, in exchange for gold coins at par, in sums not less than one hundred dollars; and it shall be lawful, also, to transmit parcels of the same, from time to time, to the assistant treasurers, depositaries, and other officers of the United States, under general regulations proposed by the Director of the Mint and approved by the Secretary of the Treasury."

Under the provisions of these acts the issue and paying out of silver dollars has been effected.

First. By payment in standard silver dollars for all silver bullion purchased for coinage and delivered at the mints during the year, amounting to \$24,972,161.81.

Second. By exchange for gold coin.

Third. Under general regulations prescribed by the Director of the Mint, and approved by the Secretary of the Treasury September 3, 1878, directing that the superintendents of the coinage mints "upon the receipt of a written request of the Treasurer of the United States, forward by express standard silver dollars in the sum of one thousand dollars, or a multiple thereof, to such party or parties as he may designate. The expense of transportation to be paid by the mint from the silver profit fund."

Section 27 of the coinage act of 1873 provides that the expense of distributing the subsidiary silver coins shall be paid from the silver profit fund. In the act directing the coinage of the standard silver dollar the gain arising from such coinage is required to be accounted for and paid into the Treasury as provided under existing laws relative to the subsidiary coinage.

Under these provisions and the regulation referred to, standard silver dollars are transported from the mints not only to assistant treasurers, depositaries, and other officers of the United States, but to such point as the Treasurer of the United States may designate, and the expense

is charged to the silver profit fund.

If there is any doubt as to this construction of the law, or of the propriety of such method of distribution, and the payment of expenses thereof, I respectfully suggest that additional legislation be requested conferring any needed authority, or more specifically defining the proper cases for its application.

Section 28 of the coinage act of 1873 provides that the subsidiary silver coins shall only be paid out at the mints in sums of not less than \$100 at par in exchange for gold coins.

The propriety of limiting such exchange to gold coin at the present

time is not apparent, and if any exchange for United States notes is not authorized I respectfully suggest that the existing laws ought to be amended.

I append herewith a table exhibiting the movement, circulation, and coinage of standard silver dollars on July 1, 1878, and each six months thereafter to July 1, 1880, and for the four months ending November 1, 1880, as shown by the books of this office and the Treasurer's monthly statement of assets and liabilities:

COMPARATIVE STATEMENT of the MOVEMENT, CIRCULATION, and COINAGE of STANDARD SILVER DOLLARS at the end of each six months, from July 1, 1878, to July 1, 1860, and for the four months ending November 1, 1880.

	In	the Treasury	. <u>-</u>	Total coin- age.

July 1, 1878	412, 480 3, 824, 252	\$5, 273, 964 16, 283, 970 27, 733, 871 29, 343, 812 38, 635, 746 27, 304, 218	\$5, 281, 044 16, 697, 330 28, 147, 351 33, 168, 064 44, 425, 315 47, 084, 459	\$3, 292, 456 5, 798, 220 7, 653, 649 16, 887, 586 19, 309, 435 25, 763, 291	\$8, 573, 500 22, 495, 550 35, 801, 000 50, 055, 650 63, 734, 750 72, 847, 750

APPROPRIATIONS, EARNINGS, AND EXPENDITURES.

The amount appropriated for the support of the respective mints and assay offices during the fiscal year ended June 30, 1880, was \$1,228,800, out of which the sum of \$1,085,482.91 was expended. In addition the sum of \$92,033.46 was expended on account of the mints, and \$13,558.62 at the Treasury Department, a total of \$105,592.06 from the appropriation contained in the act of February 28, 1878, authorizing the coinage of the standard silver dollar.

The use of this appropriation to meet the expenditures at the Philadelphia and New Orleans mints became necessary on account of the large coinage of standard silver dollars executed at those mints, which unavoidably carried the expenses above the specific appropriations for their support. This, however, was offset by reduced expenses resulting from correspondingly diminished coinage at other mints.

The total expenditures at all the mints and assay offices were \$51,283.63

less than the amount specifically appropriated.

The appropriations and expenditures were distributed as shown in the following table:

Appropriations, 1880.

The charges collected from depositors for parting and refining bullion are used as provided by law for paying in full the expenses thereof, including labor, material, and wastage.

The total amount collected from depositors and paid into the Treasury on account of parting and refining bullion during the year ended June 30, 1880, was \$257,771.37, of which the sum of \$249,479.23 has been expended.

The following statement shows the amount of charges and expenditures, including the proper portion of the operative wastages and loss on sale of sweeps, on account of parting and refining bullion at the mints at Philadelphia, San Francisco, and Carson, and the assay-office at New York, during the fiscal year ended June 30, 1880.

ANNUAL ASSAY.

The commission appointed by the President to make the annual test of the fineness and weight of the coins reserved from each delivery at the mints, met at the mint at Philadelphia, pursuant to law for that purpose.

The following extracts from the reports of the committees on weighing and assaying show that the examination was in all respects satisfactory. The committee on weighing report:

That from the tabular statement submitted it appears that the weights of the reserved coin from the several mints, both in masses and in single pieces, are in all cases within the limits of legal tolerance, and are therefore entirely satisfactory. The result also of the examination of the weights ordinarily employed in the mint is entirely satisfactory to the committee.

The Committee on Assaying beg leave to present the following report: That they have taken the gold and silver coins reserved from the several mints, viz, Philadelphia, San Francisco, Carson City, and New Orleans, and have assayed the same either in mass or in individual coins and have found in all cases the coins to be in conformity with law of Congress, and all safely within the limits of tolerance.

ESTIMATION OF THE VALUE OF FOREIGN COINS.

Pursuant to the provisions of section 3564 of the Revised Statutes, on the 1st day of January last estimation was made by the Director of the Mint and proclamation by the Secretary of the Treasury, of the values of the standard coins in circulation of the various nations of the world.

The basis of comparison for estimating the values of certain silver coins was changed from that taken in preceding years, for the reason stated in the correspondence relating thereto, copies of which are submitted herewith.

The values of foreign gold coins of full standard weight and fineness are readily computed and expressed in the money of account of the United States, the gold-dollar piece at the standard weight of twenty-five and eight-tenths grains having been established by section 3511 of the Revised Statutes as the unit of value.

The weight and fineness of foreign gold coins in comparison with that

of such gold dollar readily determines their value.

But as to foreign silver coins, while standard dollars and fractions of dollar of given weight and fineness have been authorized and made legal tender, the standard of value legally provided has not been

changed.

When gold and silver coins of the same denomination are in circulation with like actual purchasing power, the comparative values of the gold coin and gold dollar measured by their weight and fineness can still be taken as the basis for estimating the value of both coins. But where the coinage of silver is unrestricted, and the actual circulation consists chiefly of silver coins, must the value of such coins be estimated by comparing their weight and fineness with United States silver coins, or by ascertaining their commercial value compared with the standard gold dollar?

The latter was taken as the proper construction of the law, and the values of foreign silver coins in countries where silver is the sole standard, or coined without limitation, were estimated for 1880 at their com-

mercial gold value.

A different rule having been heretofore followed, the estimation for 1880 will show changes in the valuations of several foreign silver coins, other than would have been occasioned simply by variations in the price of silver bullion.

EXAMINATIONS AND ANNUAL SETTLEMENTS.

During the year personal examinations were made by the Director or his representatives of all the mints and assay offices except those at

Boise City and Charlotte.

They were generally found to be in an efficient and satisfactory condition, and the officers and employes attentive to their duties. But few errors appeared to have occurred in their transactions with individuals or in keeping their books and records and rendering their accounts to the government.

The wastage of the operative officers at the annual settlement was found in each case to be within the legal limits and appeared to have been actually incurred, and was therefore, with my approval, credited

to their respective accounts.

The total wastage during the year at the coinage mints was \$18,369.14

gold, and \$26,617.93 silver.

The amount operated upon in the melting and refining departments of the mints was of gold bullion 6,905,941.191 standard ounces, upon which the legal limit for wastage was 6,905.941 standard ounces, the actual wastage only 866.174 standard ounces; and of silver bullion 51,313,811.72 standard ounces, on which the legal limit for wastage was 76,970.71 standard ounces, and the wastage 18,789.53 ounces.

The amount operated upon in the coining departments of the mints was of gold bullion 6,653,791.119 standard ounces, on which the legal limit for wastage was 3,326.895 ounces, the actual 121.164 ounces; and of silver bullion 48,302,083.84 standard ounces, on which the legal limit for wastage was 48,302.08 ounces, and the actual wastage only 4,085.23

ounces.

In the appendix will be found a statement showing in detail the wastage of the operative officers and the loss on sale of sweeps at the comage mints and the manner in which the bullion fund was reimbursed for the same.

PRESENT CONDITION OF THE MINTS AND ASSAY OFFICES.

United States Mint at Philadelphia.—The coinage at the parent mint has been unusually heavy, having in number and value of pieces coined been double that executed in the preceding year.

The increase was chiefly in the gold and minor coinage. The yearly coinage of standard silver dollars, however, was one-quarter greater

than in 1879.

The comparative deposits and coinage of the two years have been as follows:

Deposits and coinage.	1879.	1880.
Deposits, value	\$19, 340, 176	\$51, 389, 973
Gold coinage, pieces Silver coinage, pieces Minor coinage, pieces	936, 564 12, 125, 850 9, 620, 200	3, 789, 820 15, 223, 400 26, 831, 850
Total coinage, pieces	22, 682, 614	45, 845, 070
Total coinage, value	\$23, 552, 032	\$43, 103, 854

It is a gratification to report that this increased coinage did not cause

a proportionate increase of expenditures.

The regular and specific appropriations were, however, inadequate to meet all the expenses of the mint in accomplishing this unusual amount of work, and it became necessary to make use of the appropriations contained in the act of February 28, 1878, for the coinage of the standard silver dollar. On account of the large amount of imported gold bullion yet uncoined and the lower rates at which silver bullion can be procured for delivery at this mint, its coinage, so long as silver dollars are coined and the excessive importation of gold continues, will be unusually heavy, and increased facilities will be needed to perform the work required.

United States Mint at San Francisco.—The diminished production of gold and silver on the Pacific coast has sensibly affected both the amount

of deposits and coinage.

The coinage at this mint was, in 1880, \$13,000,000 less of gold and \$6,000,000 of silver than in 1878.

The comparative values of the deposits and number of pieces coined for the last and preceding years, are:

Deposits and coinage.	1879.	1880.
Deposits, value	\$43, 329, 884	\$39, 387, 949
Gold coinage, pieces	1, 798, 500 12, 722, 000	2, 284, 950 7, 910, 000
Total coinage, pieces	14, 520, 500	10, 194, 950
Total coinage value	\$42, 051, 250	\$36, 053, 000

A large number of eagles and half eagles have been coined, and consequently the number of gold pieces struck has been increased instead of diminished. Improvements in refining bullion, in the appliances used and arrangement of apparatus have been made, and experiments instituted to ascertain the most economical and desirable processes for parting and refining the precious metals. I made careful inquiry into the unusual wastage of the melter and refiner, and found upon examination of the character of the deposits and a comparison of the fineness of the bullion of the last with the preceding years, that the amount of low-grade and refractory bullion had largely increased without any deduction having been made from the weight of the deposit for the protection of the government, as authorized by the instructions.

I directed that thereafter deductions should be made on unusually base deposits of gold or silver sufficient to cover the probable and un-

avoidable loss on such bullion.

United States Mint at Carson City.—The stock of bullion at the mint having become reduced in October, 1879, to \$107,023 of gold, and \$14,362 of silver, being an insufficient supply for a single month's work, coinage was temporarily suspended, but the mint was kept open for the purchase of silver, and deposit and refining of gold and silver.

So small an amount, however, came to the mint that, up to April 16, 1880, only \$228,177 gold, and \$258,427 silver, had accumulated. This, however, was deemed sufficient to authorize the resumption of coinage operations, which were thereafter continued to the close of the year.

The deposits and coinage of 1879 and 1880 compare as follows:

Deposits and coinage.		1879.	1880.
Deposits, value			\$551, 885
Gold coinage, pieces	·	24, 357 1, 644, 000	
Total coinage, pieces	··········	1, 668, 357	447, 567
Totol coinage, value		\$1, 972, 310	\$654, 790

United States Mint at New Orleans.—The difficulty alluded to in my previous report of procuring silver bullion for this mint, which seemed likely to cripple if not destroy its usefulness, has but in part been removed. A considerable demand in the Gulf States for silver coins for circulation has necessitated monthly allotments at this mint for the coinage of 400,000 standard dollars, which is about equal to its ordinary coinage capacity with the present force and appropriations.

The deposits and coinage for the last two years have been:

	Deposits and coinage	ge.	•	1879.	1880.
Deposits, value	*******			\$1, 195, 607	\$4, 344, 28
Gold coinage, pieces Silver coinage, pieces				737, 000	10, 52 4, 430, 00
			* 1	737, 000	4, 440, 52
Total coinage, value.				\$737,000	\$4, 558, 50

During the year it became my painful duty to report the death of Henry S. Foote, who had been superintendent of the mint from December, 1878, until the date of his death on the 19th day of May, 1880.

A representative of this bureau was instructed to proceed to New Orleans, examine the condition of the mint, and superintend the deliveries and transfers to be made upon the appointment of a successor. Mr. Foote's continued ill health and inability to give the necessary attention to the business of the mint occasioned some neglect and laxity in keeping records and supervision of mint transactions. Upon a transfer of the funds and bullion and property belonging to the mint to M. V. Davis, who, on the 11th day of June, 1880, was promoted from coiner to superintendent, the amount of coin charged to the cashier on the books of the mint and required to be delivered was found to lack 1,000 standard dollars, which remains to be accounted for on final settlement of the account of the late superintendent.

The discrepancy was apparently a surprise to the cashier and officers of the mint. There had previously been frequent urgent demands for the shipment of standard dollars and the error was supposed to have occurred from an undiscovered mistake in the report or count of the sacks at some delivery for distribution.

New York assay office.—The unusual import of gold has correspondingly increased the usefulness of this office, as will be seen by comparing the value of the deposits and of the bars manufactured in the last two years as follows:

Deposits and bars.	1879.	1880.
Gold deposits, value	\$11, 345, 563 7, 019, 698	\$68, 273, 62 4, 491, 41
Total deposits, value	 18, 365, 261	72, 765, 04
Gold, fine bars, manufactured Gold, mint bars, manufactured Silver, fine bars, manufactured Silver, sterling bars, manufactured.	 6, 639, 213 5, 309, 001 7, 006, 828	11, 378, 98 57, 368, 76 4, 372, 70 24, 34
Total bars manufactured, value	 18, 955, 042	73, 144, 79

Sixty-eight million two hundred and eleven thousand nine hundred and eighty-five dollars were paid in coin and bars to depositors. Of the deposits \$28,355,070 were during the year transported to Philadelphia for conversion into gold coin.

At the annual settlement the melter and refiner returned a surplus of 861.616 standard ounces gold above amount charged him, which had been recovered from gold not credited to the depositors contained in silver deposits.

This value, \$16,030.06 was covered into the Treasury as a miscella-

neous receipt.

The U. S. mint at Denver, U. S. assay offices at Helena, Boise, and Charlotte have been open during the whole year for the receipt, assaying and stamping of bullion, and for the payment of coin for gold bullion, affording the miners in the vicinity opportunities for the immediate conversion of gold bullion into coin at the coinage value less the cost of transportation and mint charges. They have made and forwarded to the United States Mint unparted bars of the following value:

		Year.	
Name of assay office.	1879.	1880.	
Denver value Helena de Boise do	\$415, 268 730, 178	\$348, 22 534, 60	
Boise	71, 171 54, 344	147, 73 88, 36	

LEGISLATION SUGGESTED.

Melting charge.

I respectfully suggest the propriety of imposing a melting charge in all cases on deposits of bullion either for coin or bars. Prior to 1873 a charge for refining was authorized on bullion below standard but none for melting bullion. The coinage act of that date amended the existing provision by inserting the words "melting and" before the word refining so as to permit a charge for melting and refining when bullion is below standard.

It may have been intended that the melting charge should be imposed in all cases where the value of a deposit could not be accurately ascertained without melting. But the language of the act limits the charge to "bullion below standard" and makes no provision for a melting

charge when bullion is at or above standard.

Scarcely any imported gold bullion or coin is below the United States standard of fineness and liable to a charge for melting. During the last year the mints and New York assay office were required, at considerable expense, to melt free of charge not only many millions of domestic refined gold, but over \$60,000,000 of imported gold coin and bullion.

It does not seem reasonable that bullion which must be melted before assay should be exempt from paying the expense of the operation.

Coinage charge.

From 1853 to 1873 a coinage charge on gold was imposed of $\frac{1}{2}$ of 1 per cent. During the time \$540,736,349.50 in gold was coined and the coinage charges amounted to \$2,703,681, the average yearly coinage being \$27,368,175, upon which the coinage charge amounted annually to about \$137,000.

The coinage act of 1873 reduced the charge to $\frac{1}{5}$ of 1 per cent., and the resumption act of 1875 repealed it. Had it been continued at the latter rate on the gold coinage of the last five years which has amounted to \$232,200,788.50, the sum of \$480,000 would have been collected.

While it was uncertain whether sufficient gold could be attracted to the mints to supply the coin necessary to maintain the redemption of United States notes in gold, it may have been prudent and advisable to remove every charge that might hamper the conversion of gold into And now, if our supply of metallic circulation depended upon the * amount of foreign bullion brought to the mints for coinage an exemption from charge either for melting or coinage might, for similar reasonsappear to be defensible. But the amount of domestic production is more than sufficient to supply the increasing annual needs of this country for the coinage of either gold or silver and a large part of the domestic gold as well as silver, like other surplus products, must at some time in the future again be exported. It can be of no national advantage to export gold or silver in the form of coin if those coins abroad do not pass into circulation, but are there again melted and recoined. The coinage of countries not producing the precious metals is composed chiefly of remelted foreign coins, for the latter cannot well circulate in countries having different monetary units of value.

It has been said that the remission of such charge enables a country

to invite and secure gold for circulation.

The experience of the United States, France, and Great Britain shows that, other circumstances being favorable, a coinage charge does not prevent a country from securing the coinage of all the coin the condition of its foreign trade will permit it to retain.

In the United States, although from 1863 to 1873, on account of the suspension of specie payments, there was no demand for gold for circulation, \$242,416,377.50 of gold was brought to the mints and coined, not-

withstanding the coinage charge of $\frac{1}{2}$ of 1 per cent.

France imposing a charge for assay melting and coinage exceeding $\frac{1}{3}$ of 1 per cent. (= .00216), coined in the last 30 years over \$1,300,000,000

of gold.

It is believed that no country really coins bullion free of expense to the public. In Great Britain no bullion fund is provided as in the United States for the immediate payment of the value of a deposit, and it is found more profitable to the public and even to importers, in preference to waiting for coinage at the mint, to exchange their bullion at the Bank of England for its notes at $1\frac{1}{2}$ pence per onnce less than the coining rate. This is $\frac{1}{6}$ of 1 per cent. (= .0016), and with other deduction for assay and melting exceeds the former United States coinage of $\frac{1}{5}$ of 1 per cent. (.002).* Should it be deemed advisable to reinstate the coinage charge the present is the most favorable time, as the supply of gold bullion now in the mints is sufficient to employ them at their ordinary rate of coinage for more than a year and a half, and so long as a bullion fund is kept at the mints and assay offices out of which to pay depositors coin on the delivery of their bullion, all the gold not needed for export undoubtedly will as heretofore come to the mints regardless of the charge.

Reynold's Patent.

A suit has been commenced and is now pending in the circuit court of the United States, District of California, by John Reynolds against the superintendent and melter and refiner of the San Francisco mint, for an alleged infringement of a patent issued to him on March 20, 1866, for "new and useful improvements in refining bullion."

The process of parting at the mint has been in use since its organiza-

^{*} Report Silver Com. vol. 1, page 229-230.

tion, and was continued by the present superintendent solely for the benefit of the United States, and if any advantage has accrued it has been to the United States and not these officers.

They ought not to be required either to pay or even be called upon to

defend themselves at their own expense in this suit.

The plaintiff justifies his personal suit for the alleged reason that no court has jurisdiction of any suit he could bring against the United States.

I respectfully recommend, that the jurisdiction of the Court of Claims be extended to enable it to hear this case, or that such other legislation be obtained as will enable the patentee to test the validity of his claim, and make the government and not the officers responsible for the benefit (if any) it may have derived from the use of the process in case he substantiates his patent, and its infringement at the mint.

Indebtedness of the San Francisco Mint to the Treasury.

There is charged against the San Francisco mint upon the books of the Treasury several deficits of officers, the first occurring in 1857, in the accounts of the melter and refiner, amounting to \$152,227.03, the second, \$20,000 in 1866, in the accounts between the coiner and treasurer, the third, \$10,665.28 in 1867, in the accounts of the melter and refiner, and the last, \$16,373.93, in 1869, in the accounts of the coiner,

the total being \$199,366.24.

A deficit of \$21,962.85 exists by reason of the pyx coins of 1865, 1866, and 1867, sent to the Philadelphia mint for trial at the annual assay, being used in paying for supplies purchased and shipped the San Francisco mint, instead of being restored to the accounts. Besides these sums the loss on sale of sweeps and the wastage of the operative officers for a number of years prior to 1871 (although within the legal limit of allowance), amounting to \$195,158.81, were not paid as they should have been out of the annual appropriations, and it therefore appears as a deficit in the accounts. These losses all occurred prior to the organization of the mint bureau and to the appointment of the present officers of the San Francisco mint.

Their accounts have been annually satisfactorily adjusted, and as there is no hope of collecting the amount from the former officers or their sureties, I recommend that legislation be procured to authorize the cancellation of the indebtedness by an appropriation of the necessary amount from the profit on the coinage of silver or from moneys in the Treasury of the United States.

STATISTICS OF THE PRODUCTION, CONSUMPTION, COINAGE, AND CIR-CULATION OF THE PRECIOUS METALS.

The investigations and inquiries heretofore instituted for procuring the latest and most reliable and valuable information upon these subjects have been continued, and are presented in detail in the tables and communications accompanying this report.

MONETARY STATISTICS OF THE UNITED STATES.

Production of gold and silver.

As there are thousands of mines, yielding annually more or less gold and silver, scattered over an area embracing more than half of the territory of the United States, to obtain accurate and complete statistics of their aggregate production is evidently a work of great difficulty; and to make annual personal examination of each is physically impossible, without employing a large number of assistants, and expending annually an amount disproportionate to the value of the information to be obtained.

The appropriation for the collection during the present fiscal year of the statistics of the production of the precious metals in the United States became available on the 1st of July last, and the work was assigned to this bureau. Considerable progress has been made in procuring the necessary information, especially for the Pacific Coast; and the data already obtained have been found of great advantage in ascertaining the locality from which gold and silver have been obtained, as well as in estimating the total production for the last fiscal vear.

Through the mints and assay offices, to which nearly all the gold and a large proportion of the silver production come yearly, and the customhouse returns, which record the movement from and into the country, the domestic product is readily ascertained. By adding to the amounts thus reported, the gold and silver of demestic production used in the arts and manufactures, other than that deposited in the mints, I estimate the production of the United States to have been, during the last

fiscal year—

In gold	 \$36,000,000 37,700,000

To make an intelligent estimate of the production of different States and Territories is a more difficult task, from the fact that a large portion of the deposits of both gold and silver at the mints and assay offices comes in the form of fine bars from various refineries on both sides of the continent.

The time that has elapsed since the appropriation for the collection of mining statistics became available has been so short, and returns and information from distant localities have come in so slowly, that I find it impossible to present in this report, in proper shape, the data already obtained.

It seems therefore preferable to submit at a later date the statistics of the production of the precious metals in the various States during the last fiscal year, and when complete data shall have been received.

Consumption of the precious metals.

The investigation of the annual use and consumption of the precious metals in ornamentation manufactures and the arts was prosecuted in the same manner as in the previous year. A greater number of persons were addressed, and replies received, the latter showing a much greater quantity of gold and silver consumed than previously reported.

Seven thousand two hundred and ninety circular letters were addressed to parties using gold and silver in the arts and manufactures; two thousand seven hundred and ninety-one replies were received; and of the latter, one thousand three hundred and eighty-one were manufacturing.

A table is submitted showing the respective amounts of the different

manufactures using gold and silver.

The amounts reported as consumed are-

	United States coin.	Fine bars.	Old articles and foreign coin.	Total.
Gold	\$2, 408, 768 541, 834	\$5, 511, 047 2, 749, 190	\$714, 378 173, 145	\$8, 634, 193 3, 464, 169
Total	2, 950, 602	8, 260, 237	887, 523	12, 098, 362

The New York assay office reports the value of bars made and delivered during the year for use in the arts and manufacturing, from description of bullion, as follows:

Bars manufactured from—	Gold.	Silver.	Total.
Inited States coin (defaced) foreign coin foreign bullion foreign bullion foreign bullion flate, &c.	260, 222 1, 007, 400 2, 988, 422	\$982 72, 668 278, 622 3, 863, 126 144, 992	\$5, 911 332, 890 1, 286, 922 6, 851, 548 539, 863
Total	4, 655, 844	4, 360, 390	9, 016, 234

The replies made to the circulars from the Mint Bureau show a conumption of about \$1,000,000 greater of fine gold bars, and \$1,600,000 ess silver bars, than reported by the New York assay office.

Doubtless both statements are below the amount of gold as well as ilver actually appropriated during the year for use in the arts, orna-

hentation, and manufactures.

The estimate of last year that in the form of bullion, coin, or plate, &c., 5,000,000 of silver and \$7,000,000 of gold were during the present year ppropriated for purposes other than coin circulation, is sustained as to ilver and increased as to gold to \$10,000,000, if not more.

An examination and comparison of these statements and of the value f the fine bars issued from all the mints lead to the conclusion that robably \$5,500,000 of gold and \$4,000,000 of silver of domestic bullion roduced during the year, together with \$2,500,000 gold and \$600,000 ilver United States coin, were thus consumed.

The estimated disposition made of the amount of gold and silver bullon in the mints and New York assay office at the commencement and eposited during the year, and amounts held by each at the close of the ear, are presented in tabulated statements in the appendix.

Coin circulation of the United States.

The coinage and net imports of United States gold and silver coin ere shown in my last annual report (p. 22) to have increased the coin rculation in six years prior to the 1st of July, 1879, \$151,490,698 in old, and \$107,050,985 in silver, being a total gain of \$258,541,683. The coinage and imports during the last fiscal year have further aug-

ented the metallic circulation as follows:

United States coin.	Gold.	Silver.	Total.
nount June 30, 1879 inage less recoinage t import	\$286, 490, 698 55, 948, 407 16, 519, 586	\$112, 050, 985 27, 903, 139 2, 642, 896	\$398, 541, 683 83, 851, 546 19, 162, 482
culation June 30, 1880	358, 958, 691	142, 597, 020	501, 555, 711

During the first four months of the present fiscal year there has been a further increase by the coinage of \$14,544,599 gold and \$9,113,000 silver, and a net import of \$1.820,591 United States gold coin and \$567,524 United States silver coin, making the amount of United States coin—not including minor coins—in the country on the 1st of November, 1880, \$527,601,425, of which \$375,323,881 consisted of gold, 72,847,750 standard dollars, and \$79,429,794 of fractional coin and trade dollars, the latter probably amounting to \$7,000,000.

Besides the above amounts of United States coin the Treasury held on the 1st of November, in the mints and assay offices, \$78,558,811 of gold bullion, and \$6,043,367 of silver bullion, making an aggregate of coin in circulation and bullion in the Treasury of \$612,203,603, of which

\$453,882,692 consists of gold coin and bullion.

The coin circulation on the 1st day of January, 1879 and 1880, based upon the estimate for June 30, 1878,* and the subsequent net coinage and import of United States coin is as follows.

United States coin.	Gold.	Silver.	Total.	
Amount June 30, 1878	24, 189, 858	\$80, 352, 328 13, 916, 814 1, 247, 570	\$327, 781, 898 38, 106, 672 2, 899, 849	
Total January 1, 1879 Net coinage to January 1, 1880 Net import to January 1, 1880	38, 874, 789	95, 516, 712 27, 524, 639 4, 756, 343	368, 788, 419 66, 399, 428 19, 483, 929	
Total January 1, 1880	326, 874, 082	127, 797, 694	454, 671, 776	

The gain in coin circulation during the calendar year 1879 was \$53,602,375 in gold and \$32,280,982 in silver, a total of \$85,883,357, and the increase in coin circulation from the date fixed for resumption, January 1,1879, to November 1, 1880, was gold coin \$102,329,718, silver coin \$56,760,832.

This computation is exclusive of the stock of gold and silver bullion in the mints and assay offices, which held for coinage January 1, 1879, \$5,038,419 in gold and \$11,057,091 in silver bullion, showing a gain of coin and bullion from that date to November 1, 1880, of \$175,701,904 in gold and \$51,697,524 in silver coin and bullion available for coinage.

In this foregoing estimates the amount of United States coin consumed in the arts and manufactures reported at about \$2,500,000 in gold and \$500,000 in silver, is not deducted for the reason that it is estimated that an equal amount of United States coin is probably brought into the country by immigrants and not reported by the custom-houses.

From the reports of the Treasurer and the Comptroller of the Currency the coin in the Treasury on the 1st of November, and in national and State banks on the 1st of October, 1880, and the estimated circulation not in the banks and Treasury appears to have been—

	Gold.	Sil	Total.	
	Goid.	Legal tender.	Subsidiary.	Total.
Treasury National banks Other banks Private hands	\$62, 167, 141 95, 675, 472 17, 102, 130 200, 379, 138	\$47, 084, 459 *2, 500, 000 \$ 23, 263, 291	\$24, 629, 489 *2, 830, 357 51, 969, 948	\$133, 881, 089 101, 005, 829 292, 714, 507
Total	375, 323, 881	72, 847, 750	79, 429, 794	527, 601, 425

^{*}Director's Report, 1879, p. 22.

⁺ Not distinguished; total silver reported, \$5,330,357.

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The effort to gather and present in convenient form for reference statistics of the production, coinage and use of the precious metals in other countries and the amount and character of their circulation was continued with advantage during the year, and much valuable information has been obtained in reply to the inquiries transmitted by the Secretary of State at your request.

Our ministers and consuls abroad have displayed commendable zeal and activity in securing the desired statistics, and grateful acknowledgements are due to the officials of foreign governments, from whom replies

have been received, for their prompt and satisfactory responses.

The information in relation to coinage, circulation, production and specie reserves has been collated from these dispatches and other sources into tables, which will be found in the appendix.*

A brief review of some of the most useful facts contained in the pa-

pers received is herewith presented:

Great Britain.—From the papers received it would appear the net specie exports of Great Britain were, during the year 1879, gold £2,937,000, silver £500,000. Mr. Freemantle estimates the specie circulation at the close of 1879 to have been as follows:

which shows the circulation to be about \$23,500,000 less than my estimation for last year. It can hardly be said that there is any stock of silver bullion in the United Kingdom, the imports and exports being about equal. The coinage of gold at the royal mint was very small, being only £35,050, while the total value of silver coined was £549,054, and the amount of worn silver coin withdrawn from circulation during the year was £495,944. The report of the deputy master of the mint shows that the average price at which silver (British standard) was purchased during the year was $52\frac{7}{5}d$. per ounce, the seigniorage accruing to the state being at the rate of $13\frac{1}{5}d$. per ounce, or $24\frac{13}{15}$ per cent. The rate of seigniorage was nearly 7 per cent. less than during the previous year.

Australia.—The dispatches of O. M. Spencer, consul-general at Melbourne, contain seriatim replies to the circular of the Secretary relative to monetary statistics, and also inclose interesting papers from J. W. Smith, consular agent at Port Adelaide, and from V. Delves Broughton, deputy master of Melbourne branch mint: the first giving the history of the discovery of gold in 1851 and the exodus to South Australia in consequence, and the business crises occasioned thereby, and the second an instructive account of the discovery of the "chlorine process" for separating and refining gold. Both these papers will be found well worthy of perusal.

The production of gold in the province of Victoria amounted in 1879 to 758,947 ounces, valued at \$15,000,000, and the average annual production for the past ten years has been 1,063,148 ounces, valued at \$20,000,000. No silver is mined, but a small quantity is parted from gold. The coinage at the Melbourne mint during 1879 was the largest since its establishment, amounting to £2,740,000, all in sovereigns.

India.—Information in regard to the paper and specie circulation of India has of late years been sought for with more than usual eagerness

^{*}The documents here referred to are omitted for want of space, but they are printed in the pamphlet copies of the Director's report.

on account of the important relation sustained by that country to the future of silver. Two papers have been received from Consul-General Litchfield, one transmitting information from the Hon. R. B. Chapman, secretary of the government of India, together with tabular statements showing the imports, exports, and coinage of gold and silver in India, and the paper money issued by the Bengal, Madras, and Bombay presidencies from 1835 to 1879 inclusive. These tables are especially valuable as showing the immense quantity of silver absorbed by India in the last half century. The net imports of silver during 1879 were £3,970,694. The other paper contains a résumé of the mint laws and regulations of India.

No banks or other private corporations are allowed to issue paper money—the only notes in circulation being those of the State, for which the government holds a reserve of specie and bonds equal to the entire paper issue.

These government notes are received everywhere at their nominal

value, and amount at present to \$48,060,176.

Silver is the standard of value of the country; gold is not rated a legal tender, but is received in payment of debts. The coins of other countries, or of native Indian States, do not circulate.

Canada.—The response of the deputy minister of finance of the Dominion of Canada, with documents, transmitted through the Hon. J. Q. Smith, consul-general of the United States, show the following facts:

There is no mint in Canada, its coin being supplied from the home government. The system of paper money of Canada is similar to that of the United States, consisting of Dominion notes to the amount of \$12,000,000 and bank notes to the amount of \$20,000,000. The issue of Dominion notes is limited to \$20,000,000, for which specie and government securities are held.

Germany.—Valuable documents have been received from Germany, together with a communication from the Hon. Andrew D. White, United States minister at Berlin, commenting upon the efforts being made for the remonetization of silver by Germany, which it would appear is under consideration. The principal item of information in this paper is that the annual production of the mines (silver) of Freiberg has fallen off about \$250,000 since the demonetization of silver.

The quantity of silver remaining in Germany to be sold amounted at the close of 1879 to 3,932,353 fine pounds (63,212,574 fine ounces), which at the average price of former sales (79.824 marks per fine pound) would realize 313,896,000 marks = \$74,707,248. The loss on the sale of this silver at the rates previously realized would amount to about \$17,000,000 (an average of 21 per cent.)

France.—The documents received from Mr. Noyes, United States minister at Paris, show the coinage of France from 1795 to 1879 to have been—

	Francs
Gold	8,716,438,200
Silver	

The amount of specie imported in 1879 was 339,170,000 francs, and exported during the same year 424,543,000 francs. No coinage of silver was executed at the Paris mint in 1879. The gold coinage consisted of 3,860,100 francs in 100-franc and 24,610,540 francs in 20-franc pieces; in all, 28,470,640 francs, besides the coinage of a million francs in 20-franc pieces, for the principality of Servia.

The new agreement of the Latin Monetary Union went into effect on the first of the present year. A law was passed July 31, 1879, by the French legislature abolishing the contract system of coinage and creating a bureau for the management of the mint, and placing the coinage, as in this country and Great Britain, under the control of a responsible officer—called there, also, a Director—and subject to the direction of the minister of finance.

In my last report (page 28), in stating the metallic circulation of France, I said "While doubting the accuracy of the exhibit, in default of better data the estimates given are accepted." Among the documents since received are the reports made to their respective governments by the delegates to the monetary convention of the states of the Latin Union held November 5, 1878, from which valuable information has been obtained in revising the table of circulation found in this report.

The specie circulation of France is given as—

Gold	540, 786, 000

The statement of the gold circulation is based upon the estimate for 1878 of M. Folville, adopted by Dr. Soetbeer, 5,000 million francs, from which is deducted the loss by export and use in the arts for 1879, 203,000,000 francs.

The five-franc silver circulation is stated at a mean of three estimates made by the following distinguished statisticians, after adding subsequent importation and subtracting exports and consumption in the arts, viz:

1st. Report made 1878 by a committee of French Chamber of Deputies through M. Guyot, five-franc pieces, close of 1877, 2,530,000,000 francs.

2d. Herr de Folville (quoted by Dr. Soetbeer), close of 1878, 2,880,000,000 francs.

3d. Ernest Seyd's estimate in 1870, with subsequent importation given in tables (less fractional silver and payment to Germany, 539,000,000 francs), close of 1879, 2,747,000,000 francs.

The circulation of five-franc pieces at the close of 1879 would be, tak-

ing the mean of these estimates, 2,802,000,000 francs.

Austria.—Minister Kasson transmits, under date of July 6, 1880, interesting statistics in relation to the coinage laws of Servia and a communication from the Austro-Hungarian minister of finance, giving the laws regulating the coinage of money in Austria and tables of coinage and circulation. Silver is the standard of value in Austria and Hungary. Gold as well as silver coins are struck at the mints at Vienna and Kremnitz, but the principal circulating medium is paper money, the total issue of which amounted on the 31st of December, 1879, to \$259,682,597, being about equally divided between state and bank notes.

Since the suspension of specie payments in 1848, private debts and internal taxes have been paid in bank and government notes. Customs dues are paid in gold and silver. The value of the paper money has enhanced as the value of silver became depreciated, and since the 1st of January last the paper and silver florin have been of equal value.

January last the paper and silver florin have been of equal value.

A dispatch is printed in the appendix from Mr. J. F. Delaplaine, of the legation at Vienna, to the effect that intelligence has been received there that the principality of Bulgaria intends coining money, the monetary unit of which will be the franc, and the total silver coinage has been fixed at 9,500,000 francs. The largest gold piece will be the "Alexander," of the value of 20 francs. The amount of the gold coinage has not been fixed. The coinage will be executed at Paris.

Netherlands.—The papers forwarded by our minister at The Hague show that no coinage was executed at the mint of Holland during the The silver standard prevailed in the Netherlands up to 1875, when the double standard was adopted. The metallic money in circulation is principally silver, which is coined only on government account, and the coinage is at present restricted. The paper circulation consists of bank notes, issued by the Bank of Netherlands, and is not a legal tender, but is received by the government and preferred by individuals, and is secured by a deposit of government interest-bearing bonds.

The Scandinavian countries—Denmark, Norway, and Sweden.—The documents and communications received through our ministers in relation to the monetary statistics of these countries, contain especially full and valuable information. These States still adhere to the single gold standard adopted in 1873, silver being subsidiary and for change pur-

poses only.

The imports of gold into Norway in the year 1878 exceeded the exports by \$556,904. The imports of specie into Sweden during the two years 1878 and 1879 exceeded the exports by \$6,135,367, nearly all of

this amount being gold.

The paper circulation of both countries consists of bank-notes, the governments issuing no paper money. In Denmark the National Bank of Copenhagen, a private corporation, has the sole monopoly of issuing bank-notes possessing the quality of legal tender. The bank is authorzed to issue as much as may be required by the necessities of trade, but is required to keep a metallic reserve of not less than three-eighths of the volume of bank-notes, and bonds of an actual value, one and onehalf times as great as the portion of the bank-notes in circulation not covered by the metallic reserve.

Switzerland.—The papers transmitted by Minister Fish contain, in addition to statistics of coinage and circulation, the laws governing the

organization and coinage of the Federal mint.

Switzerland, being one of the States of the Latin Union, does not depend upon its own coinage for its circulation, as the coins of the States composing the Union circulate freely in all. No gold is coined in the confederation. The coinage of silver from the year 1850 to December, 31, 1879, was 50,052,828 francs = \$10,000,000, nearly. No government paper is issued, and bank-notes are not a legal tender. The amount of this currency is about \$17,000,000.

Italy.—The dispatch and inclosures from our minister at Rome show the coinage of the Italian mint from 1862 to 1878, inclusive, to have been gold, \$48,175,695; silver, \$96,621,945, and the production of the mines for the years 1875, 1876, 1877: Gold, \$143,013; silver, \$60,988.

The paper circulation is reported by the minister of finance to have

been September 30, 1879, \$315,788,724. The specie circulation was estimated at \$57,900,000, of which about

\$38,000,000 are held as a reserve by the treasury and banks.

Portugal.—The dispatch of Minister Moran, under date of June 26, 1880, contains very desirable and complete information in relation to the monetary affairs of Portugal, including tables showing the amount of gold and silver coined in Lisbon from 1855 to 1879, inclusive, and the imports of coin and bullion from 1869 to 1878, inclusive.

Portugal has the single gold standard, and the English sovereign and half sovereign are almost the only gold coin in circulation. Silver is a legal tender to the amount of 5 milreis (\$5.40). The Bank of Portugal is the financial agent and depository of the government; its outstand-

ing paper circulation amounts to about \$5,000,000.

Russia.—The papers received through our legation at St. Petersburg will be found valuable as containing the production of the mines of this country, one of the largest producers of the precious metals.

The production of gold in Russia from 1751 to the present time has been 80,000 poods = \$793,760,000. During the ten years from 1868 to 1877

the production was-

 Gold, 21,230 poods
 \$210,635,570

 Silver, 8,630 poods
 5,354,045

The net exports of gold and silver coin, and bullion for ten years from

1869 to 1878, inclusive, was \$107,106,900.

Russia has a large paper circulation, amounting to about \$775,000,000, while the amount of coin in the State banks is about \$115,000,000, of

which about \$8,000,000 is silver.

Turkey.—Very interesting dispatches from the Hon. Horace Maynard, late United States minister to Turkey, together with official papers from the officers of the Ottoman Empire in relation to the money and finances of that country have been received, also a copy of official decrees in relation to the issue of paper money.

The government of Turkey coins both gold and silver on its own account; that is, buys the bullion at the imperial mint at Constantinople at the rate of 48 piasters per drachm of pure gold, and 3.12½ piasters per drachm of pure silver of standard fineness, and lower rates for bullion

below standard.

The proportion of gold to silver in the Turkish coinage is as 1 to 15.0909.

The coin circulation of Turkey is reported as about \$15,000,000. The British pound and French franc pieces also circulate freely. The principal circulating medium of Turkey has been paper money, but it has become so enormously depreciated that its circulation is almost abandoned, and the government is making efforts to replace it with silver.

doned, and the government is making efforts to replace it with silver. The amount of paper outstanding March 31, 1880, was estimated to be in the neighborhood of \$21,000,000. The relative value of Ottoman moneys is shown by the following statement, furnished by Mr. Maynard,

giving the rate of exchange between the different kinds:

Date.	Gold.	Silver.	Beshlix (heavily alloyed silver).	Copper.	Paper.
December 2, 1879	. 100	1061	117 \$7.5	370	860

To those interested in Turkish finance, the papers in the appendix

will be found worthy of perusal.

Mexico.—The dispatches from Mexico show that the production of the mines during the year 1879 was, gold \$989,161, silver \$25,167,763, and that the circulation of coins of other countries has been considerably reduced by exportation. The standard of value is the silver dollar.

Central American States.—The communications from our minister at Guatemala show the amount of gold and silver in circulation in Costa Riea to be about \$2,500,000, in addition to a considerable amount of foreign coins, the values of which are fixed by law. The gold coined from 1829 to 1877 was \$2,318,381, silver \$373,919. Notwithstanding the rich minerals which abound in the republic, lack of capital and intelligent labor prevents the mines from being worked on the large scale their value merits.

The laws of Nicaragua, promulgated under date of May 29, 1880, pro-

vide for the coinage to the extent of \$100,000 of silver pieces of 20, 10, and 5 cents, eight-tenths fine, to be a legal tender in the State. A one-cent coin has also been made by decree of 1878 a legal tender in any quantity. No information with regard to the circulation of Nicaragua has been obtained.

The State of Salvador uses principally coins of other nations and paper as its circulating medium. The coins of the United States, Mexico, and England are preferred and command a premium. The

paper circulation is placed at \$60,000.

South American States.—Dispatches have been received from only three of the South American countries, Venezuela, Peru, and Argentine Republic. In Peru gold is the legal standard of value and the Inca is the monetary unit. Silver is limited as legal tender to 25 pesetas. The pound sterling of England has been provisionally adopted as legal money. No statistics in regard to the amount of circulation of either

coin or paper are furnished.

The circulation of gold and silver in the Argentine Republic is about \$7,000,000, a little over a million of which is held by the First National Bank; about two thirds of this amount is gold. The paper circulation is very large, amounting to \$364,000,000, and in addition \$9,470,000 of metallic notes. The production of the mines is calculated at 3,800 ounces of gold and 325,000 ounces of silver, during 1879. The gold is obtained from the copper mines and is exported to England. The exportation of specie is chiefly carried on with that country, and amounted in the last year to about \$2,000,000.

Venezuela coins no money; but the French franc, under the name of bolivar, is the monetary unit, and all laws relating to finance are adopted from the French. Its silver mines are not worked. The production of the gold mines in the year 1875–76 amounted to \$1,324,000. Paper money is not issued by the government, but the notes of the Bank of

Carracas are in circulation to the extent of \$250,000.

Cuba and Hayti.—The dispatch from our consul-general at Havana states that the amount of gold and silver coin in the treasury is nominal only, and that the amount of gold coin in the Bank of Havana, April 30, 1880, was \$10,522,000. The gold in circulation in the island is estimated at \$32,500,000 and silver \$1,000,000. The legal standard of value is the gold dollar (peso).

There is no gold or silver mined and no mint, its coins being imported from Spain. The bills of the Spanish Bank of Havana constitute the paper currency, and amounted on the 30th of April last to \$57,857,000, of which \$44,900,000 had been issued on account of the government. The dollar of this paper circulation is worth about 41 cents in United

States gold coin. The imports and exports are about equal.

Two dispatches from Hon. John M. Langston, minister to Hayti, have been received. There is no bank or paper currency of any kind in Hayti. Prior to 1872 it had a paper currency estimated as high as \$800,000,000, of which \$544,675,404 was redeemed at the rate of 300 paper for one of silver, \$2,154,266 in American silver having been provided therefor. The present coin circulation is estimated at about \$5,000,000, consisting chiefly of American and Mexican coins. United States gold and silver coins are held in especial favor, the former selling generally for a considerable premium, and the latter, as against Mexican dollars, being held preferable, sometimes selling as high as 7 per cent. premium. A million Mexican silver dollars have recently been imported into the island, and a decree was issued compelling merchants to receive them at par.

Japan.—Hon. John A. Bingham transmits under date of April 14, 1880, very complete information in relation to the monetary statistics of He also notifies this country of the establishment of a branch of the imperial mint at Tokio, and incloses a copy of the regulations govern The production of the mines of Japan during the fiscal years of 1878 and 1879 was gold 36,870 ounces, silver 1,272,515 ounces. exports for the same years were gold 661,787 ounces, silver 3,973,673 The minister of foreign affairs reports the total paper circulation at \$147,288,681, nearly all of government issue, while the coin and bullion in circulation and reserve amount to nearly \$150,000,000, about one-third being silver.

Egypt.—The communication from our consul general at Cairo states that the gold piaster is the unit of account in Egypt, and that gold is generally the circulating medium, silver being only used for purposes of change. Of the gold coins English sovereigns constitute the larger part. There is no paper currency. The treasury reserve is limited. No gold

or silver is produced in the country.

African States.—Dispatches have been received from United States consuls at Algiers. Morocco, and Cape of Good Hope, which state that there are no gold mines in any of those countries, and that the production of silver is insignificant. Algiers has no mint and uses French coins as its principal metallic medium, which amounts to about \$8,500,000 in gold, and \$5,500,000 in silver. The Bank of Algeria is authorized to issue currency, of which there is outstanding between eight and nine millions of dollars.

. The circulation of Morocco consists principally of French and Spanish gold and silver coin, the amount of which is not known. Moorish gold coins have disappeared from circulation, having been exported to Europe on account of their high standard. Gold dust and trinkets brought by caravans are exported in small quantities. Morocco has no banks and no paper circulation.

British coin constitutes the circulating medium of the Cape of Good

Hope, the amount of which is not known.

THE WORLD'S PRODUCTION OF GOLD AND SILVER.

No new facts have been obtained which would materially change the estimates and conclusions presented in my last report of the annual

supply and appropriation of the precious metals.

A valuable table is presented in the appendix showing the production of the principal producing countries of the world for the years 1877, 1878, and 1879, and estimating the small amount produced from the mines of other countries.

The reported production of Russia and Australia, next to this country, the largest gold-producing countries, somewhat exceeds the estimate in

my report for last year.

The total gold product for the calendar year 1879 (the United States and Japan alone being for the fiscal year, which would not materially alter the total) was \$105,365,697, and silver \$81,037,220, which is 8 millions of gold and one-half million of silver less than the annual average given by Dr. Soetbeer for 1871-1875.

THE COINAGE OF FOREIGN COUNTRIES.

The drain of gold during the last calendar year from Europe to the United States has had a marked effect upon the gold coinage of several countries, not only from the export of our own gold having ceased to supply them with material for new coinage, but because the United States has appropriated the stock of bullion from other gold producing countries, as well as large amounts of foreign gold coins, and absorbed

almost the entire world's production for the year.

The British mint was occupied with the coinage of gold only during a part of the month of December, and coined but \$170,571. Less than \$5,000,000 was coined at the French, and about \$11,000,000 at the German mints in 1879, which present a striking contrast to the coinage of \$39,080,000 gold at the United States mints, and an accumulation of gold bullion by the 1st of January amounting to \$60,734,318 beyond the capacity of the mints for coinage. A table of coinages for the years 1877, 1878, 1879, to be found in the appendix, shows the total coinages of 19 countries to have been for the

Years—	Gold.	Silver.	Total.
1877	\$201, 616, 466	\$114, 359, 332	\$315, 975, 798
1878	188, 386, 611	161, 191, 913	349, 578, 524
1879	89, 969, 091	117, 318, 293	207, 287, 384

COIN AND PAPER CIRCULATION OF THE PRINCIPAL COUNTRIES OF THE WORLD.

The papers forwarded through the State Department contain recent and authentic information in regard to the paper currency, as well as the specie circulation and bank reserves of foreign countries.

Tables have therefore been prepared presenting both the coin and paper circulation of nearly every commercial nation, giving the per capita

amount of each.

The figures given for each of the 31 countries embraced in the table are believed to approximate their actual coin and paper circulation.

The aggregates are, of paper \$4,021,721,853, gold \$2,819,301,004, silver full legal-tender \$2,060,697,480, and limited tender \$422,252,541; total paper and specie \$9,470,564,706; total specie \$5,488,842,853. The statement of the amount of gold and silver in circulation in the world at the present time is below the usual estimate, and is less than half of the production since the discovery of America, which was estimated in the report of the Silver Commission, page 78, to have been, gold \$5,841,000,000, silver \$7,072,000,000; total \$12,913,000,000.

As bearing upon the question of the proper specie reserve to paper

As bearing upon the question of the proper specie reserve to paper circulation, the amounts of coin and bullion in banks and national treasuries available for the redemption of their outstanding paper issues, as far as could be ascertained from the dispatches and latest reliable authorities, are, for convenient reference, tabulated and submitted with

this report.

COURSE OF PRICES.

The past fiscal year has exhibited monetary phenomena unusual and unexpected. The deficient harvests in Europe, and our unusual bounteous supply of exportable food, produced an importation of gold unchecked by advancing prices or the amount of existing circulation, already seemingly abundant. The heavy importation of foreign coin and bullion which commenced in August, 1879, continued until the close of the calendar year, and has been again resumed within the last three

months. The remarkable increase of metallic circulation has been

largely absorbed by the business community.

The speculative advance in prices first in the United States and then abroad subsided in part before the close of the year. Comparisons of the prices of 1880 with those of former years have been made similar to those in my last report. The table of the prices of exported commodities at different periods and for the whole of the last fiscal year shows an advance of 8½ per cent. on the average prices of the same commodities during the fiscal year 1879, and but 6 per cent. below the gold prices of the same commodities in 1870.

In this connection an examination will be interesting of a table in the appendix compiled from official data contained in this and the preceding report, showing the increase of the net gain in specie in France from 1850 to 1878, and the outstanding bank circulation, and the comparative

prices of exports and imports for a corresponding period.

It has been a gratification to find at every institution, and among those connected with the Mint Bureau, a commendable desire to secure the highest efficiency for every branch of the Mint service. During the year over \$133,000,000 of gold and silver bullion received on deposits or silver purchases, and, in addition, nearly \$40,000,000 received on transfers from other institutions, have been faithfully accounted for.

In the preparation of the statistical information embraced in this report, as well as in the discharge of the routine duties of the office, I have had the ready co-operation of the clerks in the Mint Bureau, for whose

valuable assistance I desire to make acknowledgments.

I am, very respectfully,

HORATIO C. BURCHARD,

Director of the Mint.

Hon. John Sherman, Secretary of the Treasury.

APPENDIX. 1.—DEPOSITS and PURCHASES of GOLD and SILVER BULLION during the fiscal year ended June 30, 1880.

	-		Mints.				m

XV.-GENERAL REGULATIONS for the DISTRIBUTION of STANDARD SIL-VĔR DOLLARS.

No. 1.

TREASURY DEPARTMENT, OFFICE OF THE DIRECTOR OF THE MINT, Washington, D. C., September 3, 1878.

In conformity with sections 3526 and 3527, Revised Statutes, and with the first section of the act authorizing the coinage of the standard silver dollar and restoring its legal-tender character, passed February 28, 1878, it is hereby ordered and directed that the superintendents of the mints at Philadelphia, San Francisco, Carson, and New Orleans will, upon the receipt of a written request of the Treasurer of the United States, forward, by express, standard silver dollars in the sum of one thousand dollars, or a multiple thereof, to such party or parties as he may designate.

The expense of transportation to be paid by the Mint from the "silver-profit fund." Shipments will, however, be made only to parties reached through established express lines

press lines.

R. E. PRESTON, Acting Director.

Approved: JOHN SHERMAN, Secretary of the Treasury.

TREASURY DEPARTMENT, Office of the Director of the Mint, Washington, D. C., August 21, 1880.

In order to facilitate the distribution of standard silver dollars from the mints at Philadelphia, San Francisco, and New Orleans, the following regulations for the government of the superintendents thereof are prescribed:

Upon the receipt from an Assistant Treasurer of the United States of an original certificate of deposit on account of standard silver dollars, giving the name and address of the party or parties to whom the coin is to be sent, the superintendent of the mint in the same city as the Assistant Treasurer issuing the certificate will ship a like amount of standard silver dollars, and pay the charges for transportation from the "silver-profit fund."

The superintendent of the mint will report to the Treasurer of the United States and the Assistant Treasurer, at the close of business each day, the amount of standard silver dollars shipped upon such certificates, giving the number and date of each cer-

All shipments of standard silver dollars under the foregoing regulations will be treated as a transfer to the Treasurer of the United States.

R. E. PRESTON, Acting Director.

Approved:

John Sherman, Secretary of the Treasury.

XVI.—ESTIMATION OF VALUE OF FOREIGN COINS.

BUREAU OF THE MINT, Washington, D. C., December 29, 1879.

Hon. JOHN SHERMAN.

Secretary of the Treasury:

Sir: The money of account of the United States is required by the act of April 2, 1792 (Revised Statutes, section 3563), to "be expressed in dollars or units, dimes or tenths," &c., "a dime being the tenth part of a dollar."

The coinage act of February 12, 1873 (Revised Statutes, section 3511), provides "that the gold coins of the United States shall be a one-dollar piece, which, at the standard weight of twenty-five and eight-tenths grains, shall be the unit of value," &c.

The act of March 3, 1873 (Revised Statutes, section 3564), provides "that the value of foreign coins as expressed in the money of account of the United States shall be that of the nure metal in such coin of standard value, and the values of the standard

that of the pure metal in such coin, of standard value, and the values of the standard coins in circulation of the various nations of the world shall be estimated annually by the Director of the Mint, and be proclaimed on the first day of January by the Secretary of the Treasury."

In estimating the value of coins of foreign countries where gold is the standard of value no difficulty is experienced; the value is readily ascertained by comparing the amount of pure gold contained with that in the gold dollar, but in silver coins the law does not definitely state what shall be the basis of comparison in estimating the value of the pure metal of such coins when silver is the standard of the country.

The coinage act of 1873 discontinued the coinage of the silver dollar of 4122 grains, and also failed to make provision that it should be a unit of value as in case of the one-dollar gold piece, but it still remained an existing coin and a legal tender to the

amount of five dollars in any one payment.

The trade-dollar of 420 grains and subsidiary coins of 25 grammes to the dollar were authorized by the same act, and also constituted a legal tender to a like amount, but none of these coins were declared units or standards of value. If it had been intended that the value of foreign silver coins should be ascertained by comparing the pure metal contained with that in the United States silver coins, the law failed to specify

what silver coin or what quantity of silver should be the standard for valuation.

I therefore have the honor to request that you will furnish this office with your opinion as to whether under the provisions of the act of March 3, 1873, referred to, the value of foreign silver coins should be estimated by comparing their weight and fineness with that of the silver dollar or other silver coins of the United States, of the nominal value of one dollar, or by taking the commercial bullion value of the pure silver in such foreign silver coins valued in gold dollars as units.

If computed by the former method, what silver coin should be the basis of comparison; and if by the latter method, in what manner should the gold value of the pure

silver in such foreign silver coin be ascertained?

Very respectfully,

HORATIO C. BURCHARD, Director.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., December 30, 1879.

Hon. H. C. Burchard,

Director of the Mint:

Sin: I am in receipt of your letter of this date, asking my opinion as to the basis on which estimates of the values of foreign silver coin should be made under the provisions of section 3564, Revised Statutes.

In reply I have to inform you that in my opinion the law clearly contemplates that the estimates should be based on the commercial value of the pure silver contained in the coin of full weight, expressed in terms of the standard unit of value of the United States, which, under the law, is declared to be the gold dollar of the standard weight of 25% grains. In estimating the commercial value of the pure silver in question, as required by law, a proper basis would seem to be the London quotations of such silver for a period immediately preceding the year for which the estimate is made, and I would suggest that a period of three months be taken for this purpose.

Very respectfully,

JOHN SHERMAN, Secretary.

CIRCULAR ESTIMATING AND PROCLAIMING, IN UNITED STATES MONEY OF ACCOUNT, THE VALUES OF THE STANDARD COINS IN CIRCULATION OF THE VARIOUS NATIONS OF THE WORLD.

DEPARTMENT No. 1. SECRETARY'S OFFICE.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., January 1, 1880.

Hon. JOHN SHERMAN,

Secretary of the Treasury:

SIR: In pursuance of the provisions of section 3564 of the Revised Statutes of the United States, I have estimated the values of the standard coins in circulation of the various nations of the world, and submit the same in the accompanying table.

Very respectfully,

HORATIO C. BURCHARD, Director of the Mint.

I will here repeat what my predecessor said in his last annual report, that—

The foregoing statement omits mention of a great deal of labor which cannot easily be reported, but which has required much time and care, such as the examination of, and decision upon, applications for the issuing of duplicate bonds and other securities in place of securities lost and destroyed; the examination of powers of attorney for collection of money due to creditors of the United States; decisions upon the right of persons claiming to be executors, administrators, or heirs of deceased claimants, to receive money due from the United States to said decedents; the examination, registry, and filing of official bonds; the copying of letters forwarded; auswering calls for information made by Congress, the departments, and private persons; the investigation of legal points arising in the adjustment of accounts, and other work of a miscellaneous character:

INVESTIGATIONS.

The Secretary of the Treasury is authorized by general laws and appropriation acts to make investigations in many cases of the official transactions and accounts of officers in the public service under the Treasury Department. The exercise of this power in proper cases has

a most salutary effect.

These investigations have generally been made by clerks in the Treasury Department detailed for the purpose, and have been attended with considerable expense, especially when conducted at long distances from the capital. It is believed that it would contribute to the efficiency of the public service, and aid in securing fidelity and economy, if the Secretary should be authorized to require any officer connected with this Department whom he might designate to make the requisite investigations, especially if the officers so deputed could be invested with power in some form to secure the presence of witnesses, evidence under oath, and the production of books and papers.

If, upon the request of the Secretary of the Treasury, the heads of other Departments respectively should be authorized to require officers connected therewith to make similar investigations for the Treasury

Department, it might be found of great practical value.

Investigations could thus be made by officers not now subject to the direction of the Secretary of the Treasury, and in the vicinity of the transactions requiring examination. This would be attended with advantage in the means of local knowledge, and in facilities for acquiring

information, by affording ample time for ascertaining all material facts, and with the least possible expense.

It has sometimes been found necessary to ascertain facts and procure information on questions of law in foreign countries. Thus, government bonds have been held by citizens or subjects of foreign governments, and upon the death of the owners, controverted questions of fact and of law, as to the proper parties entitled to the bonds, have arisen, requiring determination in this office. If the Secretary of the Treasury should be invested with power to call upon any representative or agent of our government abroad to make investigations and report the result, and if such representatives and agents should be given ample authority to require evidence and the production of papers by citizens of the United States in foreign countries, and by citizens or subjects of foreign governments, so far as by them permitted, it is believed it would be found a salutary means of securing justice, of facilitating the operations of the Treasury Department, and a protection to the Treasury.

LOST AND DESTROYED BONDS.

Section 3702 of the Revised Statutes enacts that whenever it appears to the Secretary of the Treasury, by clear and unequivocal proof, that any interest-bearing bond of the United States has, without bad faith upon the part of the owner, been destroyed wholly or in part, or so defaced as to impair its value to the owner, and the bond is identified by number and description, the Secretary shall, under such regulations and with such restrictions as to time and retention for security or otherwise, as he may prescribe, issue a duplicate thereof, etc.; or, if the bonds have been called in for redemption, instead of issuing a duplicate, it shall be paid.

The next section enacts that the owner shall file in the Treasury a bond, in a sum prescribed, with two good and sufficient sureties, residents of the United States, to be approved by the Secretary, with condition to indemnify and save harmless the United States from any claim upon such destroyed or defaced bond.

Applications for duplicates, or for the redemption of "called lost" bonds, are referred under regulations prescribed by the Secretary of the Treasury to the First Comptroller, to be decided upon by him.

My predecessor, Hon. A. G. Porter, in the report of the office for the last fiscal year, made the following statement and recommendation:

It will be perceived that bends payable to bearer come within the terms of this statute; and the practice has been to issue duplicates for, or to redeem, bonds of this character alleged to have been destroyed, upon evidence furnished by affidavits taken before certain prescribed officers of the United States. The redemption of such bonds and the issuing of duplicates have always been refused until after the lapse of six mouths from the filing of an application; but even with this precaution the statute is fraught with great danger to the Treasury. In practice it has been found that in fully half the cases where evidence has been offered to establish the fact of destruction, the bonds have not been destroyed, but have passed either by theft or collusion into the hands of other holders. When a bond of this kind is lost or stolen, the owner who has been deprived of it is apt soon to persuade himself that it has been destroyed, as only in case of its having been destroyed can be entertain reasonable hope of ever receiving payment. Instances also have occurred of persons offering most impressive evidence of the destruction of bonds alleged to have been owned by them, who, subsequent events have shown, had no title to them whatever. Great vigilance has been practiced by the Treasury by the invocation, even when very slight doubt has been excited, of the aid of the secret-service division; but it is believed that no vigilance can be sufficient to guard against the ingenious methods by which fraudulent applications may occasionally be made successful. If no radical change is made in the existing statute, authority ought at least to be given to require more than two sure-

I concur in this recommendation.

The greatest danger of loss to the Treasury arises from the possibility that the sureties upon the bonds of indemnity may prove to be worthless in the event of a suit against them. The regulations of the Department provide that the sufficiency of the sureties must be approved by some one of several prescribed officers. Most of these officers have performed the duty imposed upon them with the utmost fidelity, but in many cases such approval is made without any knowledge whatever of the parties, the officers feeling that such duties are extra-official, and that they are not required to make an examination into the condition of the sureties.

A wise caution would dictate that the Secretary be empowered to require each officer to make a thorough examination into the financial status of the parties to bonds before appending his approval of the same, and that such officers be invested with authority to require evidence

under oath.

It may also be found proper to make some regulations by statute in relation to the payment of lost government bonds.

LAW CLERK AND STENOGRAPHER.

A law clerk and a stenographer are deemed necessary for the efficiency of the service in this office. The First Comptroller is the law officer of the Treasury Department. He is charged with the duty of ultimately deciding all questions of law arising upon warrants for the payment of money from the Treasury, and the accounts of the Treasurer of the United States. This includes all the agencies by which money may be paid from the Treasury. The decisions so made are generally final, subject only to the revision of Congress, and in certain cases, not frequent in practice, by the Court of Claims. (Winnisimmet Company v. United States, 12 Court of Claims Reports, 326.)

It must be apparent that questions of great magnitude and difficulty are frequently presented for decision. Counsel of great ability are often retained by claimants to present oral and written or printed arguments against the government, which is not represented by counsel. It is therefore important that every reasonable aid should be furnished to

this office to protect the interests of the government.

DECISIONS OF FIRST COMPTROLLER.

It is so important that the leading general principles of law applicable to the business of the Department should, so far as practicable, be settled, and in an accessible form, that it has been deemed proper, in order to secure these objects, to prepare and cause to be printed formal decisions in a considerable number of cases. A copy of these is herewith transmitted. None of the decisions made by my predecessors have been printed, except in rare instances.

The work of preparing decisions in the form now adopted involves much research and labor, but it is hoped the result may be found accept-

able, and of such utility as to justify it.

STATUTE AS TO PERJURY.

There may be some doubt whether the existing statute defining perjury is sufficiently broad to include all cases of corrupt false swearing in affidavits used for various purposes in the Treasury Department. Affidavits are necessarily used for a great variety of purposes, and it is of the utmost importance that all who make them should be amenable

to punishment in cases deserving it. A comprehensive provision on this subject was included in a bill introduced in the Forty-fourth Congress, on which no final action was taken (H. R. 451, first session Forty-fourth Congress, January 5, 1876).

I respectfully submit that the subject is worthy of consideration by

Congress.

UNPAID BALANCES.

In the adjustment of the accounts of receivers of public moneys, and other officers whose duty it is to collect the revenues of the government, such officers are charged with the amount of their collections and credited with the amount of money deposited by them in the Treasury. In many cases officers have deposited by mistake more money than they

have collected, thus creating a balance in their favor.

The seventh clause of the ninth section of Article 1 of the Constitution prohibits the payment of any money from the Treasury, except in consequence of appropriations made by law. The above accounts come under no appropriation now existing, for the money deposited and covered into the Treasury constitutes an unappropriated fund, and the accounts of such officers under appropriations for the payment of their compensation and the expenses of their offices are kept entirely distinct from their accounts for the collection of revenues. In the absence of a provision for the payment of balances upon the latter class of accounts they have accumulated from year to year until quite a number now stand upon the books of the Department. It would be a great convenience if means for their payment should be provided.

I respectfully call attention to, and renew, the recommendations made

by my predecessor in his last annual report.

The deputy comptroller, chiefs of division, clerks, and other persons employed in this bureau, deserve commendation for the intelligence, ability, and fidelity with which they have performed their respective duties.

I am, very respectfully, your obedient servant,

WILLIAM LAWRENCE,

First Comptroller.

Hon. John Sherman, Secretary of the Treasury.

REPORT

OF

THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, Washington, October 29, 1880.

SIR: In compliance with your direction, by letter of the 14th ultimo, I submit a report, in two tabular statements, of the transactions of this office during the fiscal year which ended on the 30th day of June 1880.

The first tabular statement shows the total number of accounts, claims, and cases of every kind settled and adjusted, and the amounts allowed thereon. The second table furnishes a more detailed statement of the same accounts, claims, and cases; showing the character of the accounts, the source from which received, the number of each kind, and the amounts allowed. A still more detailed statement is prepared and filed for preservation in this office, but it is deemed too voluminous for publication.

	From—		Vumber evised.	Amounts.

In submitting the foregoing exhibits, showing the official labor performed in this office during the last fiscal year, I desire to call attention to the fact that the number of accounts examined and adjusted, and the amount of money involved in their settlement, are without precedent in the history of this bureau.

It will be observed that the number of accounts adjusted for the year was 27,081, and the amount of money involved, as per vouchers examined, was \$3,099,712,371.24, which is over one thousand millions of

dollars in excess of the national debt during the same time.

The amounts of accounts examined during the last four years are over nine thousand millions of dollars, making an average of more than two thousand millions of dollars in yearly settlements made in this office.

The following table, showing the comparative labor performed annually in the First Auditor's Office since 1860, will more fully illustrate what is here stated relating to the present labor and official responsibility compared with former years.

An examination of the foregoing table will show that the labor and official responsibility has increased in this office three hundred per cent. since 1861. This increase will doubtless continue in the future, yet in a less ratio perhaps, growing out of the fact that all public accounts, except those specially assigned by statutes to other accounting officers, are referred to this office for examination and adjustment; and for the further reason that, with the increase of population, and of organized States and Territories, the Treasury Department will of necessity be required to adjust and pay a larger number of accounts that will be filed for settlement. This table clearly shows the necessity for the additional clerical force in this bureau heretofore recommended by me, and which was granted by act of Congress approved June 15, 1880.

While the labor required of the office had increased three hundred per cent. over that of 1861, the clerical force had not been increased over one hundred per cent., and this compelled a constant detail of clerks for special duty in the office in order that the public business

might be dispatched without embarrassment.

Attention is called to the number of accounts and the amounts involved in the settlement of what are known as "miscellaneous accounts," under the designation of "miscellaneous desks," from No. 1 to 7 inclusive. These embrace the largest part of the disbursements from the United States Treasury during the year, yet their examination is not under the supervision of a chief of division, as they do not belong to any class pertaining to divisions of the First Auditor's Office as now organized.

I would respectfully recommend that a new division be organized, to be known as the Division of Miscellaneous Accounts, to which should be referred all accounts not now assignable to existing divisions in this

office.

While the accounts settled upon these desks are now carefully and critically examined by clerks in charge who would be a credit and honor to any office, for I except none, as to diligence, efficiency, and integrity, this will secure a supervision of the accounts stated by them, which will be an additional guarantee of their correct adjustment. In cases of enforced absence of clerks from duty on account of sickness or otherwise, the work of the new division will proceed with less embarrassment under the charge of an efficient chief.

Renewing my former commendations of the deputy auditor, chiefs of divisions, and clerks and employés of the office for faithful and intelli-

gent performance of duty,

I am, sir, most respectfully, your obedient servant,

R. M. REYNOLDS, First Auditor.

Hon. John Sherman, Secretary of the Treasury.

269

The number of requisitions registered, journalized, and posted was 5,119, namely: War, 1,260 debit and 508 credit; Interior, 3,135 debit and 216 credit. Twenty-nine miscellaneous settlements, involving \$224,403.10, were made in this division; 1,170 certificates of deposit were listed; 546 repay requisitions were prepared for the War and Interior Departments; 53 official bonds of disbursing officers were recorded; 370 certificates of non-indebtedness were issued, and 26 special reports were made in reply to inquiries from committees of Congress and individual Senators and Representatives. A statement was prepared, showing the expenditures on account of the War of the Rebellion chargeable to appropriations on the books of this office. The amount disbursed on account of said war up to June 30, 1879, was ascertained to be \$1,558,138,343.88.

The following settlements confirmed by the Second Comptroller were entered and posted:

Claims: War, 331; Indian, 2,337	
Special settlements connected with overpayments, refundments, removal of suspensions, &c	426
Miscellaneous	148
Total	3,712
PAYMASTERS' DIVISION.	
Paymasters' accounts on hand unexamined July 1, 1879	154 516
Total	670

The amount involved in the 540 audited accounts, and in 294 miscellaneous settlements, was \$12,110,035.15, as follows:

540

130

Audited and reported to the Second Comptroller

On hand, unexamined, June 30, 1880

Disbursements by paymasters	\$11,854,187 21
Fines and stoppages naid to the Soldiers' Home	110, 386 20
Transfers to the Third Auditor's books on account of tobacco sold to soldiers, \$118,156.55; and on account of stoppages for subsistence	
and quartermaster's stores, \$5,371.52	123, 528 07
Charges to officers and men of the Army and late volunteer forces on	
account of overpayments	7,726 38
Amount of overpayments refunded	5,24559
Sundry charges and credits	8,961 70
Total	12, 110, 035 15

The accounts of seventeen paymasters were finally adjusted during the year, showing balances due the United States amounting to \$12,645.10; of which \$9,622.46 has been collected and deposited in the Treasury. From the record of deposits by enlisted men under the act of May 15, 1872, kept in this division, it appears that the sum of \$343,381.95 was deposited with paymasters whose accounts have been audited during the year; and that \$250,725.78 was returned to the depositors. Under the act of June 18, 1878, which authorizes officers of the Army to count service as enlisted men in making up their longevity record, one hundred and ten records have been examined and revised, in order to determine from what date the officers interested are entitled to increased pay for length of service.

MISCELLANEOUS DIVISION.

There were 1,865 accounts examined in this division during the year, in which disbursements aggregating \$3,890,788.07 were passed to the credit of the officers concerned, under the following heads of appropriations:

Ordnance, ordnance stores and supplies, armament of fortifications, manufacture of arms, arming and equipping the militia, ordnance service, repairs of arsenals, and other appropriations of the Ordnance Department		230	92
Department	, ψ=,, -	•••

The clerks engaged in recording payments to officers of the Regular Army and volunteer forces have examined and entered 100,247 vouchers, discovering, incidentally, thirty cases of double payment, which

have been reported for appropriate action.

It is suggested that Congress be asked to amend the act of March 3, 1875 (18 Statutes, 360), so as to require the fiscal officer of the National Home for Disabled Volunteer Soldiers to give a bond to the United States in such sum as the President of the United States may deem proper, said bond to be approved by the Secretary of War, and be subject to the provisions of sections 1192 and 3639, Revised Statutes. Under existing laws the moneys appropriated for the support of the National Home are placed to the credit of the fiscal officer of that institution with a designated depositary of the United States, in the same manner that other public moneys are advanced to disbursing officers of the War Department. The act of March 3, 1875, requires that the managers of the Home shall render to the Secretary of War accounts of all their receipts and expenditures, and that such accounts shall be audited and allowed, as required by law for the general appropriations and expenditures of the War Department. Until the accounts are so audited and allowed the fiscal officer of the Home is a debtor to the United States on the books of this office for advances made to him without the security ordinarily demanded of officers who are intrusted with the disbursement of public funds. For this reason I think he should give a bond to the United States. At the same time I disclaim any reflection on the past or present officers of the National Home.

INDIAN DIVISION.

Last year's report showed that, in consequence of a large increase in the number of accounts and claims presented for adjustment, the work of this division had fallen in arrear. Additional clerical force was assigned to it as early as practicable, and the number of accounts on hand has been materially lessened.

The greater portion of the money appropriated by Congress for the Indian service is now paid directly from the Treasury, on requisitions issued by the Secretary of the Interior, based upon accounts stated by the Second Auditor and certified by the Second Comptroller. Formerly the bulk of the money was advanced to Indian agents for disbursement. Accounts for Indian supplies, &c., were then paid first and audited afterwards. Now they are audited prior to payment. This method undoubtedly has its advantages, but it is also open to objections, one of which is that it throws upon the Treasury Department the labor of paying by draft numerous claims for comparatively insignificant amounts that might be paid more promptly and with less expense to the government by the bonded disbursing officers of the Indian service. the last fiscal year one hundred and six claims of \$5 each or less, and four hundred and thirty-five for sums varying from \$5 to \$25, have been paid by draft. The weight of the objection here suggested will be appreciated when it is stated that a claim for 50 cents must pass through the same channels and undergo the same manipulation as one for \$50,000. and, in its progress through the Interior and Treasury Departments, must pass through the hands of nearly fifty persons, including two heads of departments, one Assistant Secretary, two members of the Board of Indian Commissioners, six heads of bureaus, and eight chief clerks and chiefs of division.

To show how the business of this office has been affected by the change in the method of disbursing Indian appropriations, I append a statement of the number of claims settled and requisitions issued since July 1, 1869, from which it will be seen that, while in 1880 there were five and one-half times as many claims and six times as many requisitions as in 1869, the increase in the amount involved is only 50 per cent.

Fiscal year.	Claims settled.	Requisi- tions issued.	Amount.
1869 1870 1871 1872 1873 1874 1874 1876 1876 1876 1877 1878	635 962 996 984 1, 101 1, 678 1, 236 2, 248	560 625 1,006 977 1,386 1,482 1,867 1,488 2,194 2,873 3,019 3,351	\$2, 750, 539 75 1, 307, 083 96 2, 973, 705 72 3, 108, 160 44 4, 730, 749, 34 3, 050, 552 94 4, 422, 865 55 3, 556, 269 38 3, 575, 641 22 3, 398, 813 00 3, 795, 366 00 4, 146, 681 38

The accounts and claims received, adjusted, and remaining on hand during the last fiscal year are shown by the following statement:

	On hand July 1, 1879.	Received during the year.	Examined and disposed of.	Remaining on hand June 30, 1880.	Amount of dis- bursements.
Money accounts of Indian agents Property accounts of Indian agents Claims of contractors, employes, &c. Total disbursements	352	330	333	349	\$1, 518, 548 27 4, 146, 681 39 5, 660, 229 66

It is proper to remark that the 148 claims remaining unexamined belong to a large class of outstanding claims that accrued between 1873 and 1876, chargeable to appropriations that have been exhausted or carried to the surplus fund, and that they cannot be paid until Congress shall have provided the necessary funds.

Forty one transcripts of accounts of Indian agents, no longer in the service, have been prepared for suit, and the sum of \$25,556.82 has been recovered by suit and otherwise and covered into the Treasury.

PAY AND BOUNTY DIVISION.

The work of this division is exhibited in the subjoined tabular statements of claims examined and claims settled. When claims for arrears of pay and bounty are presented to the office, it is the duty of the "Examining Branch" of this division to ascertain whether or not they have already been paid or rejected, and to see that all the evidence required by law and regulation is filed by the claimant or his attorney. The "Settling Branch" deals only with claims that have been reported by the Examining Branch as technically correct and ready for adjustment.

Arrears of pay and all bounties	6, 329	1, 529	2, 119	3, 648			139, 551 68
Total	25, 117	4, 313	11, 504	15, 817	17, 939	3, 692	423, 033 25

In addition to the settlements reported above, one was made for \$5,006.13 in favor of the Soldiers' Home, under section 4818, Revised Statutes, on account of unclaimed arrears of pay due deceased soldiers of the United States Army.

The total number of claims remaining on hand June 30, 1880, was 29,470, namely:

Arrears of pay and bounty to white soldiers	2, 625 9, 523
Total	

It will be observed that comparatively few of the claims for three months' extra pay to soldiers of the Mexican war, so far presented, have been allowed. The whole number filed up to June 30, 1880, was 3,963, of which only 167 have been paid, while 3,638 were rejected, and 158 remain on hand for adjustment. The time for filing claims for additional bounty, under the act of July 28, 1866, expired on June 30th last. Many claimants do not appear to be aware of this, although the fact has been repeatedly published. Claims continue to be presented, but as the accounting officers cannot entertain them, they are at once returned to the claimants. Unless the time for filing this class of claims be further extended by Congress, I anticipate that the next annual report will show that all have been disposed of.

DIVISION FOR THE INVESTIGATION OF FRAUD.

During the year, 8,722 cases were before this division for examination and investigation. Of these, 4,639 were examined and partially investigated, 332 were finally disposed of, and 8,390 cases remain on hand for further consideration. Abstracts of facts were made in 547 cases; 69 were transmitted to the Department of Justice for suit and criminal prosecution, and 4,900 letters were written. These cases comprise such claims presented on account of military service to the United States as involve apparent, alleged, and supected fraud in their prosecution and

collection, unlawful withholding of money from claimants, forgery, criminal personation of soldiers and their heirs, difficult identification, overpayments and double payments of officers and enlisted men, conflicting testimony, contested heirship, &c., and are as follows:

Unsettled cases of 1,000 white and 1,574 colored soldiers, and cases of 1,900 white and 3,517 colored soldiers in which notice of fraud or wrong

was not presented until after settlement of the claims.

The amount recovered by suit and otherwise and returned to the Treasury was \$4,696.17; amount of judgments recovered, but not yet satisfied, \$375.22; amount secured to claimants from parties unlawfully withholding, \$1,741.22; and amount returned to the Treasury by the paymaster having charge of the business of the late freedmen's branch of the Adjutant General's Office, \$27,219.41.

I respectfully invite your attention to the urgent necessity of some action on the part of Congress with regard to the claims of colored soldiers and their heirs, to which special reference was made in the annual reports for 1875, 1876, 1877, 1878, and 1879. The case was succipatly stated in lest year's report as follows:

cinctly stated in last year's report as follows:

Many colored soldiers now living, and the heirs of others who were killed in the military service, are clamorous for the pay and bounty which they claim to have been defrauded of under the *regime* of the Freedmen's Bureau. The accounting officers of the Treasury Department, to whom their reiterated applications are made, are powerless to afford them any satisfaction.

PROPERTY DIVISION.

Property returns (clothing, camp and garrison equipage) on hand July 1, 1879	7.776	
Received during the year	3,817	
<u> </u>		11,593
Settled during the year		4,032
7		
Property returns unsettled June 30, 1880		7,561

The sum of \$1,204.89 has been charged to officers for property not accounted for, \$365.36 has been recovered, and 342 certificates of non-indebtedness have been issued to officers no longer in the service.

DIVISION OF INQUIRIES AND REPLIES.

The records of this division show that 5,467 inquiries remained unanswered on July 1, 1879; that 9,665 have been received since that date; and that 10,360 replies, containing information of a varied character, have been made to inquiries from the Adjutant-General, Quartermaster-General, Commissary-General, Chief of Ordnance, Commissioner of Pensions, and the Third and Fourth Auditors. There are 4,772 inquiries awaiting attention, the major part of which are from the Adjutant-General. The following miscellaneous work has been performed:

Rolls and vouchers copied for the Adjutant-General (414) and for the De-	
partment of Justice (50)	464
Miscellaneous papers copied, namely, affidavits, final statements, certifi-	
cates of disability, letters, furloughs, &c	2,367
Signatures on claims, &c., compared with signatures on muster and pay	
rolls, vouchers, &c.,	3,831
Descriptive lists briefed and filed away	13, 965
Overpayments and double payments discovered, amounting to	\$22,436 48
Amount recovered in satisfaction of charges raised against officers and en-	" '
listed men at the instance of this division	2,066 18

DIVISION OF CORRESPONDENCE AND RECORDS.

Letters received, 37,116; written, 32,258; referred to other offices, having been sent here in error, 2,145; recorded and indexed, 984; dead

letters received and registered, 1,824; claims received, briefed, and registered, 30,602; miscellaneous vouchers received, stamped, and distributed, 49,743; letters containing additional evidence to perfect suspended claims briefed and registered, 18,080; pay and bounty certificates examined, registered, and mailed, 4,591; pay and bounty certificates examined, registered, and sent to the pay department, 3,692; reports calling for requisitions sent to the Secretary of War, 452; miscellaneous cases disposed of, 3,864.

ARCHIVES DIVISION.

Paymasters' accounts received from the Pay Department to be audited Confirmed settlements received from the Second Comptroller, entered, indexed, and placed in permanent files: Paymasters', 161; Indian, 2,591; miscella-	516
neous, 608	3,360
Vonchers withdrawn from files for reference in the settlement of accounts and	1,807
claims	31,829
Vouchers returned to files	49, 338 127, 976
Mutilated rolls repaired	21, 365
RECAPITULATION.	
Number of accounts and claims, of all kinds, on hand unexamined July 1, 1879	29, 777 35, 258
Total	65, 035 26, 588
Number of accounts and claims, of all kinds, remaining on hand June 30, 1880.	38, 447

Amount drawn out of the Treasury by requisitions on account of claims allowed, and advances made to disbursing officers, \$20,633,746.37.

Amount involved in claims and disbursing accounts audited and adjusted during the year, \$22,057,617.42.

Total number of letters written, 162,828.

Average number of clerks employed, 136.

As will be seen by the foregoing recapitulation, there were 38,447 unsettled accounts on hand June 30, 1880, against 29,777 on July 1, 1879, an increase of 8,670, as follows:

Increase in number of unsettled claims for back pay and bounty Decrease in number of unsettled accounts of all other classes	$9,300 \\ 630$	
Net increase in number of unsettled cases	8,670	

The accumulation of unsettled claims for arrears of pay and bounty is due to insufficient clerical force and peculiarities in the character of the claims presented. The first of these causes has been in a measure removed by an addition to the force of the office, which has enabled me to place more clerks in the Bounty Division, with a view of bringing the work up to date as early as possible; but the difficulties attending the adjustment of these claims increase rather than diminish. Questions of law and fact, heirship, identity, &c., now arise that were comparatively unknown when the claims accrued, and call for an amount of careful investigation and tedious correspondence not required ten years ago.

Very respectfully,

O. FERRISS, Auditor.

Hon. JOHN SHERMAN, Secretary of the Treasury.

277

REPORT

OF

THE THIRD AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, Washington, October 25, 1880.

SIR: I have the honor to transmit herewith report of the operations of this office for the fiscal year ended June 30, 1880. The following statement shows, in tabular form, the number and amount of accounts and claims received and audited, and the number and amount of accounts and claims remaining unsettled at that date, viz:

Work has been continued during the fiscal year in abstracting the names of soldiers of the war of 1812, for the purpose of arrangement in alphabetical registers, with all the clerical force available. Up to date three hundred and forty-six thousand four hundred and thirty-two payments have been abstracted, which is probably one half of the payments made for services in that war. In order to complete these registers within a period of time that will be available to the old soldiers and their widows, whose applications for pension are now pending in the office of the Commissioner of Pensions, but whose service cannot be traced for lack of data to base a search upon, an increase in the clerical force in this division will be necessary. In many cases, of widows, especially, who know the fact by tradition that their former husbands served in the war of 1812, the claimants do not know or have forgotten the names of the officers under whom they served. Until these alphabetical registers are completed this office is unable to trace the service of any soldier without the name of the captain or colonel under whom the soldier served. When these registers shall be completed a knowledge of the name of the soldier will be a sufficient clue to trace his military service. When the abstract slips are entered upon registers they may be sent to the States

from which the soldiers enlisted to become a part of the records of the State. The current work of the collection division has largely increased during the fiscal year, and if the same ratio of increase continues additional clerical force will be required to keep it up.

Balance on hand June 30, 1880	. 359	42, 115, 488 37	5. 5	

The force employed in this division during the last year numbered 36 clerks and 1 copyist. The consolidation of agencies, together with the granting of pensions by acts of March 9, 1878, and "arrears of pension," have caused the vast accumulation of work now on hand. There are over 40,000 notifications of "arrears" received not yet recorded. Large numbers of cases are referred to this office for verification of records and calculation of amount due before payment can be made by the agent. This current work requires prompt attention. The force heretofore employed has been insufficient to keep up the work, but the clerks have all been faithful and energetic in the discharge of their duties, the pro rata of labor performed being larger. The following tabular statements exhibit the amount disbursed by the several agents, and the unexpended balances in hand June 30, 1880:

THE FILES.

The number of official money settlements filed during the year is 4,638, making the number since March, 1817, when this office was created, 183,380. In this number are included only the settlements for horses lost in the military service which were made since February, 1878. The pension settlements, which include all vouchers of army pensioners from 1818 to the present time, are in a good state of preservation, but many of the abstracts have been often handled and need repairing and bind-

ing

These settlements are now numbered and kept in a separate series, and the papers are much greater in bulk than all the others. The settlements of accounts of officers of the quartermaster, commissary, and engineer departments are now filed in one series and are in good condition. The settlements of miscellaneous claims also form a separate series, and are rapidly increasing in number and bulk; they are well preserved. There are more than 50,000 property returns filed in this office not included in the above which are also well kept. Much inconvenience has been caused in the past few months by want of room for new settlements which were accumulating; but a large apartment recently vacated by the Bureau of Engraving and Printing has been assigned for the use of this bureau. This room, which is a large apartment, well lighted and ventilated, is quite suitable for files. It will probably soon be ready for occupancy, and when completed will suffice for several years to come.

There were nine lady copyists employed during the year. The number of pages copied and compared by them was 13,678, letters recorded 4,496, making a total of 18,174 pages. The number of names indexed

was 25,555. Number of papers copied, 4,747.

It gives me pleasure to testify to the general faithfulness, industry, and fidelity displayed by the clerks employed in this office, and to commend them for the intelligent discharge of the duties assigned them.

E. W. KEIGHTLEY, Third Auditor.

Hon. John Sherman, Secretary of the Treasury. REPORT OF THE FOURTH AUDITOR.

REPORT

OF

THE FOURTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FOURTH AUDITOR'S OFFICE, Washington, November 1, 1880.

SIR: In obedience to the law requiring the auditor charged with the examination of the accounts of the Department of the Navy to report annually on the first Monday in November to the Secretary of the Treasury the application of the money appropriated for the Navy Department, and in compliance with your request of September 13 last, for a statement showing the condition of the public business intrusted to my charge, for the fiscal year ending June 30, 1880, I respectfully submit the following:

APPLICATION OF MONEY.

The subjoined statement gives in a summary way the application of the money appropriated by Congress for the support of the Navy. It is desirable that this information should be given more in detail, which would require also more minuteness of specification in the appropriations themselves. Wise economy in the appropriation and expenditure of money requires an itemized account. A complete exhibit of this kind would show specifically the precise purpose for which every dollar was appropriated and how expended. If the expenditure had been greater or less than the specific appropriation, the reason would be stated. Such an exhibit, while furnishing desirable information for the people, would give the appropriating power the exact facts needed when grants for a

subsequent year are under consideration.

The last column of the following table is made up from the sums named in the money requisitions passed during the fiscal year. It shows approximately the expenditures for the year; but, owing to the nature of the naval service which is performed in remote seas, it occurs unavoidably that bills made on account of accident or other unforeseen circumstances near the close of the year do not reach this office until a considerable time after the year has closed. It sometimes happens that a disbursing officer may charge a payment to a wrong appropriation, and the error, when discovered, is corrected by the accounting officers in the adjustment of his account. The discrepancy which appears in the aggregate amount of the drafts drawn on the Messrs. Seligman Bros., and the amount paid by them during the year, is explained by the fact that bills sold near the close of the year may not be paid until after the beginning of the succeeding fiscal year.

The amount appropriated for officers of the active list was \$3,822,875; for the retired list \$645,400; total \$4,468,275. The amount due and unpaid June 30, 1880, was \$110,325.53. Net amount paid to officers \$4,357,949.47. The amount appropriated for petty officers and men was \$2,300,000. The amount due and unpaid June 30, 1880, was \$608,652.85. Net amount paid to petty officers and men \$1,691,347.15. The whole amount due and unpaid to officers and men at the close of the fiscal year was \$718,978.38. This amount has doubtless been mostly paid by this time and the unexpended balance of the appropriation for pay of Navy correspondingly diminished. Vouchers for payments made during the year, but not included in the above table, will probably exhaust the balances as shown there.

ACCOUNT WITH SELIGMAN BROS.

The disbursements of the Department of the Navy, through the Messrs. Seligman Bros., temporary special agents in London, amount for the year to \$1,724,746.79, being \$213,592.80 less than the previous year. A commission of 1 per cent. was paid to these agents amounting to \$17,246.02. By the terms of the contract they pay interest on balances in favor of the Department at the rate of 4 per cent. per annum, and for the advances made by them they receive 5 per cent. The interest paid to them during the year was \$2,698.50; and the interest paid by them \$2,925.44. For the previous year the interest account was \$6,194.82 against the Department and \$2,475.04 in its favor. The interest paid to Seligman Bros. for the first two months of the current fiscal year, July and August, 1880, was \$2,372.42. For the twenty-six months closing with the date last named, the interest paid on advances made by them was \$11,265.74, and the interest paid by them was \$5,400.48, the balance of interest against the Department being \$5,865.26. Money is transferred to London usually by the purchase in New York of sixty day bills of exchange on London, resulting in almost all cases to the advantage of the Department. The net gain from this source during the year was \$7,963.41, and for the previous year \$10,764.99.

EXCHANGE.

Bills of exchange were sold by the pay officers of the Department of the Navy during the year to the amount of \$1,935,478.30. These, with the exception of thirty in number drawn directly on the Secretary of the Navy, and amounting to \$188,590.91, were sight drafts on Seligman Bros., London. The premiums amounted to \$1,459.63, and the discount to \$28,089.20—a net loss to the Department of \$26,629.57. The net loss on the drafts drawn on the Secretary was \$285.21. Pay officers are instructed to draw on the Secretary when practicable; but in the larger

number of foreign ports at which our vessels touch, drafts on the United States are either not salable or cannot be negotiated so satisfactorily as those on London. On the Pacific coast of Mexico and South America, the Sandwich Islands and the West Indies, drafts on the Secretary have been sold to good advantage; but in the ports of China and Japan, the South Atlantic, and the Mediterranean, bills are not often wanted except on London.

During the past year more than usual attention has been given to this subject in this office. A circular was prepared showing in detail the drafts drawn on Seligman Bros. for the fiscal years ending June 30, 1878, and June 30, 1879. This was printed and sent to pay officers by the authority of the Secretary of the Navy, with the hope that it would result in an increase of diligence on their part and a consequent reduction of expense in converting drafts into money. It was shown that for the two years named the gains had been \$30,699.91, and the losses \$52,277.11—a net loss of \$21,279.20. The gains resulted mainly from transactions in Mexican dollars, which were then valued according to the United States silver standard. It was suggested in the above-mentioned circular that the credit of the United States was so thoroughly established, and the demand for the best bills on London so general in the ports visited by the vessels of our Navy, that the drafts of pay officers, if carefully negotiated, should, in nearly all places, bring their face

value, and often a premium, in gold or its equivalent.

On January 1, 1880, the value of the Mexican dollar, which had been for the year previous \$1.015, was fixed by the annual circular of the Treasury Department at \$0.909. Some question arose as to the effect this new valuation would have on the cost of maintaining the Navy of the United States in parts of the world where the Mexican dollar was one of the principal kinds of money in use. The first sale for Mexican dollars under the new valuation was at Shanghai, China, April 7, 1880. The bill was for £8,000, or \$38,932, and the number of Mexican dollars received for it was \$41,290.32. These, paid out at the new rate, amounted to \$37,532.90, or \$3,757.42 less than the face of the Mexicans. As the bill was sold, the loss to the Department in exchange was \$1,399.10. At the former valuation this loss would have been changed into a gain of The sale of bills for Mexican dollars from April 7 to June 30, 1880, all in China and Japan, amounted to \$218,992.50, and the number of Mexican dollars received therefor was \$234,052.72. The aggregate loss to the Department on these was \$8,965.58. Had the Mexican dollars been paid out at their face value this loss would have been transformed into a gain of \$15,060.22. During the first three quarters of the fiscal year bills were sold in China and Japan for gold, the Japanese "yen," a gold coin almost identical in weight and fineness with our gold dollar, being worth \$0.997, serving as the unit of value. These transactions amounted in the aggregate to \$433,118.50. The loss on exchange was \$7,807.71, or \$1,157.87 less than the loss in the silver transactions mentioned above, involving but a trifle over one-half the aggregate sum. Unless circumstances exist which have not been explained, it would have been a considerable saving to the Department if sales for gold had been continued.

The embarrassing feature connected with this subject, so far as this office is concerned, is an almost total lack of means necessary for any intelligent supervision of the sales of bills of exchange. The regulations of the Navy require that the account of sale forwarded to this office must include the certificate of two respectable merchants resident at the place where the bill was sold, stating the current rates of exchange at

that time on London and New York, and in what money payable. Such certificates, however, are considered of very little value, if not actually worthless, in a majority of cases. It is in evidence that these certificates can easily be obtained, signed in blank, at the instance of an interested broker or banker, and that sometimes instead of being a help to a proper dispatch of business they may become a convenient cloak to cover improper transactions. Careful pay officers do not esteem such certificates as evidence of due diligence on their part, but protect their

reputation by other and better means.

While, during the last year, bills have been sold in more than fifty different ports, full three-fourths of the sales in amount have been made in one-fifth of that number of places. Thus the aggregate sales in Callao, Constantinople, Gibraltar, Hong-Kong, Honolulu, Montevideo, Nice, Rio Janeiro, Shanghai, and Yokohama amounted to \$1,462,846.60. If this office were furnished with the financial reports contained in the newspapers of these ten places, it would have a basis for intelligent judgment concerning the bulk of the sales of exchange. These could be supplied at a comparatively small cost. It may also be added that financial reports giving the rates of exchange taken from newspapers of even date with the account of sales and attached thereto would be of much more value than the certificates of any number of resident merchants, the most of whom would not be engaged in foreign trade nor have any special knowledge of the current rates of exchange.

WORK OF THE OFFICE.

The following tables give a brief exhibit of the work of the office for the year. The whole number of accounts and claims received was 2,531. The number settled was 2,829, and the amount involved \$18,244,321.01. The number of letters received was 17,741, and the number written 18,862. The number of letters recorded was 26,458; indexed, 39,298. Cash requisitions issued, 2,145, amounting to \$19,482,638.33. Refunding requisitions, 347, amounting to \$6,617,068.39. Unsettled accounts on hand June 30, 1879, 949. The same June 30, 1880, 651; a decrease of 298.

This division is charged also with the preparation of all reports and tabular statements called for by Congress and the Secretary of the Treasury, keeping a record of appointments, resignations, removals, and absences, the care and issuing of stationery used in the office, and the payment of salaries to employés.

NEW ORLEANS AND OTHER PRIZE-MONEY.

Prize money amounting to nearly fifteen millions of dollars has been awarded for captures made during the rebellion. The apportionment to the captors of the proceeds of each prize has been made upon the books of this office, and all claims presented in due form have been settled up to date. There is yet remaining a considerable sum uncalled for, but claims are constantly being received, presented by seamen who have been abroad, or for other reasons have not been informed of the adjudication of prizes in which they are interested. Claims of heirs of deceased officers and seamen are also being presented, and these require very careful scrutiny to avoid erroneous payments.

Claims have been presented during the year for prize-money accruing during the war with Mexico, the war of 1812, the war with Algiers, and even the Revolutionary War. Most of them have been rejected on account of lack of evidence.

A balance of bounty for the destruction of vessels at New Orleans has not yet been distributed on account of the failure of Congress to appropriate the money required. Besides the vessels captured by the fleet under the command of Admiral Farragut during the engagements near Forts Jackson and Saint Philip, a large number of vessels were destroyed, for which the court in 1873 awarded the sum of \$268,600. At the date of the award there was in the Treasury, after paying fees, &c., but \$93,865.20 to the credit of the appropriation "Bounty for the destruction of enemies' vessels." This amount was distributed to all the captors. There remains to be appropriated by Congress the sum of \$143,644.47.

Forty-four vessels were admitted to share in this award, and the number of persons entitled to share is more than five thousand.

THE THREE MONTHS' EXTRA PAY.

Of the number of claims settled in this division, 824 were for the three months' extra pay authorized by the act of February 19, 1879, for services in the war with Mexico, and amount to the sum of \$34,800.33

in the aggregate.

Complaint has been made in some instances, originating, no doubt, from a misapprehension of the facts, that the construction placed upon this law has, to a very great extent, defeated the intention of Congress. The act provides that the gratuity is to be paid subject to the limitations contained in the act of July 18, 1848. That law was passed for the exclusive benefit of persons who were employed in the military service during the Mexican war, and limited the payment to those who "served out their term of engagement, or have been or may be honorably discharged," and to the widows, children, &c., of those "who have been killed in battle, or who died in service, or who having been honorably discharged have since died, or may hereafter die, without receiving the three months' pay." The term honorably discharged, as used in the law, applied to the enlisted men, and to the volunteer officers of the army who received an honorable discharge when mustered out at the close of the war, or when their services were no longer required. will be seen, therefore, that the "limitations" of the law of 1848 necessarily excluded those officers of the Navy and Marine Corps who resigned their positions or remained in the service, and also the heirs of those who resigned or died in the service after the 19th of July, 1848.

A bill amending the act of February, 1879, is now before Congress, and if it should become a law it is presumed that all officers and men of the Navy and Marine Corps who were employed in the prosecution of the war with Mexico, and who have not been dishonorably dis-

charged, will become entitled to the gratuity.

NAVY PENSION FUND.

At a very early period of the government Congress enacted that all money accruing to the United States from the sale of prizes shall be and remain forever a fund for the payment of pensions to the officers, seamen, and marines who may be entitled to receive the same. The aggregate amount of this fund now on deposit in the Treasury of the United States is \$14,000,000, on which the government pays interest at the rate of 3 per cent., amounting to \$420,000 a year. If the interest paid on this fund were 4 per cent., the lowest rate at which the government has yet sold any of its bonds, the amount realized would be \$560,000, a sum sufficient to meet the annual pension claims.

Notwithstanding the sacredness of this fund, there are annually bills

introduced into Congress designed to make inroads upon it, and to divert it from the righteous purpose to which it has been so justly appropriated. It is to be sincerely hoped that all such designs will fail, and that the principal shall remain intact, while the interest is annually devoted to the just and worthy purpose of compensating officers and men, their widows and children, who have so freely given their services to the government. Instead of dissipating this fund it ought, if possible, to be still more carefully guarded, and secured beyond all peradventure of loss or diminution.

I take pleasure in expressing my obligations to William B. Moore, the long-time faithful and efficient deputy auditor, to the chiefs of divisions, and to the clerks and employés generally, for their devoted and capable service and close attention to their respective duties. While there may be and probably is room for improvement in the condition of the public business committed to my charge, I am glad to believe and to report that it has been carefully attended to during the year, and so conducted as to merit your approval and commendation.

I have the honor to be, very respectfully, your obedient servant, CHARLES BEARDSLEY,

Auditor.

Hon. John Sherman, Secretary of the Treasury. REPORT OF THE FIFTH AUDITOR.

REPORT

OF

THE FIFTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, D. C., November 1, 1880.

SIR: I have the honor to submit herewith the operations of this office for the fiscal year ended June 30, 1880.

The adjustments required the examination of one hundred and eighty-six thousand seven hundred and seventy vouchers, amounting to eight hundred and six millions, five hundred and twenty-nine thousand, seven hundred and ninety-five dollars and eighty-three cents (\$806,529,795.83).

The several clerks engaged in the examination and adjustment of accounts, and keeping the records, and the copyists employed, have been faithful and industrious, and have given great satisfaction by the manner their respective duties have been performed.

J. B. MANN, Acting Auditor.

Hon. John Sherman, Secretary of the Treasury.

NOTE.—The tables pertaining to this report are omitted for want of space, but they will be found in the pamphlet edition of the Auditor's report.

307

REPORT OF THE SIXTH AUDITOR.

309

Digitized for FRASER

REPORT

OF THE

AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT.

OFFICE OF THE AUDITOR OF THE TREASURY FOR THE POST-OFFICE DEPARTMENT, Washington, D. C., October 26, 1880.

SIR: I have the honor to submit the following report of the business operations of this office for the fiscal year ended June 30, 1880. My annual report to the Postmaster-General, now in course of preparation, will exhibit in detail the financial transactions of the Post-Office Department during the past fiscal year.

NECESSITY FOR THE INCREASED APPROPRIATION FOR WHICH ESTI-MATES HAVE BEEN SUBMITTED.

I have the honor to invite your attention to the large increase of business in this office over last fiscal year, as shown by the reports of the several chiefs of division, especially of the Money-Order Division.

The general average of the increase of work in the various divisions

is as follows:

Examining Division, six per cent. Registering Division, ten per cent. Bookkeeping Division, thirteen per cent. Stating Division, nine per cent.

Collecting Division, seven per cent. Foreign Mail Division, eleven per cent.

Pay Division, ten per cent.

Money-Order Division, thirty-two per cent. In my estimates for the service of this bureau for the fiscal year ending June 30, 1882, I have asked for an appropriation for fifteen additional clerks, and I refer to the foregoing statement as conclusive evidence of the necessity for that increase.

There was also submitted an estimate for one chief clerk, at \$2,100 per annum, and, in support thereof, I have to offer the following reasons:

The force now employed in this bureau is greater than that of any of the other bureaus of the Department, and the details of business probably more numerous. Much of the time of the Auditor and Deputy Auditor is occupied with routine office affairs which could very properly be disposed of by a chief clerk.

311

Note.—A summary of the principal labors performed by the several divisions of this office will be found in the pamphlet copies of the Auditor's report.

Under the present organization, no provision is made for filling the place of the Deputy Auditor during his absence or sickness, or that of the Auditor. The appointment of a chief clerk would supply an officer upon whom this duty could devolve.

By the last reorganization of the clerical force of this office, the position of principal clerk of the Law Division was abolished, and it is intended that the duties formerly discharged by that officer—namely, the preparation of cases for suit and the conduct of the correspondence

arising therein—shall be performed by the chief clerk.

I have fixed the compensation at \$2,100 for the reason that the duties and responsibilities proposed to be assigned to the chief clerk would, in my opinion, fully justify such a salary, and in order that the rank of the position may be superior to that of the chiefs of division, over whom he would be called to exercise authority.

This additional appropriation is earnestly recommended as much needed, and in the confident belief that it would materially facilitate the transaction of the business of the office and advance the public

interest.

I am pleased to report, in conclusion, that the work of the bureau, in all its branches, is in excellent condition. The accounts of the Post-Office Department, numbering over four hundred thousand, and involving over two hundred million dollars, have been promptly settled, collections made, and liabilities paid, with a loss so slight as to be scarcely appreciable. Never, since the organization of the government, have the accounts of the Post-Office Department been in so satisfactory a condition as at the present time.

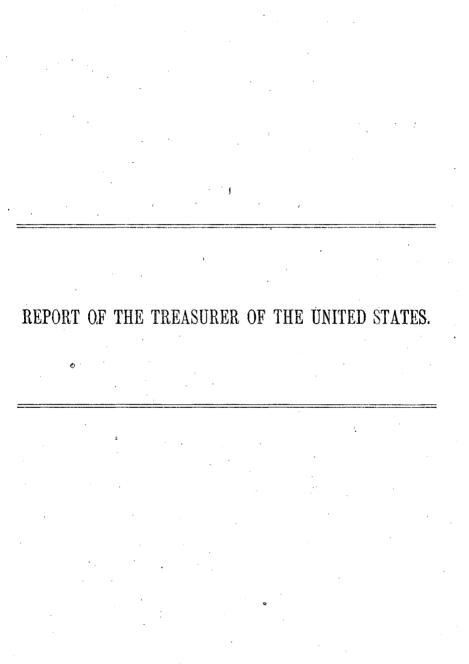

To my efficient and faithful Deputy Auditor, Mr. F. B. Lilley, the chiefs of the various divisions, and to the conscientious and untiring efforts of the clerks and other employés of this office, I am indebted for this very favorable condition of the work, and I commend them all to

your special favor and confidence.

I am, sir, very respectfully,

J. M. McGREW, Auditor.

Hon. John Sherman, Secretary of the Treasury, Washington, D. C.

REPORT

OF

THE TREASURER OF THE UNITED STATES.

TREASURY OF THE UNITED STATES, Washington, November 1, 1880.

SIR: The following statement of the transactions of this office and of the condition of the public business therein, during the fiscal year 18\$0, is respectfully submitted.

From the tables in the appendix the following facts appear:

The receipts of the government compare very favorably with those of the previous fiscal year, and show an increase from customs, internal revenue, and sales of public lands, of \$59,811,505.78, and a decrease in those from miscellaneous sources of only \$112,079.26. The expenditures show a slight increase of \$695,074.25 in the aggregate as compared with the previous fiscal year, caused by an increase of \$22,395,040.06 in the payments on account of the Interior Department, but show a decrease of \$21,699,965.81 in the expenditures for interest and premium on the public debt, on civil and miscellaneous accounts, and for the War and Navy Departments.

The balance of public money on deposit in the Treasury and subject to draft at the close of business June 30, 1879, was \$417,223,787.08; the receipts during the year from all sources amounted to \$494,578,241.20 and the drafts paid to \$708,190,900.76. After deducting receipts properly refunded and outstanding drafts, there was subject to draft, at the close of business June 30, 1880, \$204,683,836.34, which differs from the debt statement balance by \$3,595,213.46, as explained in the appendix.

The business of the government involved the transfer during the year of \$1,053,357,982.22, the greater portion through the medium of the accounts of this office, and the remainder by actual transportation of the funds.

At the close of the year \$28,581,290.93 stood to the credit of disbursing agents of the United States upon the books of the Treasury.

The amount subject to draft June 30, 1879, on account of the postal service was \$2,660,412.29; the receipts during the year, including the amount paid from the Treasury for the deficiency in the postal revenues, were \$35,691,810.29, of which amount \$26,048,562.16 was received and disbursed by postmasters without having been deposited in the Treasury. After deducting deposits refunded and outstanding drafts, there remained subject to draft June 30, 1880, \$2,375,727.04.

The total unavailable funds have not increased during the year by loss or defalcation, but remain unchanged at \$29,512,206.85 for the Treasury, and at \$40,078.06 for the Post Office Department.

Fifty-eight national banks were organized during the year, five failed,

315

and twenty-one went into voluntary liquidation, leaving two thousand,

one hundred and two doing business at the close of the year.

The amount collected from national banks by the Treasurer of the United States for semi-annual duty accruing during the year was \$7,591,770.43. The total amount collected during the existence of the national banking system is \$100,361,469.35.

There were on deposit in this office, at the close of the year, for the security of the circulating notes of national banking associations, United States bonds to the amount of \$361,652,050, and to secure pub-

lic deposits therein \$14,777,000.

At the close of the year the United States notes and paper currency outstanding amounted to \$362,659,008.70. The total face value of currency redeemed from the date of the first issue is \$2,229,368,462.17, from which the deductions for mutilations under the regulations amounted to \$297,363.76.

The total amount of United States bonds retired by purchase, redemption, conversion, and exchange, from March 11, 1869, to June 30,

.1880, is \$1,898,040,750.

The coupons from United States bonds paid during the year amounted to \$31,479,603.86, and there were 296,936 quarterly checks issued in payment of \$40,719,376.04 interest on registered bonds.

There was redeemed during the year \$61,585,675 in national bank notes, making the aggregate amount redeemed under the act of June

20, 1874, \$1,039,838,889.

THE STATE OF THE TREASURY.

The resources and liabilities of the Treasury on the 30th day of September, 1877, 1878, 1879, and 1880, are exhibited in the following statement:

STATEMENT of LIABILITIES and ASSETS of the TREASURY of the UNITED STATES, September 30, 1877, 1878, 1879, and 1880.

^{*} Fractional Silver Coin, and Silver Bullion.

It appears from the above table that the gold and silver coin and bullion ranged from \$114,464,982.79 in 1877 to \$163,969,444.70 in 1878, to \$222,807,368.01 in 1879, and to \$214,303,215.38 in 1880. The decrease of \$8,500,000 between 1879 and 1880 is represented by a reduction in the gold balance of \$34,000,000 and an increase in the silver coin and bullion on hand. The influences tending to the decrease of the gold balance have been, primarily, the scarcity of notes, compelling payments of the daily balance to the New York Clearing-House in gold coin. There has been but a small amount of United States notes and gold certificates presented for redemption in gold coin. There has been during the year an increase in silver coin of \$15,977,970 in standard dollars and of \$7,849,994.21 in fractional silver coin.

The note assets, including balances due from depositary banks, have ecreased from \$107,664,287.64 in 1877 to \$93,417,282.91 in 1878, to \$3,926,653.25 in 1879, and to \$42,402,314.58 in 1880. The steady delease is due in great measure to the withdrawal of notes, caused by representation of clearing house certificates for redemption, the amount

of these certificates outstanding having been reduced from \$31,335,000 1879 to \$9,975,000 in 1880. Another reason for the smallness of the no balance may be found in the falling off in note receipts, the revenues the government being now levely paid in acting and in silver certificate.

the government being now largely paid in coin and in silver certificat From the following tables of assets and liabilities for November 1879, and 1880, the changes in the funds can more readily be seen. The also show the excess of assets, constituting the reserve available the resumption purposes.

The amount of gold coin and bullion in the Treasury January 1, 1879, the date of resumption of specie payments, was \$135,382,639.42, and at this date it is \$140,952,837.74, a gain of \$5,570,198.32; and, in addition, there have accumulated in the Treasury \$47,084,459 in standard silver dollars.

The redemptions of United States notes in gold since the resumption of specie payments have aggregated \$11,963,336, as follows:

		1013.	1000.

REFUNDING.

The refunding operations virtually ceased in September, 1879, by the closing of the lean accounts with depositary banks, though the conversion of ten-dollar refunding certificates into 4 per cent. consols of 1907 still continues. The receipts into the Treasury on account of the 5 per cent, funded loan of 1881, of the 4½ per cent. funded loan of 1891, and of the 4 per cent. consols of 1907, to October 31, 1880, aggregate, principal and interest, \$1,514,084,180.03, which was deposited in depositary banks and at the various subtreasury offices as set forth in the following table:

With whom deposited.		Funded Loan of 1891 (4½ per cent.). 1907 (4 per cent	
Treasurer U. S., Washington, D. C. Assistant Treasurer U. S., New York, N. Y. Assistant Treasurer U. S., Boston, Mass. Assistant Treasurer U. S., Baltimore, Md. Assistant Treasurer U. The conversions of refunding certificates, amounting to \$39,367,857.69, are included in the sum of \$109,935,498.21, received by the Treasurer of the United States on account of the funded loan of 1907.

REFUNDING CERTIFICATES.

The amount of refunding certificates of the denomination of \$10 issued under the act of February 26, 1879, was \$40,012,750, including registered certificates. Up to this date there have been received for conversion into 4 per cent. bonds \$39,033,550 from 8,534 depositors, the average amount presented by each depositor being \$4,574. The amount outstanding at this date is \$979,200.

RETIREMENT OF BONDS.

There were redeemed and paid for by this office from November 1, 1879, to date, \$17,444,800 in called bonds upon which the interest had ceased, the proceeds of which, including interest, amounted to \$17,774,333.94.

There were also purchased on account of the sinking fund during the same period \$106,271,100 in United States bonds, the total cost of which, including interest and premium, was \$111,220,366.09.

UNITED STATES NOTES.

The following table shows the total amount of United States note outstanding at the close of the fiscal years 1877, 1878, 1879, and 1880, I denominations. The fractional parts of a dollar and the odd amount

appearing therein arise from the discounting under the rules of the Department of mutilated notes redeemed.

Denomination.	1877.	1878.	1879.	1880.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars Five hundred dollars One thousand dollars One thousand dollars	25, 369, 826 20 49, 338, 224 00 64, 495, 717 00 62, 607, 197 00 35, 912, 910 00 29, 410, 170 00 33, 884, 500 00 34, 585, 500 00	\$20, 929, 874 30 .20, 910, 948 20 54, 669, 556 50 65, 551, 644 00 27, 182, 680 00 31, 624, 670 00 30, 878, 500 00 33, 212, 500 00	\$18, 209, 980 80 18, 092, 653 20 54, 107, 113 00 64, 638, 562 00 60, 470, 887 00 25, 523, 340 00 32, 038, 480 00 32, 569, 500 00 35, 070, 500 00	\$20, 332, 332 00 20, 352, 813 00 65, 432, 548 00 74, 916, 751 00 72, 143, 207 00 24, 808, 995 00 32, 797, 870 00 19, 224, 000 00 16, 532, 500 00
Five thousand dollars Ten thousand dollars			4, 000, 000 00 2, 960, 000 00	680, 000 00 460, 000 00
Total Destroyed in subtreasury in Chicago fire, denominations unknown	360, 764, 332 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00	347, 681, 016 00 1, 000, 000 00
Outstanding	359, 764, 332 00	346, 681, 016 00	346, 681, 016 00	346, 681, 016 00

From the above it appears that, while the aggregate amount of notes outstanding has not changed, there has been an increase of \$2,122,351 in one dollar notes, \$2,260,160 in two dollar notes, \$11,325,435 in five dollar notes, \$10,278,189 in ten dollar notes, \$11,672,320 in twenty dollar notes, and \$759,390 in one hundred dollar notes; and a decrease of \$714,345 in fifty dollar notes, \$13,345,500 in five hundred dollar notes, \$18,538,000 in one thousand dollar notes, \$3,320,000 in five thousand dollar notes, and \$2,500,000 in ten thousand dollar notes; showing an increase of \$37,658,455 in notes of a less denomination than fifty dollars, and a corresponding decrease in the higher denominations. The notes of the denomination of five thousand and ten thousand dollars issued at the time of the suspension of the issue of gold notes are disappearing from circulation by being presented for redemption, and no more are being issued, the demand for them having virtually ceased.

The following table of issues and redemptions of United States notes during the fiscal years 1878, 1879, and 1880, shows the total redemption during those years, and the manner in which the changes in the denominations of outstanding notes were brought about:

	1878.			1879.	1880.

There will be a decrease in the issues and redemptions during the trent fiscal year, for the reason that there is so much difficulty in oblining notes for redemption and exchange for other denominations that a amount of such exchanges now being made is much less than during

the last fiscal year. The demand for notes is to a great extent being supplied by the issue of silver certificates of the denominations of ten and twenty dollars.

STANDARD SILVER DOLLARS.

The total coinage of standard silver dollars under the act of February 28, 1878, is \$72,847,750. Of this amount \$47,588,106 are in the Treasury and the mints, and \$25,259,644, being more than thirty-four and twothirds per cent. of the coinage, are in circulation. The amount in circulation November 1, 1878, was \$4,922,623, or twenty-six and nine-tenths per cent. of \$18,282,500 coined; at the same date in 1879 the amount in circulation was \$13,002,842, or twenty eight and three-fourths per cent. of \$45,206,200 coined. Of the total amount coined to date \$47,602,932, or more than sixty-five per cent., has been paid out from the Treasury offices and mints. Of the amount paid out nearly forty-seven per cent., or \$22,343,288, has been returned to the Treasury in payment of dues or on account of silver certificates. While the amount distributed is only about one-third of the amount coined, there were placed permanently in circulation, during the first seven full months of coinage, 4,731,684 standard silver dollars, or 675,955 each month, and for the succeeding twelve months ending October 31, 1879, there were absorbed into the circulation of the country 8,080,219 standard silver dollars, or 673,351 per month. During the twelve months just ended 12,256,802 standard silver dollars and \$18,175,871 in silver certificates entered into the circulation of the country, or an average of 1,021,400 standard silver dollars and \$1,514,656 in silver certificates each month.

The following table shows the amount coined, on hand, and outstanding at the close of each month since the coinage began:

Montb.	Monthly coinage.	Coined to the end of the month.	Balance on hand at the close of the month.	Net distribu- tion during the month.	at the close

In addition to the ordinary influences which facilitate the distribution of standard silver dollars, the demonetization by the people of the Southwest of the Mexican silver dollar has created an extensive demand for the new dollar in that quarter. Were the trade-dollar withdrawn from circulation or everywhere rated at its bullion value, many more standard silver dollars would be required for circulation in the cities of New York and Philadelphia, and in other places in which the trade-dollar is now in use as a circulating medium, much to the advantage of the bullion dealers, who purchase trade-dollars at points where they are rated at 90 cents and sell them at an advance to parties in places where they circulate at their face value.

SILVER CERTIFICATES.

The total amount of silver certificates issued under the act of Congress of February 28, 1878, to September 30, 1880, is \$27,308,000; of which there were issued at Washington, \$10,080,000; at New York, \$4,428,000; and at San Francisco, \$12,800,000. There were in actual circulation at the latter date \$12,429,381, which amount does not include \$6,092,579 held in the cash of the various offices. The demand for silver certificates under the circular of the Department dated September 18, 1880, authorizing their exchange for gold coin or bullion has been quite extensive at New Orleans, Saint Louis, Chicago, and Cincinnati, and there were paid out at those points during the month of October \$3,485,000 in silver certificates for an equal amount of gold coin deposited in the subtreasury at New York. The demand was stimulated by the scarcity of other circulating notes, and because, the certificates being furnished at the various subtreasuries without expense for transportation to the person desiring them, they became an inexpensive means of obtaining exchange, which was really of great advantage in the Southwest.

The following table shows the amount of silver certificates outstanding June 30, 1879, issued and redeemed during the fiscal year and outstanding at its close:

FRACTIONAL CURRENCY AND FRACTIONAL SILVER COIN.

The total amount of fractional silver issued under the act of April 17, 1876, was \$42,983,618.50; to which should be added at least 25 per cent. more represented by coins of dates prior to 1875 which have found their way into circulation since the resumption of specie payments. Of this in there is in the Treasury at this date \$24,629,489.89, of which 17,296,671.13 has been withdrawn from circulation since the passage the act of June 9, 1879, providing for the exchange of fractional ver for lawful money. Since July 31, 1880, the amount in the Treasury 3 decreased about \$500,000, that amount in excess of redemptions

having been reissued under a demand which has sprung up by reason of reduced transportation charges and an improved condition of business.

Under Department regulation of August 26, 1880, fractional silver coin has been sent at the risk and expense of the applicant by registered mail in four-pound packages, each containing \$70. Under this arrangement 796 packages have been sent.

At the date of the act of April 17, 1876, authorizing the exchange of fractional silver coin for fractional currency, there was in circulation \$41,508,737.48 of fractional currency, which, up to October 31, 1879, had been decreased by redemption to \$15,710,964.24. Since that date there has been a further redemption, as shown by the following table, of \$153,164.54, or an average of \$12,763.71 per month, leaving the amount outstanding at this date \$15,557,799.70.

Month.	Fractional currency out- standing at close of each month.	Fractional currency re- deemed during each month.	Total redeemed to the end of each month.

MINOR COIN.

The Minor Coin in the vaults of the various offices September 30, 1880, amounted to \$1,063,665.22, having decreased to that amount from \$1,524,700.57 in the Treasury at the same date in 1879. The demand for five-cent nickels, which has amounted to \$455,810.80 during the year in excess of redemptions, has been supplied from the amount on hand; but the demand for bronze one-cent pieces still continues, and the Mint has been unable to fill the orders for that denomination promptly. The following table shows the distribution of the Minor Coin on hand in the Treasury September 30, 1880:

Office by which held.	Five-cent, nickel.	Three-cent, nickel.	bronze.	One cent, bronze, cop- per - nickel, and copper.	Mixeu.	Total.
Washington	\$678 00 1, 250 00 138, 696 00	\$2, 154 00 90 00 8, 760 00	\$910 00 20 00 1,110 00	\$837 00 193 27 9,090 00	\$287 47	\$4, 866 47 1, 553 27 157, 656 00

DEPOSITARY BANKS.

The total receipts of public money during the fiscal year by Depositary Banks were \$119,493,171.94, the average daily balance therein being \$8,000,000, secured by the deposit in this office of \$14,777,000 United States bonds and personal bonds to the amount of \$330,000. The receipts of public money by Depositary Banks from 1864 to 1880 aggregate \$3,537,641,044.41. There were at the close of the fiscal year one hundred and thirty-one National Bank depositaries.

The following statement gives the receipts, disbursements, and balances of public money, as shown by the Treasurer's accounts with Depositary Banks, during the fiscal years from 1864 to 1880:

Fiscal year.	Receipts.	Funds transfer- red to deposi- tary banks.		Drafts drawn on depositary banks.

CLEARING-HOUSE CERTIFICATES.

The following table shows the amount of Clearing-House Certificates issued, redeemed and outstanding for the fiscal years 1873 to 1880, inclusive. The total amount issued is \$601,785,000, of which amount there was outstanding at the close of the year only \$13,125,000, being by far the smallest amount outstanding since their first issue in 1873, and indicating the demand for United States notes by the banks and the increased use by them of coin for their reserves.

	 Fiscal year.	Total amount issued.	Total amount redeemed.	Outstanding, as shown by the Treasurer's books.

SALES OF EXCHANGE.

For the purpose of supplying those offices with funds, there was sold the New Orleans subtreasury, \$250,000 of New York exchange; at

the San Francisco subtreasury, \$6,690,000 of New York exchange, and by the depositary at Tucson, \$123,500 of New York and San Francisco exchange, which was furnished to them from this office, by the Treasurer's checks on New York and San Francisco.

GOLD CERTIFICATES.

The issue of Gold Certificates was suspended by the Department December 1, 1878, at which time there had been issued \$981,134,880.46. Of that amount there was outstanding at the close of the fiscal year but \$8,004,600. The following table shows the amount issued and redeemed during each fiscal year from 1866 to 1880, inclusive, the total issued and redeemed, and the amount outstanding at the close of each year:

DRAFTS AND CHECKS.

There were drawn during the year 296,936 checks in payment of quarterly interest on registered stock of the United States, 31,385 drafts on warrants of the Secretary of the Treasury, 13,945 drafts on warrants of the Postmaster-General, and 66,059 transfer checks on assistant treasurers, making in all 408,325.

MUTILATED, STOLEN, AND COUNTERFEIT CURRENCY.

There were rejected, branded, and returned to the owners during the fiscal year \$3,610 in counterfeit United States notes, \$3,842 in counterfeit national-bank notes, and \$770.10 in counterfeit fractional currency. Of the counterfeit bank notes rejected \$1,200 was in notes of the denomination of \$100, purporting to be of the issue of the following national banks: First National Bank of Boston, \$300; Central National Bank of New York, \$100; National Revere Bank of Boston, \$300; and Pittsburgh National Bank of Commerce of Pittsburgh, Pa., \$500. The two last-mentioned counterfeits are printed from the same original plate and are by far the most difficult of detection of any which have yet Fortunately, the person by whom the plate was engraved has been recently arrested, and it is hoped that the further printing or putting in circulation of counterfeits printed from it will be prevented There were also rejected \$7,870.23 in stolen, pieced, and fragmentar national-bank notes. There was deducted on account of mutilation from the face value of United States notes redeemed during the fisca

year \$10,157; from fractional currency, \$430.73; and from notes of failed liquidating, and reducing banks, \$80; making the total deductions to the close of the fiscal year \$297,363.76 on notes of the face value of \$2,229,368,462.17 redeemed. The deductions made prior to May 11, 1875, amounting to \$229,824.09, have been covered into the Treasury, increasing by that amount the redemptions, as shown by the cash statements, and decreasing the outstanding, as shown by the public debt statements.

PACIFIC RAILROAD SINKING FUNDS.

There are held at this date on account of the Pacific Railroad Sinking Funds, established by the act approved May 7, 1878 (20 Statutes, 56), bonds as follows:

For the Union Pacific Railroad Company: Pacific Railway bonds, currency sixes Funded Loan of 1881, 5 per cent Funded Loan of 1907, 4 per cent	256, 450 31, 950	
For the Central Pacific Railroad Company: Pacific Railway bonds, currency sixes. Funded Loan of 1881, 5 per cent. Funded Loan of 1907, 4 per cent.	194,900	•

The third section of the act provides that in making investments for these funds, the Secretary of the Treasury "shall prefer the five per centum bonds of the United States, unless, for good reasons appearing to him, and which he shall report to Congress, he shall at any time deem it advisable to invest in other bonds of the United States."

Attention is invited to the disadvantage of investing these sinking funds in the bonds of the United States at the present high market rates, and it is suggested that the consent of Congress, by joint resolution, be obtained to the purchase for the purpose of any bonds of the United States, or of the first mortgage bonds of the two railroad companies, authorized by section 10 of the act of Congress of July 2, 1864 (13 Statutes, 356), and section 1 of the act of Congress of March 3, 1865 (13 Statutes, 504), which are the only liens upon the property of those companies prior and paramount to that of the United States.

TRUST FUNDS.

The Indian Trust Fund.

The bonds and stocks of the Indian Trust Fund, at the close of the fiscal year, in the custody of this office in conformity with the act of Congress of June 10, 1876 (19 Statutes, 58), amounted to \$4,580,216.83\frac{3}{3}\$. Of this amount \$2,469,400 was in United States bonds, as follows:

Loan of July and August, 1861	\$ 50 0
Pacific Railway bonds, currency sixes	280,000
Funded loan of 1881, 5 per cent	
Landou 1000 of 1001,0 por other	
	0 100 100

United States four per cent. bonds, of the face value of \$496,350, held for the Indian Trust Fund were sold on April 8, 1880, and the proceeds, amounting to \$531,349.47, deposited in the Treasury of the United States to the credit of the Secretary of the Interior as trustee of various Indian tribes, in accordance with the act of Congress approved April 1, 1880, authorizing that officer to deposit certain funds in the United States Treasury in lieu of investment.

Bonds of the Richmond and Danville Railroad Company belonging

to this fund, amounting to \$103,500, were redeemed by that company on the 28th day of February, 1880, and the amount, together with \$946 accrued interest, was deposited in the Treasury to the credit of the Secretary of the Interior, trustee of various Indian tribes.

American Printing-House for the Blind.

Under the act of March 3, 1879 (20 Statutes, 467), \$250,000 United States four per cent. bonds are held in the name of the Secretary of the Treasury, trustee, "to promote the education of the blind," the interest on which is paid to the trustees of the American Printing-House for the Blind, in Louisville, Ky., in conformity with that act.

Pennsylvania Company.

Under the provisions of Department Circular No. 146, dated November 29, 1876, \$200,000 in registered bonds of the funded loan of 1891 are held in trust for the Pennsylvania Company for the security of unappraised dutiable merchandise and dutiable merchandise in bond.

Manhattan Savings Institution.

Duplicates of United States bonds alleged to have been stolen from the vaults of the Manhattan Savings Institution are held in this office to the amount of \$250,000 to protect the United States from loss, as provided by the act of December 19, 1878 (20 Statutes, 589).

SEMI-ANNUAL DUTY.

The semi-annual duty assessed upon, and collected from the national banks by the Treasurer of the United States for the fiscal year 1880 is as follows:

On deposits	 4,058,710 61
Total	7 501 770 43

This is the largest amount of semi-annual duty that has been assessed and collected for any year since the establishment of the national banking system, and exceeds the amount for the fiscal year 1879 by \$870,533.76.

The total amount of semi-annual duty collected by this office from the national banks for the fiscal years 1864 to 1880, as more fully set forth in the appendix, is—

THE REDEMPTION OF NATIONAL-BANK NOTES.

The redemptions of national-bank notes fell off greatly during the fiscal year, the gross amount received for redemption having been only \$61,585,675.68, as compared with \$157,656,644.96 in 1879. The redemptions under the present system reached the highest point yet attained in 1877, when the amount redeemed was \$242,885,375.14, or nearly four times as great as in 1880. The amount of notes fit for circulation references.

deemed fell off from \$112,293,000 in 1879 to \$24,977,600 in 1880; of notes unfit for circulation from \$40,162,000 to \$29,860,000, and of notes of failed, liquidating, and reducing national banks from \$8,281,550 to \$6,500,800. The chief part of the reduction took place in the notes fit for circulation, the amount for the first time since 1875 being less than that of the unfit notes redeemed. On the other hand, the redemptions of notes of failed, liquidating, and reducing banks—the expense of which is chiefly borne by the other national banks—show a relatively small falling off. The number of notes assorted was 7,576,175 against 18,295,558 in 1879. Of these 2,435,663 were fit, and 5,140,512 unfit for circulation, the average denomination of the former being \$10.25 and of the latter \$5.81. In accordance with the requirements of section 5175 of the Revised Statutes, no incomplete notes of a less denomination than five dollars have been furnished to national banks by the Comptroller of the Currency since the resumption of specie payments, although all one and two dollar notes fit for circulation redeemed by the Treasurer have been returned to the banks of issue as heretofore. The proportion of such notes returned during the last year was, however, very small, only \$132,740 out of \$1,337,860 in ones and \$90,120 out of \$919,370 in two redeemed having been found to be fit for

The great decrease in bank-note redemptions during the last two years is, in the Treasurer's opinion, due to two causes—the general revival of business, and the changes in the regulations requiring the charges for the transportation of all notes other than those clearly unfit for circulation to be paid by the senders. The former is probably the more potent influence. The redemptions of bank notes under the act of 1874 have always been in inverse proportion to the activity of business, being heavy when business is dull, and light when business is active. to the resumption of specie payments, great accumulations of bank notes took place in the principal cities—especially in New York and Boston during the winter and summer months, when business in the interior was dullest. The interior banks having no other use for the bank notes which flowed into their yaults sent them to their city correspondents for their credit, interest being paid in most cases on the current balances. notes, being unavailable for the national bank reserves or for the settlement of balances at the clearing-house, were at once forwarded by the city banks to this office for redemption in legal-tenders, the conversion under the regulations then in force being made without any expense to the hold-Recently, however, there has been an almost complete cessation of the accumulation of bank notes in the money centers, and there has been a dearth rather than a plethora of both legal-tenders and bank notes in the principal cities. They have been absorbed by the demands of business and are in active circulation throughout the country. The consequence has been a great falling off in the receipts of bank notes for redemption from those sources. The receipts of bank notes from New York fell off from \$66,273,000 in the fiscal year 1878 to \$54,170,000 in 1879 and to \$26,460,000 in 1880. The decrease in the amount received from Boston was much greater. The receipts from that city in 1880 were only \$11,701,000, against \$80,527,000 in 1878, and \$59,375,000 in 1879. The aggregate receipts from the two cities in 1880 were but a little more than one-fourth of the receipts from those sources in 1877 and in 1878. But while the revival of business and the increased activity of the irculation have been the chief cause of the decrease in redemptions, he changes in the regulations have not been without their effect. Prior

redemption of bank notes, under the act of 1874, were defrayed out of the five per cent. redemption fund, and afterwards assessed upon the several national banks in proportion to the circulation of each redeemed. charges thus assessed were those for the transportation of national-bank notes to the Treasurer for redemption in sums of \$1,000 or its multiples, and of legal-tender notes returned for them, as well as of the redeemed and assorted notes fit for circulation forwarded to the several banks by which they were issued. On and after October 1, 1878, by direction of the Secretary, the express charges on all national-bank notes forwarded to the Treasurer for redemption were required to be paid by the senders. This requirement was subsequently so modified as to permit the payment out of the five per cent fund of the charges on notes unfit for circulation received for redemption after December 1, 1879. This modification was made in the expectation that it would cause an increase in the redemption of unfit notes, and thus improve the condition of the currency; but it has wholly failed of its intended effect, the redemptions under the modified order being for ten months only \$26,651,000, against redemptions of \$31,487,400 for the corresponding ten months of the previous year, under the rule requiring all the charges to be defrayed by the senders. Whatever the cause, there is no doubt that the condition of the bank circulation has deteriorated within the last two years. of the notes received for redemption are badly worn, and ought to have been redeemed much earlier. The labor and annoyance of assorting the notes unfit for circulation from the currency coming into their hands, and of holding them until an amount accumulates sufficient to be forwarded to the Treasurer, seems to deter many banks from returning them for redemption. The notes, consequently, remain in circulation long after they have become unfit for use, to the great inconvenience of all persons handling them.

In view of this condition of the currency, a return to the system under which all of the charges for transportation incurred in the redemption of national bank notes were defrayed out of the five per cent fund and assessed upon the banks might be advisable as the only way in which the circulation can be kept in good condition. Such a course, it is be-

lieved, would not be in conflict with the law.

Although every endeavor has been made to reduce the costs of redemption, and although every item of expense has been curtailed, it was impossible, for manifest reasons, to reduce the cost in the same proportion in which the work fell off. Among these reasons are the greater proportion of mutilated notes received, which are much more difficult to handle than new notes; the smaller size of the packages, the number of packages received during the last year having been nearly threefourths as great as in the preceding year, although the amount contained in them was less than two fifths as much; the great fluctuations in the amounts received from month to month; the increase in the proportion of notes of failed, liquidating, and reducing banks, on which no assessment can be levied, constituting as they did 10.6 per cent. of the redemptions in 1880, against a little more than five per cent. in 1879; the fact that the clerical and bookkeeping work has not decreased to anything like the extent to which the amount redeemed has fallen off, and, generally, the impossibility of doing a small business as economically as a large one. Notwithstanding these drawbacks, the amount paid for salaries in the office of the Treasurer was reduced from \$111,736.30 in 1879 to \$82,144.88 in 1880. The amount paid on this account in the office of the Comptroller of the Currency was \$22,205.20, making a total of \$104,350.0

paid for salaries in the year 1880. The amount appropriated for "the force employed in redeeming the national currency" in the Treasurer's office was \$101,584, of which \$19,439.12, or more than 19 per cent. was unexpended. In every year since appropriations began to be made for this force in the Treasurer's Office a part of the amount appropriated has been returned to the Treasury. The amounts so returned were \$12,238.62 in 1876, \$1,955.52 in 1877, \$3,453.25 in 1878, \$5,447.70 in 1879, and \$19,439.12 in 1880, making a total saving on this account alone of \$42,534.21 in five years. The amount appropriated for this purpose for both offices for the fiscal year 1881 is \$90,872, being \$32,932 less than the amount appropriated for 1880, and \$13,478.08 less than the amount expended in that year. The number of persons now actually employed on this work in the Treasurer's office is 59, as compared with 152 so employed in 1876.

The total "costs for assorting" were \$108,964.15, against \$142,651.20 in 1879, a reduction having been made in every item. The "charges for transportation" were \$34,764.24, against \$98,298.75 in 1879. The total expenses of redemption were \$143,728.39, being \$97,221.56 less than in the preceding year—a reduction of more that 40 per cent. The "costs for assorting" when assessed as heretofore on the net number of notes assorted, were \$14.381 for each thousand notes, and the "charges for transportation 63 3 9 5 cents for each \$1,000 assorted. The latter rate shows a slight reduction as compared with the previous year, notwithstanding the large proportion of unfit notes, the charges on which were paid out of the five per cent. fund. The total expenses were about $\frac{13}{50}$ of 1 per cent. on the amount redeemed and charged to the banks of issue, and but a little more than $\frac{1}{25}$ of 1 per cent. on the total circulation of the national The latter percentage properly expresses the cost of the redemption system to the national banks. It is, on an average, \$37.69 for banks of \$90,000 circulation—a burden so slight as to be scarcely appreciable.

THE REDUCTION AND INCREASE OF NATIONAL BANK CIRCULATION.

Attention is invited to the practical bearing on the question of bank--note redemption of the construction heretofore placed by the Department on the various provisions of law authorizing the reduction and The fourth section of the increase of the circulation of national banks. act approved June 20, 1874 (18 Statutes, 124), authorizes any national bank, desiring to withdraw its circulating notes, to take up the bonds deposited for the security of such notes, upon the deposit of lawful money with the Treasurer of the United States, and provides that an equal amount of the outstanding notes of the bank shall be redeemed at the Treasury of the United States. The banks have availed themselves of the privilege accorded by this provision to a very large extent, more than \$85,000,000 of circulation having been surrendered in the manner prescribed, and nearly \$71,000,000 having been redeemed at this The notes are received at the Treasury mixed with other bank notes, and if they come from assistant treasurers, or in packages marked "unfit," the express charges on them are defrayed out of the five per cent. redemption fund. They necessarily pass through the various stages of counting and assorting before they can be separated from the other notes, so that almost the entire expense of the redemption of the whole \$71,000,000 has been borne by the other national banks, there being no means of charging the "reducing" banks with the expenses of redeeming their notes until their deposits of legal tender notes are exhausted... This provision was adopted in the expectation that it would act as a

regulator of the volume of the bank circulation. It was expected that when the circulation became redundant, the surplus would be retired, and that when a demand for more circulation should spring up, the banks would increase their issues to meet it. This expectation has not been realized. The almost invariable answer to inquiries made of officers of banks which have reduced their circulation has been, that the reduction was made solely to enable the bank to avail itself of the ruling premium on the bonds withdrawn, either because the bonds were exceptionally high, or because the bank needed the premium to enable it to meet losses sustained, or to reduce its premium account. It is plain that the action of the banks would not be affected by the fact that the volume of the circulation was redundant, for the simple reason that a bank has more money at its disposal after reducing its circulation than A bank which deposits \$45,000 to reduce its circulation and takes up \$50,000 of its bonds, which it sells for ten per cent. premium, has \$10,000 more to lend than it had before. While, therefore, the retirement of the bank circulation diminishes the aggregate volume of the circulation, it increases the loanable funds of the particular bank whose circulation is reduced.

Under the construction placed upon the law, banks which have thus reduced their circulation have been permitted to increase it again as often and as largely as they chose, whether their legal-tender deposits were exhausted or not. Although the exact amount cannot be ascertained, it is safe to say that many millions of dollars of additional circulation have been issued under the general provisions of the national currency act to banks which were still reducing their circulation under the act of June 20, 1874. The consequence has been that the new notes thus issued have, to a large extent, speedily been presented to the Treasury for redemption out of the legal-tender deposit. Banks which have applied in vaiu to the Treasurer for the surrender of their legal-tender deposits, have accomplished the same object by obtaining new circulation. The cost of printing the new notes thus issued is borne by the United States, so that the government, though not deriving the remotest benefit from the transaction, has been obliged to bear the whole expense of their issue, and a part of the expense of their redemption, simply to enable a bank to do by indirection what it was not permitted to do directly. In several instances banks have repeated the operation of reducing and increasing their circulation several times within a brief period, taking up their bonds and selling them, it would appear, whenever the premium constituted a sufficient inducement, and increasing their circulation again whenever bonds could be bought at better rates, the United States all the while redeeming their notes at its own expense or that of the other banks, and issuing others, also at its own expense, whenever called upon by

An example will better illustrate these operations. In January and February, 1875, a certain bank reduced its circulation from \$308,490 to \$45,000 by deposits of legal-tender notes. Between September 26, 1876, and May 26, 1877, and before that deposit was exhausted, it increased its circulation to \$450,000. Between August 14 and September 10, 1877, it again reduced its circulation to \$45,000. On September 19, 1877, nine days after completing the deposits for this reduction, it again began to take out additional circulation, although \$402,550 of prior deposits remained in the Treasury, and by the 26th of that month its circulation had again been increased to \$450,000. July 22, 1878, it, for the third time, reduced its circulation to \$45,000, and in August and September, 1879, again in

creased it to \$450,000, at which it now remains, the balance of its former legal-tender deposit then in the Treasury being \$112,615. From January 13, 1875, to the date of this report, \$778,275 of its notes have been redeemed, of which only \$40,700 were redeemed at the expense of the bank, although, during more than one-third of that period, it had outstanding and was deriving the benefit from the full amount of circulation which its capital authorized. The only assessments which have been made on the bank for the expenses of redeeming its notes were \$24.74 in 1875, and \$4.39 in 1878. At one time there were in actual circulation \$852,550 of its notes, although the highest amount ever borne on its books was \$450,000.

Other banks have reduced and forthwith increased their circulation to its former amount, with the avowed object of relieving themselves from the trouble and expense of redeeming their notes through the five per cent. redemption fund. For example, a bank deposited \$45,000 in legal-tender notes for the reduction of its circulation on April 3, 1878, and on April 5, 1878, two days afterwards, without having touched the bonds deposited as security, took out \$45,000 of additional circulation. In like manner on July 11, 1879, it deposited \$9,000 for the same purpose, and on the very same day, without disturbing its bonds, it took out

\$9,000 of additional circulation.

It is plain that such transactions as these are not within the spirit of the act of June 20, 1874. That act authorizes the deposit of legaltender notes by any national bank "desiring to withdraw its circulation, in whole or in part." A wish to surrender circulation, with the reserved intention of taking out more at once, or as soon as a fall in the price of bonds shall make the transaction profitable, is not, it is submitted, such a desire to withdraw circulation as the law contemplates. The reduction of circulation therein authorized is a bona fide reduction, based on a well-settled intention of the bank to curtail its note issues. neither have been intended nor expected that the law would become the means of enabling banks to operate in the securities of the government deposited to secure the redemption of their notes, or to throw upon the United States, or the other banks of the country, the expense of redeeming their notes, while maintaining and enjoying the full circulation to which the law entitles them. Such a construction utterly perverts the original intention of the act. Instead of the volume of the circulation being regulated by the business needs of the country, it is governed by the price of United States bonds. The price of bonds may be such as to induce banks to surrender their circulation at the very time when there is a legitimate demand for more circulation. The profit to be derived from taking up and selling their bonds may be greater than that derivable from their circulation. Within the last year a large reduction of bank circulation has taken place in the face of an active demand for money, simply because a good profit could be made by withdrawing and selling the four per cents, deposited as security for circulation. Nearly twentyfive million dollars in four per cent. bonds were thus withdrawn during the last fiscal year. Banks can afford to forego the profit on their circulation for a few months, in order to realize more from the premium on their bonds. Such operations should not, in the Treasurer's opinion, be permitted. A bank, having signified an intention to reduce its circulation, and having acted on that intention by depositing legal-tenders for the purpose, should be held to its determination until the deposit is exhausted. It should not be permitted to increase its circulation until it had disappeared from the category of "reducing" banks on the books of the Department, or to extend its note issues through one branch of the

Department at the same time that they are being redeemed and destroyed through another. The adoption of this construction, while it would work no injustice to any legitimate interest, would confine the operation of the fourth section of the act of June 20, 1874, to cases where banks had formed a well-considered intention to permanently curtail their circulation, and would relieve the United States from the expense of issuing notes to banks, only to have them forthwith returned for destruction.

It is equally clear that where additional circulation has been issued to reducing banks the new notes ought not to be redeemed out of the legal-tender deposits previously made. The law provides for the redemption out of those deposits of the "outstanding notes" of the association, plainly meaning the notes outstanding at the time the deposit The deposit has relation only to the notes then outstanding. It would be absurd to suppose that the law intended to permit a bank to deposit legal-tenders to-day to redeem new notes issued to it to-morrow on a fresh deposit of bonds, or on the self-same bonds. The additional notes issued stand by themselves. They are properly subject to the same provisions as to their redeemability as the notes of a bank which has made no legal-tender deposit. The United States has no concern with them, and should, if practicable, refuse to redeem them when presented for redemption out of the bank's legal-tender deposit. "reducing" banks are required to maintain a five per cent. deposit under section 3 of the act of June 20, 1874, on the circulation borne on their books—that is, the circulation for the redemption of which no legal-tender deposit has been made. Any part of the additional circulation of such a bank presented for redemption should be charged to its five per cent. account, and be reimbursed for and disposed of in the same manner as the notes of banks not reducing their circulation.

THE PROPORTION OF BONDS OF NATIONAL BANKS TO CAPITAL.

An important question was raised by the Treasurer during the year concerning the surrender to national banks of the bonds deposited by them with him to secure the redemption of their circulating notes, and as the reasons for his action do not appear to have been fully understood, a brief statement of them may not be out of place here. Section 5159 of the Revised Statutes requires that "every [national banking] association * * * shall transfer and deliver to the Treasurer of the United States any United States registered bonds bearing interest to an amount not less than thirty thousand dollars and not less than one-third of the capital stock paid in." Section 5160 provides that "the deposit of bonds made by each association shall be increased as its capital stock may be paid up or increased, so that every association shall at all times have on deposit with the Treasurer registered United States bonds to the amount of at least one-third of its capital stock actually paid in."

Section 4 of the act of June 20, 1874, provides "that any association * * * desiring to withdraw its circulating notes, in whole or in part, may, upon the deposit of lawful money with the Treasurer of the United States in sums of not less than nine thousand dollars, take up the bonds which said association has on deposit with the Treasurer for the security of such circulating notes; * * * * Provided, That the amount of the bonds on deposit for circulation shall not be reduced below fifty thousand dollars." It was assumed immediately upon the passage of this act, apparently without any thorough consideration of

the question, that it virtually repealed the above-quoted provisions of the Revised Statutes requiring the amount of bonds on deposit for each bank to be equal to one-third of its capital stock, and that any bank. however large its capital, might reduce its bond deposit to \$50,000. Under this construction of the law there were surrendered to banks bonds to a considerable amount which they would not have been permitted to withdraw had the provisions of the Revised Statutes been treated as being in force. The present Treasurer's attention having been called to the various provisions above quoted, he came to the conclusion, upon the fullest consideration and after taking the best advice available to him, that the practice that had been followed was erroneous: that the provisions of the Revised Statutes were still in full force, and that the only effect of the proviso to section 4 was to prevent national banks having a less capital than \$150,000 from reducing their deposit below \$50,000, as they might have done had there been no limitation other than that fixed by the Revised Statutes.

Having come to this conclusion, the Treasurer deemed it his duty to obtain an authoritative decision of this question, which concerned the administration of his office. The contemplated lean by the government, at a low rate, for the purposes of funding, coupled with the provision in the bill then pending that national banks should hold and use the proposed bonds as security, made it important that the decision should be obtained at that time in order to determine to what extent the bonds might be so used. With this view he declined to allow the withdrawal of bonds on an application of a bank in an instance in which the withdrawal would have reduced its bond deposit below one-third of its capital stock; and with the concurrence, and at the suggestion of the Secretary, the point was at once submitted to the Attorney-General for

his construction of the law.

The conclusion reached by the Attorney-General was that, as sections 7, 8, and 9 of the act of 1874 "treated the one-third policy as no longer existing," in that they provided for a compulsory withdrawal of circulation and a surrender of bonds which, in certain cases, might reduce the deposits below one-third of the capital stock, section 4 of that act is therefore "repugnant to section 5160 of the Revised Statutes and all other previous legislation that requires national banks to have and maintain in the Treasury of the United States a bond deposit equal to the amount of one-third of their capital stock."

This decision has of course governed the Treasurer's action, and no attempt has since been made to enforce the requirements of section

5160.

Very respectfully,

JAS. GILFILLAN,
Treasurer of the United States.

Hon. John Sherman, Secretary of the Treasury.

APPENDIX.

TONNAGE DIVISION.

The total tonnage of the country exhibits a decrease of 101,566 tons, the enrolled tonnage having increased 37,751 tons, while the registered tonnage has decreased 138,723 tons, and the licensed, under 20 tons, 594 tons.

The barge tonnage has decreased 83,250 tons under the operation of the act of Congress approved June 30, 1879, leaving 18,316 tons as the estimated decrease in the tonnage during the past year.

Below are given the totals for the last two years:

	1	879.	18	30.
	Vessels.	Tons.	Vessels.	Tons.
Registered	2, 717 22, 494	1, 491, 533 2, 678, 067	2, 378 22, 334	1, 852, 81 6 2, 715, 224
Total	25, 211	4, 169, 601	24, 712	4, 068, 084

The comparison of the different classes of vessels is as follows:

	1	879.	18	80.
. Class.	Vessels.	Tons.	Vessels.	Tons.
Sailing vessels Steam vessels Canal boats Barges	4, 569	2, 422, 813 1, 176, 172 103, 738 466, 878	16, 830 4, 717 J, 235 1, 930	2, 366, 258 1, 211, 558 106, 590 383, 628
Total	25, 211	4, 169, 601	24, 712	4, 068, 034

It may be seen from the foregoing that the steam tonnage has increased 35,386 tons, the canal-boat tonnage 2,852 tons, while the sailing tonnage has decreased 56,555 tons, and the barge tonnage 83,250 tons.

The proportion of the sailing tonnage registered is 42 per centum and the steam tonnage registered 12 per centum.

SHIP-BUILDING.

The following table exhibits the class, number, and tonnage of the vessels built during the last two years:

	1879.		1880.	
Class.	Vessels.	Tons.	Vessels.	Tons.
Sailing vessels Steam vessels Canal boats Barges	335	66, 867 86, 361 4, 069 35, 733	460 348 17 77	59, 057 78, 854 1, 887 17, 612
Total	1, 132	193, 030	902	157, 410

From the foregoing it appears that the amount built during the past year was less by 35,620 tons than that of the preceding year.

The tonnage built during the last two years in the several grand divisions of the country is shown below:

200	1	679.	18	80.
Division.	Vessels.	Tons.	Vessels.	Tons.
Atlantic and Gulf coasts Pacific coast Northern lakes Western rivers	65 95	104, 475 11, 207 15, 135 62, 213	589 41 137 135	92, 777 8, 943 22, 899 32, 791
Total	1, 132	193, 030	902	157, 410

The following table exhibits the iron tonnage built in the country since 1868:

Class.	1868.	1869.	1870.	1871.	1872.	1873.	1874.
Sailing vessels	2, 801	1, 039 3, 545	679 7, 502	2, 067 13, 412	12, 766	26, 548	33, 097
Total	2, 801	4, 584	8, 281	15, 479	12, 766	26, 548	33, 097
		1875.	1876.	1877.	1878.	1879.	1880.
Sailing vessels		21, 632	21, 346	5, 927	26, 960	22, 008	44 25, 538
Total		21, 632	21, 346	5, 927	26, 960	22, 008	25, 582

Tables showing the amount of iron tonnage outstanding may be found in the Report on Commerce and Navigation.

THE FISHERIES.

The tonnage engaged in the fisheries during the last two years is as follows:

Fisheries.	. 1	879.	18	80.
	Vessels.	Tons.	Vessels.	Tons.
Cod and mackerel fisheries	2, 571 185	79, 885 40, 028	2, 323 174	77, 539 38, 408

Below is shown the amount of tonnage employed in the cod and mackerel fisheries, with the per centum of each State:

States.	Tonnage.	Per cent.
Maine New Hampshire		24, 2 1, 5
MassachusettsRhode Island	39, 766 2, 306	51. 3 3. 0
ConnecticutNew York	4, 584 8, 636	5. 9 11. 1
Néw Jersey Virginia California	25 127 2, 101	0. 0 0. 2 2. 7
Oregon	70	0. 1
Total	77, 538	100.

This shows a decrease of about 3 per cent. during the year. The tonnage employed in the whale fisheries is given below:

	18	79.	188	30.
Customs districts.	Vessels.	Tons.	Vessels.	Tons.
Boston, Mass Barnstable, Mass Edgartown, Mass New Bedford, Mass New London, Conn	144	531 1, 940 720 35, 208 1, 629	5 19 6 134 10	531 1, 817 1, 124 33, 337 1, 599
Total	185	40, 028	174	38, 408

Of the above nearly 90 per cent. belongs at New Bedford. Complete tables showing the various classes of tonnage may be found in the appendix to this report.

DIVISION OF RECEIPTS AND EXPENDITURES.

The following statement exhibits the work of this division for the year ending June 30, 1880:

The number of warrants registered during the year for civil, diplomatic, miscellaneous, internal revenue, and public-debt expenditures and repayments		
was In the preceding year	20.83	9 5
Decrease		-

The number of warrants registered for receipts from customs, lands, internal revenue, direct tax, and miscellaneous sources was	6, 183 11, 220
Decrease	5, 037
The number of warrants registered for payments and repayments in the War, Navy, and Interior (pension and Indian) Departments was In the preceding year	11, 833 16, 797
	4,964
The number of draughts registered was In the preceding year	32, 179 40, 760
Decrease	8, 581
The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal revenue, miscellaneous, and public debt receipts and expenditures was. In the preceding year	5, 437 5, 432
Increase	5
The number of certificates furnished for settlement of accounts was	13, 489 12, 759
Increase	730
The number of accounts received from the First and Fifth Auditors and Commissioner of the General Land Office was In the preceding year	22, 290 22, 862
Doguesos	570

In the appendix will be found a statement of the receipts and expenditures of the government, as required by the standing order of the House of Representatives of December 30, 1791, and section 237 of the Revised Statutes; also, statements of the money expended and the number of persons employed, and the occupation and salary of each person at each custom-house, as required by section 258 of the Revised es. Very respectfully, your obedient servant, G. W. SCOFIELD, Statutes.

Register.

Hon. JOHN SHERMAN, Secretary of the Treasury.

LIABILITIES

OF THE

UNITED STATES TO INDIAN TRIBES UNDER TREATY STIPULATIONS.

DEPARTMENT OF THE INTERIOR, Washington, September 28, 1880.

SIR: In compliance with your request of the 15th instant I have the honor to transmit herewith "statement of liabilities to various Indian tribes under treaty stipulations," &c., also a copy of the letter from the Office of Indian Affairs, dated the 24th instant, accompanying said statement.

I am, sir, very respectfully,

C. SCHURZ, Secretary.

The honorable the SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR, OFFICE OF INDIAN AFFAIRS, Washington, September 24, 1880.

SIR: I have the honor to acknowledge the receipt, by your reference of the 16th instant, of a communication addressed to you by the honorable Secretary of the Treasury, dated the 15th September, requesting to be furnished with the statement prepared annually by this Office, showing the liabilities of the United States to Indian tribes under treaty stipulations.

In compliance with the request contained therein, I inclose herewith said statement in sheets, numbered from one to seven, inclusive.

Very respectfully,

E. M. MARBLE, Acting Commissioner.

The honorable the Secretary of the Interior.
